

## KOHL'S RESPONSIBLE FOREST POLICY

Kohl's recognizes that the ecosystem services provided by forests and the natural resources around the world provide an irreplaceable benefit that supports our livelihoods. Kohl's is committed to conserving ancient and endangered forests and species' habitats, protecting against deforestation, and avoiding wood-based products from controversial and illegal sources while protecting biodiversity.

We encourage suppliers to use sourcing practices that align with our commitments in order to support these goals.

To support our commitments, Kohl's maintains partnerships with the following organizations:

- Canopy: Kohl's partners with Canopy to champion and advance global solutions with regard to preserving natural forests and to help assure that ancient and endangered forests are not used in our man-made rayon, viscose or lyocell products.
- Forest Stewardship Council (FSC): We seek to utilize FSC-certified packaging to promote responsible forest management and ensure high environmental and social standards.
