Cautionary Statement on Forward-Looking Information

All statements, other than statements of historical fact, contained or incorporated by reference in or made in giving this presentation, including any information as to the future performance of Kinross, constitute "forward looking statements" within the meaning of applicable securities laws, including the provisions of the Securities Act (Ontario) and the provisions for "safe harbour" under the United States Private Securities Litigation Reform Act of 1995 and are based on expectations, estimates and projections as of the date of this presentation. Forward looking statements include, without limitation, possible events; opportunities; statements with respect to possible events or opportunities; estimates and the realization of such estimates; future development, mining activities, production and growth, including but not limited to cost and timing; success of exploration or development of operations; the future price of gold and silver; currency fluctuations; expected capital expenditures and requirements for additional capital; government regulation of mining operations and exploration; environmental risks; unanticipated reclamation expenses; and title disputes. The words "plans", "expects", "subject to", "budget", "scheduled", "timeline", "projected", "pro forma", "estimates", "envision", "view", "forecasts", "guidance", "conceptual", "target", "possible", "illustrative", "model", "opportunity", "potential", "intends", "anticipates" or "believes", or variations of such words and phrases or statements that certain actions, events or results "may", "can", "could", "would", "should", "might", "indicates", "will be taken", "become", "create", "occur", or "be achieved", and similar expressions identify forward looking statements. Forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable by Kinross as of the date of such statements, are inherently subject to significant business, economic and competitive uncertainties and contingencies. Statements representing management's financial and other outlook have been prepared solely for purposes of expressing their current views regarding the Company's financial and other outlook and may not be appropriate for any other purpose. Many of these uncertainties and contingencies can affect, and could cause, Kinross' actual results to differ materially from those expressed or implied in any forward looking statements made by, or on behalf of, Kinross. There can be no assurance that forward looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. All of the forward looking statements made in this presentation are qualified by these cautionary statements, and those made in our filings with the securities regulators of Canada and the U.S., including but not limited to those cautionary statements made in the "Risk Factors" section of our most recently filed Annual Information Form, the "Risk Analysis" section of our FYE 2009 Management's Discussion and Analysis and the "Cautionary Statement on Forward-Looking Information" in our news release dated November 3, 2010, to which readers are referred and which are incorporated by reference in this presentation, all of which qualify any and all forward-looking statements made in this presentation. These factors are not intended to represent a complete list of the factors that could affect Kinross. Kinross disclaims any intention or obligation to update or revise any forward-looking statements or to explain any material difference between subsequent actual events and such forward-looking statements, except to the extent required by applicable law.

Other information

Where we say "we", "us", "our", the "Company", or "Kinross" in this presentation, we mean Kinross Gold Corporation and/or one or more or all of its subsidiaries, as may be applicable. The technical information about the Company's mineral properties contained in this presentation has been prepared under the supervision of Mr. Rob Henderson, an officer of the Company who is a "qualified person" within the meaning of National Instrument 43-101 ("NI 43-101"). The technical information about the Tasiast mineral resource contained in this presentation has been prepared under the supervision of Mr. Nic Johnson, who is a "qualified person" with the meaning of NI 43-101.

2010 Outlook[(1)]

Production and Costs

Country	Production (000 ounces)	Cost of Sales / oz.
USA	690 – 745	$480 – 520
Russia[(8)]	495 – 525	$340 – 365
Brazil	510 – 580	$490 – 555
Chile	350 – 380	$700 – 720
Kinross (w/o West Africa)	**2.2 mm oz.**	**$495 – 510**
West Africa[(8,9)]	**135 – 155**	**$650 – 675**
Total Kinross:	**2.30 – 2.35 mm oz**	**$505 – 520**

Key Sensitivities: *Approximately 50% -60% of the Company's costs are denominated in US dollars. A 10% change in foreign exchange could result in an approximate $7 impact on cost of sales per ounce. A $10 change in the price of oil could result in an approximate $3 impact on cost of sales per ounce. The impact on royalties of a $100 change in the gold price could result in an approximate $4 impact on cost of sales per ounce.*

Kinross Project Portfolio

KINROSS

Conceptual timeline based on current Company estimates.

Paracatu: 3rd Ball Mill Update

Lifting mill feed end to mill shell

Mill feed end lifted to mill shell

KINROSS

Paracatu: At-site Expansion

3rd Ball Mill

- Installing 3rd ball mill to increase throughput
- Procurement commitments at 90%
- Total project 60% complete; construction at site 40% complete
- On schedule for completion and commissioning in H1 2011

4th Ball Mill

- Allows Paracatu to sustain planned throughput of ~41 mtpa in future years
- Capital estimate: $145 mm (includes $120 mm for mill; $25 mm for additional truck and electric shovel)
- Expected to start-up in the first half of 2012

KINROSS

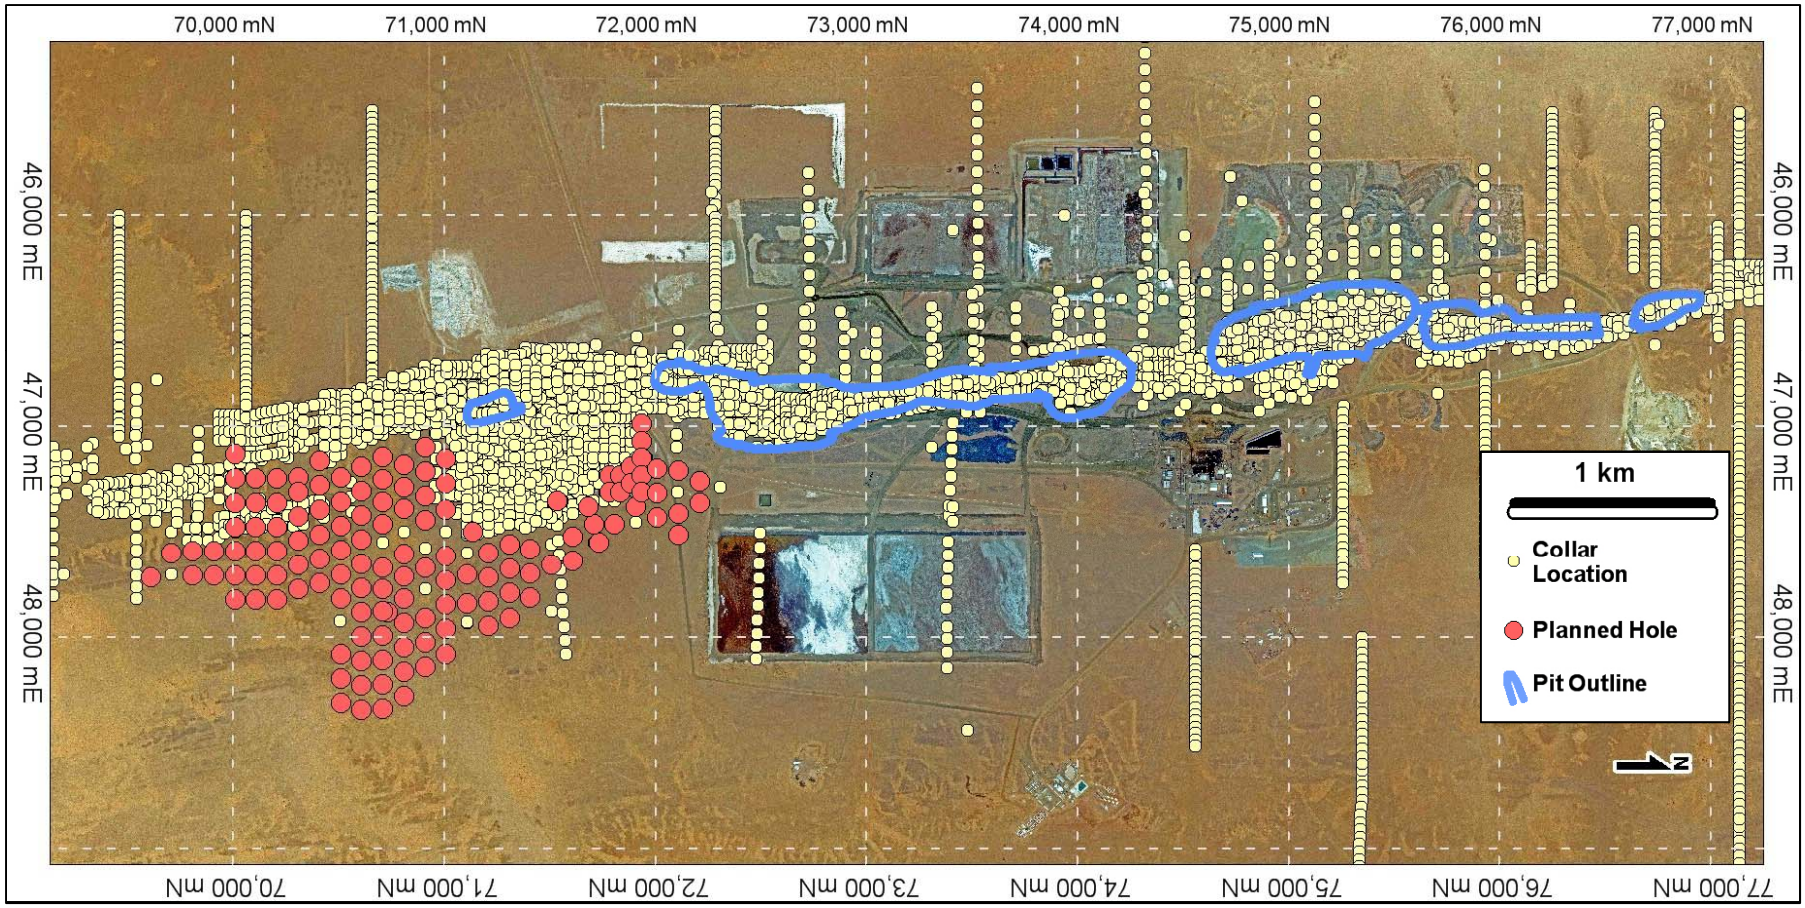

Exploration Update at Tasiast

- Added 11 drills; 22 rigs currently on-site
  - 16 currently on West Branch
- 64,682 m drilled in Q3 2010; 156,784 m drilled YTD
- Kinross plans an additional 50,000 m for rest of the year, plus 20,000 m beyond 8 km mine corridor
- Q4/10 exploration spending: ~$20.6 million
- Scoping study expected to be complete in December; feasibility study expected to be complete mid-2011

Endnotes

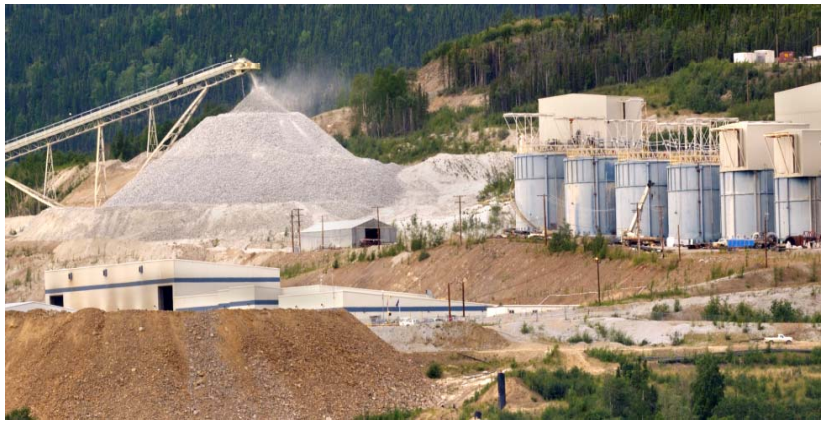

1) For more information regarding Kinross' production and cost outlook for 2010, including Kinross' production and cost estimate for the West African assets acquired through the acquisition of Red Back Mining, the please refer to the news release dated November 3, 2010, available on our website at www.kinross.com.
2) "Current" proven and probable mineral reserves reflect Kinross' Mineral Reserve and Mineral Resource Statement as at December 31, 2009, contained in our news release dated January 28, 2010, adjusted to reflect the sale of half of Kinross' 50% interest in the Cerro Casale project to Barrick in March 2010 and the acquisition of Tasiast and Chirano. For historical reserve and resource information, refer to Kinross' public filings, available on our website. Proven and Probable Mineral Reserves for Tasiast and Chirano reflect Red Back's Mineral Reserve and Mineral Resource statement as at December 31, 2009, adjusted to reflect updates in 2010. Please refer to the Red Back 2009 Annual Information Form and the Red Back news releases dated February 1, 2010, March 1, 2010, July 19, 2010 and September 7, 2010, which are available as Red Back documents on SEDAR at www.sedar.com. For historical mineral reserve and mineral resource relating the Tasiast and Chirano properties, please refer to Red Back's public filings, available under Red Back's profile on SEDAR.
3) Unless otherwise stated, all cash flow and cash flow per share figures in this presentation are adjusted operating cash flow.
4) Adjusted net earnings and adjusted operating cash flow numbers are non-GAAP financial measures which are meant to provide additional information and should not be used as a substitute for performance measures prepared in accordance with GAAP. For more information about these non-GAAP financial measures, and a reconciliation of these non-GAAP financial measures for the three months and nine months ended September 30, 2010 and September 30, 2009, please refer to the press release dated November 3, 2010, available on our website at www.kinross.com under the heading "Reconciliation of non-GAAP financial measures".
5) Cost of sales per ounce is defined as cost of sales as per the financial statements divided by the number of gold equivalent ounces sold, both reduced for Kupol sales attributable to a third-party 25% shareholder and for Chirano sales attributable to a 10% minority interest holder.
6) Cost of sales margin is defined as the average realized price of gold less attributable cost of sales per ounce.
7) For more information on Kinross' updated Measured and Indicated Mineral Resource and Inferred Mineral Resource estimate for Tasiast, please refer to the news release dated November 3, 2010, which is available on our website at www.kinross.com.
8) Unless otherwise stated, gold equivalent production, gold equivalent ounces sold and cost of sales figures in this presentation are based on Kinross' share of Kupol production (75%) and Chirano production (90%).
9) For details regarding the reconciliation of the cost of sales forecast for the West African assets, please refer to the section titled "Red Back Cost of Sales Reconciliation" in our news release dated November 3, 2010, available on our website at www.kinross.com.
