Join Industry Leaders Converging in New York City to Learn About the Latest in Datacenter Innovations

Fortune Magazine Hosting the Datacenter Innovation Summit on November 7 presented by Intel and Supermicro with Presentations by the former US Federal CIO and the Global Head of Enterprise Datacenters at Morgan Stanley

SAN JOSE, Calif., Oct. 24, 2017 /PRNewswire/ -- **Super Micro Computer, Inc.** (NASDAQ: SMCI), a global leader in enterprise computing, storage, networking solutions and green computing technology, today announced that the company along with Intel will present the Fortune Magazine hosted Datacenter Innovation Summit in New York City on November 7, 12pm to 6pm at the Dream Downtown Hotel. Over 100 leading IT executives and professionals are converging at this event to share the latest in datacenter innovations and how enterprises can embrace these transformations to ensure business success.

The technologies at the foundation of datacenters are undergoing massive accelerations that will disrupt today's status quo and enable incredible innovations and business opportunities. Big data, artificial intelligence (AI), machine learning, cloud-scale or composable infrastructure, and software-defined everything are all disrupting today's datacenters.

The question is not if enterprises should embrace these transformations, but how. More importantly, can enterprises transform quickly or will they be limited by the self-serving timetable of their current 'strategic' suppliers?

Enterprise leaders can join Fortune Magazine, Supermicro, and Intel to hear about the latest innovations in IT Infrastructure and learn how the most influential companies have harnessed the power of these emerging technologies to bring breakthrough solutions to market. This summit is a half-day event comprised of new technology overviews, real world case studies from industry leaders and a product showcase networking happy hour.

Top IT executives and industry visionaries that will be presenting at this event include:

- Sudhir Kalra, Global Head of Enterprise Data Centers, Morgan Stanley
- Shesha Krishnapura, Intel Fellow and CTO of Intel IT, Intel
- Charles Liang, President and CEO, Super Micro Computer, Inc.
- Andrew Nusca, Digital Editor, Fortune Magazine
- Tony Scott, Former Federal CIO, U.S. Government
