# Community Bank System Reports Record First Quarter Results

2014-04-22

- EPS improvement of 8%, year-over-year

- Achieved record levels of non-interest income generation

- Continued strong asset quality

SYRACUSE, N.Y.--(BUSINESS WIRE)-- Community Bank System, Inc. (NYSE:CBU) reported first quarter 2014 net income of \$22.2 million, an increase of 9.5% compared with \$20.2 million earned for the first quarter of 2013. Diluted earnings per share totaled \$0.54 for the first quarter of 2014, up 8.0% from \$0.50 reported in the first quarter of 2013. First quarter 2014 net income and noninterest income were the highest quarterly amounts ever recorded by the Company.

Total revenue for the first quarter of 2014 was \$88.5 million, an increase of \$3.9 million, or 4.7%, over the first quarter of 2013. Higher revenue resulted from an eight-basis point increase in the Company's net interest margin to 3.94%, primarily related to a significant decline in borrowing costs resulting from balance sheet repositioning actions in 2013. Additionally, continued organic growth drove a \$1.4 million, or 10.7% increase in the Company's revenue from its wealth management and employee benefit services businesses. Banking fee income from deposit services and mortgage banking, increased \$0.8 million year-over-year, while linked quarter revenues were lower, as seasonally expected. Revenue growth was supported by an increased core deposit account base resulting from solid organic growth in addition to the successful integration of eight Bank of America branches acquired in Pennsylvania in late 2013. The quarterly provision for loan losses of \$1.0 million was \$0.4 million lower than the first quarter of 2013, reflective of lower net charge-offs and the continuation of generally stable and favorable asset quality metrics. Total operating expenses of \$55.9 million for the quarter were \$1.4 million, or 2.5%, higher than the first quarter of 2013, driven by the additional operating costs associated with the completed Bank of America branch acquisitions and atypically higher seasonal maintenance and

utility costs.

“Community Bank’s trend of solid execution continued again in 2014’s first quarter, with strong operating results demonstrating the strength of our diversified franchise,” said President and Chief Executive Officer Mark E. Tryniski. “The momentum from our successful balance sheet initiatives and branch acquisitions in 2013 were catalysts for improved results as we began 2014. Our employee benefit services and wealth management groups delivered record earnings on robust growth in existing and new customer relationships. Loans and deposits grew from year-ago levels, while strong asset quality continued to reflect the strength of our underwriting and stable economic trends in our markets. In 2014 we continue to focus on executing our long-term approach to value creation for the benefit of our shareholders.”

First quarter 2014 net interest income was \$60.1 million, an increase of \$1.7 million, or 2.9%, compared to the first quarter of 2013. In addition to the \$0.9 million benefit to interest expense from continued deposit growth and an improved funding mix, growth in net interest income was driven by a \$5.5 million decrease in borrowing interest expense resulting from last year’s balance sheet repositioning actions. These actions effectively lowered the cost of borrowed funds by 286 basis points and contributed to a \$283.9 million decline in average borrowed funds year-over-year. Improved funding costs were partially offset by a 31-basis point decline in earning asset yields, driven by lower blended interest rates on loans and investment securities. While average loan balances grew \$239.1 million, or 6.2%, average loan yields declined 43 basis points year-over-year, resulting in a \$1.4 million reduction in loan income. Investment income fell \$3.3 million largely due to the Company’s balance sheet repositioning actions in 2013, which resulted in average investment securities balances (including cash equivalents) falling by \$222.5 million compared to the prior year’s first quarter, while yields fell 23 basis points.

First quarter non-interest income increased \$2.3 million to \$28.4 million, representing an increase of 8.6% compared to last year’s first quarter. Income expanded across all banking and financial services categories. Financial services revenue reached record levels as wealth management revenues increased \$0.8 million, or 21.0% over first quarter 2013, while employee benefit services revenue grew 6.8% to \$10.4 million. Strong customer expansion and market momentum from 2013 drove the improved performance. Deposit service revenues grew \$0.7 million, or 5.7%, to \$12.3 million, reflecting meaningful core deposit account growth as a result of the branch acquisitions and organic growth initiatives across the franchise.

Quarterly operating expenses of \$55.9 million increased \$1.4 million, or 2.5%, over the first quarter of 2013. Occupancy and equipment costs grew \$0.6 million, or 8.9%, primarily as a result of the December 2013 branch acquisitions as well as higher facility maintenance and utility costs in more severe winter conditions compared to the first quarter of 2013. Salaries and employee benefits grew \$0.3 million, or 0.8%, and included the additional personnel from the branch acquisitions as well as merit increases. These increases were partially offset by lower retirement plan expenses related to plan asset performance and discount rate changes. Other expenses further reflected the increased costs of operating an expanded franchise, with acquisition expenses totaling \$0.1 million and total other expenses rising \$0.4 million, or 2.2%.

The first quarter 2014 effective income tax rate of 29.7% increased compared to 29.2% in last year's first quarter, reflecting a higher proportion of income being generated from fully taxable sources.

## Financial Position

Average earning assets of \$6.6 billion for the first quarter of 2014 were essentially flat with the linked and prior year first quarter. Overall average earning asset balances included growth of \$30.6 million in average loan balances, while average investment securities and cash balances declined by an offsetting \$29.4 million. Lower securities balances reflect the full-quarter impact of fourth quarter 2013 balance sheet actions, including sales of collateralized debt obligation securities and certain Treasury securities. Average deposits increased \$238.2 million compared to the fourth quarter of 2013, and were up \$258.3 million from the first quarter of 2013, principally from the branch acquisition.

Ending loans at March 31, 2014 increased \$234.8 million, or 6.1%, year-over-year, reflecting strong organic growth in the Company's consumer lending portfolios. Ending loans decreased \$12.7 million from December 31, 2013, reflecting normal seasonal fluctuations. Ending investment securities, including cash equivalents, totaled \$2.52 billion at March 31, 2014, or \$137.9 million lower than March 31, 2013 due to the balance sheet restructuring initiatives undertaken in 2013. Quarter-end borrowings of \$217.1 million were \$144.3 million lower than the year-ago quarter, also due to the balance sheet restructuring actions and net liquidity from the branch acquisitions. Deposit balances at March 31, 2014 totaled \$6.04 billion, up \$264.1 million, or 4.6%, from the year-ago quarter. Deposit balances grew \$142.8 million from December 31, 2013, and included the expected seasonal increase in municipal funds. Growth across all core deposit categories outpaced declines in time deposit balances.

Shareholders' equity of \$918.1 million at March 31, 2014 was \$40.8 million, or 4.7%, higher than the prior year quarter-end, primarily due to strong earnings generation and retention over the last four quarters. The Company's net tangible equity to net tangible assets ratio was 7.97% at March 31, 2014, up from 7.68% at December 31, 2013. Its Tier 1 leverage ratio grew to 9.48% for the current quarter, up 19 basis points from the fourth quarter of 2013.

## Asset Quality

The Company's asset quality metrics continue to be favorable relative to comparative peer and industry averages and illustrate the long-term effectiveness of the Company's disciplined risk management and underwriting standards. Net charge-offs were \$1.1 million for the first quarter, compared to \$2.9 million for the fourth quarter of 2013 and \$1.4 million for first quarter of 2013. As an annualized percentage of average loans, net charge-offs measured 0.11% in the first quarter of 2014, compared to 0.29% and 0.14% in the linked and year-ago quarters, respectively. Nonperforming loans as a percentage of total loans at March 31, 2014 were 0.58%, compared to 0.54% at December 31, 2013, and down from 0.71% of total loans at March 31, 2013. The total delinquency ratio of 1.25% at the end of the first quarter was down 24

basis points from the end of 2013 and down 30 basis points from March 31, 2013. The first quarter provision for loan losses of \$1.0 million was \$2.2 million, or 68.6% lower than the fourth quarter of 2013, and \$0.4 million, or 28.2%, lower than the first quarter of 2013. The allowance for loan losses to nonperforming loans was 187% at March 31, 2014, compared to 201% at December 31, 2013 and 157% as of March 31, 2013.

## Cash Dividend Declared / Stock Repurchase Authorization
