Compliance with Sustainable Sourcing

We have set a range of controls to ensure our operations are responsibly managed, continue to work to reduce the risk of adversely impacting the environment, and strive to promote efficient operations using reasonably available methods.

In the event that either JPI or Supplier use palm oil in its manufacturing process, then they shall obtain 100% of its palm oil from responsible and sustainable sources. JPI is a member of, and Supplier is expected to be a member of, the Roundtable on Sustainable Oil (RSPO), a respected global multistakeholder forum setting environmental and social criteria for the palm oil industry, and Supplier is expected to comply with 2018 RSPO Principles and Criteria (P&Cs).

Supplier understands and acknowledges that JPI has the right to audit books and records and/ or engage in physical inspection of Supplier's Facilities (including the Facilities of Supplier's vendors and other partners in the supply chain) upon reasonable notice or without notice where it has received any complaint of possible violation of this Code of Conduct or of applicable law, or cause its representatives to do so. Supplier further understands and acknowledges that these Standards set out audit and inspection parameters, and JPI has no obligation to conduct inspections or audits.

Immediate Termination

JPI may immediately terminate its business relationship (including any purchase order(s) and purchase contracts) with Supplier if Supplier fails to meet the standards set forth in this Supplier Code of Conduct.
