NEWS RELEASE

2021 Includes Continued Growth and Expansion for Infinity Natural Resources

2021-01-27

While 2020 certainly had its challenges, our team at Infinity Natural Resources was able to continue to push forward, drilling and completing our first wells, Coastal 2H & 4H. These wells were then turned online January 2021.

As we continue to push into 2021, our team has been working diligently, to plan and permit six additional wells set for near term development. Despite a challenging political climate, Natural Gas remains a bridge fuel for where we stand today, and where we want to be tomorrow, and are excited to develop these additional sites. Natural Gas provides a continued opportunity for our team members, sponsors, business partners and community, as we continue to provide a clean domestic energy source.
