NEWS RELEASE

Looking to the Future in 2023

2023-01-02

The past several years have certainly come with a unique set of challenges for everyone. Our dedicated team at Infinity Natural Resources can proudly say our experience and perseverance have allowed us to overcome those challenges, exceed production goals, and double our team. Our company's growth and achievements are a testament of success to Infinity's core values and safety-focused practice.

In 2020, Infinity Natural Resources drilled and completed our first wells, Coastal 2H and 4H, both of which were turned online in January of 2021. By 2022, INR successfully acquired producing assets in Ohio and spud 12 additional wells throughout our assets in Pennsylvania and Ohio. We now operate over 60 wells and are continuing our active development. In December of 2022, we achieved a production milestone of 100 MMCFD and 5,000 BPOD. We anticipate continuing our steady growth and successful operations in 2023 and the years to follow.

We firmly believe natural gas will act as a vital source of clean energy to serve our Nation's growing demand. We also believe Infinity Natural Resources' extensive experience in the Appalachian Basin will allow for our continued growth, and providing a continued opportunity for our team members, sponsors, business partners and community, as we continue to provide a clean domestic energy source.
