

September 2018

Delivering Value.

Kinross Gold Corporation

KINROSS 25 YEARS

Cautionary Statement on Forward-Looking Information

All statements, other than statements of historical fact, contained or incorporated by reference in or made in giving this presentation and responses to questions, including but not limited to any information as to the future performance of Kinross, constitute “forward looking statements” within the meaning of applicable securities laws, including the provisions of the *Securities Act* (Ontario) and the provisions for “safe harbor” under the *United States Private Securities Litigation Reform Act of 1995* and are based on expectations, estimates and projections as of the date of this presentation. Forward-looking statements contained in this presentation include those statements on slides with, and statements made under, the headings “”Kinross Value Proposition”, “Diversified Portfolio of Assets”, “Strong Operating Results”, ”2018E Production & Costs”, “Development Projects”, “Advancing Our Projects”, “2018E Capital Expenditures Outlook”, “Development Projects”, “Tasiast Phase One”, “Round Mountain Phase W Overview”, “Fort Knox Gilmore”, “Bald Mountain Vantage Complex”, “Russia Satellite Deposits”, “La Coipa Restart Project”, “1 Year Mine Life Extension in Russia”, and “Compelling Relative Value”, and include without limitation statements with respect to our guidance for production, production costs of sales, all-in sustaining cost and capital expenditures, permit applications and conversions, continuous improvement and other cost savings opportunities, as well as references to other possible events include, without limitation, possible events; opportunities; statements with respect to possible events or opportunities; estimates (including, without limitation, gold / mineral resources, gold / mineral reserves and mine life) and the realization of such estimates; future development, mining activities, production and growth, including but not limited to cost and timing; success of exploration or development of operations; the future price of gold and silver; currency fluctuations; expected capital requirements; government regulation; and environmental risks. The words “2018E”, “advancing”, “assumption”, “budget”, “continue”, “encouraging”, “envisions”, “estimate”, “expect”, “extends”, “feasibility”, “focus”, “guidance”, “invest”, “liquidity”, “on schedule”, “on track”, “objective”, “opportunity”, “optimize”, “plan”, “potential”, “priority”, “progressing”, “prospective”, or “scoping study”, or variations of or similar such words and phrases or statements that certain actions, events or results may, can, could, would, should, might, indicates, or will be taken, and similar expressions identify forward looking statements. Forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable by Kinross as of the date of such statements, are inherently subject to significant business, economic, legislative and competitive uncertainties and contingencies. Statements representing management’s financial and other outlook have been prepared solely for purposes of expressing their current views regarding the Company’s financial and other outlook and may not be appropriate for any other purpose. Many of these uncertainties and contingencies can affect, and could cause, Kinross’ actual results to differ materially from those expressed or implied in any forward looking statements made by, or on behalf of, Kinross. There can be no assurance that forward looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. All of the forward looking statements made in this presentation are qualified by these cautionary statements, and those made in our filings with the securities regulators of Canada and the U.S., including but not limited to those cautionary statements made in the “Risk Factors” section of our most recently filed Annual Information Form, the “Risk Analysis” section of our FYE 2017 and Q2 2018 Management’s Discussion and Analysis, and the “Cautionary Statement on Forward-Looking Information” in our news release dated August 1, 2018, to which readers are referred and which are incorporated by reference in this presentation, all of which qualify any and all forward-looking statements made in this presentation. These factors are not intended to represent a complete list of the factors that could affect Kinross. Kinross disclaims any intention or obligation to update or revise any forward-looking statements or to explain any material difference between subsequent actual events and such forward-looking statements, except to the extent required by applicable law.

Other information

Where we say "we", "us", "our", the "Company", or "Kinross" in this presentation, we mean Kinross Gold Corporation and/or one or more or all of its subsidiaries, as may be applicable.

The technical information about the Company’s mineral properties contained in this presentation has been prepared under the supervision of Mr. John Sims, an officer of the Company who is a “qualified person” within the meaning of National Instrument 43-101.

Kinross Value Proposition

Operational Excellence

Diverse portfolio of operating mines consistently meeting or outperforming operational targets

6 Consecutive Years

Met or **exceeded** guidance

Financial Strength & Flexibility

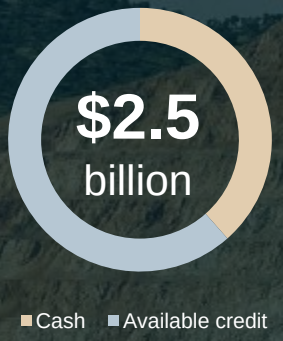

Maintaining strong balance sheet continues to be a priority objective

Repaid over **$1.0 billion** of debt over past 6 years

~$2.5 billion of liquidity

No debt maturities prior to 2021

Net debt to EBITDA: **0.7x**

Development Projects

Diverse portfolio of major projects and additional development opportunities

Relatively **low-risk** brownfields projects

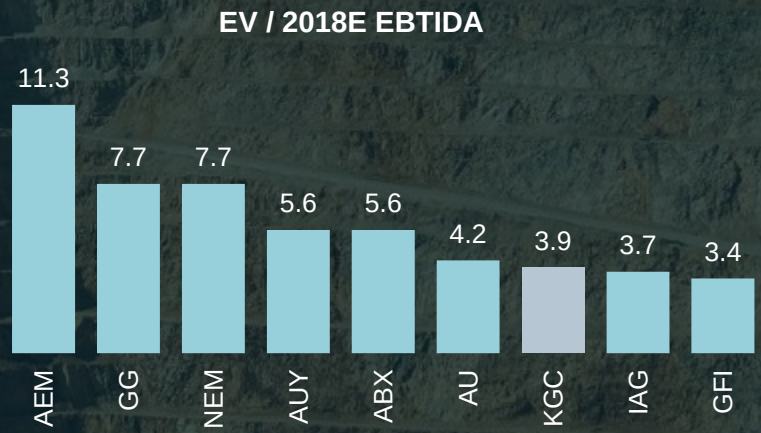

Located at or near **existing operations**

Benefits of **existing infrastructure**

Well-known mining jurisdictions

Compelling Relative Value

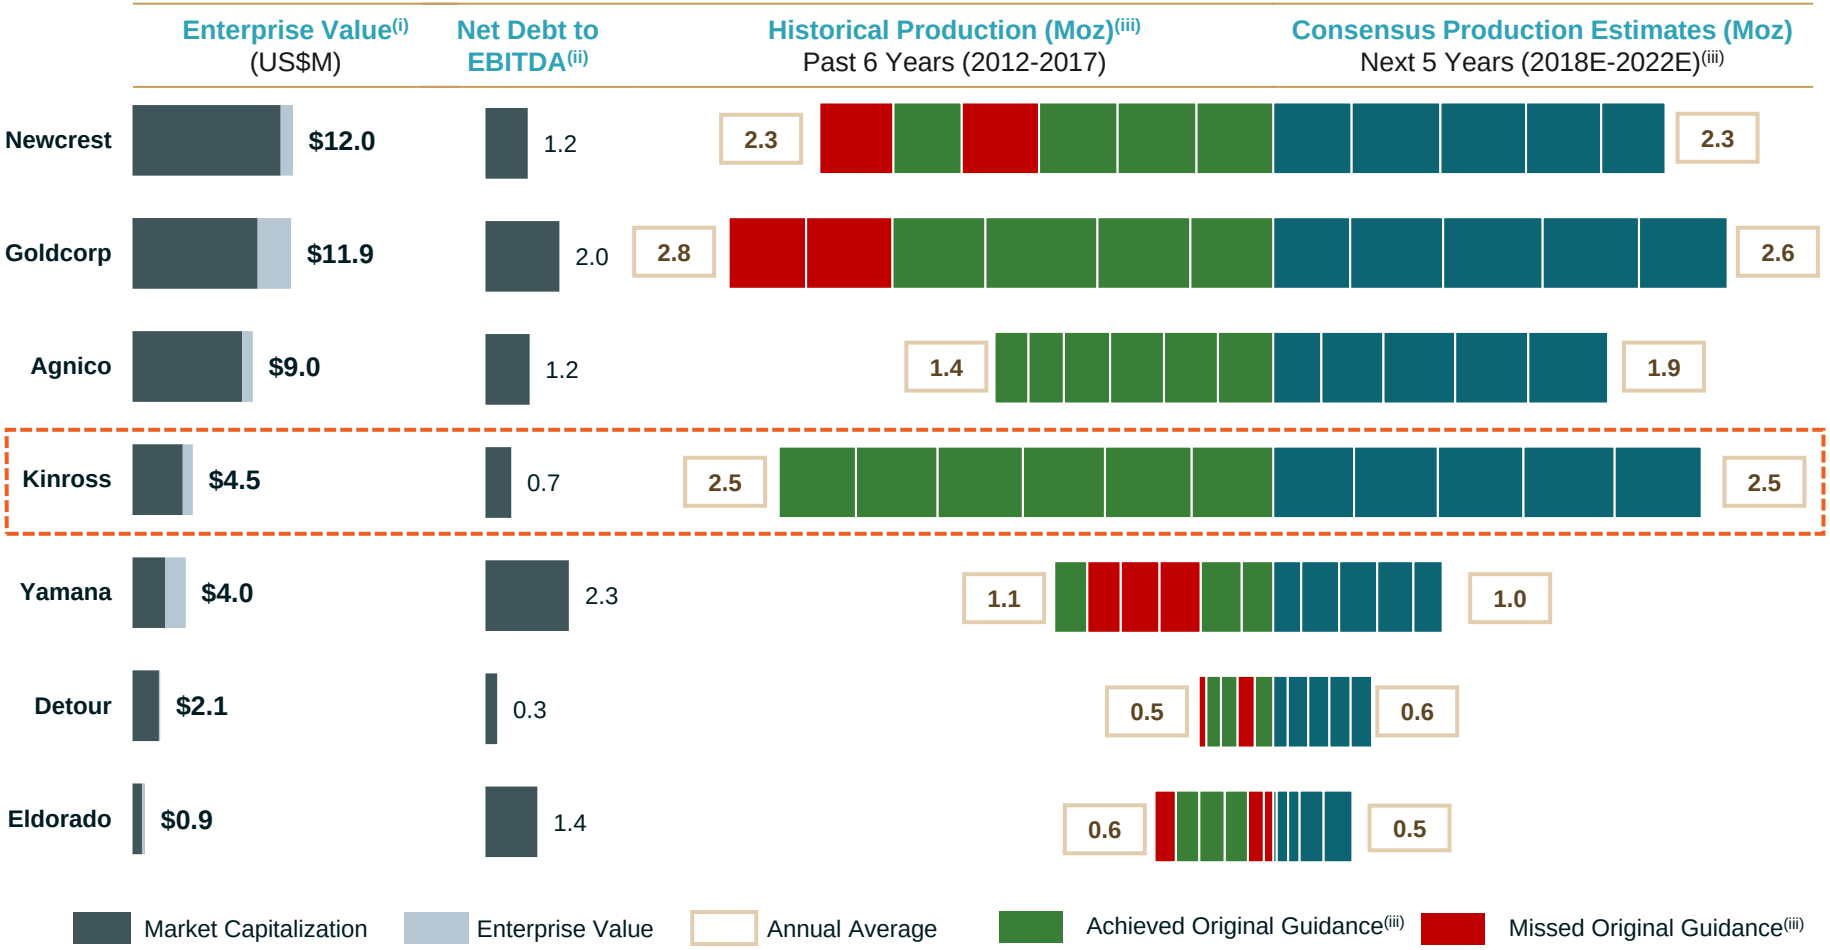

Attractive value opportunity relative to peers

Figures for cash, available credit and net debt to EBITDA are as at June 30, 2018 and do not reflect the Brazil power plant acquisition, which closed July 31, 2018
EV/2018E EBITDA – Source: FactSet (September 21, 2018)

Enterprise Value Versus Production

Market capitalization does not reflect significant scale of production and history of achieving guidance

(i) Source: FactSet.
(ii) Source: Bloomberg; net debt to trailing 12-month adjusted EBITDA.
(iii) Source: company filings; metrics are for each company's respective fiscal year. Guidance based on original figures provided at beginning of year, adjusted for acquisitions & sales. Future production is based on analyst consensus estimates (FactSet). Analysts estimates for Kinross future production may assume completion of the Tasiast Phase 2 project.

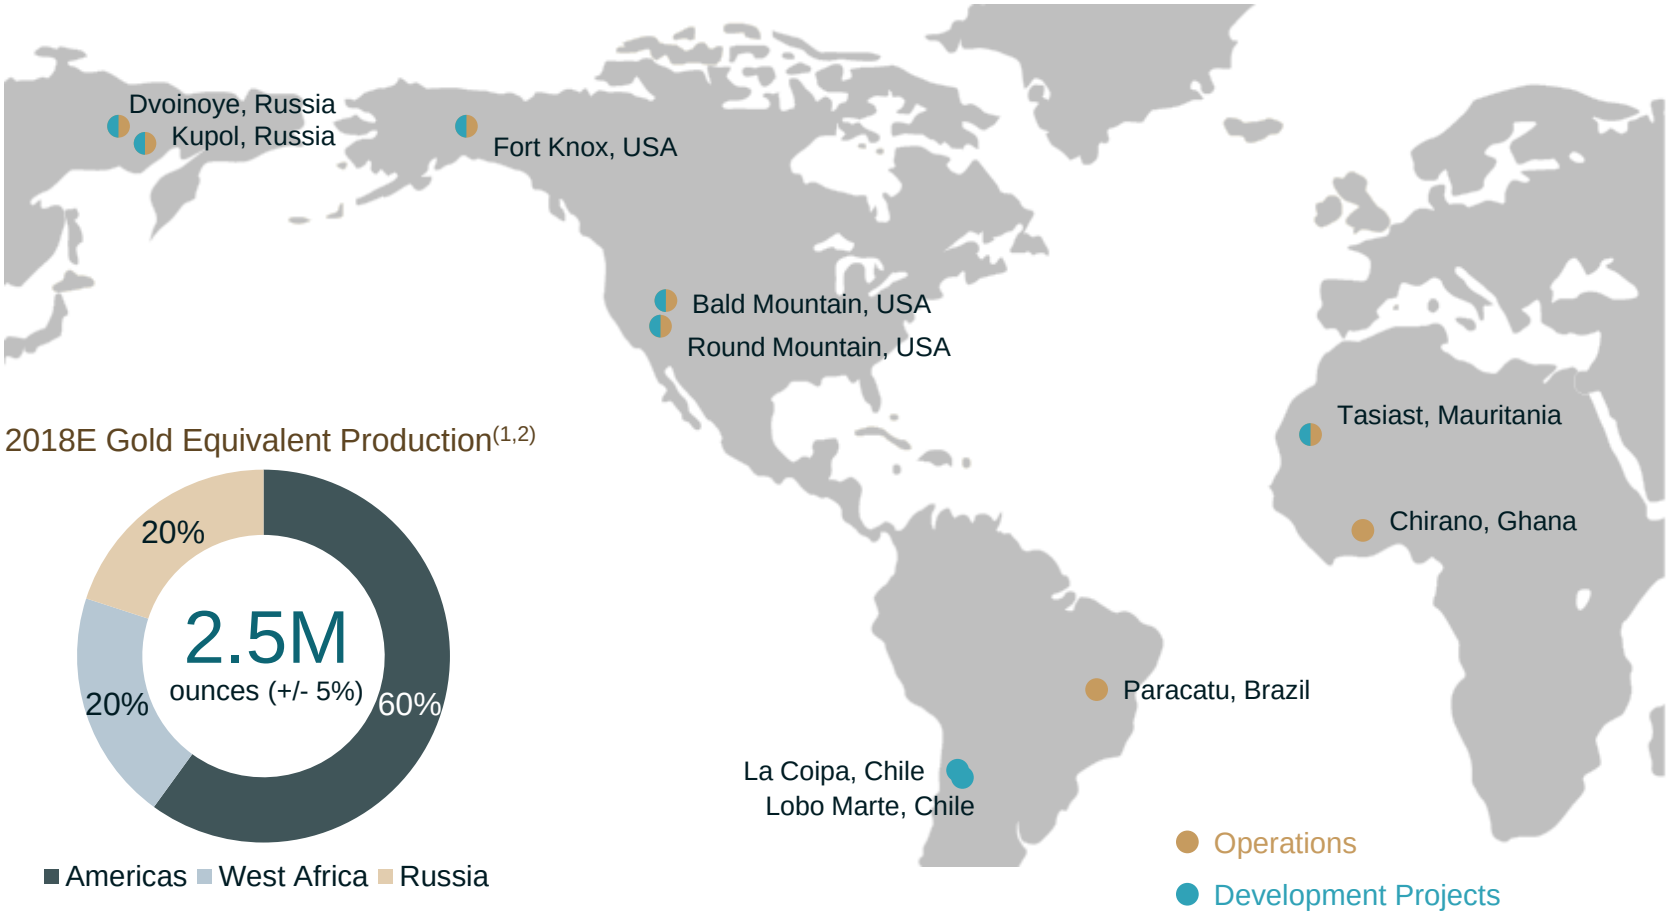

Operational Excellence

We remain focused on operational excellence, building a culture of continuous improvement, innovation and disciplined cost management

Diversified Portfolio of Assets

60% of 2018E gold equivalent production expected from mines located in the Americas

2018E Gold Equivalent Production(1,2)

(1) Refer to endnote #1.
(2) Refer to endnote #2.

Strong Operating Results

Continued track record of meeting our operational targets

- Second quarter operating results were in-line with expectations
- On track to meet 2018 guidance targets

	2018 Guidance[1]	First Half Results
Gold equivalent production (ounces.)[2]	2.5 million (+/-5%)	1,255,986
Production cost of sales ($ per gold equivalent ounce)[2,3]	$730 (+/-5%)	$709
All-in sustaining cost ($ per gold equivalent ounce)[3]	$975 (+/-5%)	$926
Capital expenditures ($ millions)	$1,075 (+/-5%)	$494

KINROSS 25 YEARS

(2) Refer to endnote #2.
(3) Refer to endnote #3.

First Half 2018 Operational Highlights

Paracatu, Brazil

- In Q2, achieved highest quarterly throughput of past 4 years
- Significant improvement in rainfall year-to-date

Paracatu H1 Results	
Production (Au. Eq. oz.)	249,426
Cost of sales(3) ($/Au. Eq. oz.)	$882

Bald Mountain, USA

- Record low cost of sales in Q2/18
- Continued strong production

Bald Mountain H1 Results	
Production (Au. Eq. oz.)	164,875
Cost of sales(3) ($/Au. Eq. oz.)	$465

Chirano, Ghana

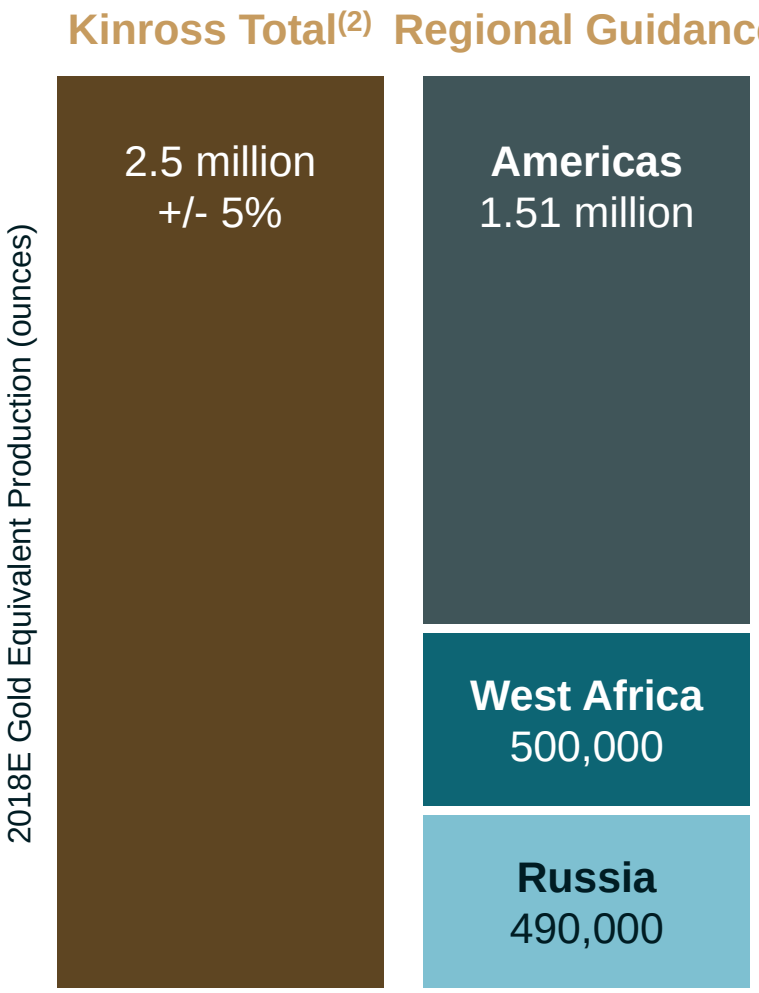

- Good performance in H1 2018
- Improved cost of sales year-over-year

Chirano H1 Results	
Production(2) (Au. Eq. oz.)	106,876
Cost of sales(3) ($/Au. Eq. oz.)	$751

Strong Balance Sheet & Financial Flexibility

With strong cash flow and no debt maturities until 2021, we have the financial strength and flexibility to fund our pipeline of development projects

KINROSS 25 YEARS

Solid Financial Position

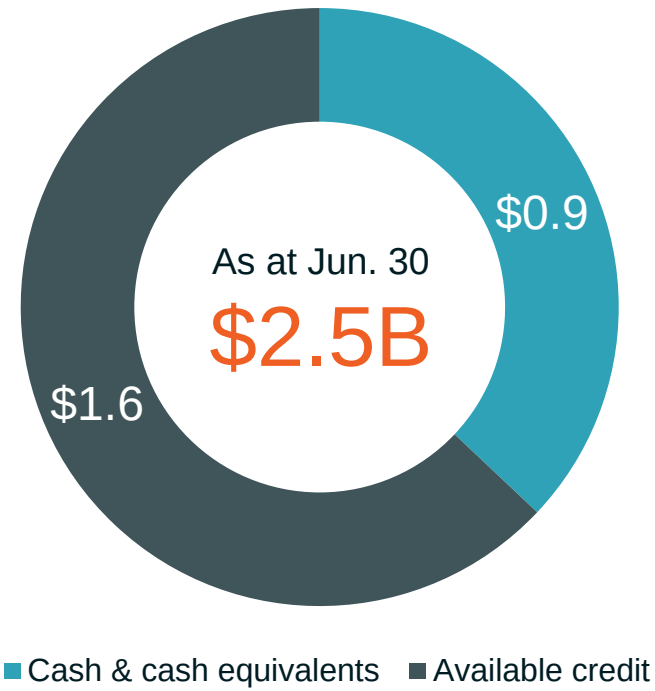

Strong position to finance organic development projects with existing cash and liquidity

Maintaining Financial Flexibility

- Cash and cash equivalents of **~$920 million**
- Available credit: **$1.6 billion**
- Trailing net debt to EBITDA: **0.7x**
- Manageable debt schedule with no significant maturities prior to **2021**
- Extended maturity dates for **revolving credit facility** (by 1 year) and **letter of credit guarantee facility** (by 2 years)

Liquidity Position

($ billion)

Figures on this slide are as at June 30, 2018 and do not reflect the Brazil power plant acquisition, which closed on July 31, 2018. Pro-forma the transaction, Kinross' cash balance would be approximately $665 million and net debt to EBITDA ratio would be 0.9x

Financial Strength & Discipline

Our balance sheet has strengthened over the two-year construction period for Tasiast Phase One

- Approved Phase One with view that balance sheet would be sufficient to fund construction
- With bulk of Phase One spending complete, our balance sheet is in a stronger position today than when construction began ~2 years ago

	Phase One approval March 31, 2016	Phase One construction complete June 30, 2018
Cash and cash equivalents	$750M	~$920M
Available credit	$1.5B	$1.6B
Total liquidity	$2.3B	$2.5B
Net debt to EBTIDA	1.2x	0.7x

June 30, 2018 figures on this slide do not reflect the Brazil power plant acquisition, which closed on July 31, 2018.
Pro-forma the transaction, Kinross' cash balance would be approximately $665 million and net debt to EBITDA ratio would be 0.9x

2018E Capital Expenditures Outlook(1)

Leveraging strong financial position to invest in development projects and our future

- Maintaining 2018 capital expenditures guidance of **$1,075 million** (+/- 5%)
  - Incremental capital associated with the recently-approved **Gilmore project**
  - Project studies for **La Coipa** and **Lobo Marte**
  - Spending on **Tasiast Phase Two** prior to the decision to pause and costs associated with preserving optionality

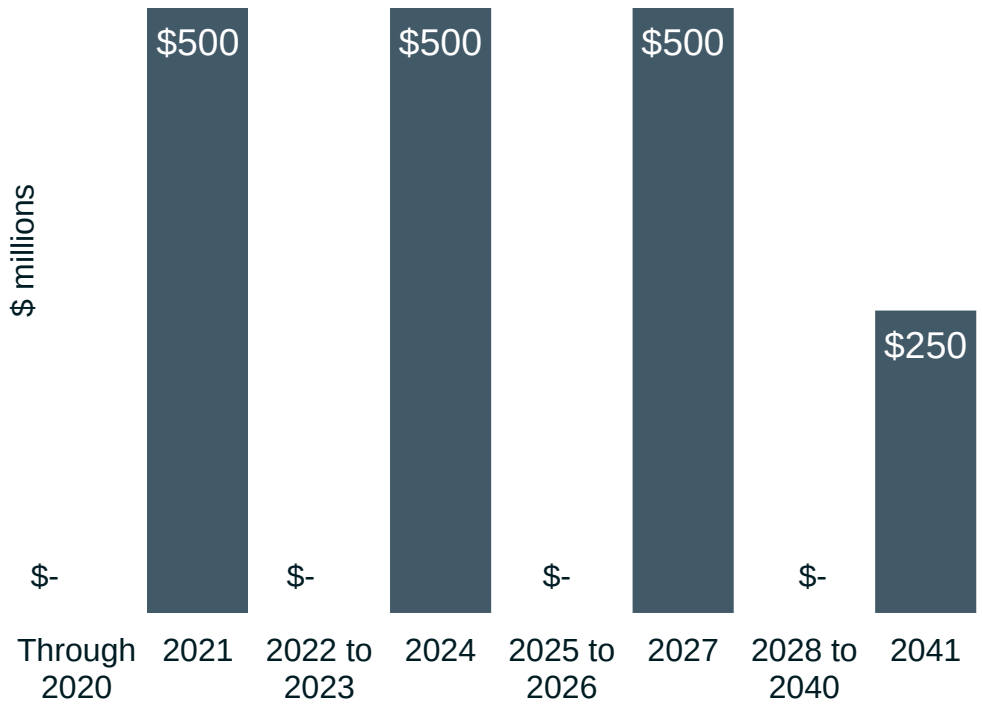

(1) Refer to endnote #1.

Manageable Debt Profile

No debt maturities prior to 2021

Debt Schedule

Debt Ratings

Agency	Rating
S&P	BBB- (Stable)
Moody's	Ba1 (Stable)
Fitch	BBB- (Stable)

Interest Rates

Senior Notes due 2021	5.125%
Senior Notes due 2024	5.950%
Senior Notes due 2027	4.50%
Senior Notes due 2041	6.875%

Development Projects

We have a portfolio of development projects that we are progressing, as well as a pipeline of future opportunities that we are focused on advancing

Projects & Future Opportunities

Portfolio of development projects and future opportunities progressing well

Tasiast Phase One

- Construction complete
- SAG mill in final stages of commissioning

Round Mountain Phase W

- Detailed engineering 95% complete
- Stripping progressing well

Fort Knox Gilmore

- Project approved in June following completion of feasibility study
- Early works initiated; permitting is now complete

Bald Mountain Vantage Complex

- Engineering 95% complete
- Construction is well underway

Russia Satellite Deposits

- Expect to begin stoping at **Moroshka** in early Q4/18
- Commenced mine development at **Dvoinoye Zone 1**

La Coipa Restart

- Initiated feasibility study; expected to be complete H2/19
- Initiated scoping study on **Lobo Marte**; expected to be complete H1/19

Tasiast Update

Kinross has continued to engage with the Government of Mauritania since early May following receipt of a letter stating a desire to enter into discussions with respect to Kinross' activities in the country

- Has been business as usual at the Tasiast mine and the Phase One project, where construction is now complete
- Project financing has continued to progress, with strong interest from multilateral organizations and commercial banks

Phase Two Update

- Kinross has decided to pause the Phase Two project, in line with our commitment to disciplined capital allocation
- To maintain optionality, we are analyzing alternative throughput approaches to expanding Tasiast
- The completion of our evaluation of throughput alternatives, and a decision on the next steps for Phase Two, are subject to the ongoing engagement with the Government. We remain committed to capital discipline as we seek additional clarity on the matter.

Tasiast Phase One

Construction of Phase One is complete; commissioning is in the final stages

- All major components commissioned using the SAG mill by-pass circuit
- **Final stages** of commissioning the SAG mill
  - Proceeding well
  - Ran **first batch of ore** through the mill in last week of July
- Project was handed over to the Operations team
- Throughput has comfortably achieved **12,000 t/d**
- Normal course commissioning activities are continuing

Construction of Tasiast Phase One Complete

In final stages of commissioning; first ore now through the SAG mill

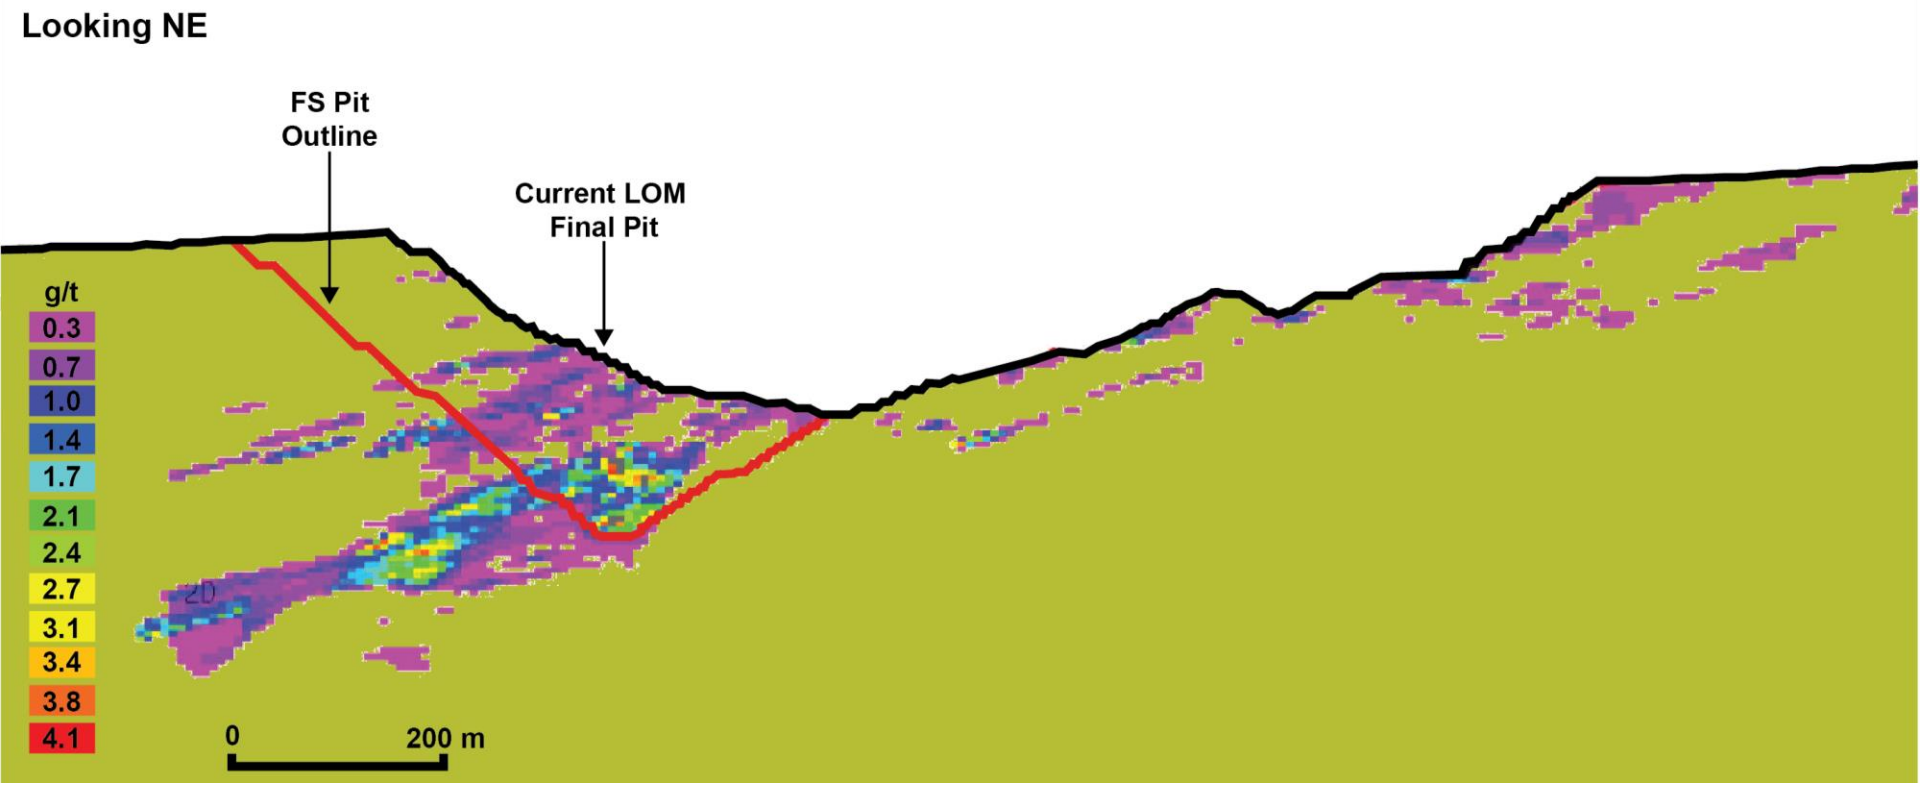

Round Mountain Phase W Overview

The Phase W project is expected to extend mining by 5 years at one of Kinross' top performing mines located in one of the world's best mining jurisdictions

Phase W Feasibility Study Results

Project expected to generate a 13% IRR at an assumed gold price of $1,200 per ounce

	Current mine plan + Phase W Estimates
Average annual production (2018-2024)	341,000 gold ounces
Production cost of sales (2018-2024)	$765 per gold equivalent ounce
All-in sustaining cost (2018-2024)	$905 per gold equivalent ounce
Mine life	Mining – 2024 Stockpile milling – 2025 Residual leach – 2027

	Phase W Stand Alone Estimates
Total ounces recovered	1.5 million ounces
Initial capital expenditures	$230 million
Capitalized stripping (non-sustaining)	$215 million
Internal rate of return(i)	13%
Net present value(i) (ii)	$135 million

Note: figures on this slide reflect at $1,200 per ounce gold price assumption.
(i) January 1, 2018 forward.
(ii) After tax, 5% discount rate.

Round Mountain Phase W

The Phase W project is progressing well and on budget

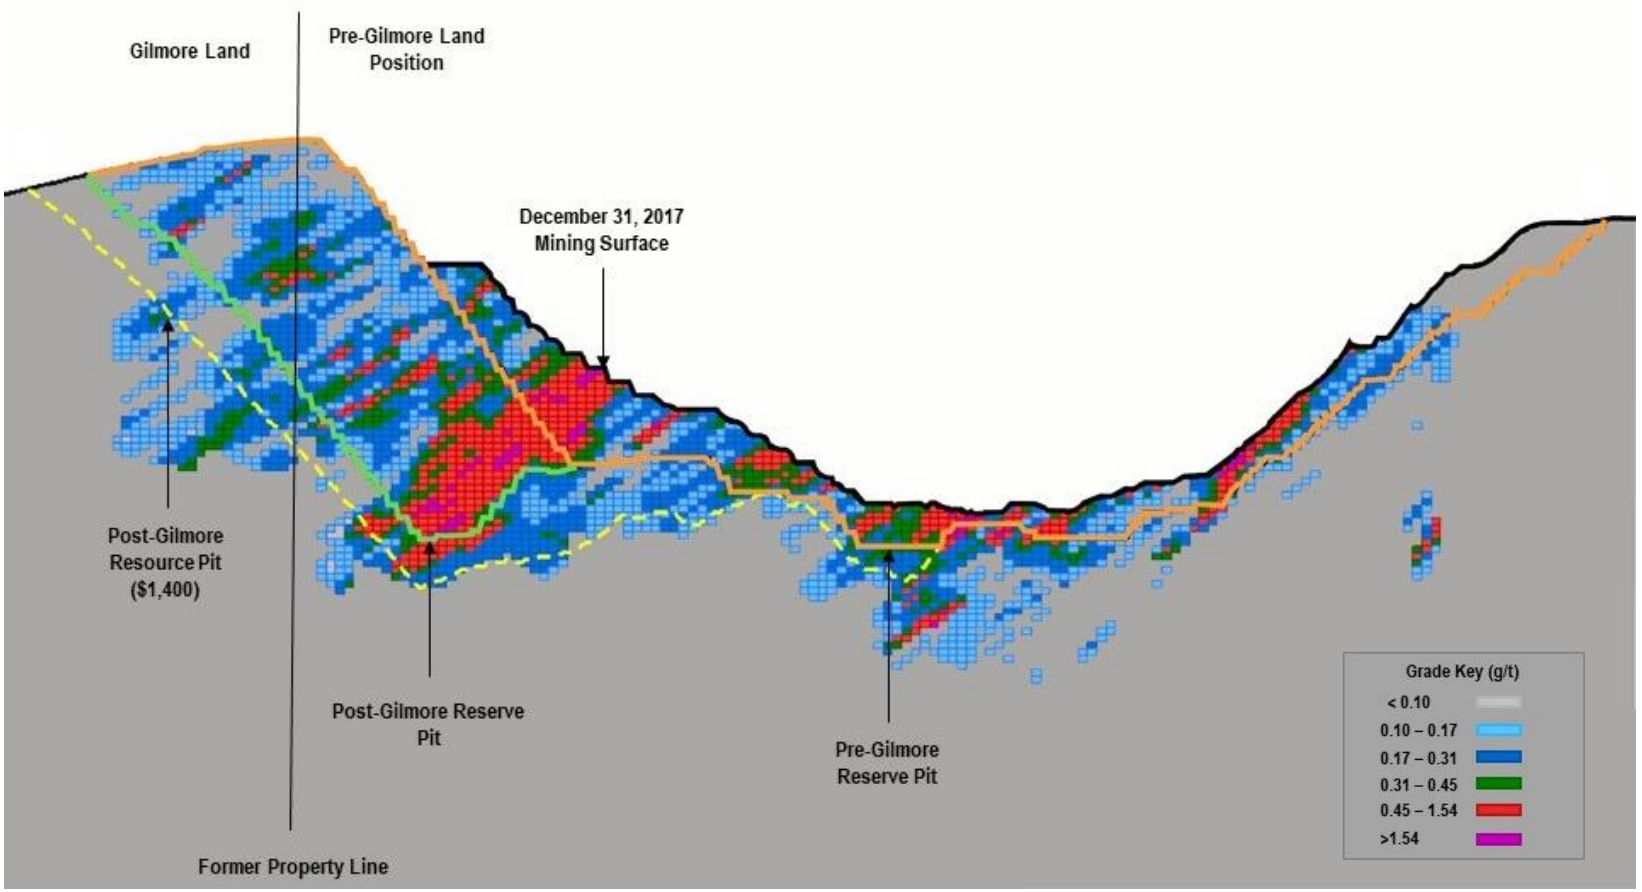

- Detailed engineering is 95% complete
- Pre-stripping is proceeding well
- Earthworks to prepare for new infrastructure area and preparation of new heap leach area for construction are largely complete
- New dewatering pond is complete
- Initial construction activities for vertical carbon-in-column plant have commenced
- Remaining construction and procurement contracts progressing well

Preparation of new heap leach area for construction is largely complete

Fort Knox Gilmore

Gilmore project expected to extend mine life to 2030 and strengthen long-term U.S. production profile

Gilmore Feasibility Study Results

Project expected to generate a 17% IRR at an assumed gold price of $1,200 per ounce

	Current mine plan + Gilmore estimates
Average annual production (2018-2027)	245,000 gold ounces
Production cost of sales (2018-2027)	$735 per gold equivalent ounce
All-in sustaining cost (2018-2027)	$1,015 per gold equivalent ounce
Mine life	Milling - 2020 Mining – 2027 Residual leach – 2030

	Incremental Gilmore estimates
Total ounces recovered	1.5 million ounces
Initial capital expenditures (2018-2020)	$100 million
Capitalized stripping (non-sustaining) (2018-2020)	$60 million
Internal rate of return(i)	17%
Net present value(i) (ii)	$130 million

Note: figures on this slide reflect at $1,200 per ounce gold price assumption.
(i) July 1, 2018 forward.
(ii) After tax, 5% discount rate.

Fort Knox Gilmore

Initial production from Gilmore is expected in early 2020

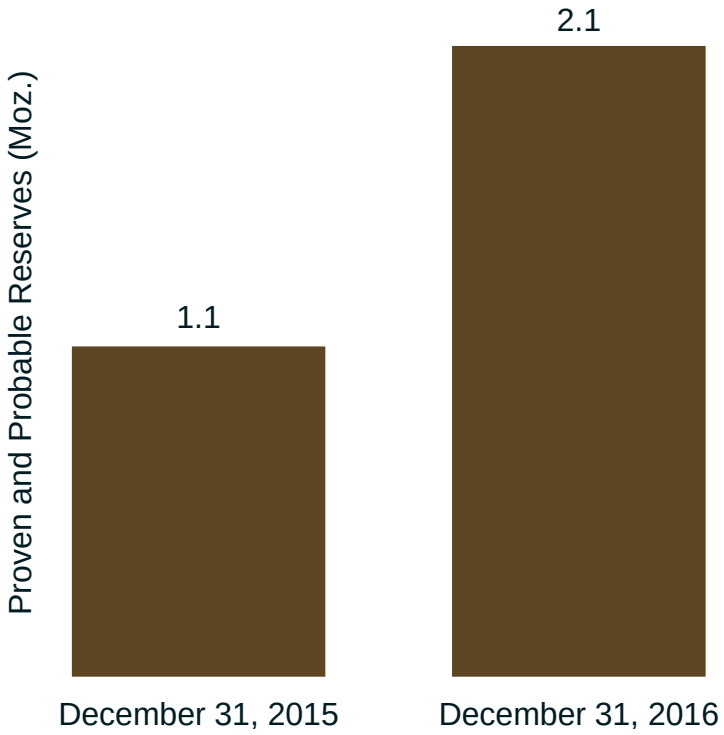

- Project includes:
  - The first two phases of a potential multi-phase layback of the Fort Knox pit; and
  - Construction of a new heap leach pad
- Project team has been established, and contracting is underway
- Early works on the new leach pad have been initiated
- Permitting is now complete
- We continue to explore the prospectivity and upside potential of the Fort Knox area
  - Orebody has not yet been fully delineated to the west, south and east

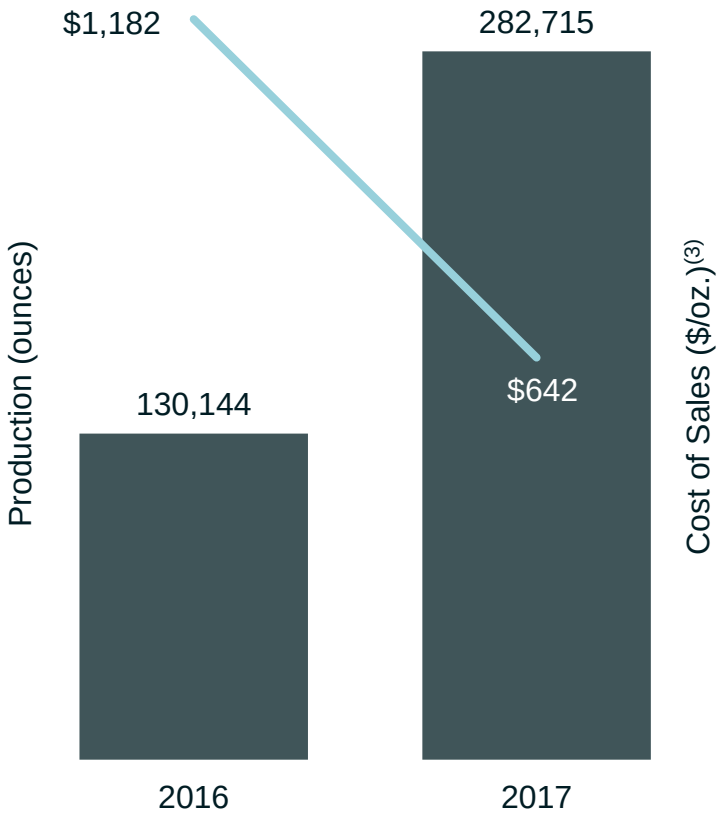

Realizing Bald Mountain's Potential

2016: Doubled reserve estimates[4]

- Added 1.2 million ounces, doubling the reserve estimate before depletion

2017: Doubled production & lowered costs

(3) Refer to endnote #3.
(4) Refer to endnote #4.

Bald Mountain Vantage Complex

Vantage Complex project in the South Area of Bald Mountain is proceeding well

- Project is advancing on schedule and on budget
- Engineering is now 95% complete and construction is well underway
- All major equipment and construction packages have been awarded
- Commissioning of the heap leach and processing facilities is expected to commence in Q1 2019

View of the Vantage Complex project

Bald Mountain Exploration Highlights

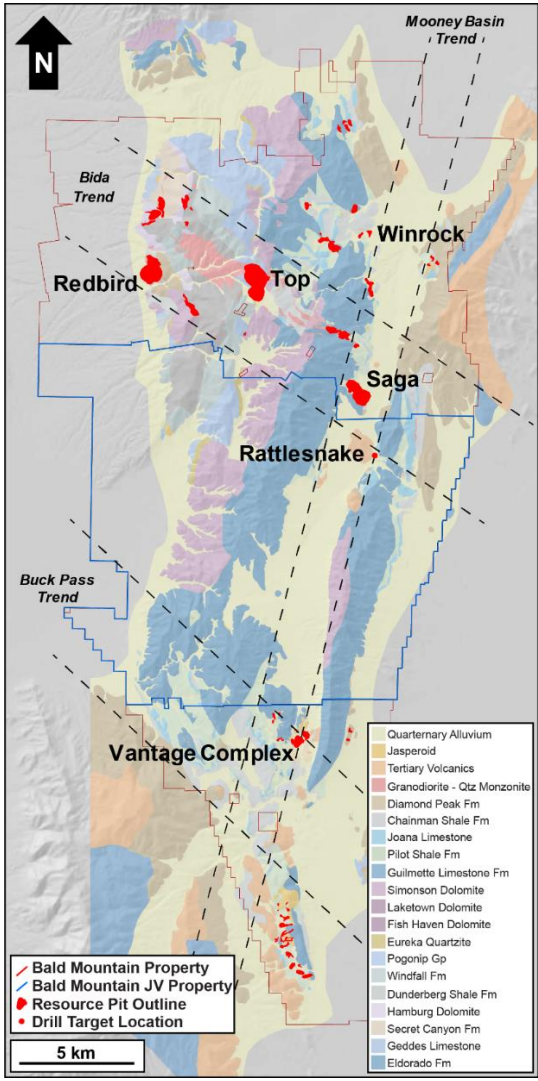

Kinross envisions Bald Mountain as a long-life asset with significant upside potential and mineral resource growth

North Area

- Drilling has mainly been focused on the North Area of the property
- Analyzing results from drilling completed in H1 2018
- Continuing program with goal of potential mineral resource additions and mineral reserve conversions for year-end
  - Particularly at the Top, Redbird and Winrock deposits

JV and South Areas

- Exploration drilling in the JV Area and South Area are ongoing
  - Encouraging results from some of the target areas

Russia Satellite Deposits

Moroshka

- Located 4km east of the Kupol mill
- Development of Moroshka continues to advance on plan
- Stoping of high grade ore expected to begin in early Q4 2018

Dvoinoye Zone 1

- Mine development commenced
  - Portal construction is complete
  - Mine and surface infrastructure development progressing as planned
  - Production expected to commence mid-2019

La Coipa Restart Project

We are evaluating the potential for a return to production in Chile

La Coipa Restart Project

- Initiated a feasibility study on the Phase 7 deposit
  - Expected to be complete in H2 2019

Lobo Marte Project

- Located 80km from La Coipa
- Measured & indicated gold resource estimate: 7Moz. with an average grade of 1.2 g/t(4)
- Initiated a scoping study to assess potential for a production start at the end of La Coipa's mine life
  - Expected to be complete in H1 2019

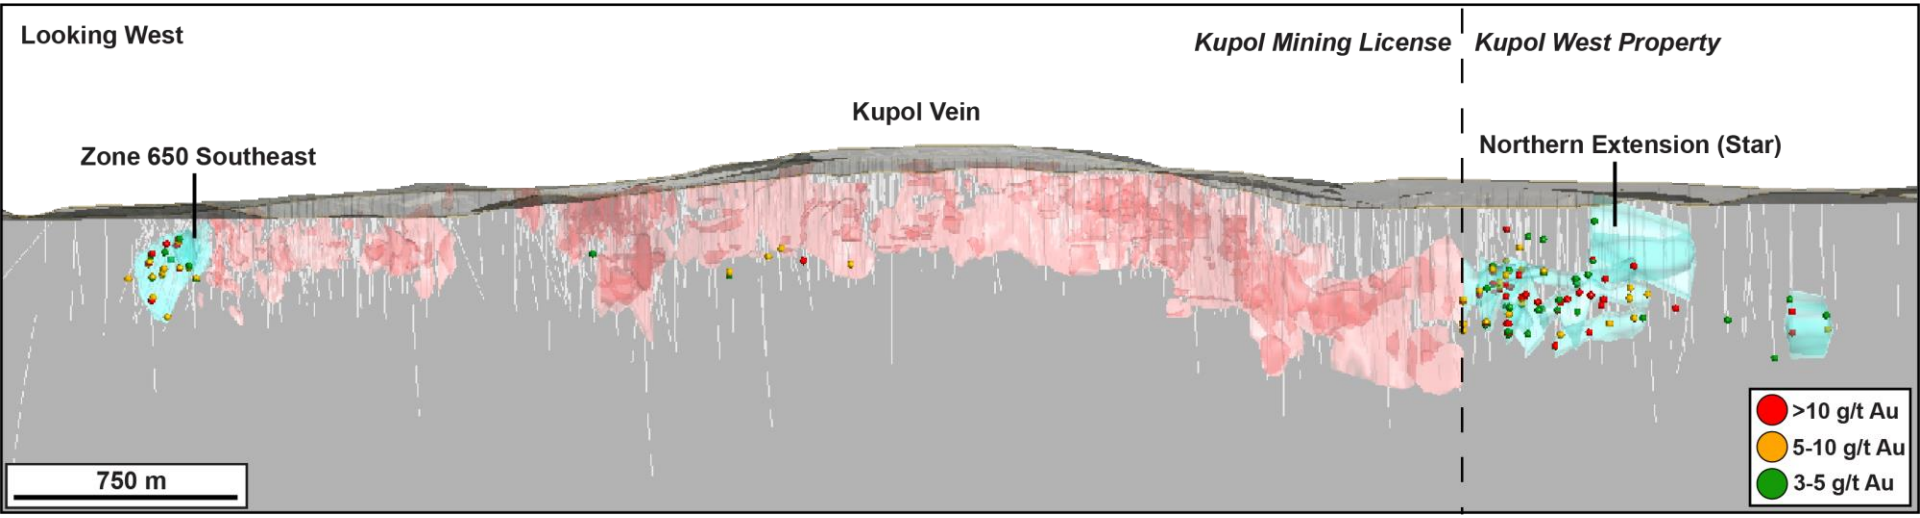

For results of the 2015 pre-feasibility study results for La Coipa, please see Appendix slide 48.
(4) Refer to endnote #4.

Kupol Exploration Highlights

Initial results for potential mineral resource additions to extend mine life have been promising

- We continue to explore the main Kupol vein and mineralization to the north and south along the main trend
  - North Extension – drilling has continued to confirm mineralization and vein widths similar to those intersected in 2017
  - 650 Zone – Drilling is indicating potential mineralization at depth beneath current resource

1-Year Mine Life Extension in Russia

Continuing our track record of adding reserves to offset depletion at Kupol and Dvoinoye

- Estimated mill production extended to 2022, another **1-year addition**
  - Result of mine plan optimization and exploration additions
- Continue to be encouraged by potential for future resource additions through exploration

(4) Refer to endnote 4. For more information regarding mineral reserve and mineral resource estimates for Kupol and Dvoinoye, please refer Kinross' Annual Mineral Reserve and Mineral Resource Statement available on our website at www.kinross.com

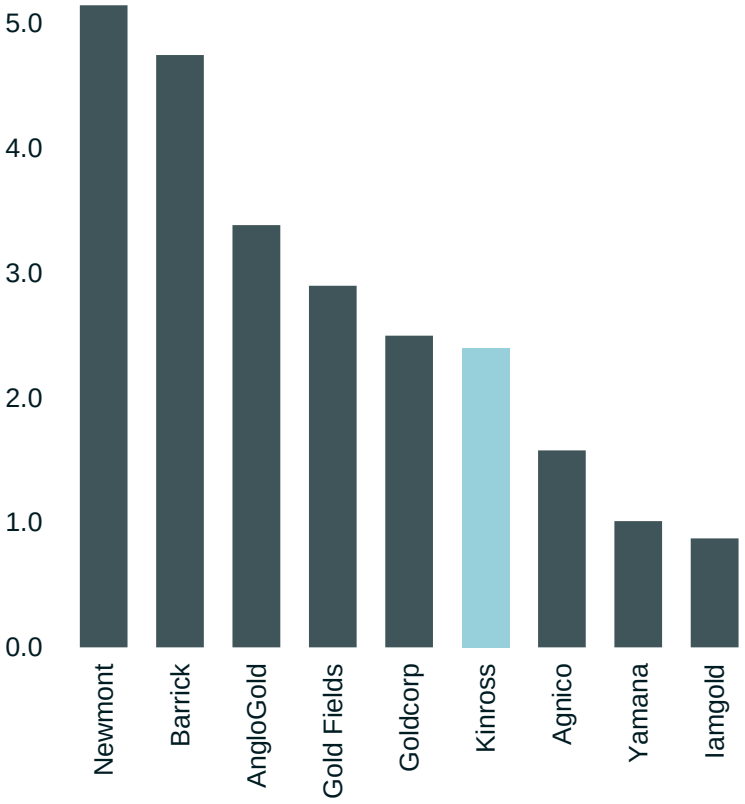

Compelling Relative Value

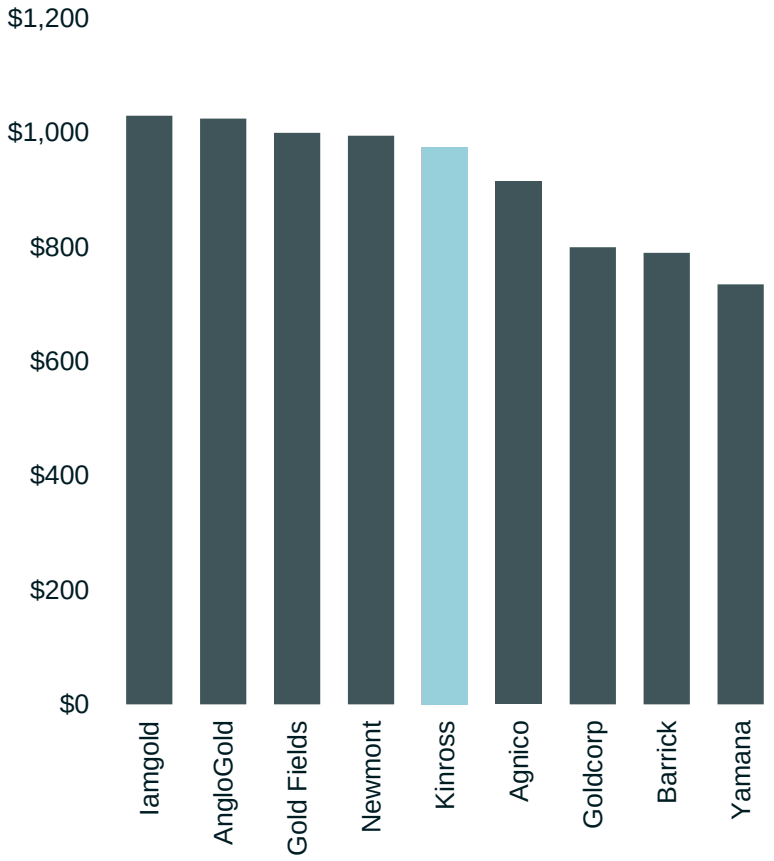

Attractive value opportunity relative to peers, considering Kinross' annual production, cost structure, track record and growth opportunities

2018E Production & All-In Sustaining Cost

2018E Production
(million ounces)

2018E All-In Sustaining Cost
($ per ounce)

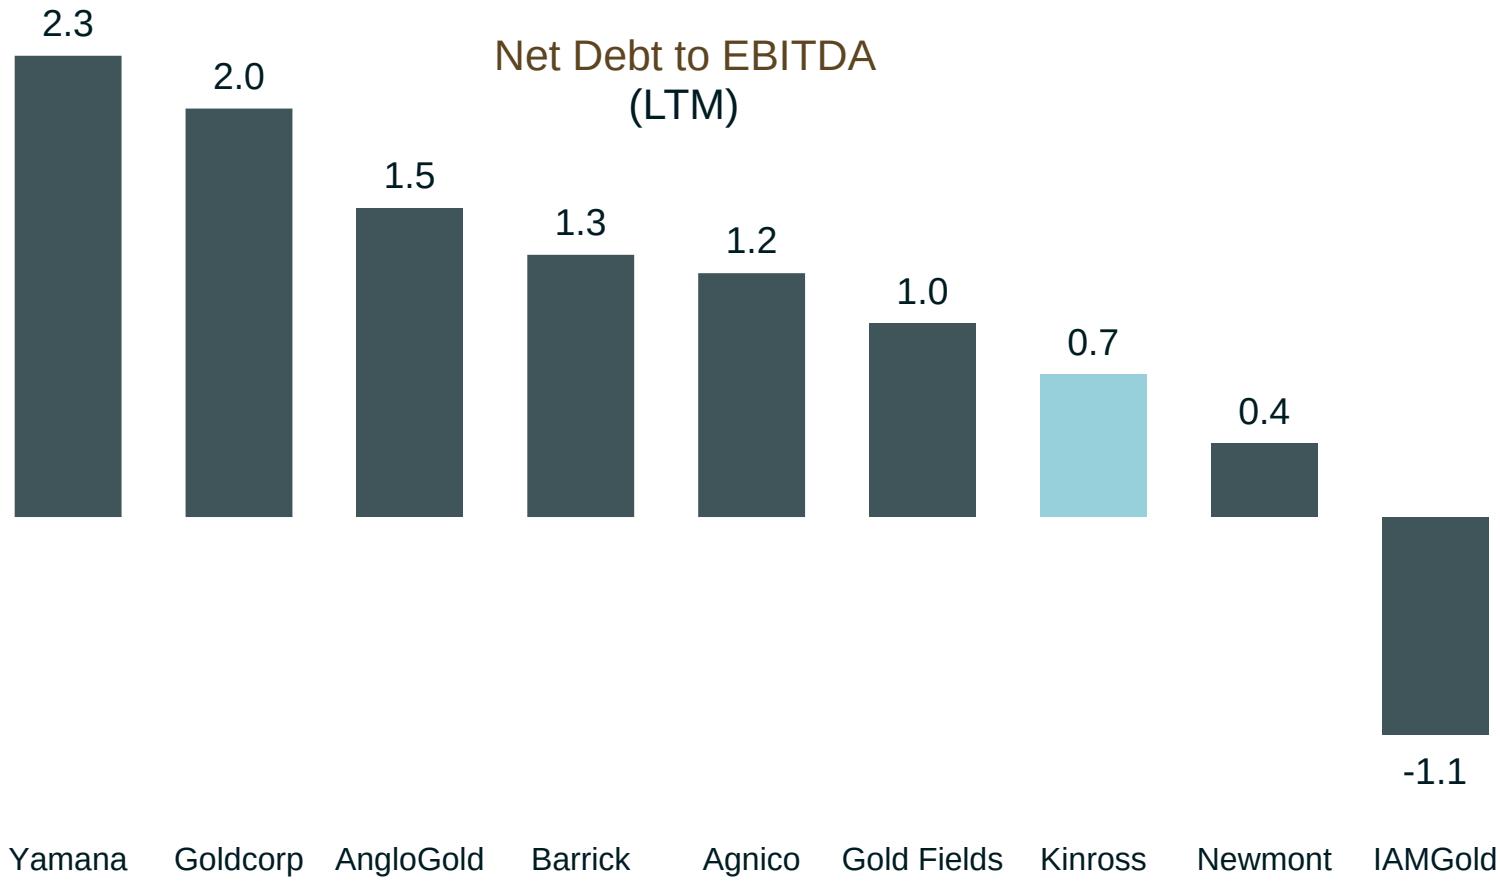

(i) Source: Company reports. Figures reflect mid-point of guidance ranges. Production figures for Kinross represent gold only production guidance of 2.4 million ounces (+/- 5%). Kinross expects to produce 2.5 million gold equivalent ounces (+/- 5%) in 2018.

(ii) Source: Company reports. Figures represent mid-point of all-in sustaining cost guidance.

Industry-Leading Balance Sheet

Net debt to EBITDA ratio of 0.7x as at June 30, 2018

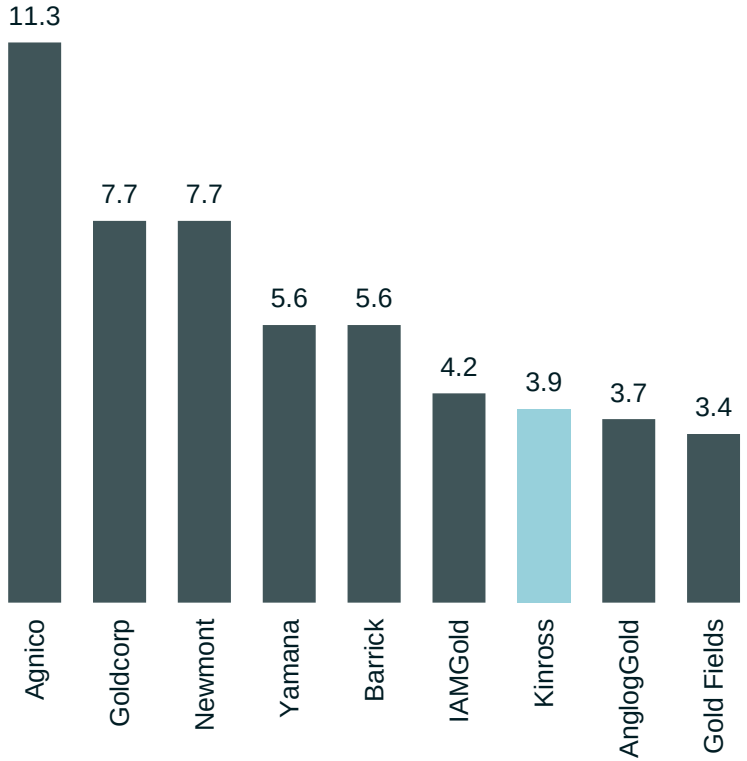

Source: Company reports; Bloomberg – net debt to trailing 12-month adjusted EBITDA.
Figures for Kinross do not reflect the Brazil power plant acquisition, which closed on July 31, 2018. Pro-forma the transaction, Kinross' net debt to EBITDA ratio would be 0.9x

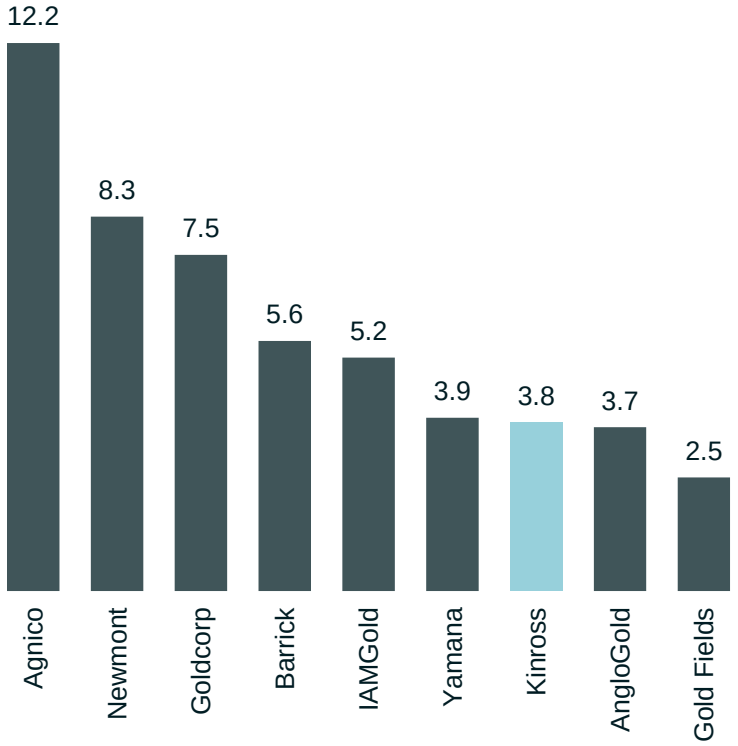

2018E Metrics

Attractive value opportunity relative to peers, considering Kinross' annual production, cost structure, track record and growth opportunities

EV / 2018E EBTIDA

P / 2018E Operating CF

Source: FactSet analyst consensus – September 21, 2018.

Appendix

Currency & Oil Sensitivities

2018 Budget Assumptions[1]

	2018 Budget	Current Spot[i]
Gold	US$1,200/oz.	$1,206/oz.
Oil	US$55/bbl.	$70/bbl
Russian rouble	60	67
Brazilian real	3.25	4.08

2018 Sensitivities (net of hedges)[1]

	Change from Assumptions	Estimated impact to cost of sales
FX	10%	US$15/oz.
Russian rouble	10%	US$16/oz.[ii]
Brazilian real	10%	US$32/oz.[iii]
Oil	$10/bbl.	US$2/oz.
Gold price	$100/oz.	US$4/oz.

(1) Refer to endnote #1.

(i) Source: FactSet – September 21, 2018.
(ii) Impact to production cost of sales of the Russian operations
(iii) Impact to production cost of sales of the Brazil operation

Fuel & Currency Hedges

Managing exposure to fluctuations in foreign currency and input commodity prices

- Overall 2018 FX exposures ~36% hedged at favourable rates compared to current spot prices
- Continue to monitor our FX and oil exposures and look for opportunities to establish additional input cost hedges if market conditions are favourable

Summary of 2018 foreign currency and energy hedges as at June 30, 2018

	% of 2018 exposure hedged	Average Rate
Brazilian real	50%	3.23 (put) – 3.93 (call)
Russian rouble	67%	60.8 (put) – 74.1 (call)
Canadian dollar	52%	1.31
Oil & Fuel	54%(i)	49.37

(i) As a result of pre-paid fuel purchases mainly relating the Company's Russian operations and fixed pricing in Ghana and Brazil, Kinross' unhedged, free-floating oil & fuel exposure for 2018 is ~33% of total consumption.

Fort Knox, USA (100%)

Proceeding with Gilmore project, which is expected to extend mine life to 2030

- Impressive track record of operational excellence
- Estimated mine life: mill – 2020; mining – 2027; leaching – 2030

Operating Results[3]

	2016	2017
Production (Au. Eq. oz.)	409,844	381,115
Production cost of sales ($/oz.)	$741	$628

2017 Gold Reserve & Resource Estimates[4]

	Tonnes (thousands)	Grade (g/t)	Ounces (thousands)
2P Reserves	282,236	0.37	3,374
M&I Resources	146,945	0.38	1,795
Inferred Resources	105,605	0.32	1,093

(3) Refer to endnote #3.
(4) Refer to endnote #4.

Summary of Feasibility Study Results

Operating Estimates (current mine plan + Gilmore)

Timeline	Operational Metric	Estimate
2018-2027 (Mining)	Average annual tonnes mined	60 million
	Strip ratio	1.2
	Average grade processed	0.37 grams per tonne
	Average annual production	245,000 ounces
	Average mining cost	$2.19 per tonne*
	Average processing cost	$1.74 per tonne
	Production cost of sales	$735 per Au eq. oz.
	All-in sustaining cost	$1,015 per Au eq. oz.
2028-2030 (Leaching)	Average annual production	80,000 ounces
	Average processing cost (per annum)	$23.6 million
	Production cost of sales	$855 per Au eq. oz.
	All-in sustaining cost	$900 per Au eq. oz.
2018-2030 (Life of project)	Strip ratio	1.2
	Average grade processed	0.37 grams per tonne
	Average recovery rate	79%
	Average annual production	205,000 ounces
	Average mining cost	$2.19 per tonne*
	Average processing cost	$2.00 per tonne
	Production cost of sales	$745 per Au eq. oz.
	All-in sustaining cost	$1,005 per Au eq. oz.

** Includes capitalized stripping*

Incremental Gilmore Estimates(i)

	Estimate
Strip ratio	1.2
Life of mine ore processed	183 million tonnes
Average grade processed	0.35 grams per tonne
Life of mine production	1.51 million ounces
Average production cost of sales	$650 per Au eq. oz.
Average all-in sustaining cost	$950 per Au eq. oz.
Initial capital costs	$100 million
Capitalized stripping (non-sustaining)	$60 million
Internal rate of return(ii)	17%
NPV(iii)	$130 million

Estimated Gilmore Capital Cost

	Estimate ($ millions)
Barnes Creek heap leach pad	51
Geotechnical study and dewatering	19
Mining fleet & capitalized maintenance	12
Infrastructure, owner's cost and other	5
Contingency	13
Initial capital	**$100**
Capitalized stripping	$60M
Total	**$160M**

(i) Based on a $1,200 per ounce gold price assumption and a $55/bbl oil price assumption. 2018-2030 unless otherwise noted.
(ii) From July 1, 2018 forward.
(iii) Calculated based on a 5% discount rate from July 1, 2018 and after tax.

Round Mountain, USA (100%)

Strong cash flow generator with Phase W project extending mine life to 2027

- Phase W is expected to generate solid returns and extend mining
- Estimated mine life: 2024 (mining); 2027 (stockpile milling / residual leach)

Operating Results[3]

	2016	2017
Production (Au. Eq. oz.)	378,264	436,932
Production cost of sales ($/oz.)	$773	$691

2017 Gold Reserve & Resource Estimates[4]

	Tonnes (thousands)	Grade (g/t)	Ounces (thousands)
2P Reserves	124,382	0.7	2,884
M&I Resources	105,061	0.7	2,393
Inferred Resources	89,078	0.7	2,115

(3) Refer to endnote #3.
(4) Refer to endnote #4.

Summary of Feasibility Study Results

Operating Estimates (current mine plan + Phase W)

Timeline	Operational Metric	Estimate
2018-2024 (Mining)	Strip ratio	2.9
	Average grade processed	0.7 grams per tonne
	Average annual production[(i)]	341,000 ounces
	Average mining cost	$2.00 per tonne
	Average processing cost	$4.60 per tonne
	Production cost of sales	$765 per Au eq. oz.
	All-in sustaining cost	$905 per Au eq. oz.
2025-2027 (Stockpile milling / residual leach)	Strip ratio	N/A
	Average grade processed	0.46 grams per tonne
	Average annual production	46,000 ounces
	Average re-handle cost	$1.80 per tonne
	Average processing cost	$14.70 per tonne
	Production cost of sales	$720 per Au eq. oz.
	All-in sustaining cost	$785 per Au eq. oz.
2018-2027 (Life of project)	Strip ratio	2.9
	Average grade processed	0.7 grams per tonne
	Average annual production	253,000 ounces
	Average mining cost	$2.00 per tonne
	Average processing cost	$4.80 per tonne
	Production cost of sales	$765 per Au eq. oz.
	All-in sustaining cost	$900 per Au eq. oz.

Standalone Phase W Estimates

	Estimate
Life of mine production	1.5 million ounces
Life of mine ore processed	77.6 million tonnes
Average grade processed	0.8 grams per tonne
Strip ratio	4.0
Initial capital costs	$230 million
Capitalized stripping (non-sustaining)	$215 million
Internal rate of return	13%
NPV	$135 million

Estimated Phase W Initial Capital Cost

	Estimate ($ millions)
Mining fleet	73
Infrastructure	65
Heap leach pad	21
Process facilities	17
Tailings	9
Indirect and owner's cost	18
Contingency	27
Total	**$230**

(i) Includes years with large variances from the forecast average of up to +/- 150,000 ounces.

Bald Mountain, USA (100%)

Forecasting strong near-term cash flow with significant upside potential

- Large estimated mineral resource base with multiple sources of potential mineral reserve additions
- Successfully doubled production & lowered costs in 2017
- Estimated mine life: 2023

Operating Results[3]

	2016	2017
Production (Au. Eq. oz.)	130,144	282,715
Production cost of sales ($/oz.)	$1,182	$642

2017 Gold Reserve & Resource Estimates[4]

	Tonnes (thousands)	Grade (g/t)	Ounces (thousands)
2P Reserves	95,216	0.6	1,698
M&I Resources	180,338	0.6	3,349
Inferred Resources	43,305	0.4	597

(4) Refer to endnote #4.

Paracatu, Brazil (100%)

Large gold mine with a long mine life that extends to 2032

- Paracatu is among the world's largest gold operations with annual throughput of ~60Mt
- Cornerstone asset in Kinross' portfolio
- Estimated mine life: 2032

Operating Results[3]

	2016	2017
Production (Au. Eq. oz.)	483,014	359,959
Production cost of sales ($/oz.)	$717	$871

2017 Gold Reserve & Resource Estimates[4]

	Tonnes (thousands)	Grade (g/t)	Ounces (thousands)
2P Reserves	642,321	0.4	8,824
M&I Resources	322,827	0.3	3,249
Inferred Resources	31,033	0.2	227

(4) Refer to endnote #4.

Acquisition of Power Plants in Brazil[(i)]

Expected to reduce Paracatu's cost of sales by ~$80/oz. over the life of mine

- Lowers operating costs by eliminating ~70% of future power purchases
- Current legislation provides reduced power tariffs to companies generating their own power
  - Tariff savings expected to be $15/oz. per ounce of the overall $80/oz. cost of sales reduction over the life of mine

Attractive returns

- Expected to generate a levered IRR between 15% to 30%, depending on terms of a potential debt financing
- Additional terminal value beyond Paracatu's mine life

De-risked supply chain

- Secures ~70% of Paracatu's future power needs at a low, fixed cost
- Reduces exposure for a key input in an environment where we are seeing input costs starting to rise

Investment in core asset

- Expected to further strengthen and enhance Paracatu; a large, long-life cornerstone operation

Transaction Overview

Summary	• Kinross acquired two hydro power plants in Brazil from a subsidiary of Gerdau
Purchase Price	• $254 million[(ii)]
Financing	• Transaction funded with cash while Kinross continues to consider future debt financing
Closing	• Closed July 31, 2018

(i) For more information, please refer to the news release titled "Kinross announces acquisition of power plants in Brazil to secure long-term, low-cost power for Paracatu mine" dated February 14, 2018 and available on our website at www.kinross.com and slide 50.

(ii) Acquisition price of $835 million Brazilian reais, $253.7 million based on an exchange rate of 3.29 Brazlian reais to the U.S. dollar.

Overview of Acquired Power Plants

Location

- Both are located on the Claro River in the State of Goias, approximately 660km west of Paracatu
- No additional infrastructure is required to provide power to the mine site

Generation capacity

- Combined installed capacity of 155 MW
- Expected to meet approximately 70% of Paracatu's future power needs
  - Remainder expected to be fulfilled from third party suppliers under fixed-term power purchase agreements

Long life assets

- Both plants commissioned in 2010 and are in good working condition
- Concessions expire in 2037, 5 years after Paracatu's estimated mine life of 2032

La Coipa Restart Project PFS Results (2015)

Project expected to generate a 20% IRR at an assumed gold price of $1,200 per ounce

- The pre-feasibility study estimates a 5.5 year mine life, following receipt of permits and commencement of stripping
  - Processing expected to commence 1.5 years after pre-stripping has been initiated and continue for 4 years

	Life of Mine Estimates (100% basis)[(i)]
Life of Mine	5.5 years
Total ounces recovered	1.03 million Au eq. oz.
Average annual production	207,000 Au eq. oz.
Average cost of sales	$674 per Au eq. oz.
Average all-in sustaining cost[(ii)]	$767 per Au eq. oz.
Initial capital	$94 million
Pre-Stripping	$105 million
IRR (after-tax)	20%
NPV[(iii)]	$120 million

Gold Price Sensitivity

	$1,100	$1,200	$1,300
IRR	15%	20%	26%

Additional Operating Metrics

	Life of Mine Estimates
Mill throughput capacity	13,000 tonnes per day
Average mining rate	80,000 tonnes per day
Average gold grade	1.69 g/t
Average silver grade	61.5 g/t
Average gold recovery	76%
Average silver recovery	59%
Strip ratio (waste:ore)	5.0

Key Assumptions

	Assumptions
Gold price	$1,200 per oz.
Silver price	$17 per oz.
Oil price	$65 per barrel
Chilean Peso	600 to the US dollar
Discount rate	5%

(i) Summary results are on a 100% basis, however Kinross has a 65% interest in Puren.
(ii) All-in sustaining cost includes operating cost, sustaining capital and post start-up capitalized stripping and does not include estimated initial capital expenditures of $94 million and estimated pre-stripping of $105 million, and any exploration, income taxes and non-cash items related to reclamation or allocation of regional or corporate overhead costs. This differs from the World Gold Council definition of all-in sustaining cost.
(iii) After tax, 5% discount.

Kupol-Dvoinoye (100%)

Our Russian mines are a model for successfully operating in a remote location

- High-grade, low-cost underground mines supported by 1 mill
- Estimated mine life: 2022

Operating Results[3]

	2016	2017
Production (Au. Eq. oz.)	734,143	580,451
Production cost of sales ($/oz.)	$441	$521

2017 Gold Reserve & Resource Estimates[4]

	Tonnes (thousands)	Grade (g/t)	Ounces (thousands)
2P Reserves	8,161	7.7	2,011
M&I Resources	929	10.8	323
Inferred Resources	503	9.4	151

Foreign Investment in Russia

The world's leading companies are invested in Russia

Foreign Investment Advisory Council

- Chaired by the Russian Prime Minister, includes CEOs from over 50 international companies

Tasiast, Mauritania (100%)

Operating mine with a large gold resource located in a prospective district

- Phase One expected to increase production from current levels while significantly reducing costs
- Construction complete; commissioning in the final stages

Operating Results[3]

	2016	2017
Production (Au. Eq. oz.)	175,176	243,240
Production cost of sales ($/oz.)	$1,061	$754

2017 Gold Reserve & Resource Estimates[4]

	Tonnes (thousands)	Grade (g/t)	Ounces (thousands)
2P Reserves	124,789	2.0	7,861
M&I Resources	74,591	1.2	2,959
Inferred Resources	41,771	0.9	1,237

(4) Refer to endnote #4.

Summary of Feasibility Study Results

Operating Estimates (Phase One & Two combined)

Timeline	Operational Metric	Estimate
2020-2024 (First 5 years of Phase Two operation)	Total tonnes mined	438 million
	Strip ratio	6.4
	Average CIL grade processed	2.5 grams per tonne
	Average annual production	812,000 ounces
	Average mining cost	$2.05 per tonne
	Average processing cost	$14.50 per tonne
	Production cost of sales	$440 per ounce
	All-in sustaining cost	$655 per ounce
2025-2029 (Remaining life of mine)	Total tonnes mined	141 million tonnes
	Strip ratio	4.8
	Average CIL grade processed	1.5 grams per tonne
	Average annual production	457,000 ounces
	Average mining and re-handle cost	$2.75 per tonne
	Average processing cost	$14.30 per tonne
	Production cost of sales	$680 per ounce
	All-in sustaining cost	$835 per ounce
2020-2029 (Life of project)	Total tonnes mined	579 million tonnes
	Strip ratio	5.9
	Average CIL grade processed	2.0 grams per tonne
	Average recovery	93%
	Average annual production	634,000 ounces
	Average mining cost	$2.25 per tonne
	Average processing cost	$14.40 per tonne
	Production cost of sales	$530 per ounce
	All-in sustaining cost	$720 per ounce

Standalone Phase Two Estimates

	Estimate
Initial capital	$590 million
Internal rate of return	24%

Estimated Initial Capital Cost

	Estimate ($ millions)
Processing plant	137
Power supply	76
Water supply	50
Mining fleet	49
EPCM	27
Indirect, owner's cost and taxes	120
Contingency	79
Miscellaneous	52
Total	**$590**

Mauritania Highlights

Kinross has successfully operated in Mauritania since 2010

- Democratic republic that gained independence in 1960
- Mining-friendly jurisdiction:
  - Well-developed, competitive mining law
  - Mining is a major export industry
  - Companies operating in Mauritania include: SNIM, First Quantum, Algold
- Major foreign companies include:
  - BP, Total, Kosmos Energy, Tullow Oil, Société Générale
  - Recent increase in oil and gas investment
- Multilateral agencies such as IMF and World Bank active in the country

Country Statistics *(2017 estimates unless otherwise indicated)*	
Population	**3.7M**
GDP	**$5.0B**
% of GDP from mining *(2016 est)*	**7%**
Trade deficit	**$1.5B**
Government revenues	**$1.25B**
Budget deficit	**$53M**

Mining Convention: Royalty & Income Tax	
Government royalty	**3%**
Income tax rate	**25%**

Chirano, Ghana (90%)

Cost reduction achieved at Chirano by transitioning to self-perform

- Chirano is an underground operation located in southwestern Ghana
- Estimated mine life: 2020

Operating Results[2,3]

	2016	2017
Production (Au. Eq. oz.)	190,759	221,424
Production cost of sales ($/oz.)	$921	$797

2017 Gold Reserve & Resource Estimates[4]

	Tonnes (thousands)	Grade (g/t)	Ounces (thousands)
2P Reserves	8,301	2.1	567
M&I Resources	10,975	2.1	746
Inferred Resources	1,590	3.0	152

Endnotes

1) For more information regarding Kinross' production, cost, overhead expense and capital expenditures outlook for 2018, please refer to the news releases dated February 14, 2018 and August 1, 2018, both of which are available on our website at www.kinross.com. Kinross' outlook for 2018 represents forward-looking information and users are cautioned that actual results may vary. Please refer to the Cautionary Statement on Forward-Looking Information on slide 2 of this presentation and in our news release dated August 1, 2018, available on our website at www.kinross.com.

2) Unless otherwise noted, gold equivalent production, gold equivalent ounces sold and production cost of sales figures in this presentation are based on Kinross' 90% share of Chirano production and sales. Also unless otherwise noted, dollar per ounce ($/oz.) figures in this presentation refer to gold equivalent ounces.

3) Attributable production cost of sales per gold equivalent ounce sold and all-in sustaining cost per gold equivalent ounce sold are non-GAAP financial measures. For more information and reconciliations of these non-GAAP measures for the three months and six months ended June 30, 2018, please refer to the news release dated August 1, 2018, under the heading "Reconciliation of non-GAAP financial measures," available on our website at www.kinross.com.

4) Mineral reserves and mineral resources are estimates. For more information regarding Kinross' 2017 mineral reserve and mineral resource estimates, please refer to our Annual Mineral Reserve and Mineral Resource Statement as at December 31, 2017 contained in our news release dated February 14, 2018, which is available on our website at www.kinross.com.

KINROSS 25 YEARS
