Ecolab Expanding Greensboro Campus to Include Life Sciences Cleanroom Manufacturing Facility

Expansion coincides with launch of cleanroom solution portfolio in North America and reaffirms company's commitment to growing in Greensboro

GREENSBORO, N.C.--(BUSINESS WIRE)-- Ecolab Inc., the global leader in water, hygiene and energy technologies and services, continues to expand its Greensboro campus with construction of a cleanroom manufacturing facility to support the launch of the company's Life Sciences solution portfolio in North America.

"This new, state-of-the-art production facility reinforces our commitment to meeting the needs of pharmaceutical and personal care manufacturers," said Beth Simermeyer, Ecolab executive vice president for Life Sciences. "It also reinforces our commitment to the greater Greensboro area, where we've significantly expanded to meet the needs of our growing business."

Ecolab's Life Sciences division provides comprehensive cleaning and disinfection solutions for pharmaceutical and personal care product manufacturers. The 3,000-square-foot ISO 5- and ISO 7-certified cleanroom production area for the division's cleaners, detergents and sanitizers will be housed within a new 12,000-square-foot facility. Cleanroom production is expected to begin in the first quarter of 2019.

Ecolab currently employs approximately 450 associates at its Greensboro campus, which produces cleaning and sanitizing products for food retail locations and quick-serve restaurants, and expects to add additional positions to support the new Life Sciences cleanroom manufacturing facility.

Earlier this year, Ecolab purchased the former Coca-Cola facility adjacent to its campus for additional storage space. The company also is in the process of commissioning its \$27 million manufacturing facility expansion and nearing completion of a remodel of its research and development facility and technical labs. In 2017, Ecolab opened a 36,000-square-foot office building on the Greensboro campus for marketing, finance and other support positions.

About Ecolab

A trusted partner at nearly three million customer locations, Ecolab (ECL) is the global leader in water, hygiene and energy technologies and services that protect people and vital resources. With annual sales of \$14 billion and 48,000 associates, Ecolab delivers comprehensive solutions, data-driven insights and on-site service to promote safe food, maintain clean environments, optimize water and energy use, and improve operational efficiencies for customers in the food, healthcare, energy, hospitality and industrial markets in more than 170 countries around the world.
