

May 12-15

2015

KINROSS GOLD CORPORATION

Bank of America Merrill Lynch Global Mining, Metals & Steel Conference

CAUTIONARY STATEMENT ON FORWARD-LOOKING INFORMATION

All statements, other than statements of historical fact, contained or incorporated by reference in or made in giving this presentation and responses to questions, including but not limited to any information as to the future performance of Kinross, constitute “forward looking statements” within the meaning of applicable securities laws, including the provisions of the Securities Act (Ontario) and the provisions for “safe harbour” under the United States Private Securities Litigation Reform Act of 1995 and are based on expectations, estimates and projections as of the date of this presentation. Forward-looking statements contained in this presentation include those statements on slides with, and statements made under, the headings “The Way Forward - Principles for Building Value”, “Operational Excellence - Delivering Strong Performance”, “2015 Outlook - Production & Cost Guidance”, “Americas – New Processing Initiative at Paracatu”, “Americas - La Coipa Phase 7”, “Near-site Exploration Targets”, “Tasiast District Exploration”, “Solid Financial Position”, “Compelling Valuation”, “Kinross Value Proposition”, and “Explanatory Notes: Exploration” and include without limitation statements with respect to our guidance for production, production costs of sales, all-in sustaining cost and capital expenditures, continuous improvement and other cost savings opportunities, as well as references to other possible events include, without limitation, possible events; opportunities; statements with respect to possible events or opportunities; estimates and the realization of such estimates; future development, mining activities, production and growth, including but not limited to cost and timing; success of exploration or development of operations; the future price of gold and silver; currency fluctuations; expected capital requirements; government regulation; and environmental risks. The words “2015E”, “aim”, “anticipate”, “assumption”, “believe”, “budget”, “efforts”, “encouraging”, “envision”, “estimate”, “expects”, “forecast”, “focus”, “future”, “guidance”, “initiative”, “indicate”, “intend”, “objective”, “on track”, “opportunity”, “options”, “outlook”, “potential”, “plan”, “principle”, “priority”, “promising”, “prospect”, “pursue”, “risk”, “strategy”, “study”, “target”, “think”, “tracking”, or “way forward”, or variations of such words and phrases or statements that certain actions, events or results may, can, could, would, should, might, indicates, achieved or will be taken, and similar expressions identify forward looking statements. Forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable by Kinross as of the date of such statements, are inherently subject to significant business, economic and competitive uncertainties and contingencies. Statements representing management’s financial and other outlook have been prepared solely for purposes of expressing their current views regarding the Company’s financial and other outlook and may not be appropriate for any other purpose. Many of these uncertainties and contingencies can affect, and could cause, Kinross’ actual results to differ materially from those expressed or implied in any forward looking statements made by, or on behalf of, Kinross. There can be no assurance that forward looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. All of the forward looking statements made in this presentation are qualified by these cautionary statements, and those made in our filings with the securities regulators of Canada and the U.S., including but not limited to those cautionary statements made in the “Risk Factors” section of our most recently filed Annual Information Form, the “Risk Analysis” section of our FYE 2014 and Q1 2015 Management’s Discussion and Analysis, and the “Cautionary Statement on Forward-Looking Information” in our news release dated May 5, 2015, to which readers are referred and which are incorporated by reference in this presentation, all of which qualify any and all forward-looking statements made in this presentation. These factors are not intended to represent a complete list of the factors that could affect Kinross. Kinross disclaims any intention or obligation to update or revise any forward-looking statements or to explain any material difference between subsequent actual events and such forward-looking statements, except to the extent required by applicable law.

Other information

Where we say "we", "us", "our", the "Company", or "Kinross" in this presentation, we mean Kinross Gold Corporation and/or one or more or all of its subsidiaries, as may be applicable. The technical information about the Company’s mineral properties contained in this presentation has been prepared under the supervision of Mr. John Sims, an officer of the Company who is a “qualified person” within the meaning of National Instrument 43-101.

THE WAY FORWARD

PRINCIPLES FOR BUILDING VALUE

- Focus on operational excellence
- Quality over quantity
- Disciplined capital allocation
- Maintaining a strong balance sheet

DELIVERING OPERATIONAL EXCELLENCE

DELIVERING STRONG PERFORMANCE

11 consecutive quarters of meeting our operational targets

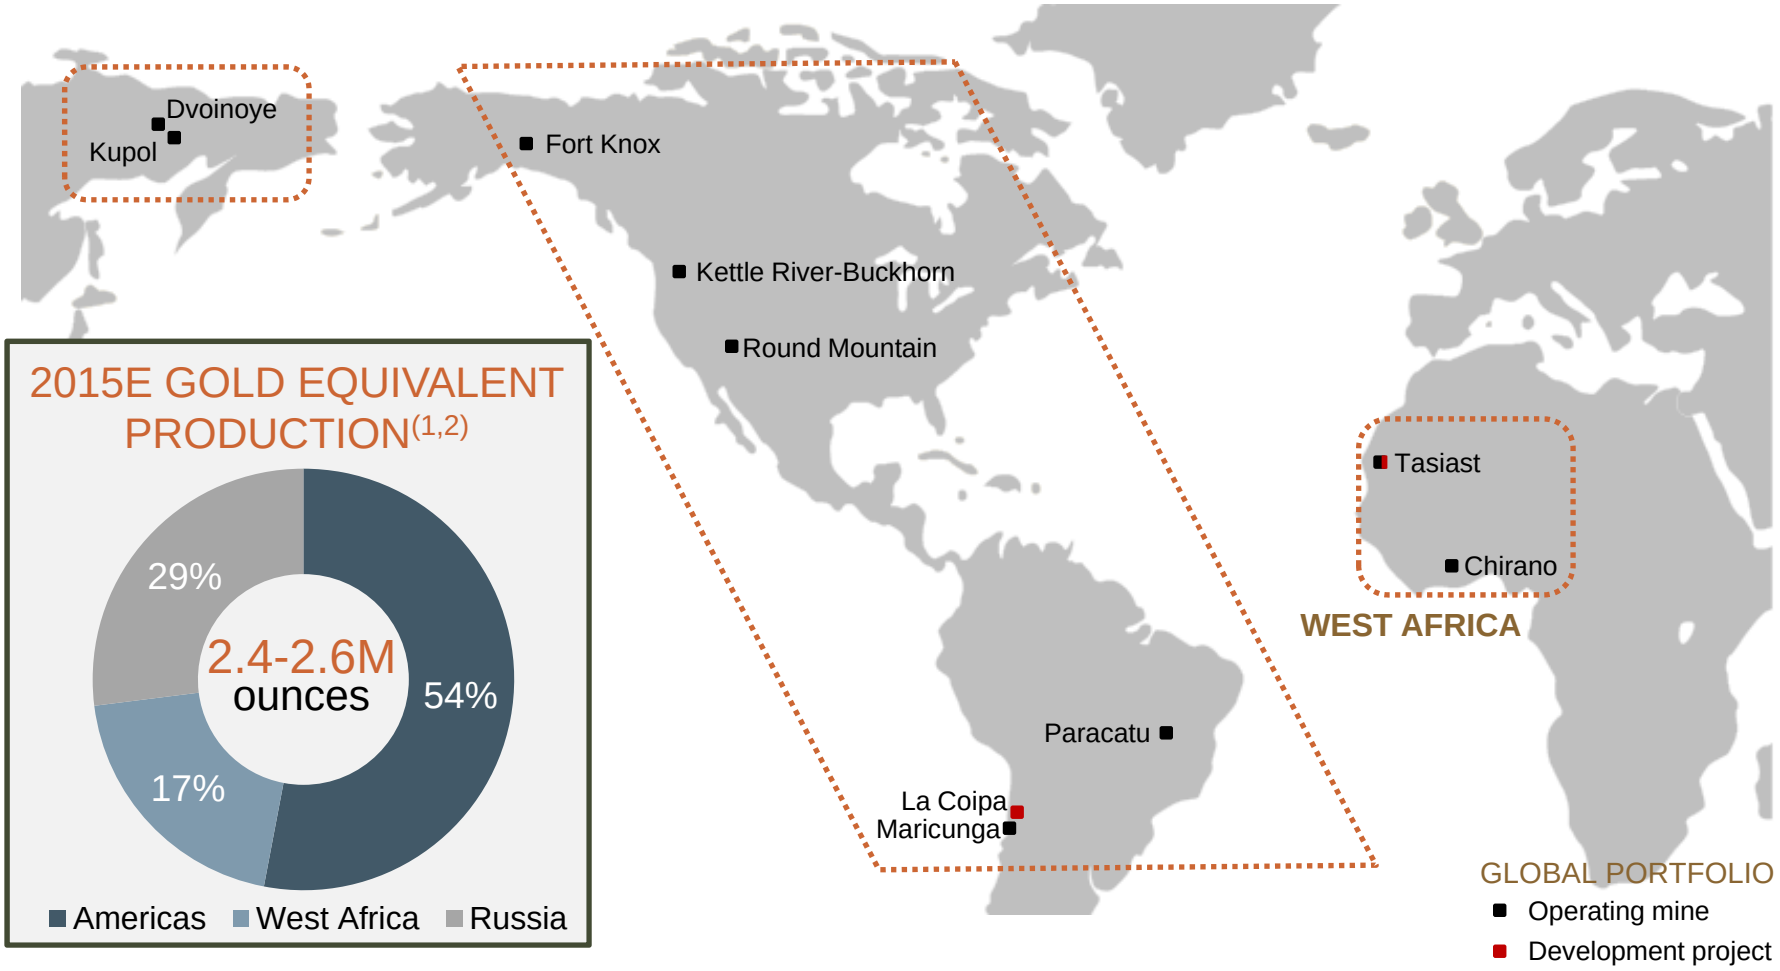

- Strong performance from operations delivered solid Q1 2015 results
  - Cost of sales and all-in sustaining costs favourable year-over-year
- On track to meet 2015 production, cost of sales and all-in sustaining cost guidance

	Q1 2014	Q1 2015	2015 GUIDANCE[1]
Gold equivalent production (oz.)[2]	664,690	629,360	2.4 to 2.6 Moz.
Production cost of sales ($/oz.)[3]	$727	$709	$720 to $780
All-in sustaining cost ($/oz.) [4]	$1,001	$964	$1,000 to $1,100
Capital Expenditures ($M)	$168.9	$149.5	$725

(1) Refer to endnote #1.
(2) Refer to endnote #2.
(3) Refer to endnote #3.
(4) Refer to endnote #4.

DIVERSIFIED PORTFOLIO OF OPERATING MINES

Over 50% of estimated 2015 gold equivalent production from mines located in the Americas

2015E GOLD EQUIVALENT PRODUCTION(1,2)

(1) Refer to endnote #1.
(2) Refer to endnote #2.

PRODUCTION & COST GUIDANCE(1)

- 2015 all-in sustaining cost expected to be $1,000-$1,100 per gold equivalent ounce(4)

Region	Gold Production (000 Au eq. oz.)	% of Total Production	Production Cost of Sales(3) ($/oz. Au eq.)
Americas	1,300 – 1,400	54%	$790 – $850
West Africa (attributable)	390 – 440	17%	$850 – $920
Russia	710 – 760	29%	$495 – $525
Total Kinross:	2.4 – 2.6 million	100%	$720 – $780/oz.

Assumptions: *Gold price – $1,200/oz; Silver price – $18/oz; Oil price – $90/bbl; Foreign exchange rates of: 2.5 Brazilian reais to the US dollar, 1.10 Canadian dollar to the US dollar, 40 Russian roubles to the US dollar, 575 Chilean pesos to the US dollar, 2.75 Ghanaian cedi to the US dollar, 290 Mauritanian ouguiya to the US dollar, and 1.30 US dollars to the Euro.*

Key Sensitivities: *Taking into account existing currency and oil hedges: 10% change in foreign exchange could result in an approximate $14 impact on production cost of sales per ounce; a 10% change in the exchange rate of the Russian rouble could result in an approximate $11 impact on Russian production cost of sales per ounce; a $10 change in the price of oil could result in an approximate $1 impact on production cost of sales per ounce; and the impact on royalties of a $100 change in the gold price could result in an approximate $3 impact on production cost of sales per ounce.*

(1) Refer to endnote #1.
(3) Refer to endnote #3.
(4) Refer to endnote #4.

AMERICAS

- Five mines located in the US, Brazil and Chile
- Over 50% of annual production is from the Americas region

AMERICAS

FIRST QUARTER 2015 HIGHLIGHTS

- Successfully recommissioned the mill at **ROUND MOUNTAIN**, which is now operating at full capacity
- **FORT KNOX** production lower compared with Q4 2014 due to expected seasonal slow down of production from the heap leach
- Expected decline in grades at **KETTLE RIVER-BUCKHORN** resulting in lower production and increase in costs

AMERICAS OPERATING RESULTS	Q1 2015	2015E[(1)]
Production (Au. Eq. oz.)	328,707	1.3 – 1.4M
Production cost of sales ($/oz.)[(3)]	$814	$790 - $850

(1) Refer to endnote #1.
(3) Refer to endnote #3.

MARICUNGA UPDATE

- Severe weather event in northern Chile occurred in late March
- Roads and power lines in the area were severely damaged, while Maricunga facilities did not sustain any damage
- Mining and crushing temporarily suspended
  - ADR plant continues to operate at 80% capacity
- Plan to restart in June with the support of an additional back-up power plant
- Main power lines expected to be restored in September
- Expected to have an impact on Maricunga's production and cost of sales in 2015; primarily in Q3
- Maintaining Americas regional guidance for 2015

NEW PROCESSING INITIATIVE AT PARACATU

Expected to start-up Q4, contributing ~11,000 ounces in 2015

- Low-cost, incremental production resulting from:
  - Enriched grades near discharge areas of the facility
  - Utilization of excess capacity in Plant 1 due to ore blending strategy
  - Lower energy consumption as no grinding required

SANTO ANTONIO TAILINGS REPROCESSING

Estimated production	34,000 ounces per year
Project life	Minimum of 9 years
Estimated production cost of sales	$400/oz.
Capital estimate	$20 million

LA COIPA PHASE 7

Pre-feasibility study on-track for completion in Q3 2015

- The pre-feasibility study will focus on:
  - The Pompeya deposit, where drilling has outlined higher average grades than previously processed at La Coipa;
  - Current oxide/transition mineral resources at the existing Puren deposit
- On-going exploration work to define other future opportunities

RUSSIA

- Continued strong performance from the high-grade, low-cost Kupol and Dvoinoye underground mines

RUSSIA

FIRST QUARTER 2015 HIGHLIGHTS

- First quarter production at the combined operation increased compared with Q4 2014
- Production cost of sales decreased to $476 per Au eq. oz.
  - Mainly due to savings associated with favourable foreign exchange movements
- Began to increase proportion of higher grade **DVOINOYE** material going through the mill
  - Expect to increase to 1,200 tpd from 1,000 tpd

RUSSIA OPERATING RESULTS	Q1 2015	2015E(1)
Production (Au. Eq. oz.)	185,729	710 – 760k
Production cost of sales ($/oz.)(3)	$476	$495 – $525

(1) Refer to endnote #1.
(3) Refer to endnote #3.

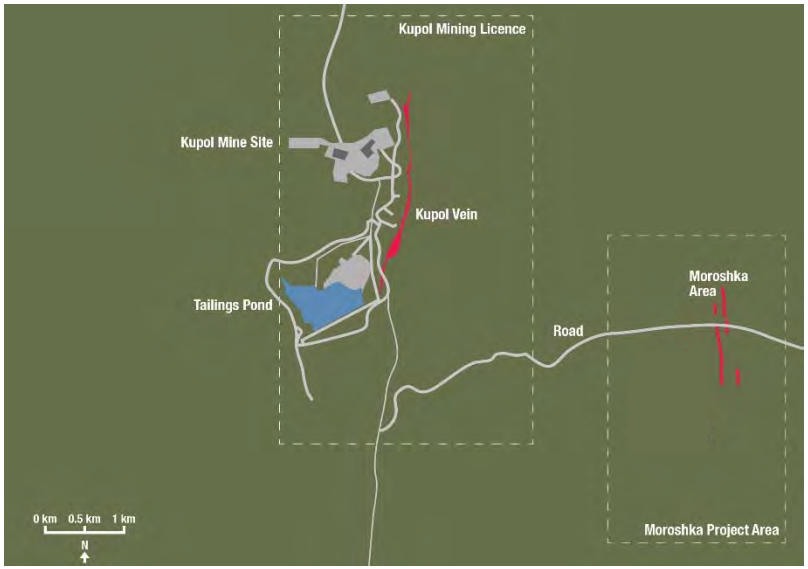

NEAR-SITE EXPLORATION TARGETS

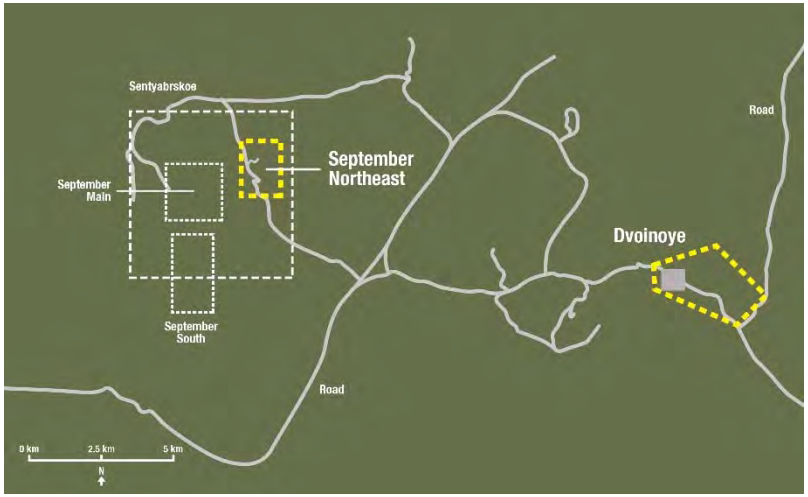

MOROSHKA

- Located approximately 4 km East of Kupol
- Drilling defined ~198koz. gold and ~2.3Moz. silver of Indicated resource(5)

SEPTEMBER NORTH-EAST

- Located approximately 15 km NW of Dvoinoye
- Drilling defined high-grade gold mineralization over a strike length of 150 m
- Work planned in 2015 to define an initial mineral resource estimate

(5) Refer to endnote #5.

For additional information, please see Kinross' news release dated February 10, 2015 and Appendices A and B, which are available on our website at www.kinross.com , as well as the Explanatory Notes available on slide 41 of this presentation.

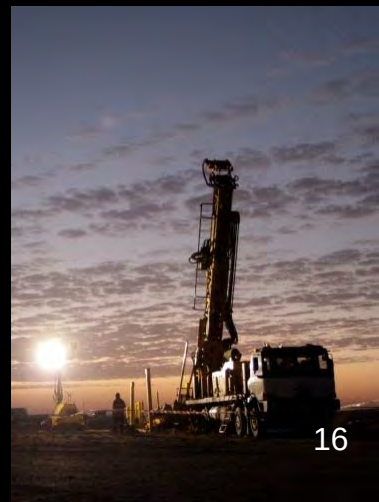

WEST AFRICA

- Record annual production for Tasiast and Chirano in 2014
- Strong focus on optimizing efficiency and performance

WEST AFRICA

FIRST QUARTER 2015 HIGHLIGHTS

- Ongoing continuous improvement initiatives focused on improving efficiency and reducing costs at **TASIAST**
- Minimal impact to **CHIRANO** production as a result of power rationing in Ghana
  - Prioritized use of power from the national grid to mining and milling operations
  - Supplemented with use of back-up generators
  - Increased diesel consumption by 50%, which impacted cost of sales

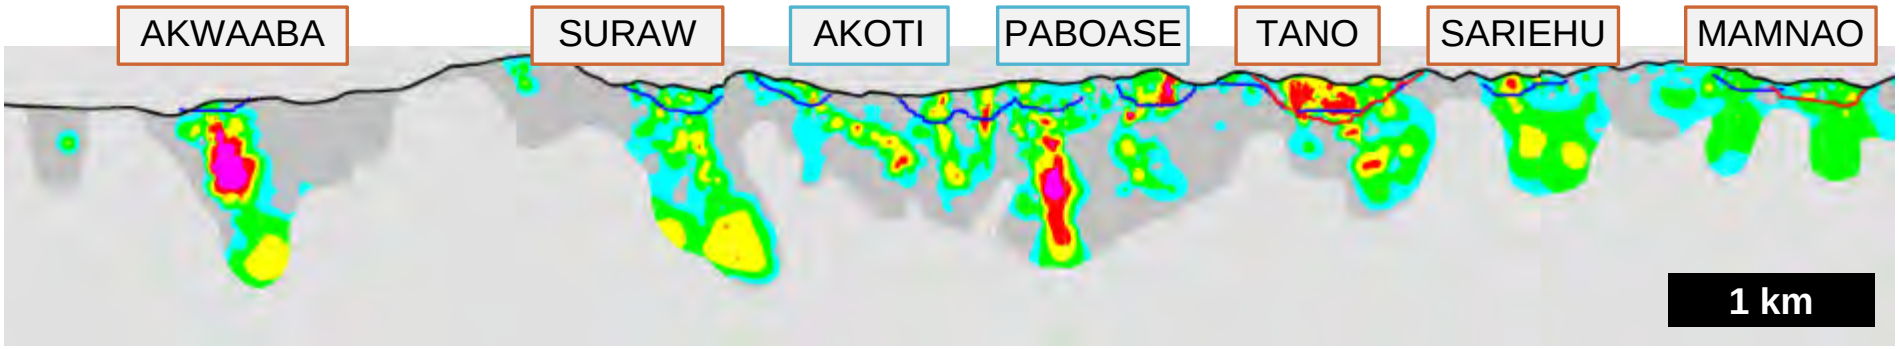

WEST AFRICA OPERATING RESULTS	Q1 2015	2015E[1]
Production (Au. Eq. oz.)[2]	114,924	390 – 440k
Production cost of sales ($/oz.)[3]	$800	$850 – $920

(1) Refer to endnote #1.
(2) Refer to endnote #2.
(3) Refer to endnote #3.

CHIRANO MINE LIFE EXTENSION

Mine life extension at one of Kinross' lowest cost operations

- Extension of estimated mine life to 2020 with additional ounces at two deposits:
  - Paboase (currently in production)
  - Akoti underground
- Provides additional time to pursue exploration potential in a highly-prospective region

TASIAST MILL EXPANSION

Attractive project in the right gold price environment

KINROSS NOT PROCEEDING WITH THE EXPANSION AT THE PRESENT TIME

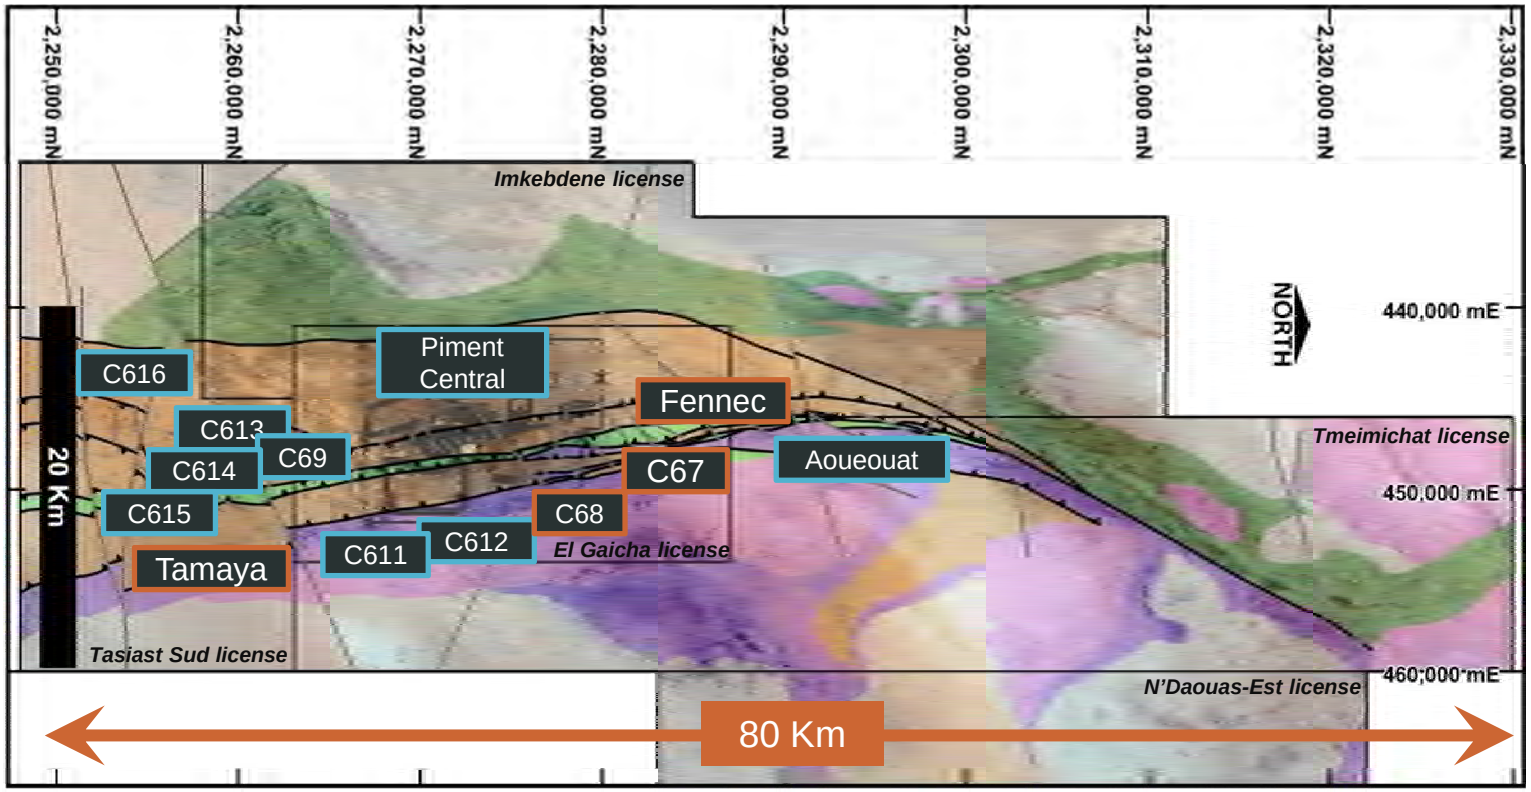

- Gold price outlook and impact on cash flow generation during 35-month construction period important factors
- Continue to believe Tasiast mill expansion offers a rare combination of large, low-cost production with relatively low execution risk
- Continuing effort to reduce operating costs at existing operation

TASIAST DISTRICT EXPLORATION

- Defined measured & indicated mineral resources totaling approximately 327,000 gold ounces at Fennec, C67 and C68 satellite deposits(5)
- Encouraging drill results at the Tamaya targets, with additional drilling planned for 2015

(5) Refer to endnote #5.

For additional information, please see Kinross' news release dated February 10, 2015 and Appendices A and B, which are available on our website at www.kinross.com , as well as the Explanatory Notes available on slide 42 of this presentation.

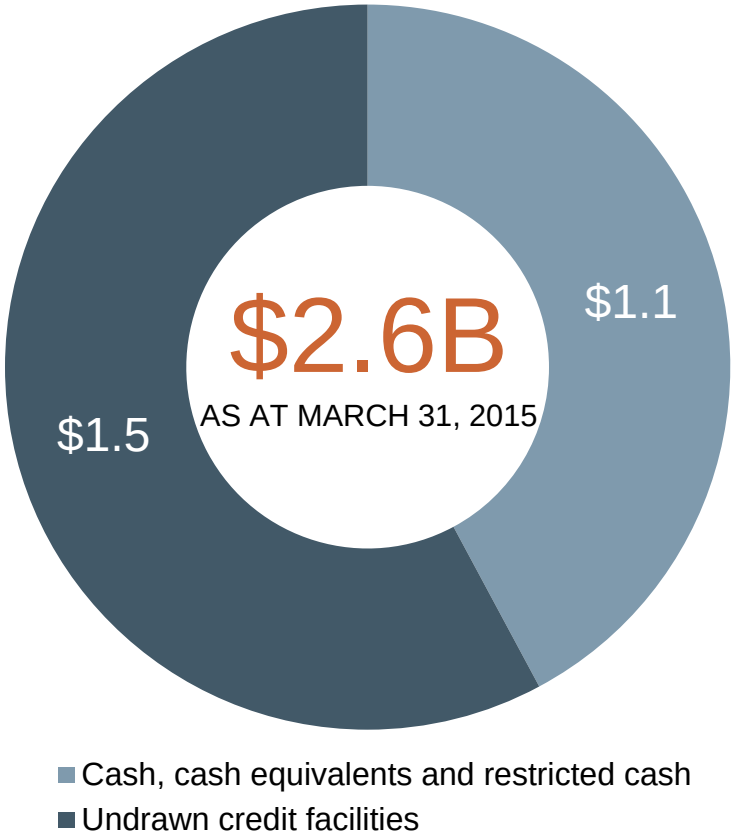

STRONG FINANCIAL DISCIPLINE

SOLID FINANCIAL POSITION

Balance sheet strength continues to be a priority objective

STRONG LIQUIDITY POSITION

MAINTAINING FINANCIAL FLEXIBILITY

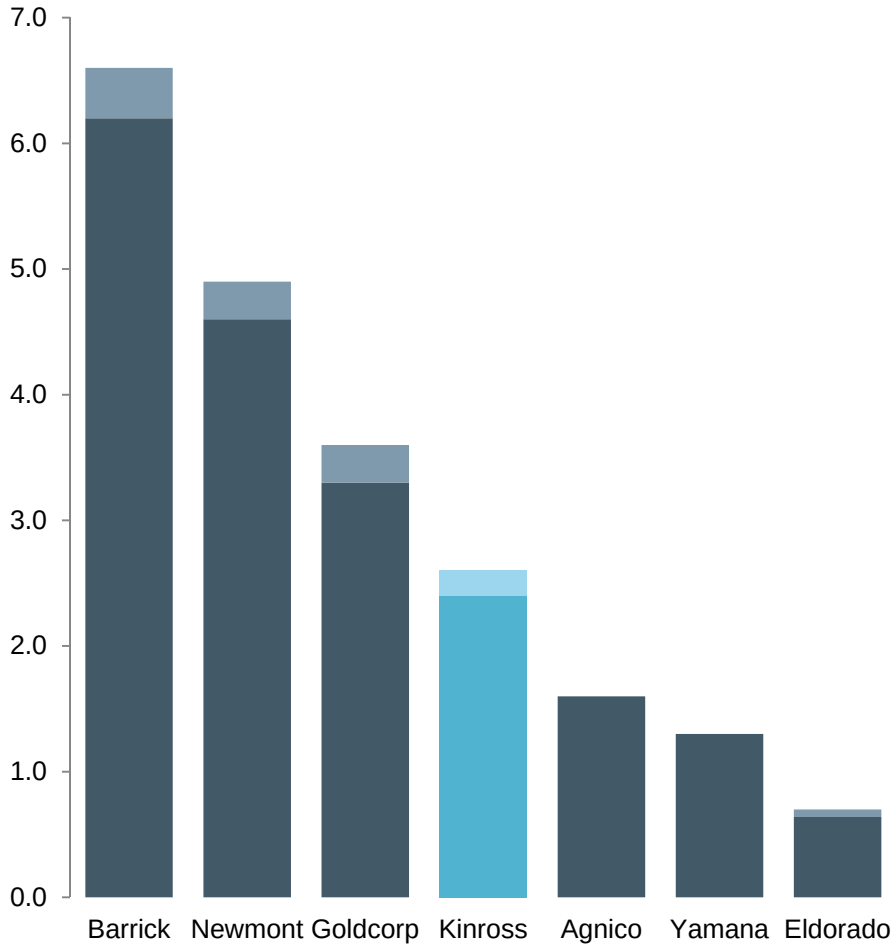

- Improved balance sheet in Q1 2015:
  - Repaid $30M of debt
  - Ended Q1 2015 with over $1.0B in cash, a $27M increase from year-end 2014
  - Reduced net debt to under $1.0B as at March 31
- Only near-term debt maturities are $250M senior notes due in 2016 and regular Kupol loan payments

2015E METRICS

Attractive value opportunity relative to peers, considering Kinross' annual production, cost structure, track record and growth opportunities

EV / 2015E EBITDA

P / 2015E OPERATING CF

Bloomberg analyst consensus – May 7, 2015.

KINROSS VALUE PROPOSITION

EXCELLENT OPERATIONAL TRACK RECORD

- 11 consecutive quarters of strong results

STRONG BALANCE SHEET

- $2.6B in liquidity and conservative net debt under $1.0B
- No significant debt maturities until 2016

ATTRACTIVE FUTURE GROWTH OPPORTUNITIES

- Advancing organic production initiatives at Paracatu and Chirano
- La Coipa Phase 7 pre-feasibility study expected to be complete in Q3 2015
- Tasiast expansion continues to be an attractive growth option

COMPELLING VALUATION

- Attractive value opportunity relative to peers, considering annual production, cost structure, track record and relatively low-risk growth opportunities

SHARE INFORMATION

K – Toronto Stock Exchange

KGC – New York Stock Exchange

APPENDIX

FORT KNOX, USA (100%)

Among the world's few cold climate heap leach facilities

- Impressive track record of operational excellence

OPERATING RESULTS[3]

	FY 2014	Q1 2015
Production (Au. Eq. oz.)	379,453	82,673
Production cost of sales ($/oz.)	$712	$672

2014 GOLD RESERVE AND RESOURCE ESTIMATES[5]

	TONNES (thousands)	GRADE (g/t)	OUNCES (thousands)
2P Reserves	163,844	0.46	2,398
M&I Resources	105,453	0.43	1,446
Inferred Resources	13,500	0.44	189

(3) Refer to endnote #3.
(5) Refer to endnote #5.

ROUND MOUNTAIN, USA (50%)

Round Mountain is a best-practice leader in many areas, including preventative maintenance

- Kinross-operated JV with Barrick
- Bulk tonnage open-pit operation

OPERATING RESULTS[3]

	FY 2014	Q1 2015
Production (Au. Eq. oz.)	169,839	40,262
Production cost of sales ($/oz.)	$855	$890

2014 GOLD RESERVE AND RESOURCE ESTIMATES[5]

	TONNES (thousands)	GRADE (g/t)	OUNCES (thousands)
2P Reserves	27,300	0.79	689
M&I Resources	23,768	0.58	440
Inferred Resources	7,861	0.51	130

(3) Refer to endnote #3.
(5) Refer to endnote #5.

KETTLE RIVER-BUCKHORN, USA (100%)

Low-cost, high-grade underground mine located in Washington state

- Significant cash flow contributor with costs among the lowest in the portfolio
- Small footprint operation

OPERATING RESULTS[3]

	FY 2014	Q1 2015
Production (Au. Eq. oz.)	123,382	24,265
Production cost of sales ($/oz.)	$678	$1,006

2014 GOLD RESERVE AND RESOURCE ESTIMATES[5]

	TONNES (thousands)	GRADE (g/t)	OUNCES (thousands)
2P Reserves	351	9.0	101
M&I Resources	18	7.27	4
Inferred Resources	26	7.19	6

(3) Refer to endnote #3.
(5) Refer to endnote #5.

PARACATU, BRAZIL (100%)

Large gold mine with a long mine life that extends to 2030

- Paracatu is among the world's largest gold operations with annual throughput of ~60Mt
- Achieved record annual production in 2014

OPERATING RESULTS[3]

	FY 2014	Q1 2015
Production (Au. Eq. oz.)	521,026	124,685
Production cost of sales ($/oz.)	$816	$752

2014 GOLD RESERVE AND RESOURCE ESTIMATES[5]

	TONNES (thousands)	GRADE (g/t)	OUNCES (thousands)
2P Reserves	749,125	0.44	10,510
M&I Resources	291,285	0.32	3,002
Inferred Resources	2,283	0.31	22

(3) Refer to endnote #3.
(5) Refer to endnote #5.

MARICUNGA, CHILE (100%)

High-altitude heap leach operation located in the highly prospective Maricunga District

- New team focused on improving operating efficiencies and reducing costs
- Record annual production in 2014

OPERATING RESULTS[3]

	FY 2014	Q1 2015
Production (Au. Eq. oz.)	247,216	56,822
Production cost of sales ($/oz.)	$953	$1,030

2014 GOLD RESERVE AND RESOURCE ESTIMATES[5]

	TONNES (thousands)	GRADE (g/t)	OUNCES (thousands)
2P Reserves	66,687	0.78	1,670
M&I Resources	195,462	0.64	3,996
Inferred Resources	57,439	0.58	1,065

(3) Refer to endnote #3.
(5) Refer to endnote #5.

KUPOL-DVOINOYE (100%)

Our Russian operations are a model for successfully operating in a remote location

- High-grade, low-cost underground mines
- Dvoinoye is the 4th mine Kinross has operated in its 20-year history in the region

OPERATING RESULTS[3]

	FY 2014	Q1 2015
Production (Au. Eq. oz.)	751,101	185,729
Production cost of sales ($/oz.)	$507	$476

2014 GOLD RESERVE AND RESOURCE ESTIMATES[5]

KUPOL	TONNES (thousands)	GRADE (g/t)	OUNCES (thousands)
2P Reserves	7,616	8.53	2,089
M&I Resources	386	15.97	198
Inferred Resources	474	12.55	191
DVOINOYE			
2P Reserves	2,137	14.97	1,028
M&I Resources	118	9.94	38
Inferred Resources	122	12.10	47

(3) Refer to endnote #3.
(5) Refer to endnote #5.

TASIAST, MAURITANIA (100%)

Operating mine with a large gold resource located in a prospective district

- Achieved record annual production in 2014
- Continuing effort to reduce operating costs at existing operation

OPERATING RESULTS[3]

	FY 2014	Q1 2015
Production (Au. Eq. oz.)	260,485	54,009
Production cost of sales ($/oz.)	$998	$1,002

2014 GOLD RESERVE AND RESOURCE ESTIMATES[5]

	TONNES (thousands)	GRADE (g/t)	OUNCES (thousands)
2P Reserves	161,822	1.77	9,196
M&I Resources	85,573	1.14	3,148
Inferred Resources	8,951	1.71	492

(3) Refer to endnote #3.
(5) Refer to endnote #5.

CHIRANO, GHANA (90%)

Cost reductions achieved at Chirano through transition to self-perform mining

- Chirano is now among our lowest cost operations following transition to self-perform mining in open pits and underground

OPERATING RESULTS[1,2]

	FY 2014	Q1 2015
Production (Au. Eq. oz.)	257,888	60,915
Production cost of sales ($/oz.)	$591	$639

2014 GOLD RESERVE AND RESOURCE ESTIMATES[5]

	TONNES (thousands)	GRADE (g/t)	OUNCES (thousands)
2P Reserves	12,055	2.38	924
M&I Resources	15,356	2.46	1,214
Inferred Resources	1,204	3.43	133

(1) Refer to endnote #1.
(2) Refer to endnote #2.
(5) Refer to endnote #5.

FUEL & CURRENCY HEDGES

Managing exposure to fluctuations in foreign currency and input commodity prices

Summary of foreign currency and energy hedges as at March 31, 2015

	% OF 2015 EXPOSURE HEDGED	AVERAGE RATE
Brazilian real	58%	2.52
Chilean peso	43%	605
Russian rouble	31%	36
Canadian dollar	68%	1.16
Oil & Fuel	65%(2)	*(Refer to note 1)*

(1) Consists of crude oil swap contracts (318,000 barrels at an average rate of $73.00) and gasoil swap contracts (27,000 metric tonnes at an average rate of $560.00) as at March 31, 2015.

(2) As a result of pre-paid fuel purchases mainly relating to the Company's Russian operations and fixed pricing in Ghana and Brazil, Kinross' unhedged, free-floating oil & fuel exposure for 2015 is ~22% of total consumption

CAPITAL EXPENDITURES GUIDANCE(1)

2015 capital expenditures are expected to be $725 million, including estimated capitalized interest of $40 million

REGION	SUSTAINING	NON-SUSTAINING	REGIONAL TOTAL
Americas	$350	$10	$360
West Africa	$70	$170	$240
Russia	$80	$ --	$80
Corporate	$5	$ --	$5
TOTAL	$505	$180	$685

OTHER EXPENDITURE OUTLOOK ($ millions)*

	2015E
Overhead expense	$205
Exploration	$95
Other operating costs (includes $11 million of care & maintenance at La Coipa)	$50
Depreciation, depletion & amortization ($/oz.)	$330

* Includes $30 million of equity-based compensation (non-cash)
(1) Refer to endnote #1.

FY2014 OPERATING RESULTS

OPERATION	PRODUCTION (Au eq. oz.)	PRODUCTION COST OF SALES[2] ($ per Au eq. oz.)
Fort Knox	379,453	$712
Round Mountain (50%)	169,839	$855
Kettle River – Buckhorn	123,382	$678
Paracatu	521,026	$816
Maricunga	247,216	$953
AMERICAS TOTAL	1,440,916	$804
Kupol-Dvoinoye	751,101	$507
RUSSIA TOTAL	751,101	$507
Tasiast	260,485	$998
Chirano (90%)[1]	257,888	$591
WEST AFRICA TOTAL	518,373	$795
KINROSS TOTAL	**2 ,710,390**	**$720**

EXPLANATORY NOTES: EXPLORATION

Kupol & Dvoinoye Exploration Results

All 28 drill holes in 2014 at Providence were diamond drill core holes (HQ or NQ core diameter). The Providence vein dips sub-vertically, therefore, drill holes are angled between minus 50° and 75° to the east and west.

The composite intervals reported for Providence diamond drill core are selected mainly by geological parameters but some of the intervals are included taking into account the elevated Au and Ag values of the assay data. The intervals are calculated by taking a weighted average of all gold and silver fire assay values included. No more than three consecutive metres of internal waste (<1 grams per tonne) is accepted. High grade samples are not excluded from the calculation. All composite assay intervals are reported as down-hole widths and are not considered true thickness.

Results reported for September Northeast (NE) are from 81 diamond drill core holes completed during 2014 and 38 surface trenches (stripped pavement).

Composite assay intervals reported for September NE diamond drill core results are calculated by taking a weighted average of all gold fire assay values equal to or above 2.0 gram per tonne gold. No more than three consecutive metres of internal waste (<2.0 grams per tonne) is accepted, high grade samples are not cut. True widths are estimated to be on average greater than 80% of the drilled intercept.

Results for the exploration drill campaign are reported as Au grams per tonne (Au g/t), Ag grams per tonne (Ag g/t) and as Au Equivalent grams per tonne (Au Eq g/t). Au Eq is calculated using Ag g/t / 63.64 and added to the Au g/t assay result.

Abbreviations used are:

NSI - No Significant Intersection;

BDL - Below Detection Limit;

TNS - Trench Not sampled

The reader is referred to the Kupol NI 43-101 Technical Report dated May 9, 2011, available under the Company's profile at www.sedar.com, for a full description of drilling methods, sampling procedures and QA/QC protocols. Samples from Providence and September NE are prepared and analyzed by fire assay using a 50 gram charge with a gravimetric finish at the Kupol mine site analytical laboratory in compliance with industry standards. Field duplicate samples are taken and blanks and standards are added to every batch submitted.

The technical information about the Company's drilling and exploration activities at Kupol and Dvoinoye contained in this news release has been prepared under the supervision of and verified by Mr. Sylvain Guerard, an officer with the Company who is a "qualified person" within the meaning of National Instrument 43-101. The drill hole data base including collar, survey, geology and assay information were reviewed by the "qualified person" and the composite assay information independently calculated and verified for accuracy of reporting. Assay certificates for the information disclosed in this news release were verified by the Regional Director Exploration, Russia, but not by Mr. Guerard as the "qualified person".

EXPLANATORY NOTES: EXPLORATION

Tasiast Exploration Results

Drill hole identifiers ending with suffix DD are diamond drill core holes (HQ diameter) and those ending with suffix RC are reverse circulation (RC) holes. Holes with "A" prefixing DD or RC are diamond core or reverse circulation re-drills of the original hole where significant deviation would have resulted in that hole missing the intended target.

Results provided for Tasiast include all exploration drill holes for which assay results were available from Tamaya at the time of preparation of this news release. Composite assay intervals reported for exploration drilling at Tasiast are calculated by taking a weighted average of all gold fire assay values equal to or above 0.3 g/t gold. No more than three consecutive metres of internal waste (<0.3 g/t gold) are accepted and high grade samples are cut to 20 grams per tonne gold. All assay intervals are reported as down-hole widths. True widths are estimated to be on average greater than 90% of the drilled intercept.

Composite intervals for reconnaissance reverse circulation holes are calculated by applying a 0.3 gram per tonne cut-off, no more than 6 metres of internal waste and no top cut. All assay intervals are reported as down-hole thicknesses. There is insufficient information on all targets to provide estimates of true thickness.

The reader is referred to the Tasiast NI 43-101 Technical Report dated March 31, 2014, available under the Company's profile at www.sedar.com, for a full description of drilling methods, sampling procedures and QA/QC protocols. Samples from Tasiast are prepared and analyzed by fire assay using a 50 gram charge with an AAS finish at ALS (Tasiast mine site, Johannesburg, South Africa and Vancouver, Canada) in compliance with industry standards. Field duplicate samples are taken and blanks and standards are added to every batch submitted. Selected samples from this lab are check assayed each month at other ALS and third party commercial laboratories worldwide.

The technical information about the Company's drilling and exploration activities at Tasiast contained in this news release has been prepared under the supervision of and verified by Mr. Sylvain Guerard, an officer with the Company who is a "qualified person" within the meaning of National Instrument 43-101. The drill hole data base including collar, survey, geology and assay information were reviewed by the "qualified person" and the composite assay information independently calculated and verified for accuracy of reporting. Assay certificates for the information disclosed in this news release were verified by the Regional Director Exploration, Africa, but not by Mr. Guerard as the "qualified person".

ENDNOTES

1) For more information regarding Kinross' production, cost and capital expenditures outlook for 2015, please refer to the news release dated February 10, 2015, available on our website at www.kinross.com. Kinross' outlook for 2015 represents forward-looking information and users are cautioned that actual results may vary. Please refer to the risks and assumptions contained in the Cautionary Statement on Forward-Looking Information on slide 2 of this presentation.

2) Unless otherwise noted, gold equivalent production, gold equivalent ounces sold and production cost of sales figures in this presentation are based on Kinross' 90% share of Chirano production and sales.

3) Attributable production cost of sales per gold equivalent ounce sold and per gold ounce on a by-product basis are non-GAAP measures. For more information and a reconciliation of this non-GAAP measure for the three months ended March 31, 2015 and 2014, please refer to the news release dated May 5, 2015, under the heading "Reconciliation of non-GAAP financial measures", available on our website at www.kinross.com.

4) All-in sustaining cost is a non-GAAP measure. For more information and a reconciliation of this non-GAAP measure for the three months ended March 31, 2015 and 2014, please refer to the news release dated May 5, 2015 under the heading "Reconciliation of non-GAAP financial measures", available on our website at www.kinross.com.

5) For more information regarding Kinross' mineral reserves and mineral resources, please refer to our Annual Mineral Reserve and Mineral Resource Statement as at December 31, 2014 contained in our news release dated February 10, 2015, which is available on our website at www.kinross.com.
