2018

KINROSS GOLD CORPORATION

Q4 & FY 2017 Results Conference Call & Webcast

CAUTIONARY STATEMENT ON FORWARD-LOOKING INFORMATION

All statements, other than statements of historical fact, contained or incorporated by reference in or made in giving this presentation and responses to questions, including but not limited to any information as to the future performance of Kinross, constitute "forward looking statements" within the meaning of applicable securities laws, including the provisions of the *Securities Act* (Ontario) and the provisions for "safe harbor" under the *United States Private Securities Litigation Reform Act of 1995* and are based on expectations, estimates and projections as of the date of this presentation. Forward-looking statements contained in this presentation include those statements on slides with, and statements made under, the headings "2017 Highlights", "2018 Outlook", "High-Quality Organic Development Projects", "Attractive Development Projects", "Operating Highlights", "Financial Discipline", "Exploration Highlights", "Enhancing a Cornerstone Asset", and "Appendix", and include without limitation statements with respect to our guidance for production, production costs of sales, all-in sustaining cost and capital expenditures, continuous improvement and other cost savings opportunities, as well as references to other possible events include, without limitation, possible events; opportunities; statements with respect to possible events or opportunities; estimates (including, without limitation, gold / mineral resources, gold / mineral reserves and mine life) and the realization of such estimates; future development, mining activities, production and growth, including but not limited to cost and timing; success of exploration or development of operations; the future price of gold and silver; currency fluctuations; expected capital requirements; government regulation; and environmental risks. The words "2018E", "advancing", "ahead", "assumption", "believe", "budget", "continue" , "encouraged", "enhancing", "envisions", "estimate", "expect", "explore", "feasibility", "flexibility", "focus", "forecast", "FS", "future", "goal", "growth", "guidance", "indicate", "liquidity", "momentum", "objective", "on schedule", "on track", "opportunity", "optimize", "outlook", "PFS", "plan", "positioned", "potential", "principle", "pre-feasibility", "priority", "promising", "progressing", "project", "risk", "study", "target", or "upside", or variations of or similar such words and phrases or statements that certain actions, events or results may, can, could, would, should, might, indicates, or will be taken, and similar expressions identify forward looking statements. Forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable by Kinross as of the date of such statements, are inherently subject to significant business, economic, legislative and competitive uncertainties and contingencies. Statements representing management's financial and other outlook have been prepared solely for purposes of expressing their current views regarding the Company's financial and other outlook and may not be appropriate for any other purpose. Many of these uncertainties and contingencies can affect, and could cause, Kinross' actual results to differ materially from those expressed or implied in any forward looking statements made by, or on behalf of, Kinross. There can be no assurance that forward looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. All of the forward looking statements made in this presentation are qualified by these cautionary statements, and those made in our filings with the securities regulators of Canada and the U.S., including but not limited to those cautionary statements made in the "Risk Factors" section of our most recently filed Annual Information Form, the "Risk Analysis" section of our FYE 2017 Management's Discussion and Analysis, and the "Cautionary Statement on Forward-Looking Information" in our news releases dated February 14, 2018, to which readers are referred and which are incorporated by reference in this presentation, all of which qualify any and all forward-looking statements made in this presentation. These factors are not intended to represent a complete list of the factors that could affect Kinross. Kinross disclaims any intention or obligation to update or revise any forward-looking statements or to explain any material difference between subsequent actual events and such forward-looking statements, except to the extent required by applicable law.

Other information

Where we say "we", "us", "our", the "Company", or "Kinross" in this presentation, we mean Kinross Gold Corporation and/or one or more or all of its subsidiaries, as may be applicable.

The technical information about the Company's mineral properties contained in this presentation has been prepared under the supervision of Mr. John Sims, an officer of the Company who is a "qualified person" within the meaning of National Instrument 43-101.

2017 Results Highlights & 2018 Outlook

OPERATIONAL EXCELLENCE

STRONG TRACK RECORD

	2012	2013	2014	2015	2016	2017
MET or **EXCEEDED** annual production guidance	✓	✓	✓	✓	✓	✓
MET or came in **UNDER** annual cost guidance	✓	✓	✓	✓	✓	✓
MET or came in **UNDER** annual capital expenditures guidance	✓	✓	✓	✓	✓	✓

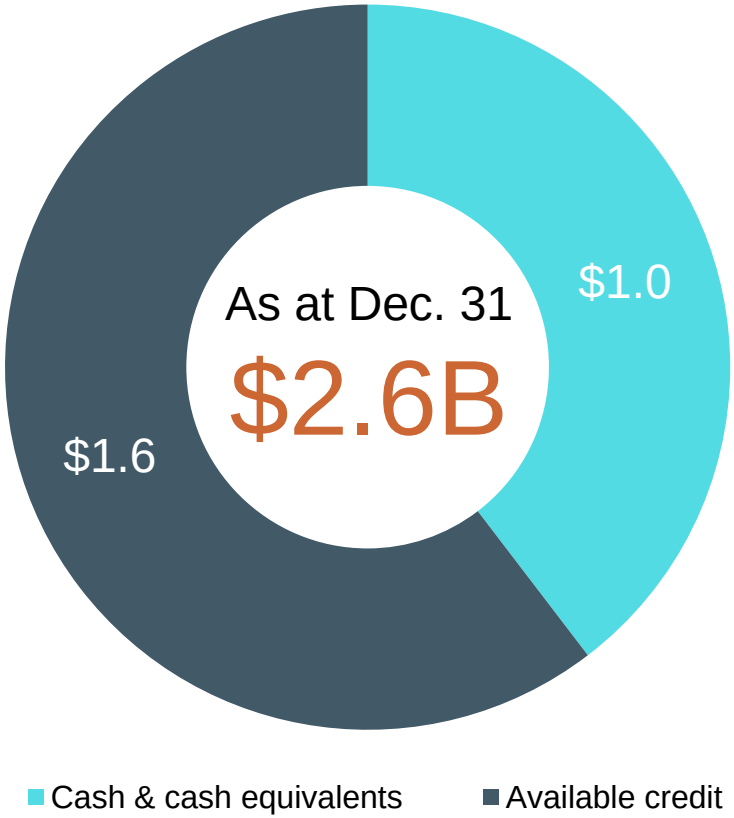

Consistently Meeting or Outperforming Targets

SOLID FINANCIAL POSITION

Strong position to finance organic development projects with existing cash and liquidity

LIQUIDITY POSITION

MAINTAINING FINANCIAL FLEXIBILITY

- Cash and cash equivalents of ~$1.0 billion
- Available credit: $1.6 billion
- Trailing net debt to EBITDA : 0.6x
- Manageable debt schedule with no significant maturities prior to 2021

ADVANCED DEVELOPMENT PROJECTS

Tasiast Phase One	• Advanced construction of Phase One • On budget and on schedule for Q2 2018
Tasiast Phase Two	• Completed feasibility study and approved Phase Two project • Advanced engineering and procurement
Round Mountain Phase W	• Completed feasibility study and approved the project, adding approximately 5 years of mining and upgrading 2Moz.(1) to reserve estimates • Advanced engineering, procurement and permitting
Bald Mountain Vantage Complex	• Completed pre-feasibility study • Advanced engineering, procurement and permitting
Fort Knox Gilmore	• Gained mineral rights to Gilmore land and initiated feasibility study
Tasiast Sud	• Accelerated drill program and initiated pre-feasibility study
September NE	• Completed project on time and on budget
Moroshka	• Advanced development of the twin declines
La Coipa Phase 7	• Advanced permitting and reached an agreement to consolidate ownership of Phase 7 concessions

(1) Please refer to endnote #1.

FORT KNOX GILMORE(1)

More than doubled Fort Knox's measured and indicated resource estimates

- Drilling program initiated in 2014, completing 73,000 metres of core and reverse circulation drilling in 205 holes
- Results of the drilling program, engineering work and gaining the mineral rights to Gilmore:
  - Added 2.1 million ounces to measured and indicated resource estimates, which was slightly offset by the conversion of measured and indicated resource to proven and probable reserves, which was mainly from the East wall of the Fort Knox pit

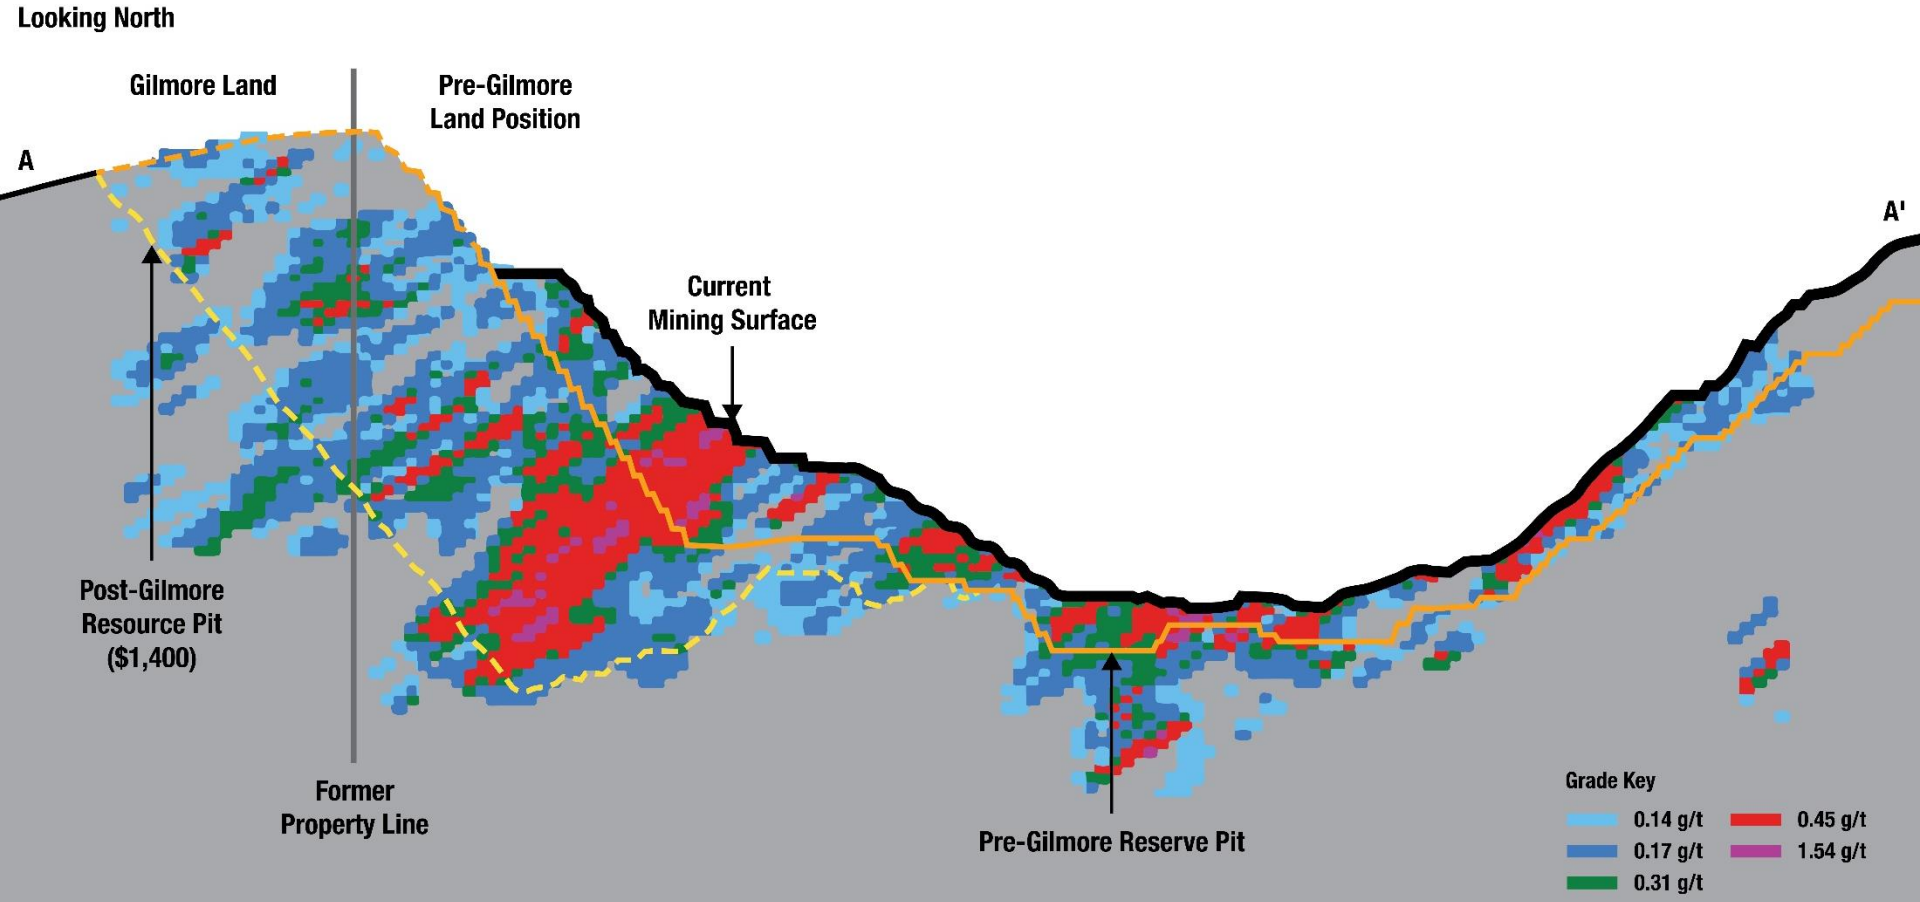

Mineral Reserves and Resources (Au koz.)

	2016	Depletion	Gilmore addition	Other engineering / exploration changes	2017
Proven and probable reserves	1,506	(515)	-	254	1,245
Measured and indicated resources	1,440	-	2,100	(311)	3,229
Inferred resources	193	(3)	300	199	689

(1) Please refer to endnote #1.

FORT KNOX GILMORE

Commenced feasibility study analyzing potential layback to the west; expected to be complete in mid-2018

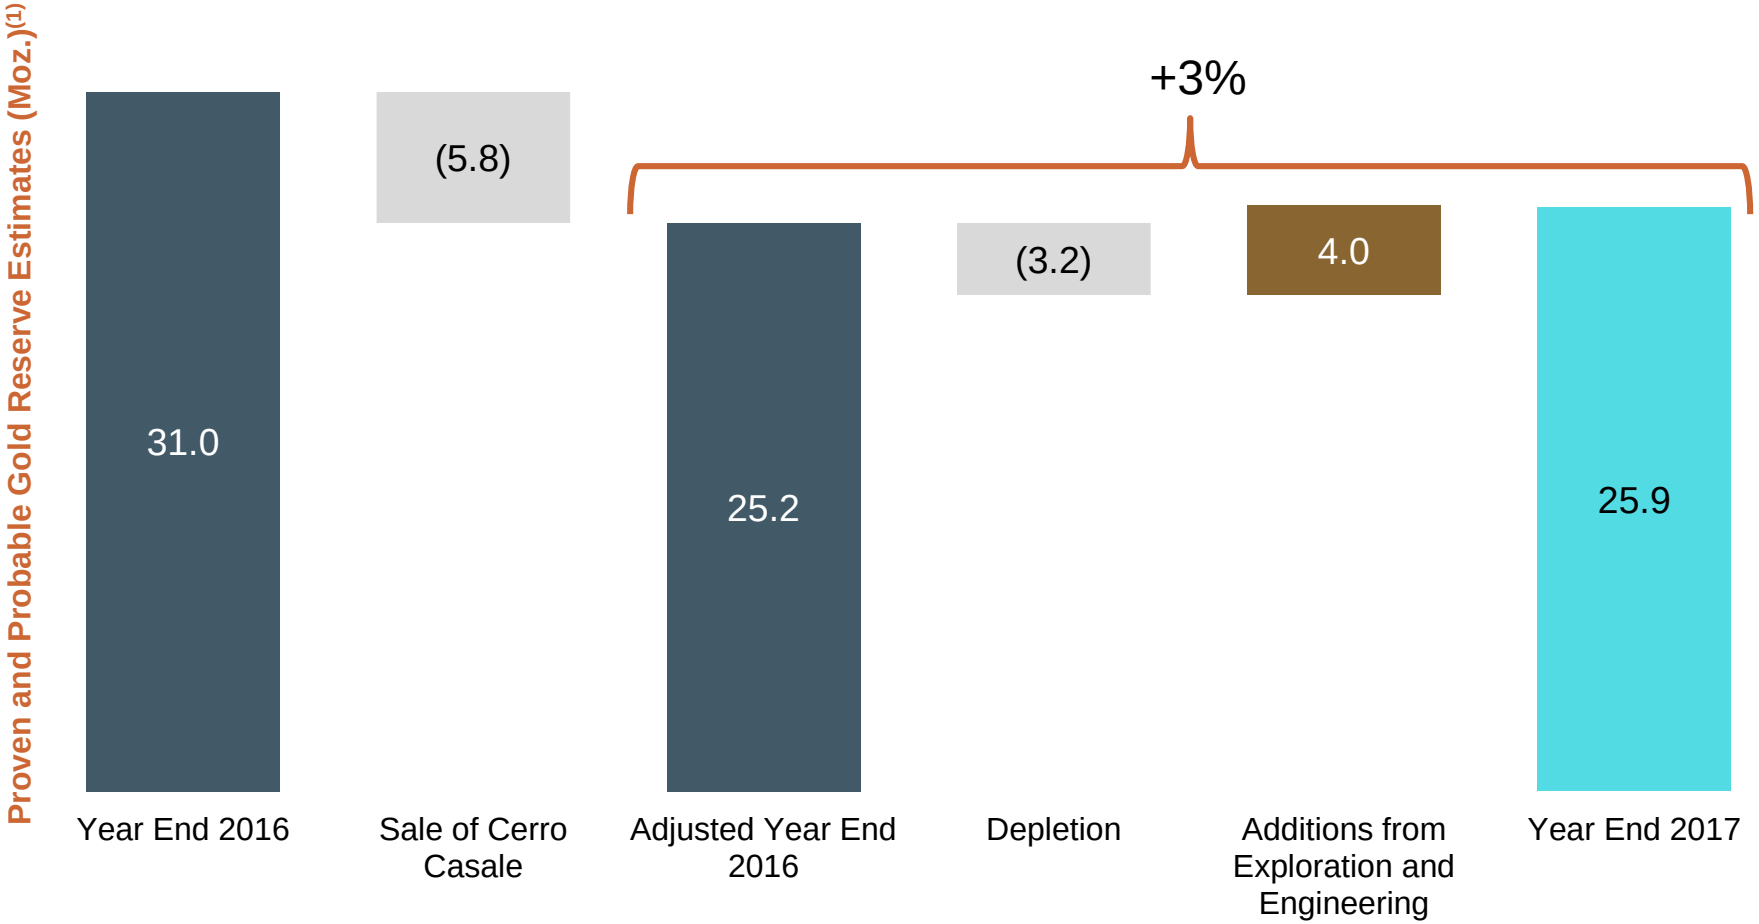

Cross section of the Fort Knox estimated mineral reserve and resource estimate as of November 30, 2017. For more information, please refer to our news release dated December 12, 2017, available on our website at www.Kinross.com.

QUALITY OVER QUANTITY

2017 RESERVE AND RESOURCE ESTIMATES

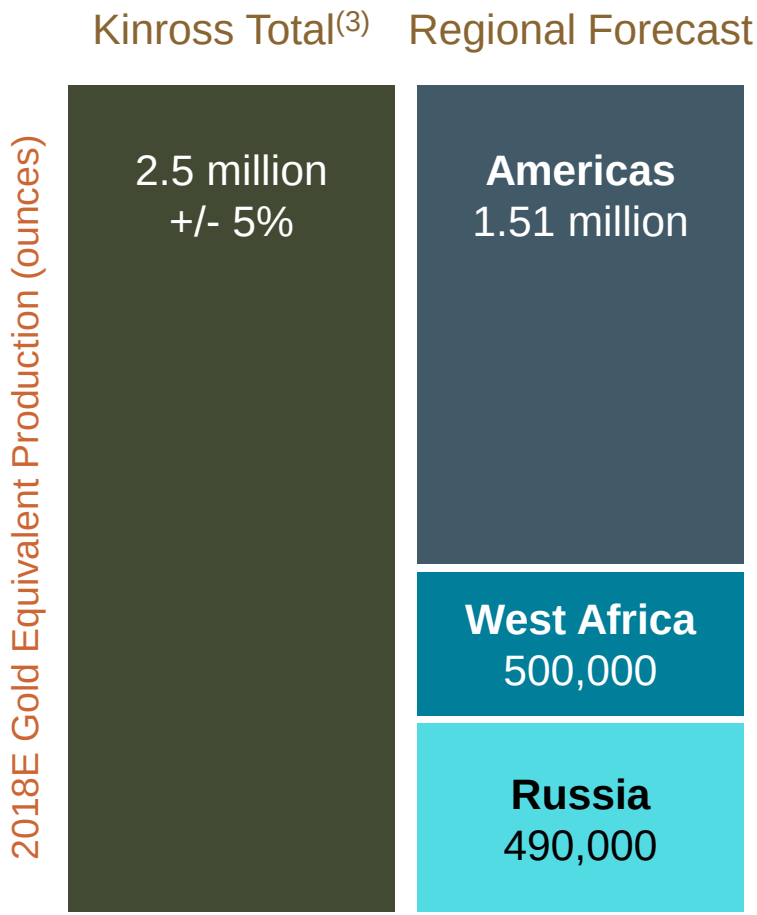

Excluding sale of Cerro Casale, proven and probable reserve estimates increased by 3%

(1) Totals may not add due to rounding. Please refer to endnote #1.

2018 PRODUCTION AND COSTS(2)

Forecasting another solid year from operations, with guidance for production and all-in sustaining costs in-line with 2017

2018E Unit Costs

($ per gold equivalent ounce)

Cost of sales(4)	$730/oz. +/- 5%
All-in sustaining cost(4)	$975/oz. +/- 5%

2018E Regional Cost of Sales Forecast(4)

($ per gold equivalent ounce)

Region	2018E Cost of Sales
Americas	$750/oz. +/- 5%
West Africa (attributable)	$795/oz. +/- 5%
Russia	$620/oz. +/- 5%

(2) Please refer to endnote #2.
(3) Please refer to endnote #3. Kinross total attributable production and regional forecasts for 2018 are +/- 5%.
(4) Please refer to endnote #4.

CAPITAL EXPENDITURES(2)

Expecting to invest $680 million of non-sustaining capital as we execute on five projects and advance 3 development opportunities

- Leveraging financial strength we've built over past 6 years to invest in our future
  - Organic projects spanning all 3 of our regions offer opportunities to expand production or extend mine life at our operations
- Total capital expenditures for 2018 are expected to be **$1,075 MILLION** (+/- 5%)
  - Includes $355 million of sustaining capital and $40 million of capitalized interest

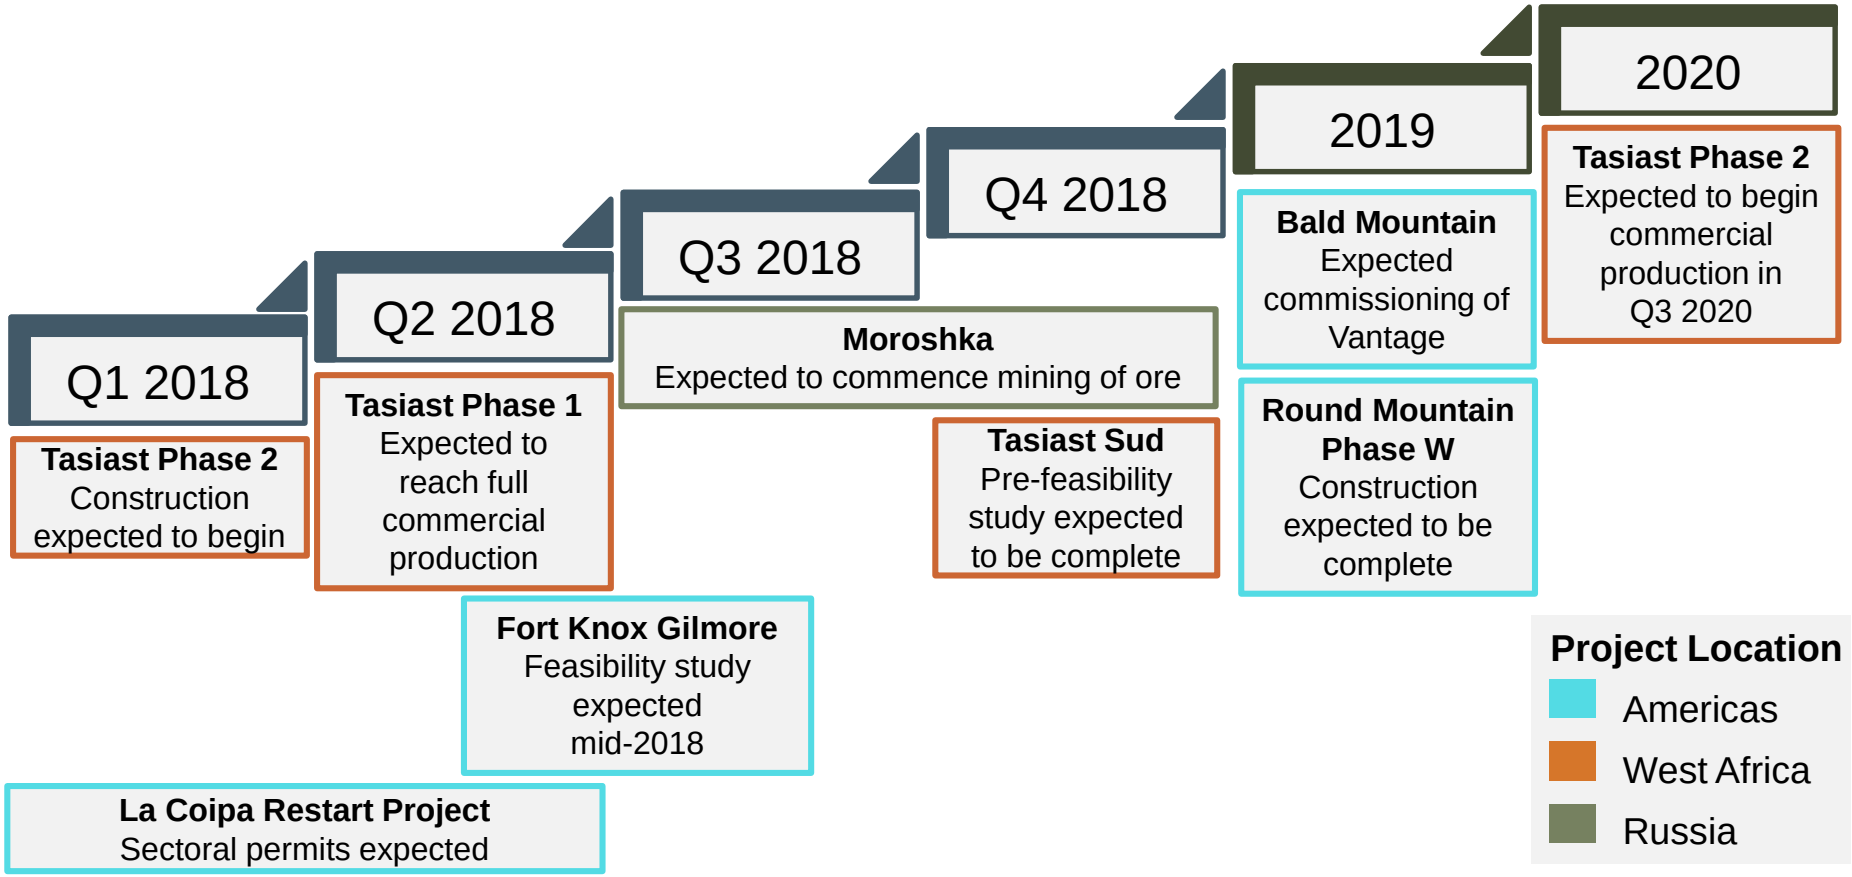

2018E Non-Sustaining Capital

	Forecasted Expenditures
Tasiast Project	$240 million
Round Mountain Phase W	$185 million
Tasiast West Branch Stripping	$130 million
Bald Mountain Vantage Project	$90 million
Development projects and other	$35 million
TOTAL	$680 million

(2) Please refer to endnote #2.

ADVANCING ORGANIC PROJECTS

All of our organic development projects are advancing according to plan, with key milestones planned for 2018 and beyond

ACQUISITION OF POWER PLANTS IN BRAZIL[(i)]

STRATEGIC RATIONALE

Expected to reduce Paracatu's cost of sales by ~$80/oz. over the life of mine

- Lowers operating costs by eliminating ~70% of future power purchases
- Current legislation provides reduced power tariffs to companies generating their own power
  - Tariff savings expected to be $15/oz. per ounce of the overall $80/oz. cost of sales reduction over the life of mine

Attractive returns

- Expected to generate a levered IRR between 15% to 30%, depending on final terms of a planned debt financing

De-risked supply chain

- Secures ~70% of Paracatu's future power needs at a low, fixed cost
- Reduces exposure for a key input in an environment where we are seeing input costs starting to rise

Investment in core asset

- Expected to further strengthen and enhance Paracatu; a large, long-life cornerstone operation

TRANSACTION OVERVIEW

SUMMARY	• Kinross to acquire two hydro power plants in Brazil from a subsidiary of Gerdau
PURCHASE PRICE	• $257 million[ii]
FINANCING	• Approximately $200M in debt (expected to be in place by closing), with balance from existing liquidity
CLOSING	• Expected to close in 3 to 6 months

(i) For more information, please refer to the news release "Kinross announces acquisition of power plants in Brazil to secure long-term, low-cost power for Paracatu mine" dated February 14, 2018 and available on our website at www.kinross.com

(ii) Assumes foreign exchange rate of 3.25 Brazilian reais to the US dollar.

Financial Highlights

FINANCIAL RESULTS

All figures in US$ millions, except ounces, per share and per ounce amounts	Q4 2017	Q4 2016	2017	2016
Attributable gold equivalent ounces (oz.)				
Produced	652,710	746,291	2,673,533	2,789,150
Sold	628,565	738,087	2,596,754	2,758,306
Average realized gold price ($/oz.)[4]	$1,276	$1,217	$1,260	$1,249
Production cost of sales[3,4]				
Gold equivalent ($/oz. Au eq.)	$653	$712	$669	$712
By-product ($/oz.)	$637	$701	$653	$696
All-in sustaining cost [3,4]				
Gold equivalent ($/oz. Au eq.)	$1,019	$1,012	$954	$984
By-product ($/oz.)	$1,013	$1,010	$946	$975
Capital expenditures	$313.3	$226.5	$897.6	$633.8
Revenue	$810.3	$902.8	$3,303.0	$3,472.0
Adjusted operating cash flow[4]	$364.2	$211.6	$1,166.7	$926.7
Operating cash flow	$366.4	$302.6	$951.6	$1,099.2
Adjusted net earnings (loss) attributable to common shareholders[4]	$16.3	($50.9)	$178.7	$93.0
per share	$0.01	($0.04)	$0.14	$0.08
Reported net earnings (loss)	$217.6	($116.5)	$445.4	($104.0)
per share	$0.17	($0.09)	$0.36	($0.08)

(3) Please refer to endnote #3.
(4) Please refer to endnote #4.

2018 CAPITAL EXPENDITURES OUTLOOK(2)

Leveraging strong financial position to invest in development projects & our future

2018E Capital Expenditures ($ millions)

Region	Sustaining	Non-Sustaining	Regional Total
Americas	$280	$285	$565
West Africa	$40	$375	$415
Russia	$30	$20	$50
Corporate	$5	-	$5
TOTAL	$355	$680	$1,035
Capitalized Interest			$40
TOTAL KINROSS			$1,075 +/- 5%

(2) Please refer to endnote #2.

CURRENCY & OIL SENSITIVITIES

2018 Budget Assumptions[(2)]

	2018 Budget	Current Spot[(i)]
Gold	US$1,200/oz.	$1,328/oz.
Oil	US$55/bbl.	$59/bbl
Russian rouble	60	57
Brazilian real	3.25	3.26

2018 Sensitivities (net of hedges)[(2)]

	Change from Assumptions	Estimated impact to cost of sales
FX	10%	US$17/oz.
Russian rouble	10%	US$19/oz.[(ii)]
Brazilian real	10%	US$38/oz.[(iii)]
Oil	$10/bbl.	US$3/oz.
Gold price	$100/oz.	US$4/oz.

(2) Please refer to endnote #2.

(i) Source: Factset – February 14, 2018.
(ii) Impact to production cost of sales of the Russian operations
(iii) Impact to production cost of sales of the Brazil operation

FUEL & CURRENCY HEDGES

Managing exposure to fluctuations in foreign currency and input commodity prices

- Overall 2018 FX exposures ~30% hedged at favourable rates compared to current spot prices
- Continue to monitor our FX and oil exposure and look for opportunities to establish additional input cost hedges if market conditions are favourable

Summary of 2018 foreign currency and energy hedges as at December 31, 2017

	% of 2018 exposure hedged	Average Rate
Brazilian real	31%	3.43 (put) – 4.12 (call)
Russian rouble	20%	60 (put) – 71.2 (call)
Canadian dollar	38%	1.35
Oil & Fuel	53%(i)	48.48

(i) As a result of pre-paid fuel purchases mainly relating to the Company's Russian operations and fixed pricing in Ghana and Brazil, Kinross' unhedged, free-floating oil & fuel exposure for 2018 is ~33% of total consumption

FINANCIAL STRENGTH & FLEXIBILITY

Maintaining balance sheet strength & financial flexibility remain priority objectives

- Increased cash balance by **~$200 MILLION** since year-end 2016, a result of excellent operating results and the disposition of Cerro Casale
- Strong financial position to fund development projects from existing cash and liquidity
  - Total liquidity of **$2.6 BILLION**(i)

(i) As at December 31, 2017.

Operating Highlights

AMERICAS

- Achieved high end of 2017 production guidance and low end of costs
- Strong cost performance at **FORT KNOX**, with cost of sales in Q4/17 of $620/oz.
- Continued strong performance at **ROUND MOUNTAIN**
- Ramp up of operations following temporary curtailment at **PARACATU** went according to plan, with the mine producing for the last 6 weeks of the quarter
    - Implementation of mitigation measures proceeding according to plan

	2017 Results	2018 Regional Guidance[2]
Production (oz. Au eq.)	1,628,418	1.51 million +/- 5%
Cost of sales ($/oz. Au eq.)[4]	$692	$750 +/- 5%

(2) Please refer to endnote #2.
(4) Please refer to endnote #4.

BALD MOUNTAIN DOUBLED PRODUCTION

Bald Mountain more than doubled its production from 2016, while also significantly reducing cost of sales per ounce

(4) Please refer to endnote #4.

WEST AFRICA

- Strong performance at **TASIAST** in 2017
  - Increased production a result of improved throughput and higher grade
  - Production cost of sales 29 percent lower year-over-year
- Production at **CHIRANO** increased 16 percent year-over-year
  - More reliable supply of energy from national grid resulting in higher throughput and better recovery

	2017 Results	2018 Regional Guidance[2]
Production (oz. Au eq.)[3]	464,664	500,000 oz. +/- 5%
Cost of sales ($/oz. Au eq.)[3,4]	$775/oz.	$795/oz. +/- 5%

(2) Please refer to endnote #2.
(3) Please refer to endnote #3.
(4) Please refer to endnote #4.

RUSSIA

KUPOL-DVOINOYE

- Consistent, strong performance from Russian operations in 2017
- Completed mining of the **SEPTEMBER NORTHEAST** project
- Development of **MOROSHKA** continues according to plan
  - Expect to begin stoping in the second half of 2018

	2017 Results	2018 Regional Guidance(2)
Production (oz. Au eq.)	580,451	490,000 oz. +/- 5%
Cost of sales ($/oz. Au eq.)(4)	$521/oz.	$620/oz. +/- 5%

(2) Please refer to endnote #2.
(4) Please refer to endnote #4.

DIVERSIFIED PORTFOLIO OF OPERATING MINES

60% of estimated 2018 gold equivalent production from mines located in the Americas

2018E GOLD EQUIVALENT PRODUCTION(2,3)

(2) Please refer to endnote #2.
(3) Please refer to endnote #3.

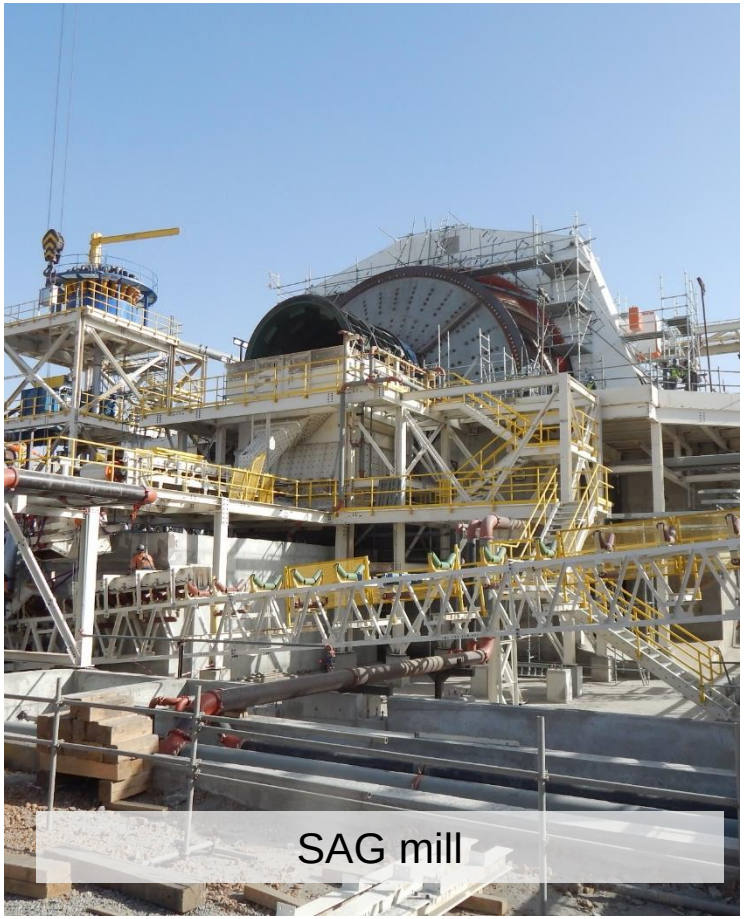

High-Quality Organic Development Projects

TASIAST PHASE ONE

On track for full commercial production by end of June 2018

Phase One progressing well

- Plant construction is approximately 93% complete
  - Remaining work focused primarily on electrical, instrumentation and controls installations
- Tailings storage facility complete; have started depositing tails at the new facility
- Mechanical installation of primary crusher, stockpile and CIL plant modifications is substantially complete
- Expect to begin commissioning of the primary crusher and CIL plant in late February
- Commissioning of the SAG mill expected to begin in April

SAG mill

TASIAST PHASE ONE PROGRESSING WELL

On track for full commercial production by end of June 2018

TASIAST PHASE TWO

Phase Two is expected to transform Tasiast into a large, world-class operation with low costs and a long mine life

- Preparing to start development work with Phase One nearing completion
- Early works for ball mill and power plant expected to begin during Q2 2018
- Overall engineering approximately 33% complete
- Procurement progressing well, with power plant and EPCM contracts now awarded
- Phase Two is expected to begin commercial production in Q3 2020

ROUND MOUNTAIN PHASE W

Phase W construction expected to be complete in Q2 2019

- Received Decision Record from the U.S. Bureau of Land Management and other necessary approvals in Q4 2017
- Stripping of Phase W was initiated in late 2017, ahead of schedule
  - Mining of Phase W ore expected to begin mid-2019
- Advancing detailed engineering
- Procurement commencing for long lead items and mining equipment
- Construction of new heap leach, CIC plant and relocation of infrastructure expected to be completed in Q2 2019

Stripping activities at Phase W

ROUND MOUNTAIN RESOURCE UPDATE(1)

Added ounces to resource estimates since feasibility study published in September

- Since the updated mineral reserve and resource estimated for Round Mountain published in September, we have added:
  - **433,000 ounces** to measured and indicated resource estimates
  - **421,000 ounces** to inferred resource estimates
- Majority of these estimated ounces are located in the south and west walls of the main Round Mountain pit
  - Engineering optimization work underway to determine if economic at our $1,200/oz gold price assumption for reserve estimates

	July 31, 2017	Depletion	Engineering and Exploration change	December 31, 2017
Proven and probable reserves	3,107	(320)	97	2,884
Measured and indicated resources	1,969	(9)	433	2,393
Inferred resources	1,700	(6)	421	2,115

(1) Please refer to endnote #1.

BALD MOUNTAIN VANTAGE COMPLEX

Construction of a new heap leach facility and related infrastructure to develop Vantage Complex in the South Area of Bald Mountain

- Initial construction work now underway
- Engineering more than 80% complete
- Permitting is proceeding as planned
- Contractors for more than half the scope of work have been selected
- Commissioning of the heap leach pad and processing facilities is expected to commence in Q1 2019

Initial construction work

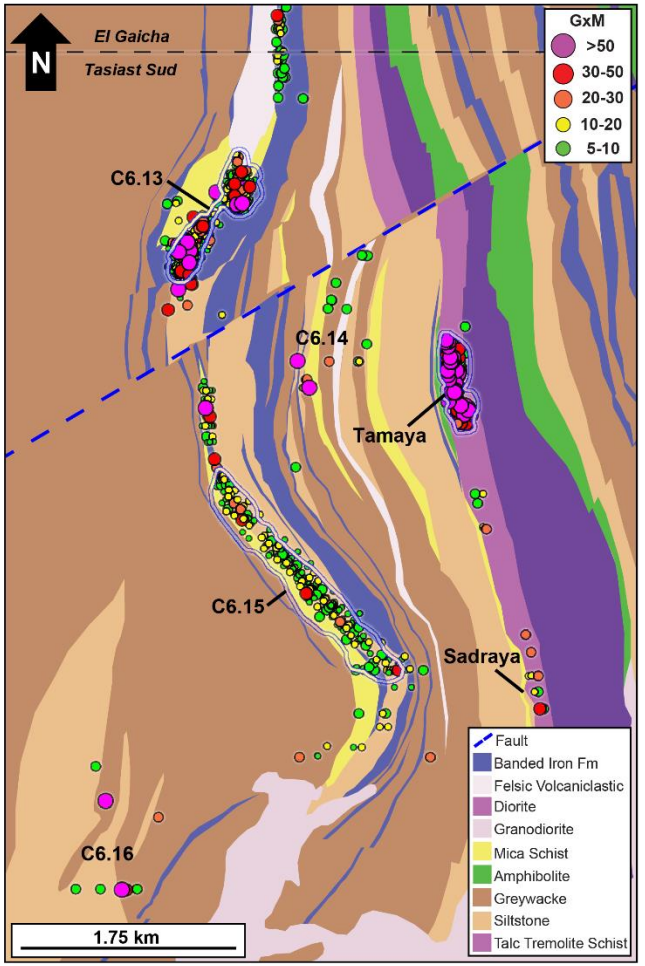

TASIAST SUD

Pre-feasibility on track for completion in H2 2018

- Tasiast Sud pre-feasibility study progressing well
  - Study evaluating potential for dump leach operation that combines material from Tamaya, C6.13 and C6.15
  - Higher grade material expected to be transported to the CIL mill

Successful exploration in 2017

- Completed over 47,000 metres of drilling, focused mainly at the C6.13 and C6.15 targets
- Drilling has identified continuous mineralization along an 8 km strike, to depths up to 200 metres
- Total addition to Inferred resource estimates(1) in the Tasiast Sud area: 820,000 ounces
  - C6.13 and C6.15: 670,000 ounces
  - Tamaya: 150,000 ounces

For additional information, please see Kinross' news release dated February 14, 2018 and Appendices A and B, which are available on our website at www.kinross.com.

(1) Refer to endnote #1.

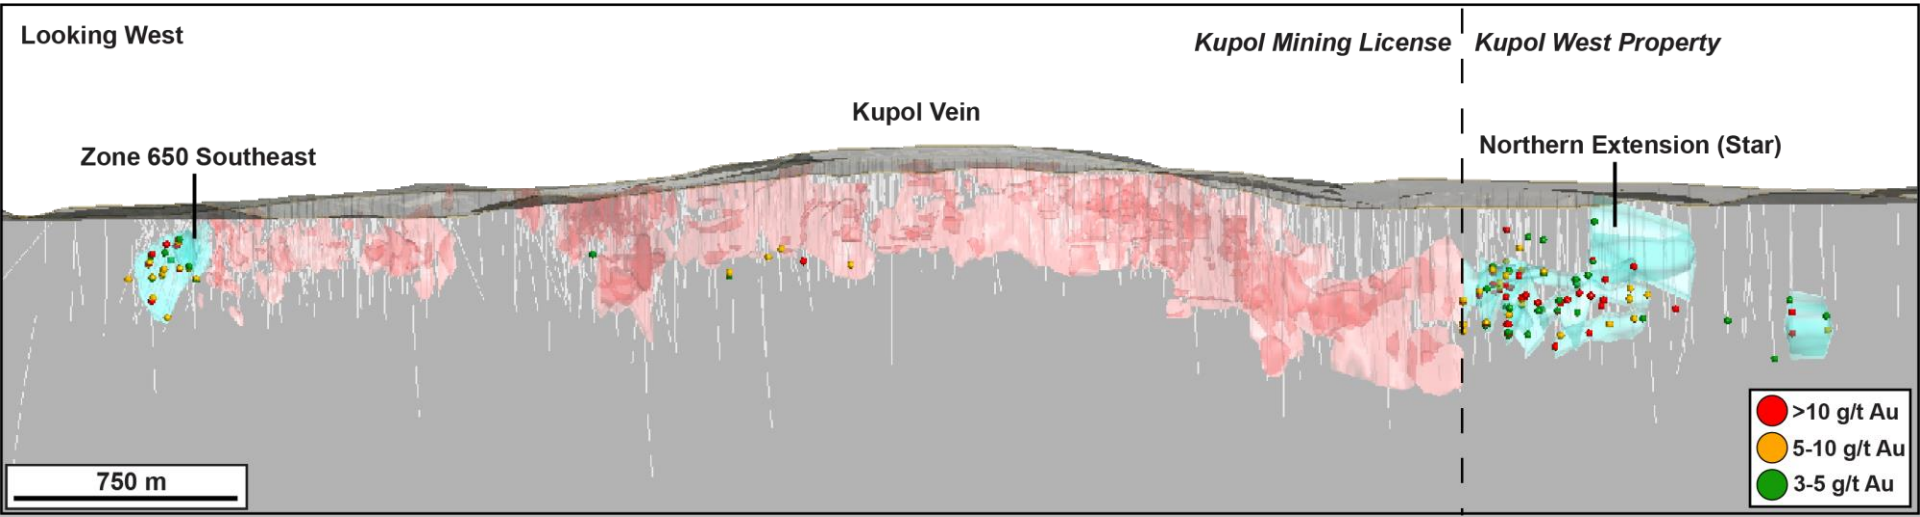

Exploration Highlights

KUPOL

Increasing 2018 exploration budget for Kupol to continue exploration of high-potential targets

- Primary objective of 2017 drilling in the North Extension was to determine extent of mineralization
  - We continue to intersect high grade narrow vein mineralization extending northwards by up to 2 kilometres from the current limit of the Kupol mine workings
- Focus for 2018 will be a drilling program at tighter spacing to determine the potential for additions to Inferred resource estimates

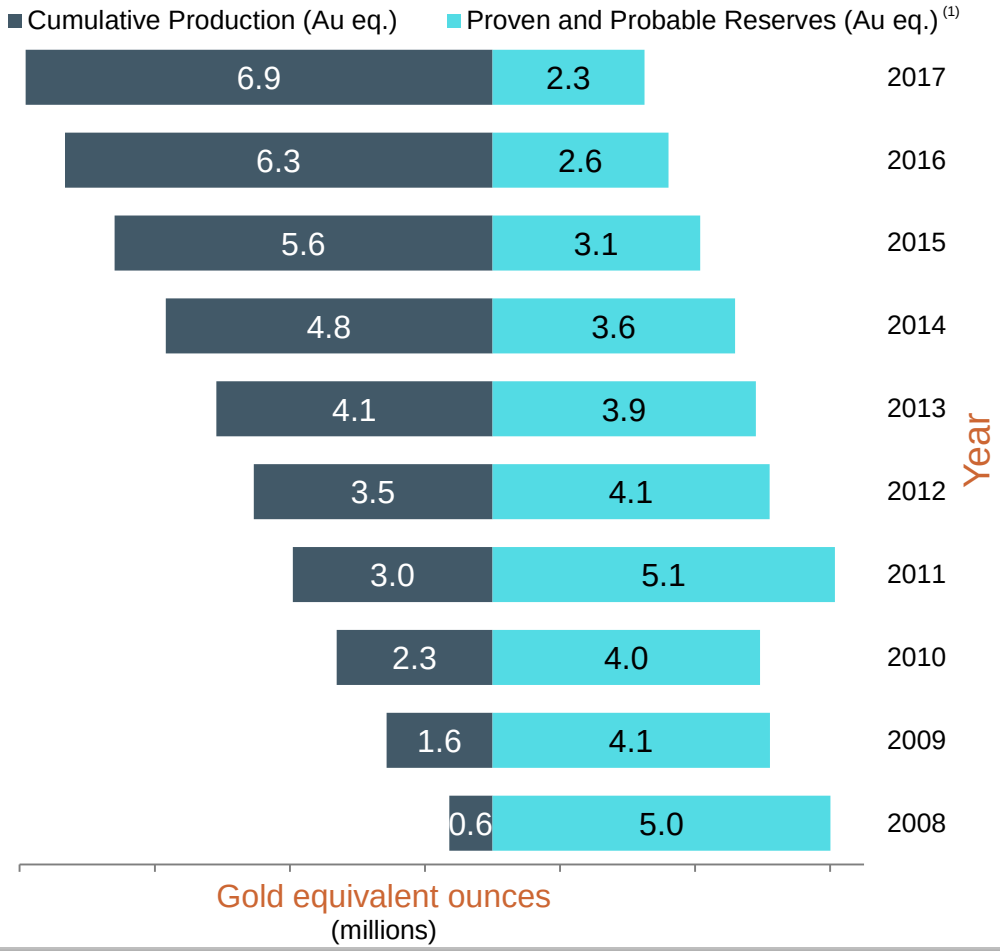

For additional information, please see Kinross' news release dated February 14, 2018 and Appendices A and B, which are available on our website at www.kinross.com.

1-YEAR MINE LIFE EXTENSION IN RUSSIA

Continuing our track record of adding reserves to offset depletion at Kupol and Dvoinoye

- Estimated mill production extended to 2022, another **1-year addition**
  - Result of mine plan optimization and exploration additions
- Continue to be encouraged by potential for future resource additions through exploration

(1) Please refer to endnote #1.

BALD MOUNTAIN

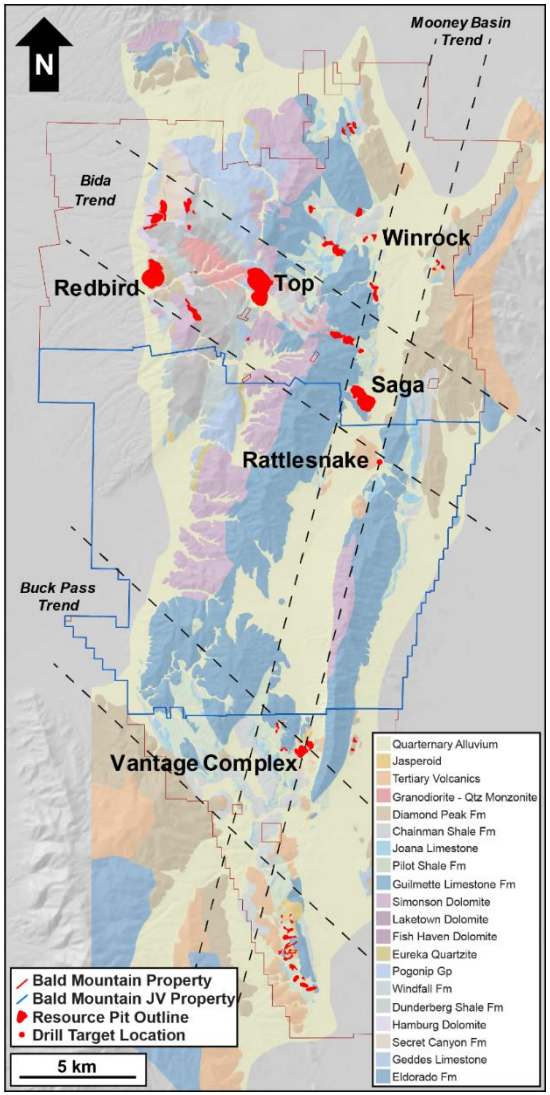

Kinross envisions Bald Mountain as a long-life asset with significant upside potential and mineral resource growth

2017 program largely focused on target identification

- Targeted extensions at existing pits in order to support operational planning and grow the existing mineral resource estimates

2018 exploration plan

- Planning infill drill programs with goal of upgrading mineral resource estimates to reserves at several targets in both North and South areas
- Also plan to conduct exploration work on earlier stage targets within the large Bald Mountain land package

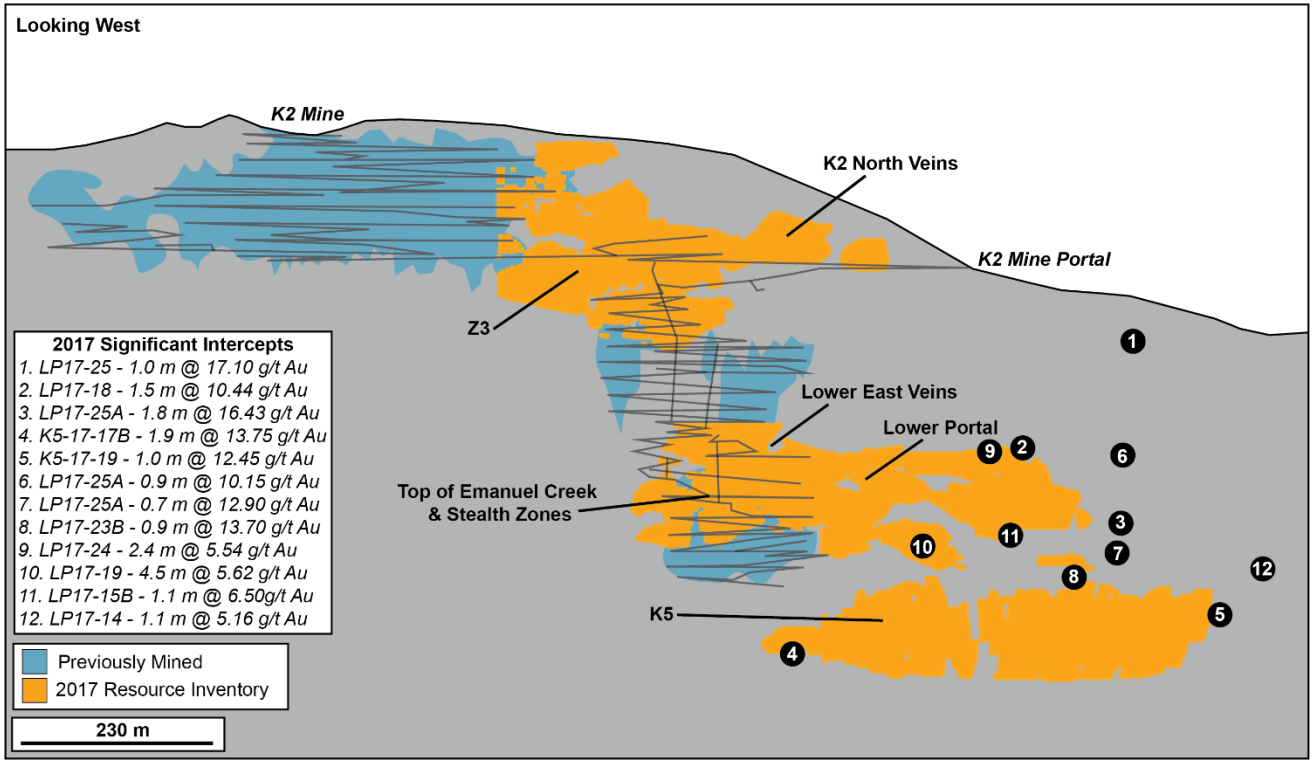

For additional information, please see Kinross' news release dated February 14, 2018 and Appendices A and B, which are available on our website at www.kinross.com.

CURLEW DISTRICT

Promising underground opportunities in the Curlew District; drilling to define gaps and extend mineralization along strike

- In 2018, we plan to dewater and rehabilitate the historic K2 mine in order to conduct exploration drilling from underground to better target the extensions of mineralization identified in 2017

For additional information, please see Kinross' news release dated February 14, 2018 and Appendices A and B, which are available on our website at www.kinross.com.

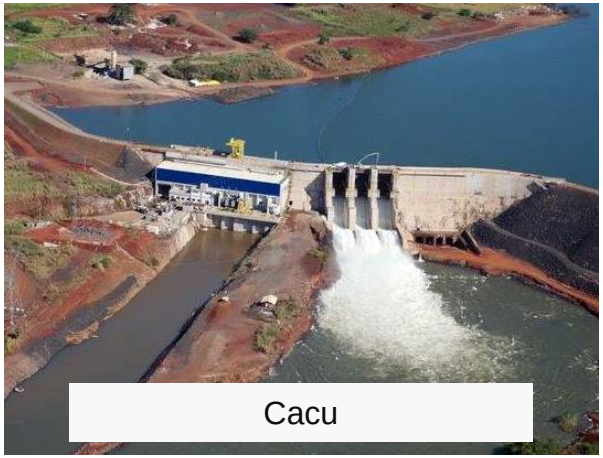

Appendix

OVERVIEW OF ACQUIRED POWER PLANTS

Agreement to acquire the Barra dos Coquieros (BCQ) and Cacu hydro power plants

Location	• Both are located on the Claro River in the State of Goias, approximately 660km west of Paracatu • No additional infrastructure is required to provide power to the mine site
Generation capacity	• Combined installed capacity of 155 MW • Expected to meet approximately 70% of Paracatu's future power needs ▪ Remainder expected to be fulfilled from third party suppliers under fixed-term power purchase agreements
Long life assets	• Both plants commissioned in 2010 and are in good working condition • Concessions expire in 2037, after Paracatu's estimated mine life of 2032

Barra dos Coquieros

Cacu

LA COIPA RESTART PROJECT: PFS RESULTS

Project expected to generate a 20% IRR at an assumed gold price of $1,200 per ounce

- PFS based on using existing infrastructure to blend and process higher grade material from the recently delineated Phase 7 deposit with oxide/transition material from the existing Puren deposit

	Life of Mine Estimates (100% basis)(i)
Life of Mine	5.5 years
Total ounces recovered	1.03 million gold equivalent ounces
Average annual production	207,000 gold equivalent ounces per year
Average cost of sales	$674 per gold equivalent ounce
Average all-in sustaining cost(ii)	$767 per gold equivalent ounce
Initial capital	$94 million
Pre-Stripping	$105 million
IRR (after-tax)	20%
NPV(iii)	$120 million

(i) Summary results are shown on a 100% basis, however, Kinross has a 65% interest in Puren and currently holds a 50% interest in the Phase 7 deposit but has entered into an agreement whereby it has agreed to purchase the other 50% that it does not currently own.

(ii) All-in sustaining cost includes operating costs, sustaining capital, and post start-up capitalized stripping and does not include estimated initial capital expenditures of $94 million and estimated pre-stripping of $105 million, and any exploration, income taxes and non-cash items related to reclamation or allocation of regional or corporate overhead costs. This differs from the World Gold Council definition of all-in sustaining cost.

(iii) After tax, 5% discount rate.

APPENDIX

LA COIPA RESTART PROJECT: PFS RESULTS

- The pre-feasibility study estimates a 5.5 year mine life, following receipt of permits and commencement of stripping
  - Processing expected to commence 1.5 years after pre-stripping has been initiated and continue for 4 years

ADDITIONAL OPERATING METRICS

	Life of Mine Estimates
Mill throughput capacity	13,000 tonnes per day
Average mining rate	80,000 tonnes per day
Average gold grade	1.69 g/t
Average silver grade	61.5 g/t
Average gold recovery	76%
Average silver recovery	59%
Strip ratio (waste:ore)	5.0

KEY ASSUMPTIONS

	Assumptions
Gold price	$1,200 per oz.
Silver price	$17 per oz.
Oil price	$65 per barrel
Chilean Peso	600 to the US dollar
Discount rate	5%

GOLD PRICE SENSITIVITY

	$1,100	$1,200	$1,300
IRR	15%	20%	26%

ENDNOTES

1) Mineral reserves and mineral resources are estimates. For more information regarding Kinross' 2017 mineral reserve and mineral resource estimates, please refer to our Annual Mineral Reserve and Mineral Resource Statement as at December 31, 2017 contained in our news release dated February 14, 2018, which is available on our website at www.kinross.com. Kinross' Annual Mineral Reserve and Mineral Resource Statements for previous years (2008 – 2017) are also available on our website at www.kinross.com.

2) For more information regarding Kinross' production, cost, overhead expense and capital expenditures outlook for 2018, please refer to the news release dated February 14, 2018 which is available on our website at www.kinross.com. Kinross' outlook for 2018 represents forward-looking information and users are cautioned that actual results may vary. Please refer to the Cautionary Statement on Forward-Looking Information on slide 2 of this presentation and in our news release dated February 14, 2018, available on our website at www.kinross.com.

3) Unless otherwise noted, gold equivalent production, gold equivalent ounces sold and production cost of sales figures in this presentation are based on Kinross' 90% share of Chirano production and sales.

4) Attributable production cost of sales per gold equivalent ounce sold and per gold ounce sold on a by-product basis, all-in sustaining cost per gold equivalent ounce sold and per gold ounce sold on a by-product basis, adjusted net earnings attributable to common shareholders, and adjusted operating cash flow numbers are non-GAAP financial measures. For more information and reconciliations of these non-GAAP measures for the three months and twelve months ended December 31, 2017, please refer to the news release dated February 14, 2018, under the heading "Reconciliation of non-GAAP financial measures," available on our website at www.kinross.com.
