February 19, 2014

Qualcomm Discusses its Industry-Leading Technologies at Mobile World Congress 2014

Come Hear How the Company Continues to Drive the Mobile Experience Across Multiple Device Categories and Industries

Who:	Dr. Murthy Renduchintala, executive vice president, Qualcomm Technologies, Inc. (QTI), and co-president of Qualcomm CDMA Technologies (QCT).
What:	With all of the news and noise of MWC 2014, this will be a tremendous opportunity to hear the latest about Qualcomm's mobile innovations, technology and product leadership, particularly in both 3G and 4G modem connectivity as well as with its industry-leading Snapdragon processor portfolio. There will be an opportunity to ask questions about what these new products, technologies and industry trends mean for Qualcomm and the mobile eco-system overall.
Where:	Mobile World Congress Media Village CC4 (Fira Gran Via, on the Upper Walkway between Halls 3 and 4), Press Conference Room 1, Barcelona, Spain.
When:	1:15 p.m. (CET), Monday, Feb. 24, 2014.
Interviews:	Q&A session following the presentation; individual interviews available upon request.
Visuals:	Still photography permitted (no flash), demonstrations of the latest Qualcomm technology will be on display at Qualcomm's booth at Mobile World Congress (Hall 3 Stand 3E10).

To learn more, visit Qualcomm Incorporated's website, OnQ blog, Twitter and Facebook pages, or stop by the Qualcomm booth at Mobile World Congress (Hall 3 Stand 3E10).

For more information or to arrange interviews, please contact: Claudine Ricanor, Qualcomm Public Relations 1-(858) 845-5959 // corpcomm@qualcomm.com.
