CAUTIONARY STATEMENT ON FORWARD-LOOKING INFORMATION

All statements, other than statements of historical fact, contained or incorporated by reference in or made in giving this presentation, including any information as to the future performance of Kinross, constitute "forward looking statements" within the meaning of applicable securities laws, including the provisions of the Securities Act (Ontario) and the provisions for "safe harbour" under the United States Private Securities Litigation Reform Act of 1995 and are based on expectations, estimates and projections as of the date of this presentation. Forward looking statements include, without limitation, possible events; opportunities; statements with respect to possible events or opportunities; estimates and the realization of such estimates; future development, mining activities, production and growth, including but not limited to cost and timing; success of exploration or development of operations; the future price of gold and silver; currency fluctuations; expected capital expenditures and requirements for additional capital; government regulation of mining operations and exploration; environmental risks; unanticipated reclamation expenses; and title disputes. The words "plans", "expects", "subject to", "budget", "estimate", "scheduled", "timeline", "projected", "pro forma", "estimates", "envision", "view", "forecasts", "guidance", "conceptual", "target", "possible", "illustrative", "model", "opportunity", "objective", "potential", "intends", "anticipates" or "believes", or variations of such words and phrases or statements that certain actions, events or results "may", "can", "could", "would", "should", "might", "indicates", "will be taken", "become", "create", "occur", or "be achieved", and similar expressions identify forward looking statements. Forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable by Kinross as of the date of such statements, are inherently subject to significant business, economic and competitive uncertainties and contingencies. Statements representing management's financial and other outlook have been prepared solely for purposes of expressing their current views regarding the Company's financial and other outlook and may not be appropriate for any other purpose. Many of these uncertainties and contingencies can affect, and could cause, Kinross' actual results to differ materially from those expressed or implied in any forward looking statements made by, or on behalf of, Kinross. There can be no assurance that forward looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. All of the forward looking statements made in this presentation are qualified by these cautionary statements, and those made in our filings with the securities regulators of Canada and the U.S., including but not limited to those cautionary statements made in the "Risk Factors" section of our most recently filed Annual Information Form, the "Risk Analysis" section of our FYE 2010 Management's Discussion and Analysis and the "Cautionary Statement on Forward-Looking Information" in our news release dated May 3, 2011, to which readers are referred and which are incorporated by reference in this presentation, all of which qualify any and all forward-looking statements made in this presentation. These factors are not intended to represent a complete list of the factors that could affect Kinross. Kinross disclaims any intention or obligation to update or revise any forward-looking statements or to explain any material difference between subsequent actual events and such forward-looking statements, except to the extent required by applicable law.

Other information

Where we say "we", "us", "our", the "Company", or "Kinross" in this presentation, we mean Kinross Gold Corporation and/or one or more or all of its subsidiaries, as may be applicable. The technical information about the Company's mineral properties contained in this presentation has been prepared under the supervision of Mr. Rob Henderson, an officer of the Company who is a "qualified person" within the meaning of National Instrument 43-101 ("NI 43-101"). The technical information about the White Gold mineral resource contained in this presentation has been prepared under the supervision of Mr. Wayne Barnett and Mr. Marek Nowak, who is a "qualified person" with the meaning of NI 43-101.

ADVANCING OUR PROJECTS

Tasiast

- 26 drill rigs active
- 135,000 metres drilled YTD
- Encouraging reconnaissance drilling result at the Charlize and C67 targets
- Feasibility study 62% complete and on schedule to be complete mid-2011
- Expected to commission in 2014

Fruta del Norte

- Commenced construction of the portal highwall
- Target 600 m of decline development by year-end
- Feasibility study expected to be complete H2 2011
- Expected to commission in 2014

Dvoinoye

- Drilling ahead of schedule
- Three rigs operational; fourth en route
- Completed portal; development of the decline advanced 100 m
- Feasibility study expected to be complete Q1 2012
- Expected to commission in 2013

Lobo-Marte

- 70% of 20,000 m drill program to be completed by end of May
- Encouraging results from Valy prospect 3 km south of the Lobo deposit
- Feasibility study expected to be complete in Q4 2011
- Expected to commission in 2014

KINROSS IN SOUTH AMERICA

KINROSS IN SOUTH AMERICA

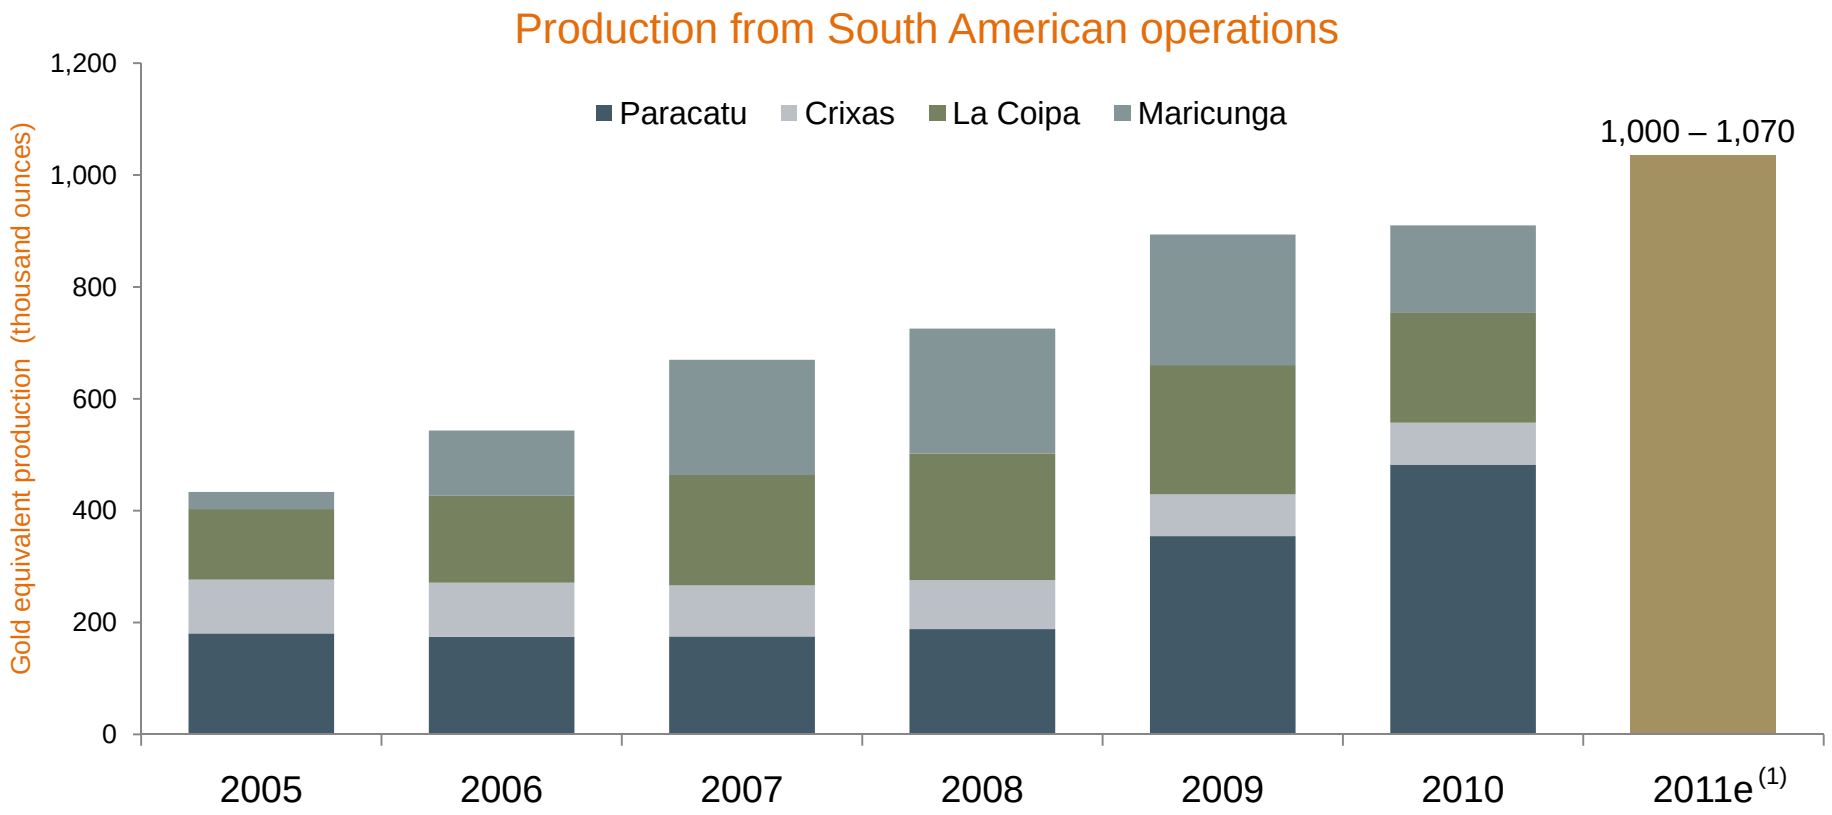

- Cornerstone region for Kinross with long operating history
  - Began operating in region in1998
  - 4 operating mines producing approx. 1.0 – 1.07 mm oz[(1)]
  - Approx. 39% of 2011 production
- Excellent growth potential
  - 3 major development projects
  - At-site expansion and optimizations
- Focused in highly prospective districts with exploration potential
- Mining friendly jurisdictions
- Expertise to capitalize on regional opportunities

(1) Refer to endnote #1.

SUBSTANTIAL PRODUCTION BASE

- Production from South America increases reflect portfolio upgrades and start-up of the Paracatu expansion

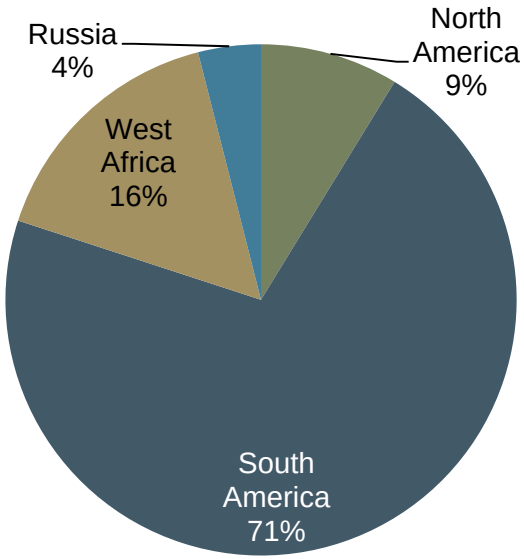

(1) Refer to endnote #1.

SIGNIFICANT % OF GOLD RESOURCES(5)

- Majority of Kinross' reserve and resource base located in South America
- Stable platform for growth in region where Kinross has track record & expertise

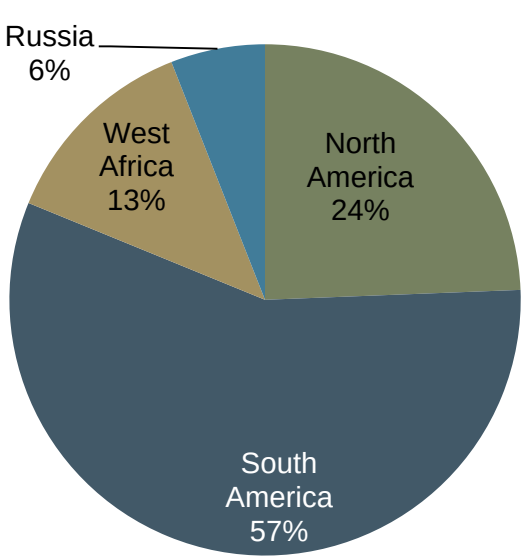

Proven & Probable Reserves

62.4 mm oz

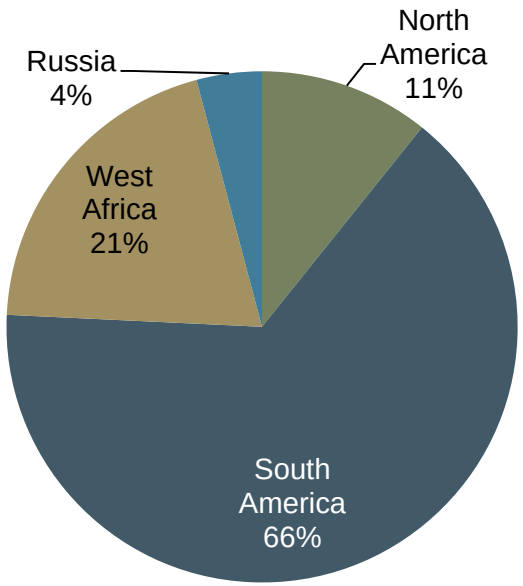

Measured & Indicated Resources

17.7 mm oz

Inferred Resources

24.0 mm oz

SOUTH AMERICAN PROJECT PIPELINE

Maricunga
Process enhancements

- ADR plant completed ahead of schedule
- Improves efficiency of gold stripping from solution
- SART plant on schedule to start-up in late 2011
- Additional copper production expect to result in a production cost credit of ~$40/oz(i)

Paracatu
At-site expansion

- Pre-commissioning of the 3rd ball mill began in April
- Commissioning to continue through Q2
- 4th ball mill to be delivered mid-2011
- Expected to sustain throughput of 41 mtpa in future years
- Expected to start-up in H1 2012

Fruta del Norte
New development

- Commenced construction of the portal highwall
- Target 600 m of decline development by year-end
- Feasibility study expected to be complete H2 2011

PARACATU, BRAZIL

PARACATU, BRAZIL

- Low-grade mine with long mine life
  - 18 mm oz of 2P reserves
  - 3.4 mm oz of M&I
  - 30+ year mine life
- First phase expansion started up in 2009
  - New crushing and processing plant
- 3rd and 4th ball mill additions expected to sustain throughput at 41 mtpa as harder ore is processed

2010 GOLD RESERVES AND RESOURCES[5]

	TONNES (thousands)	GRADE (g/t)	OUNCES (thousands)

PARACATU: AT-SITE EXPANSIONS

3rd Ball Mill

- Installing 3rd ball mill to increase throughput
- Mill commissioned and is now processing ore

Desulphurization circuit

- To reduce sulphur content in tailings and increase Plant 2 recoveries
- Expected to be operational Q3 2011

4th Ball Mill

- Project engineering well-advanced
- Mill to be delivered mid-2011
- Expected to commission in the first half of 2012

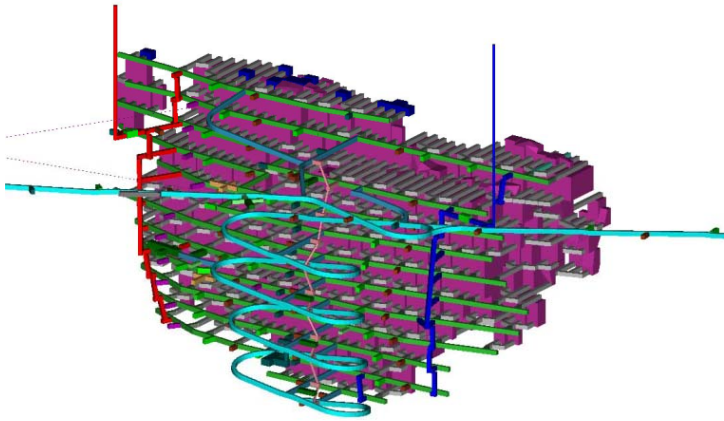

FRUTA DEL NORTE, ECUADOR

FRUTA DEL NORTE, ECUADOR

- Prepared pre-feasibility study and technical report
- Underground operation estimated 16-year mine life
- LOM avg. production estimate : 410k Au eq. oz. / year
  - Expected avg. gold grade of 8.07 g/t
  - Expected avg. gold recovery of 93%
- LOM avg. cost of sales expected to be ~$370/oz
- Phased commissioning:
  - Plant expected to process 2,500 tpd initially
  - POX circuit added 18 months post-commissioning
    - Ramp up over 3 years to ~5,000 tpd
- Estimated capital:
  - Phase 1: $700 mm
  - Phase 2: $400 mm

FRUTA DEL NORTE, ECUADOR

- Advancing the exploration decline:
  - Proceeding with underground ramp
  - Plan to develop 600 m of decline by year-end
  - Expected completion in Q1 2013
- Advancing permitting:
  - Expect to submit EIAs for mine and plant operations to the Ministry of Environment by mid-2011
- Government contract discussions in progress
- Feasibility study expected to be complete H2 2011
- Expected to commission in late 2014

LOBO-MARTE,

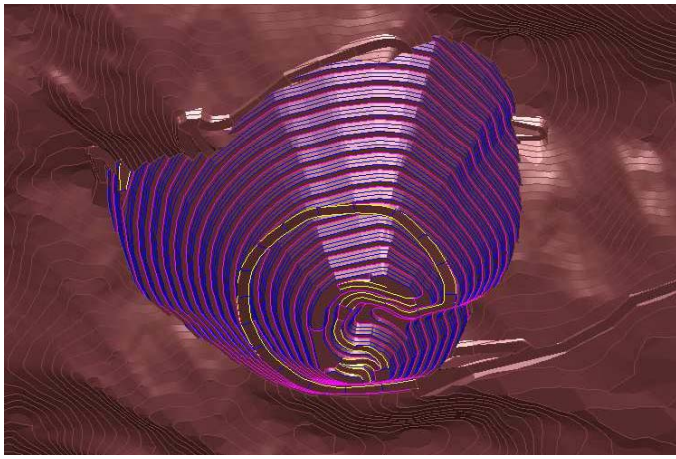

CHILE

LOBO-MARTE, CHILE

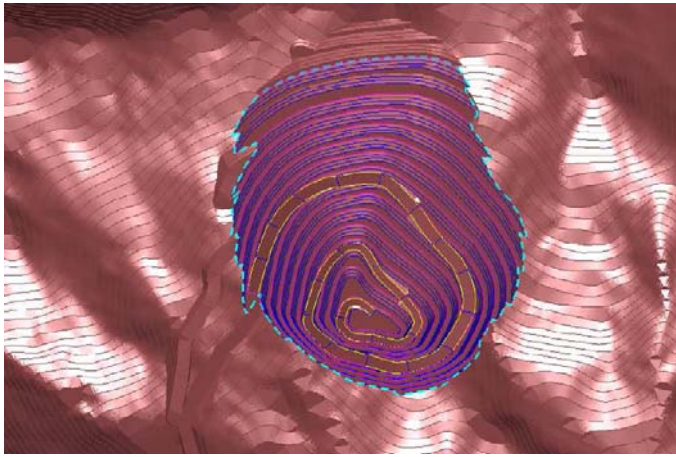

- Completed pre-feasibility study update
- 10-year mine life
- Expected 47,000 tpd heap leach with SART plant
- Annual production estimate: 350k oz. per year
  - Expected avg. grade: 1.17 g/t
  - Expected avg. recovery: 60-70%
- Cost of sales estimate: ~$500/oz;
  - Including by-product copper credit: ~$450/oz
- Initial capital estimate: $700 million
  - Optimized layout of site

Lobo Final Pit

Marte Final Pit

(5) Refer to endnote #5.

LOBO-MARTE, CHILE

- 20,000 m drill campaign 70% complete
  - Geotechnical drilling has been completed
  - Geotechnical and mine block models expected to be completed in Q3 2011
- Exploration drilling at Valy Prospect
  - Located 3 km south of Lobo deposit
  - Geological and drill exploration identified 2 new mineralized zones
- Feasibility study expected to be complete Q4 2011
  - Incorporating recent infill drill results
- Expected to commission in 2014

GROWTH THROUGH EXPLORATION

La Coipa

- Drilling in 2010 focused on the Can Can and Portezuelo targets to upgrade resources classification
- Following up on encouraging results encountered at Puren West and Pompeya

Fruta del Norte

- Restarted exploration on concessions outside of FDN project area in 2010
- Identified a number of encouraging targets
- Work is concentrated along the prospective Las Penas fault zone

Lobo-Marte

- Encouraging results from recent exploration drilling on the Valy target 3km south of the Lobo deposit
- 1 of 7 prospects located within the Lobo-Marte district concessions

WHY GOLD?
WHY KINROSS?
WHY NOW?

KEY OBJECTIVES FOR 2011

- ✓ Complete Tasiast scoping study
- ✓ Declare NI 43-101 resource at Dvoinoye
- ✓ Complete FDN pre-feasibility study
- ✓ Complete Dvoinoye scoping study
- ✓ Complete purchase of Kupol minority interest
- ✓ Commence construction on La Zarza exploration decline at Fruta del Norte
- ✓ Commissioning of the 3rd ball mill at Paracatu
- ❑ Complete feasibility studies at:
  - ❑ Tasiast (mid-2011)
  - ❑ FDN (H2 2011)
  - ❑ Lobo-Marte (Q4 2011)
- ❑ Commission SART and ADR plants at Maricunga
- ❑ Commence construction of 4th ball mill at Paracatu
- ❑ Negotiate Fruta del Norte exploitation agreement

WHY KINROSS?

1. Industry-leading growth from a senior gold producer
2. World-class projects with experienced teams and financial resources to build them
3. Attractive valuation

ENDNOTES

1) For more information regarding Kinross production and cost forecast for 2011 and production target for 2015, please refer to the press release dated May 3, 2011, available on our website at **www.kinross.com**.

2) Production cost per gold equivalent ounce is a non-GAAP measure defined as attributable production costs divided by the attributable number of gold equivalent ounces sold. Production cost is equivalent to total cost of sales per the financial statements less depreciation and amortization, and is generally consistent with cost of sales as reported under Canadian GAAP prior to the adoption of IFRS.

3) Attributable margin is defined as the average realized price of gold less attributable cost of sales per ounce.

4) Adjusted operating cash flow numbers are non-GAAP financial measures which are meant to provide additional information and should not be used as a substitute for performance measures prepared in accordance with GAAP. For more information about this non-GAAP measures, and a reconciliation of this non-GAAP financial measure for the three months ended March 31, 2011 and March 31, 2010, please refer to the press release dated May 3, 2011, and the news release dated February 16, 2011 the twelve months ended December 31, 2009 and December 31, 2010, under the heading “Reconciliation of non-GAAP financial measures”, both available on our website at **www.kinross.com**

5) For more information regarding Kinross’ mineral reserve and mineral resources, please refer to Kinross’ Annual Mineral Reserve and Mineral Resource Statement as at December 31, 2010, contained in the press release dated February 16, 2011, available on our website at **www.kinross.com**.
