Kinross Gold Corporation

KINROSS

Cautionary Statement on Forward-Looking Information

All statements, other than statements of historical fact, contained or incorporated by reference in or made in giving this presentation and responses to questions, including but not limited to any information as to the future performance of Kinross, constitute “forward looking statements” within the meaning of applicable securities laws, including the provisions of the *Securities Act* (Ontario) and the provisions for “safe harbor” under the *United States Private Securities Litigation Reform Act of 1995* and are based on expectations, estimates and projections as of the date of this presentation. Forward-looking statements contained in this presentation include those statements on slides with, and statements made under, the headings “”Kinross Value Proposition”, “Diversified Portfolio of Assets”, “2019E Outlook”, ”2019E Production & Costs”, “2019E Capital Expenditures Outlook”, “Development Projects”, “Project Milestones for 2019”, “Tasiast Phase One Exceeds Expectations”, “Tasiast Expansion Update”, “Tasiast Project Financing Update”, “Round Mountain Phase W Overview”, “Fort Knox Gilmore”, “Bald Mountain Vantage Complex”, “Russia Satellite Deposits”, “1 Year Mine Life Extension in Russia”, “Chile Projects”, and “Compelling Relative Value”, and include without limitation statements with respect to our guidance for production, production costs of sales, all-in sustaining cost and capital expenditures, permit applications and conversions, continuous improvement and other cost savings opportunities, as well as references to other possible events include, without limitation, possible events; opportunities; statements with respect to possible events or opportunities; estimates (including, without limitation, gold / mineral resources, gold / mineral reserves and mine life) and the realization of such estimates; future development, mining activities, production and growth, including but not limited to cost and timing; success of exploration or development of operations; the future price of gold and silver; currency fluctuations; expected capital requirements; government regulation; and environmental risks. The words “2019E”, “advancing”, “assumption”, “budget”, “continue”, “encouraging”, “envisions”, “estimate”, “expect”, “extends”, “feasibility”, “flexibility study”, “focus”, “forward”, “future”, “growth”, “guidance”, “invest”, “liquidity”, “objective”, “on schedule”, “on track”, “objective”, “opportunity”, “optimize”, “outlook”, “plan”, “position”, “potential”, “priority”, “proceeding”, “progressing”, “project”, “prospective”, “risk”, or “scoping study”, or variations of or similar such words and phrases or statements that certain actions, events or results may, can, could, would, should, might, indicates, or will be taken, and similar expressions identify forward looking statements. Forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable by Kinross as of the date of such statements, are inherently subject to significant business, economic, legislative and competitive uncertainties and contingencies. Statements representing management’s financial and other outlook have been prepared solely for purposes of expressing their current views regarding the Company’s financial and other outlook and may not be appropriate for any other purpose. Many of these uncertainties and contingencies can affect, and could cause, Kinross’ actual results to differ materially from those expressed or implied in any forward looking statements made by, or on behalf of, Kinross. There can be no assurance that forward looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. All of the forward looking statements made in this presentation are qualified by these cautionary statements, and those made in our filings with the securities regulators of Canada and the U.S., including but not limited to those cautionary statements made in the “Risk Factors” section of our most recently filed Annual Information Form, the “Risk Analysis” section of our FYE 2018 2018 Management’s Discussion and Analysis, and the “Cautionary Statement on Forward-Looking Information” in our news release dated February 13, 2019, to which readers are referred and which are incorporated by reference in this presentation, all of which qualify any and all forward-looking statements made in this presentation. These factors are not intended to represent a complete list of the factors that could affect Kinross. Kinross disclaims any intention or obligation to update or revise any forward-looking statements or to explain any material difference between subsequent actual events and such forward-looking statements, except to the extent required by applicable law.

Other information

Where we say "we", "us", "our", the "Company", or "Kinross" in this presentation, we mean Kinross Gold Corporation and/or one or more or all of its subsidiaries, as may be applicable.

The technical information about the Company’s mineral properties contained in this presentation has been prepared under the supervision of Mr. John Sims, an officer of the Company who is a “qualified person” within the meaning of National Instrument 43-101.

Kinross Value Proposition

Operational Excellence

Diverse portfolio of operating mines consistently meeting or outperforming operational targets

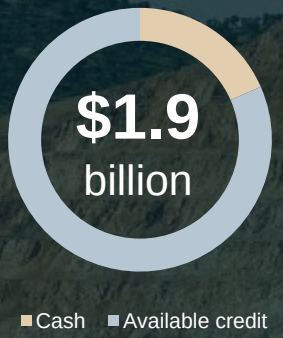

7 Consecutive Years

Met or **exceeded** guidance

Financial Strength & Flexibility

Maintaining strong balance sheet continues to be a priority objective

- Repaid over **$1.0 billion** of debt over past 6 years
- **~$1.9 billion** of liquidity
- **No debt maturities** prior to 2021
- Net debt to EBITDA: **1.4x**

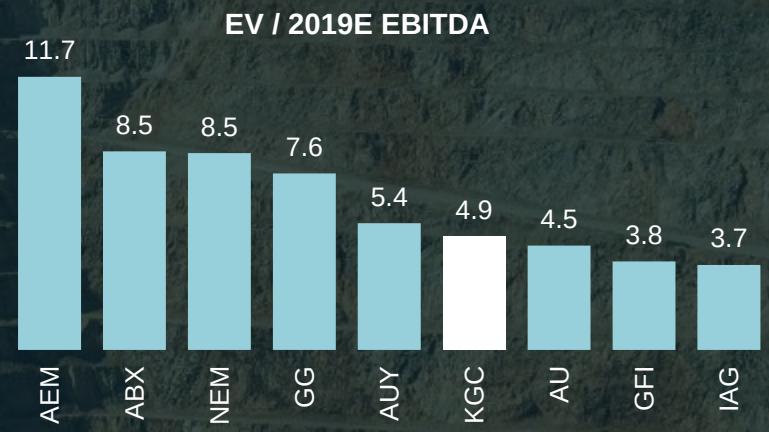

Development Projects

Diverse portfolio of major projects and additional development opportunities

- Relatively **low-risk** brownfields projects
- Located at or near **existing operations**
- Benefits of **existing infrastructure**
- **Well-known** mining jurisdictions

Compelling Relative Value

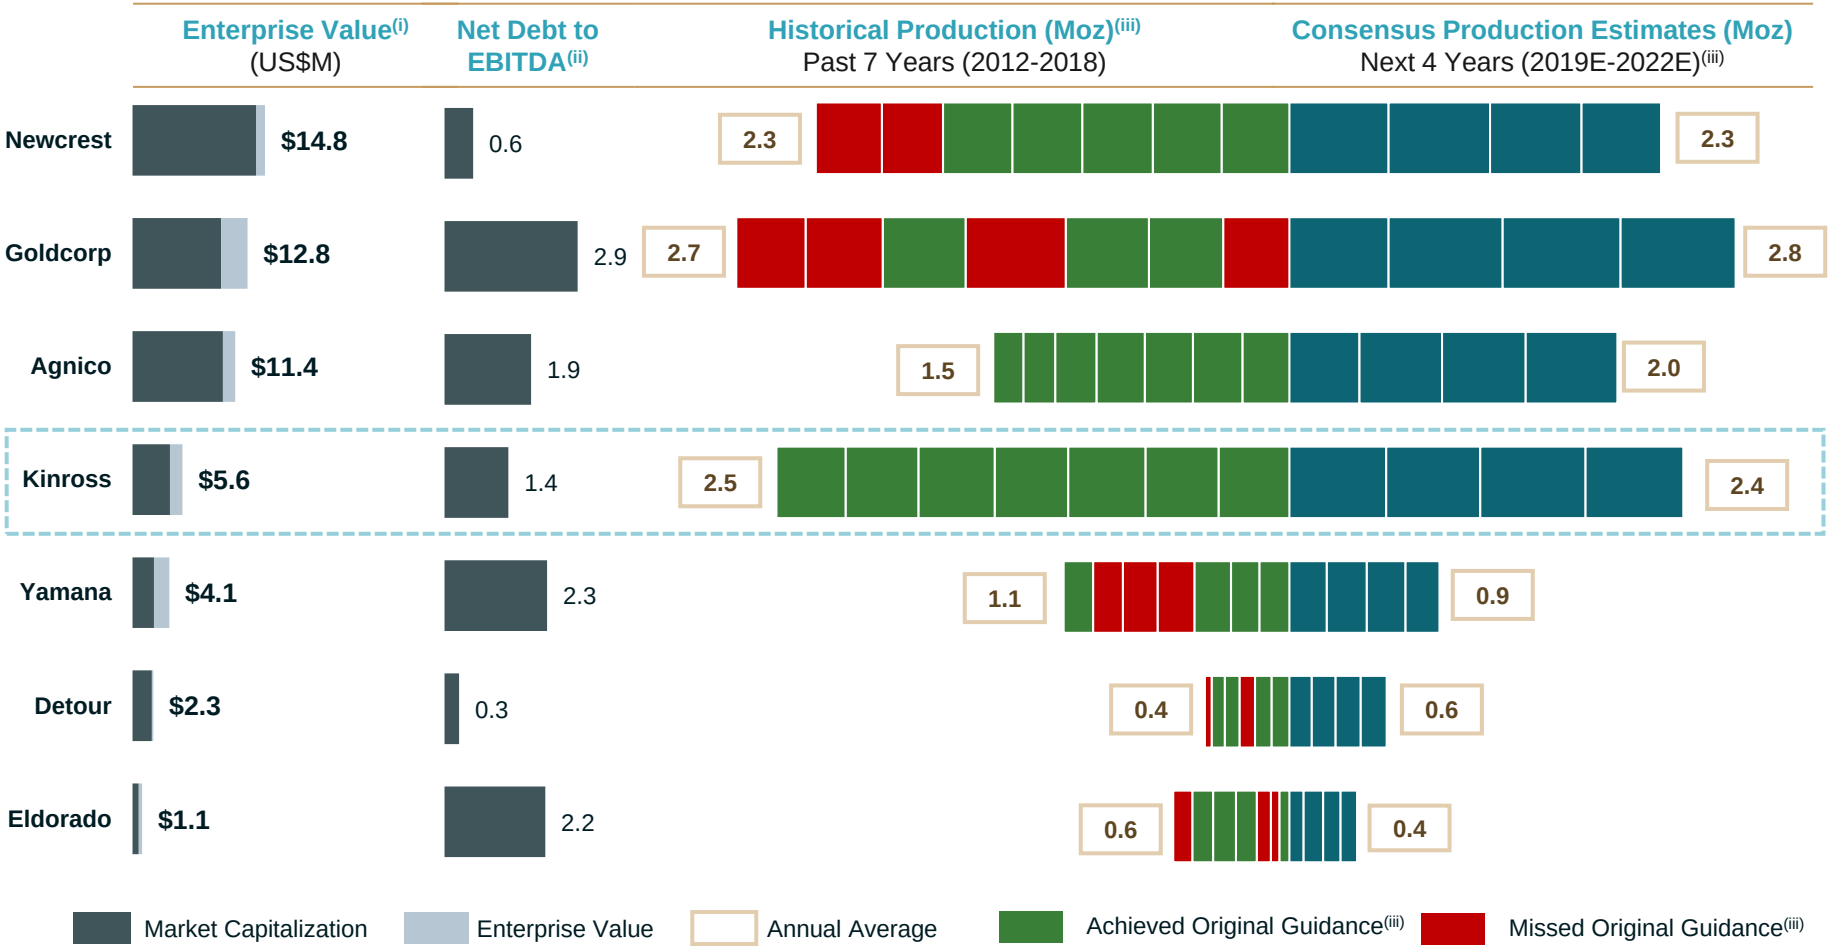

Attractive value opportunity relative to peers

Figures for cash, available credit and net debt to EBITDA are as at December 31, 2018
EV/2018E EBITDA – Source: FactSet (April 1, 2019)

Enterprise Value Versus Production

Market capitalization does not reflect significant scale of production and history of achieving guidance

(i) Source: FactSet.
(ii) Source: Company reports; Bloomberg; net debt to trailing 12-month adjusted EBITDA.
(iii) Source: company filings; metrics are for each company's respective fiscal year. Guidance based on original figures provided at beginning of year, adjusted for acquisitions & sales. Future production is based on analyst consensus estimates (FactSet). Analysts estimates for Kinross future production may assume completion of the Tasiast Phase 2 project.

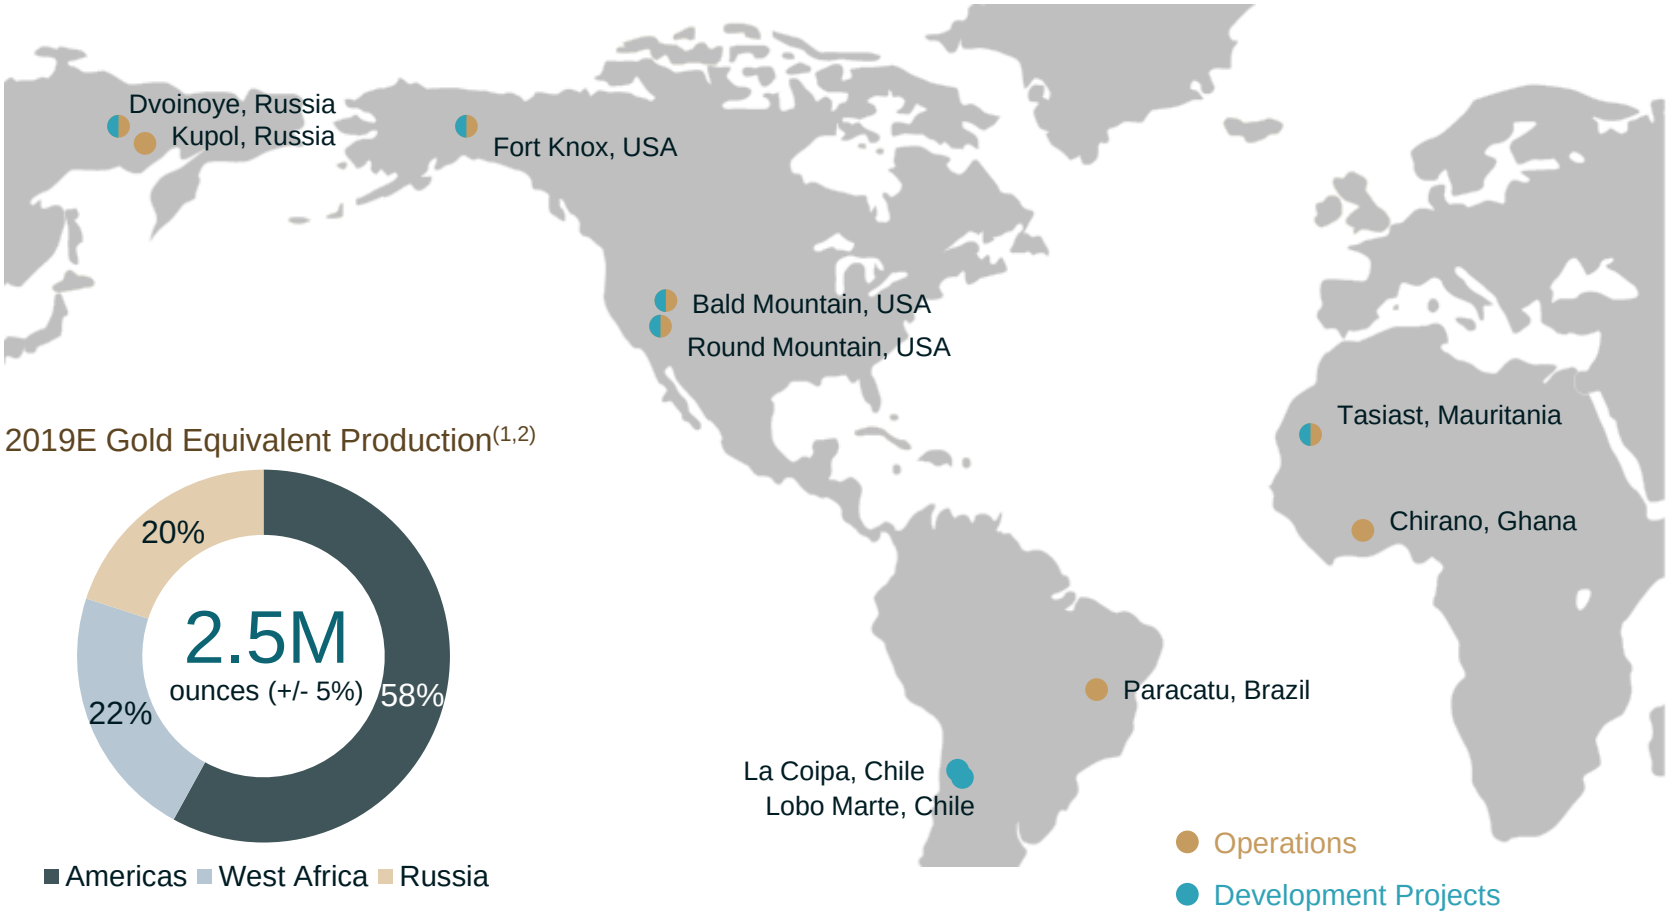

Operational Excellence

We remain focused on operational excellence, building a culture of continuous improvement, innovation and disciplined cost management

Diversified Portfolio of Assets

~60% of 2019E gold equivalent production expected from mines located in the Americas

2019E Gold Equivalent Production[1,2]

(1) Refer to endnote #1.
(2) Refer to endnote #2.

Seven Consecutive Years of Meeting Guidance

Kinross has met or exceeded guidance targets for production, costs and capital expenditures for the past seven years

	2012	2013	2014	2015	2016	2017	2018
Met or **exceeded** annual production guidance	✓	✓	✓	✓	✓	✓	✓
Met or **came in under** annual cost guidance	✓	✓	✓	✓	✓	✓	✓
Met or **came in under** annual capital expenditures guidance	✓	✓	✓	✓	✓	✓	✓

2018 Operating Results Highlights

Record annual production at Paracatu and Bald Mountain, while Tasiast achieved a record quarter in Q4

- Strong results from the overall portfolio, achieving guidance for:
  - Production
  - Cost of sales
  - All-in sustaining cost
- Significant improvement in Tasiast performance during Q4, following successful Phase One commissioning
- Operational challenges at Fort Knox, following impacts from pit wall failure & unseasonably high rainfall

2018 Achievements

Paracatu, Brazil

- Record annual production
- Increased throughput & recovery

Bald Mountain, USA

- Record annual production
- Kinross' lowest cost mine in 2018

Tasiast, Mauritania

- Record quarterly production in Q4
- Throughput & recovery exceeding expectations

2019E Outlook

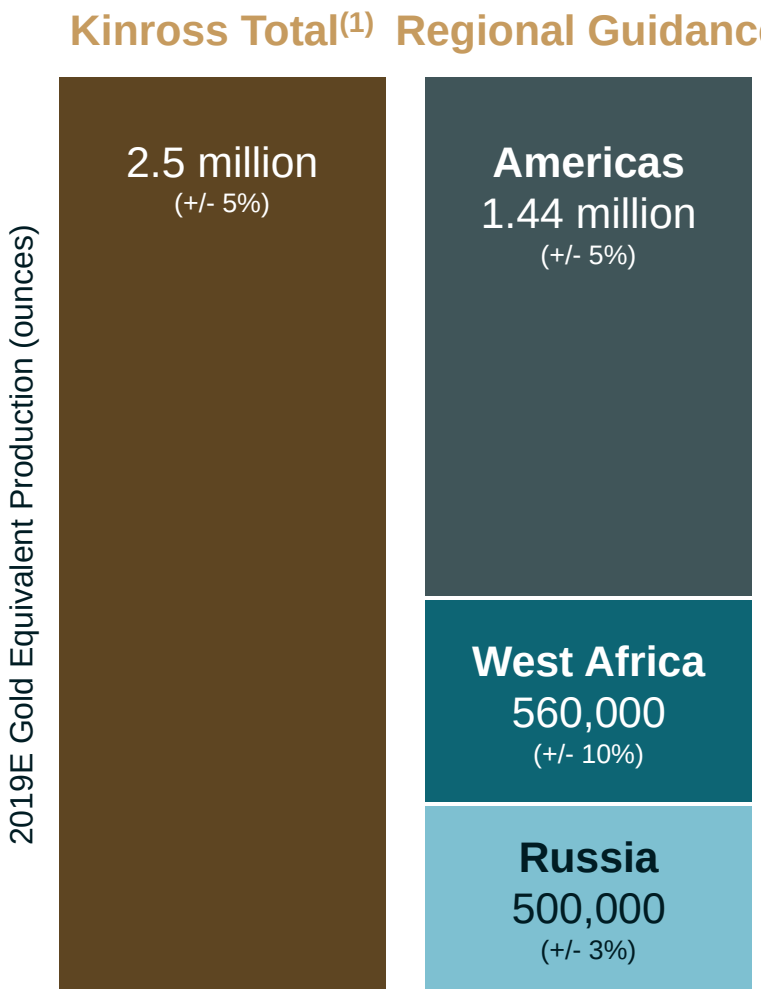

We are forecasting another strong year in 2019, with production and cost of sales in-line with 2018

	2018 Guidance (+/- 5%)	2018 Results	2019 Guidance[2] (+/- 5%)
Gold equivalent production (ounces.)[1]	2.5 million	2.45 million	2.5 million
Production cost of sales ($ per gold equivalent ounce)[1]	$730	$734	$730
All-in sustaining cost ($ per gold equivalent ounce)[3]	$975	$965	$995
Capital expenditures ($ millions)	$1,075	$1,043	$1,050

KINROSS

(2) Refer to endnote #2.
(3) Refer to endnote #3.

Strong Balance Sheet & Financial Flexibility

With strong cash flow and no debt maturities until 2021, we have the financial strength and flexibility to fund our pipeline of development projects

KINROSS

Solid Financial Position

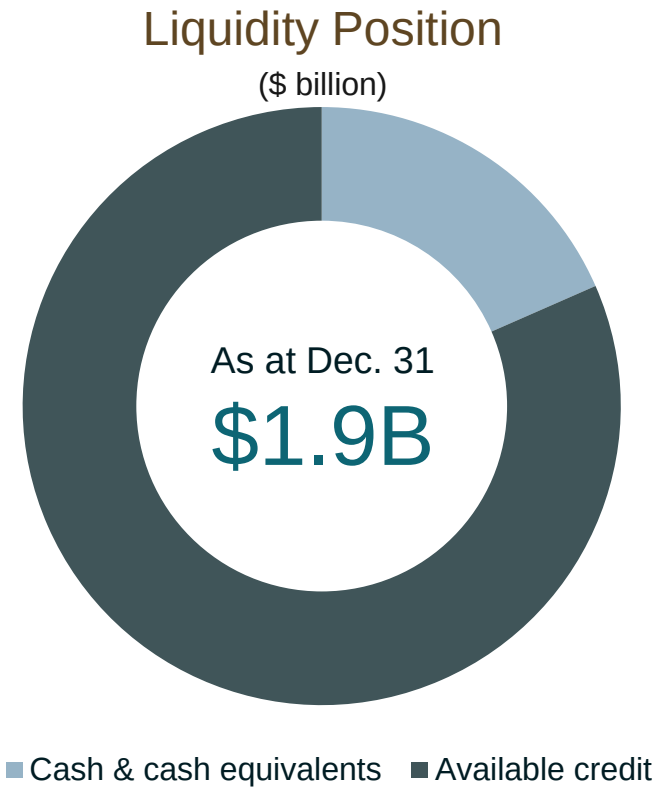

Strong position to finance organic development projects with existing liquidity and cash flow generation

Strategic investments to add value to our portfolio

- Completed the Phase One expansion and advanced our other development priorities
- Acquisition of power plants in Brazil for $254M
- Buying out JV partners, consolidating ownership of projects and land packages

Financial Flexibility

- Available liquidity of: **$1.9 billion**
- Manageable debt schedule with no debt maturities prior to **2021**

2019E Capital Expenditures[2]

- 2019 capital expenditures are expected to be $1,050 million (+/- 5%), including estimated capitalized interest of $65 million

Region	2019E Sustaining Capital	2019E Non-Sustaining Capital	Total 2019E Capital (+/- 5%)
Americas	$375	$295	$670
West Africa	$35	$240	$275
Russia	$30	$5	$35
Corporate	$5	-	$5
Sub-Total	$445	$540	$985
Capitalized interest			$65
Kinross Total			$1,050

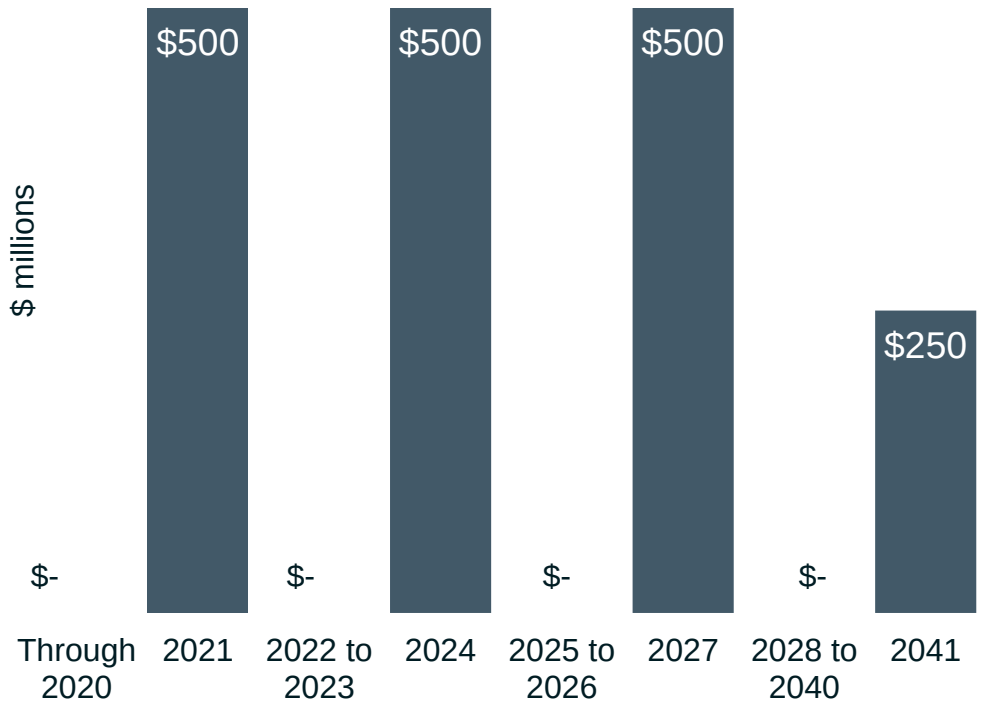

2019E Other Expenditures[2]	$ million
Exploration	$75
Overhead (G&A and business development)	$165
Other operating costs	$100

(2) Refer to endnote #2.

Manageable Debt Profile

No debt maturities prior to 2021

Debt Schedule

Debt Ratings

Agency	Rating
S&P	BBB- (Stable)
Moody's	Ba1 (Stable)
Fitch	BBB- (Stable)

Interest Rates

Senior Notes due 2021	5.125%
Senior Notes due 2024	5.950%
Senior Notes due 2027	4.50%
Senior Notes due 2041	6.875%

Development Projects & Exploration Highlights

We have a portfolio of development projects that we are progressing, and we are also focused on advancing a pipeline of future opportunities and high potential exploration targets

KINROSS

Project Milestones for 2019

First Quarter

Bald Mountain Vantage Complex

Expected to **initiate production** in the South Area of Bald Mountain

Commenced commissioning of processing circuit as planned in **Q1 2019**

Lobo-Marte

Refreshed look at the **highest grade** deposit in the Maricunga district

Lobo-Marte scoping study completed in **Q1 2019;** results to be released in May*

Second Quarter

Round Mountain Phase W

Expected to **extend mining** until 2027 at a top-performing US mine

Expect to commission Phase W processing circuit in **Q2 2019**

Russia Satellite Deposits

Developing **high-grade** deposits to be processed at **Kupol** mill

Dvoinoye Zone 1 scheduled to commence production in **mid-2019**

Third Quarter

La Coipa Restart Project

Studying potential **synergies** between La Coipa and Lobo-Marte

La Coipa feasibility study expected to be complete in **Q3 2019**

Fort Knox Gilmore

Low-cost brownfields project expected to extend mine life to 2030

Expect to commence stripping in **Q3 2019**

* With Kinross' Q1 2019 operating and financial results, which Kinross plans to release after market close on May 7, 2019.

Tasiast Phase One Exceeds Expectations

Benefits of Phase One expansion result in record quarterly production in Q4

- Strong Q4 production: 91,548 gold equivalent ounces
- Exceeding throughput & recovery expectations
  - Average Q4 throughput: 14,100 t/d
  - Average Q4 recovery: 94%
- Continuous improvement initiatives targeting meaningful cost & operational improvements
- Expecting strong performance at Tasiast in 2019

Tasiast Results	Q4 2018	Q4 2017
Production(1) (Au. Eq. oz.)	91,548	60,274
Production cost of sales(3) ($/oz.)	$830	$782

(1) Refer to endnote #1.
(3) Refer to endnote #3.

Tasiast Expansion Update

Phase Two continues to be a viable option as we complete our evaluation of alternative approaches to optimize further increases to Tasiast's throughput

- Incorporating strong Phase One results into analysis of throughput alternatives
- Objective is to evaluate options that lower capital expenditures while preserving Tasiast's overall value proposition

Phase Two considerations

- Results of our evaluation of throughput alternatives
- Acceptable project financing terms
- Capital priorities across our portfolio
- Ongoing discussions with the Government of Mauritania

Tasiast Phase One Project Financing Update

Project financing has progressed, with strong interest from multilateral organizations and commercial banks

- Targeting approximately $300 million in financing
- Have now signed mandate letter with IFC, a division of the World Bank, and Export Development Canada, indicating their interest
  - Subject to further due diligence
- Due diligence site visit conducted in Q4 2018, included meetings with relevant Mauritanian government Ministers and officials
- Received expressions of interest from certain commercial banks

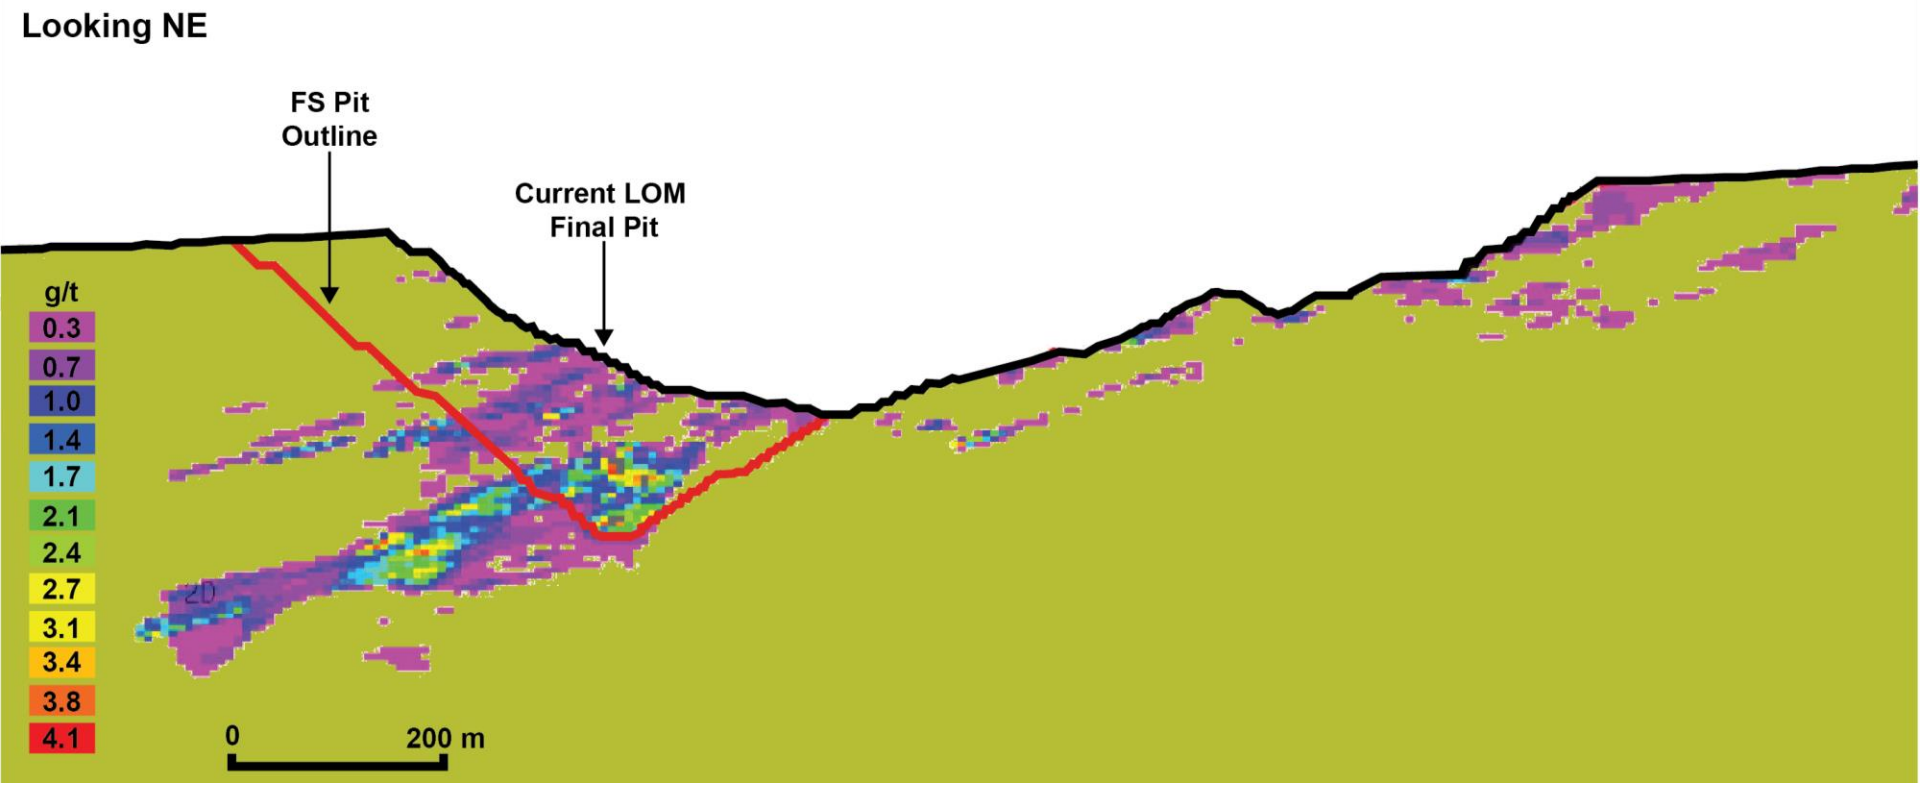

Kinross Remains in Discussions with the Government of Mauritania

Topics under discussion	Multi-lateral partnerships	Upcoming election
• Discussions have been focused on matters generally common in the mining industry: ▪ Taxes ▪ Work permits ▪ Increasing opportunities for local suppliers • In addition, we are discussing: ▪ Customs and import duties ▪ License conversions • Government has **not** expressed an intention to reopen the Mining Convention	• Involvement of the World Bank: ▪ Insurance policy covering the existing Tasiast operation in place with MIGA ▪ IFC engaged on the project financing, which is progressing well • Believe there is merit in their involvement to help drive alignment of interests among all parties	• It is expected there will be a Presidential election in Mauritania around mid-year • Expected to impact timing and substance of discussions

Round Mountain Phase W Overview

The Phase W project is expected to extend mining by 5 years at one of Kinross' top performing mines located in one of the world's best mining jurisdictions

Phase W Feasibility Study Results

Project expected to generate a 13% IRR at an assumed gold price of $1,200 per ounce

	Current mine plan + Phase W Estimates
Average annual production (2018-2024)	341,000 gold ounces
Production cost of sales (2018-2024)	$765 per gold equivalent ounce
All-in sustaining cost (2018-2024)	$905 per gold equivalent ounce
Mine life	Mining – 2024 Stockpile milling – 2025 Residual leach – 2027

	Phase W Stand Alone Estimates
Total ounces recovered	1.5 million ounces
Initial capital expenditures	$230 million
Capitalized stripping (non-sustaining)	$215 million
Internal rate of return(i)	13%
Net present value(i) (ii)	$135 million

KINROSS

Note: figures on this slide reflect at $1,200 per ounce gold price assumption.
(i) January 1, 2018 forward.
(ii) After tax, 5% discount rate.

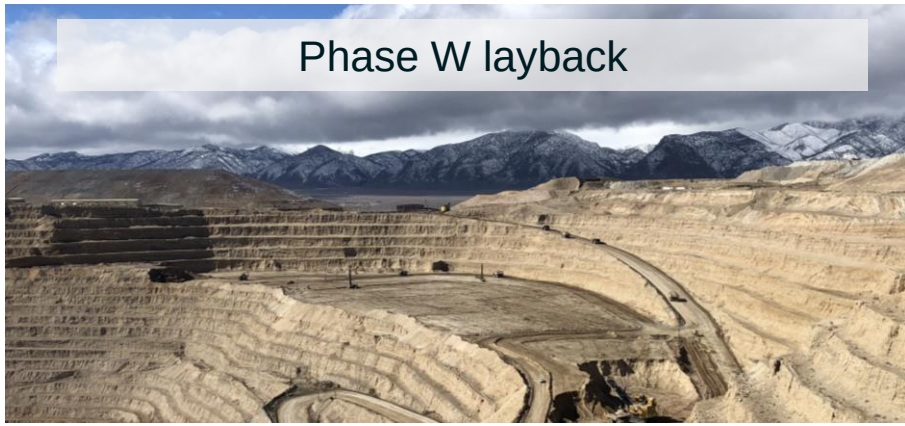

Round Mountain Phase W

The Phase W project is progressing well; expect to commission the processing circuit in Q2 2019

- Detailed engineering for all major infrastructure is now complete
- Construction of the new heap leach pad is nearing completion
- Construction of the vertical carbon-in-column plant is proceeding well and is ~80% complete
- Pre-stripping is advancing well; encountered initial Phase W ore ahead of schedule
  - Now stacking ore on the new heap leach pad
  - Initial solution application has commenced
- Construction of project infrastructure proceeding well

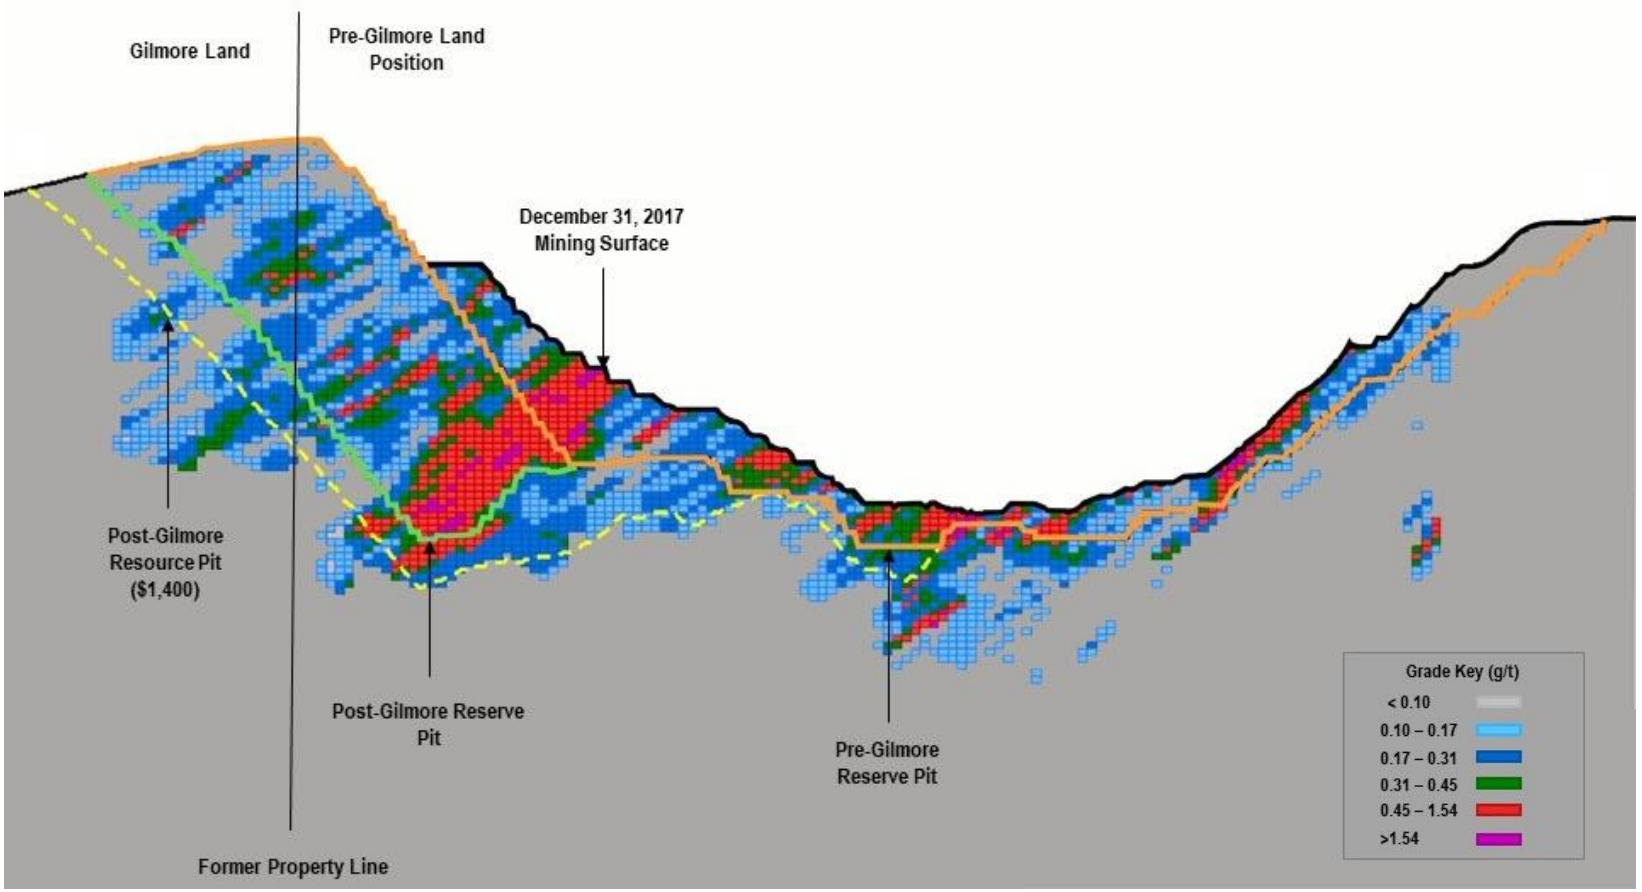

Construction of the truck shop

Phase W layback

Fort Knox Gilmore

Gilmore project expected to extend mine life to 2030 and strengthen long-term U.S. production profile

Gilmore Feasibility Study Results

Project expected to generate a 17% IRR at an assumed gold price of $1,200 per ounce

	Current mine plan + Gilmore estimates
Average annual production (2018-2027)	245,000 gold ounces
Production cost of sales (2018-2027)	$735 per gold equivalent ounce
All-in sustaining cost (2018-2027)	$1,015 per gold equivalent ounce
Mine life	Milling - 2020 Mining – 2027 Residual leach – 2030

	Incremental Gilmore estimates
Total ounces recovered	1.5 million ounces
Initial capital expenditures (2018-2020)	$100 million
Capitalized stripping (non-sustaining) (2018-2020)	$60 million
Internal rate of return(i)	17%
Net present value(i) (ii)	$130 million

KINROSS

Note: figures on this slide reflect at $1,200 per ounce gold price assumption.
(i) July 1, 2018 forward.
(ii) After tax, 5% discount rate.

Fort Knox Gilmore

Initial production from Gilmore is expected in early 2020

- Project includes:
  - The first two phases of a potential multi-phase layback of the Fort Knox pit; and
  - Construction of a new heap leach pad
- Engineering of the new heap leach is now complete
- Preparations for major construction of the new Barnes Creek heap leach pad, including grading, are proceeding well
- Drilling and expansion of the dewatering system will continue through the year, in preparation to begin stripping
  - Stripping expected to commence in Q3 2019

Bald Mountain Vantage Complex

Began commissioning of the Vantage Complex processing circuit in Q1 2019 as planned

- Heap leach pad is ~90% complete
- Construction of mine infrastructure is ~55% complete
- Mining activities at Vantage have commenced
- Now stacking Vantage ore on completed portion of the new heap leach pad
  - Initial solution application has commenced

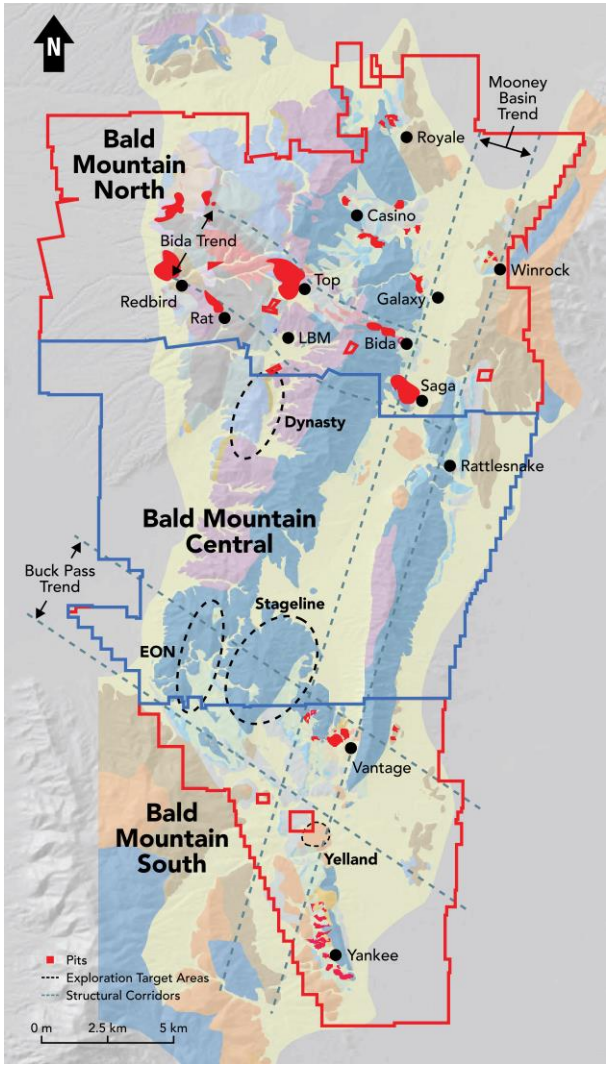

Bald Mountain Exploration Highlights

Kinross envisions Bald Mountain as a long-life asset with significant upside potential and mineral resource growth

- 2018 drill program was focused on near-mine opportunities to increase the resource base and provide a direct impact on operational planning

Plans for 2019

- Focusing efforts on the infill drill programs with a goal of upgrading mineral resources at several targets
  - North: Top, Redbird, Saga, Winrock
  - South: Yelland
- Also focusing on targets for resource growth, including in the Central area (now owned 100% by Kinross)
- Focused on higher grade, intrusion-related mineralization

Russia Satellite Deposits

Development of satellite deposits which are expected to contribute high-grade ore feed to the Kupol mill

Moroshka

- Located 4km east of the Kupol mill
- Project is now complete; production commenced in October 2018

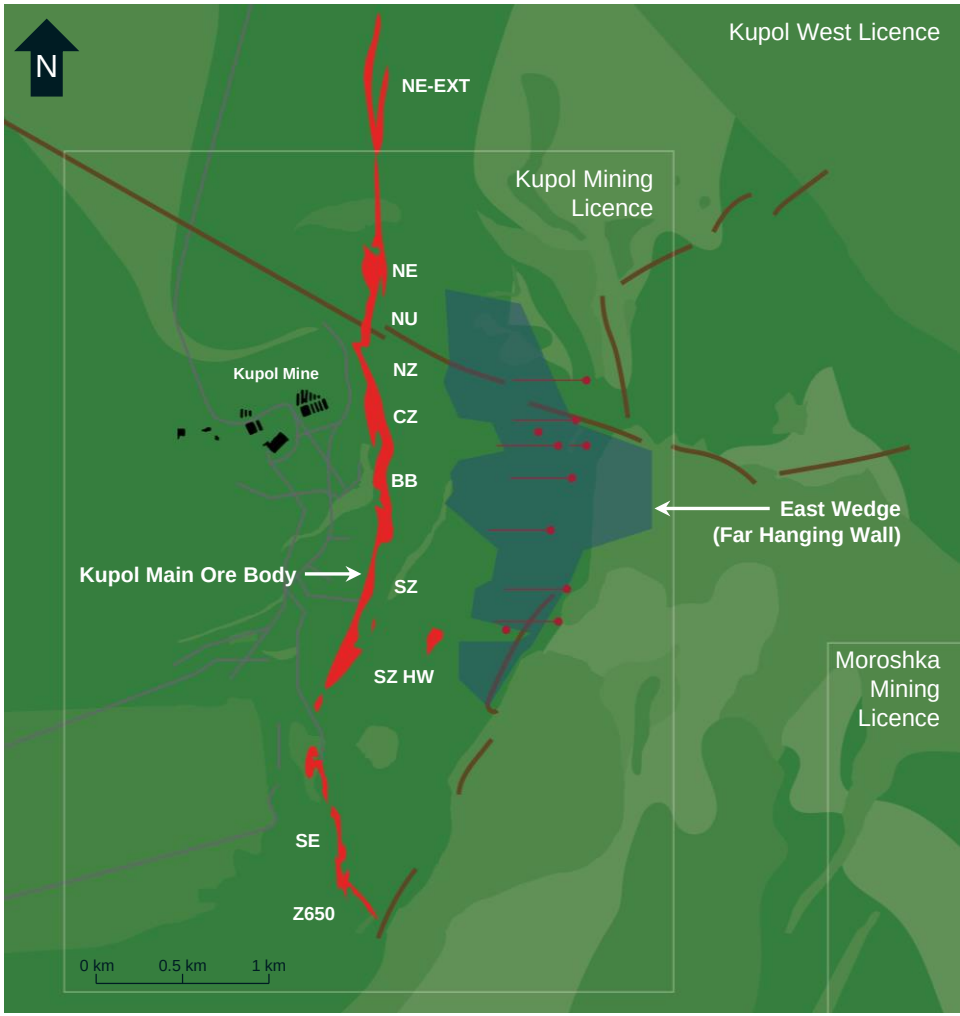

Dvoinoye Zone 1

- Development of Dvoinoye Zone 1 continues on schedule
- Production expected to commence mid-2019

Kupol Exploration Highlights

Many targets identified along the main Kupol trend

- In 2018, primary objective was to test depth and north extensions of the main Kupol vein system
- Drill intercepts continued to confirm high-grade narrow-vein mineralization extending northwards and at depth
- Increasing 2019 exploration budget to $20M[4]
- Plan to continue exploring and delineating high-potential targets at Kupol and Dvoinoye

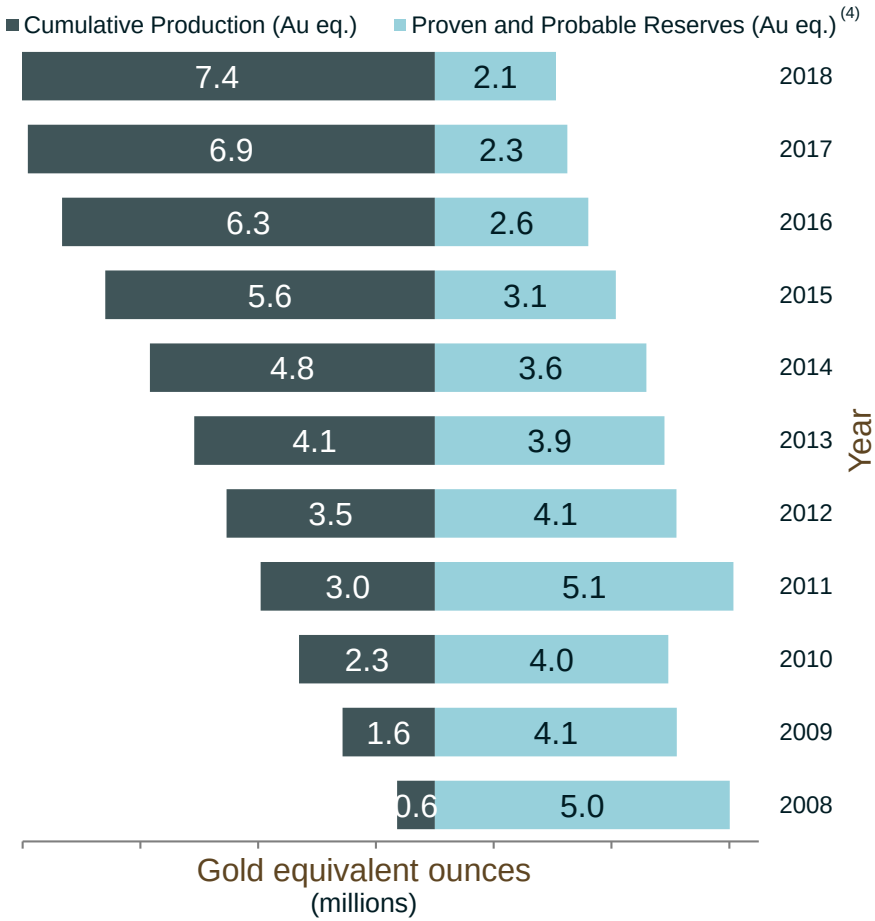

(4) Refer to endnote #4.

Another 1-Year Mine Life Extension in Russia

Continuing our track record of adding reserves to offset depletion at Kupol and Dvoinoye

- Estimated mill production extended to late 2023, another **1-year addition**
  - Result of mine plan optimization and exploration additions
- Continue to be encouraged by potential for future resource additions through exploration

(4) Refer to endnote 4. For more information regarding historical mineral reserve and mineral resource estimates for Kupol and Dvoinoye, refer to Kinross' Annual Mineral Reserve and Mineral Resource Statements, all of which are available on our website at www.kinross.com

Chile Projects

We are evaluating the potential for a return to production in Chile

La Coipa Restart Project

- Initiated a feasibility study on the Phase 7 deposit
  - Expected to be complete in Q3 2019

Lobo-Marte Project

- Located 80km from La Coipa
- Measured & indicated gold resource estimate: 7Moz. with grade of 1.2 g/t(4)
- Initiated a scoping study to assess potential for a production start at the end of La Coipa's mine life
  - Completed in Q1 2019; expect to share results with first quarter results in May

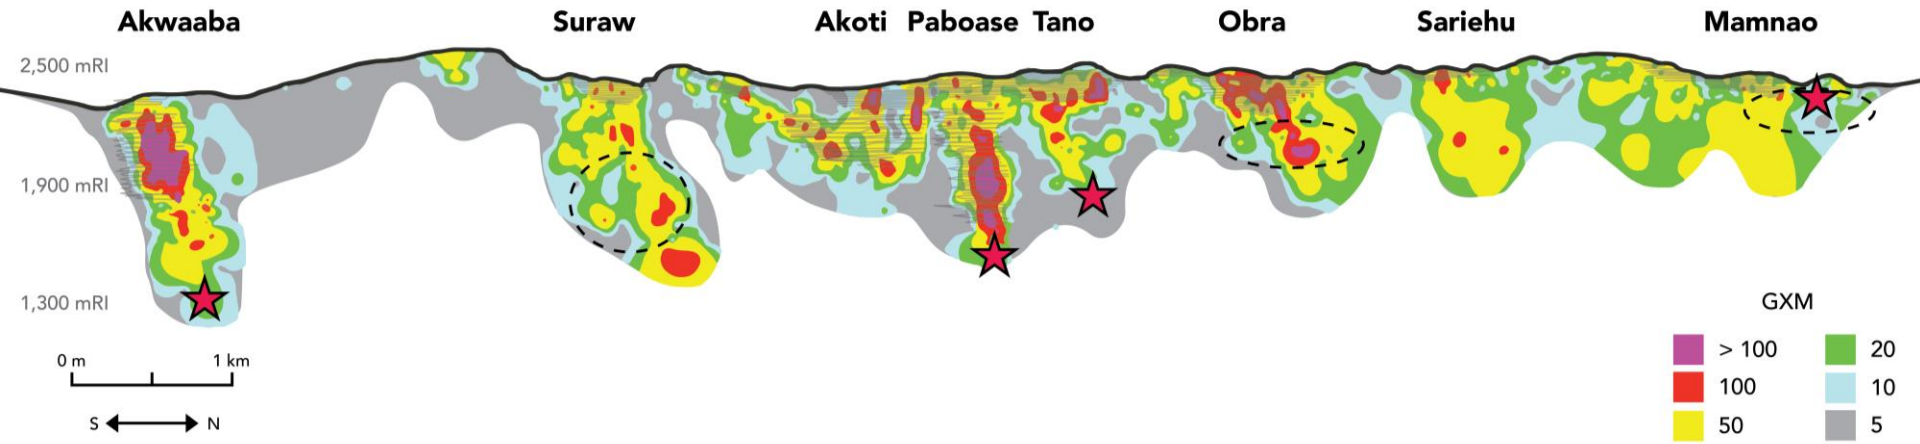

(4) Refer to endnote #4.

Chirano Exploration Highlights

Production at Chirano is now expected to extend to 2021, a 1-year extension

- 2018 exploration focus continued to be adding incremental ounces to mine life
  - Focused on infill drilling the depth potential at Akwaaba and Paboase
- Following success of 2018 program, increased budget for 2019 to drill depth extensions at Akwaaba and Paboase
- Started an exploration drift from Paboase underground to Tano, where economic gold mineralization was encountered at depth

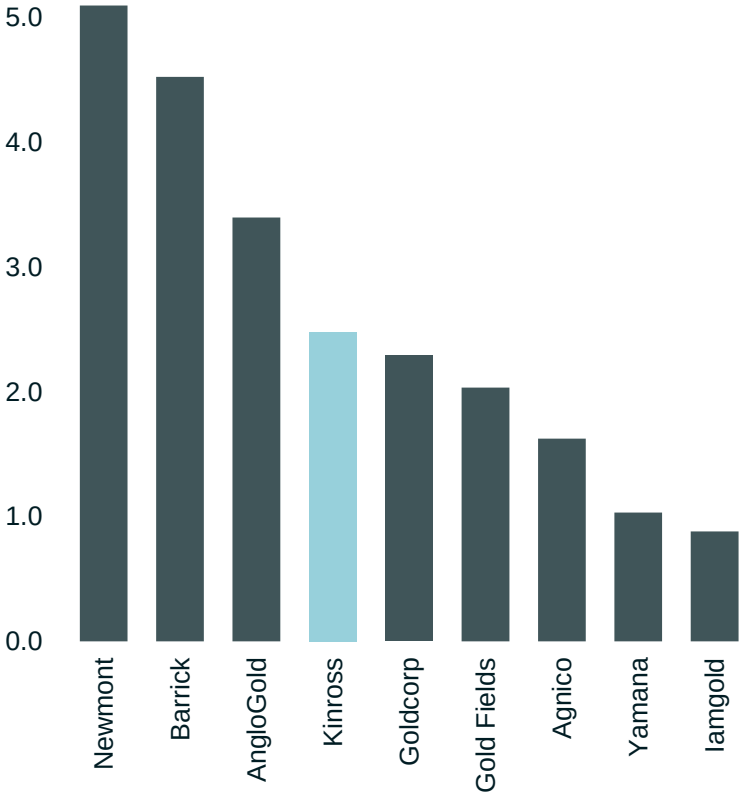

Compelling Relative Value

Attractive value opportunity relative to peers, considering Kinross' annual production, cost structure, track record and growth opportunities

Summary of Feasibility Study Results

Operating Estimates (current mine plan + Gilmore)

Timeline	Operational Metric	Estimate
2018-2027 (Mining)	Average annual tonnes mined	60 million
	Strip ratio	1.2
	Average grade processed	0.37 grams per tonne
	Average annual production	245,000 ounces
	Average mining cost	$2.19 per tonne*
	Average processing cost	$1.74 per tonne
	Production cost of sales	$735 per Au eq. oz.
	All-in sustaining cost	$1,015 per Au eq. oz.
2028-2030 (Leaching)	Average annual production	80,000 ounces
	Average processing cost (per annum)	$23.6 million
	Production cost of sales	$855 per Au eq. oz.
	All-in sustaining cost	$900 per Au eq. oz.
2018-2030 (Life of project)	Strip ratio	1.2
	Average grade processed	0.37 grams per tonne
	Average recovery rate	79%
	Average annual production	205,000 ounces
	Average mining cost	$2.19 per tonne*
	Average processing cost	$2.00 per tonne
	Production cost of sales	$745 per Au eq. oz.
	All-in sustaining cost	$1,005 per Au eq. oz.

** Includes capitalized stripping*

Incremental Gilmore Estimates(i)

	Estimate
Strip ratio	1.2
Life of mine ore processed	183 million tonnes
Average grade processed	0.35 grams per tonne
Life of mine production	1.51 million ounces
Average production cost of sales	$650 per Au eq. oz.
Average all-in sustaining cost	$950 per Au eq. oz.
Initial capital costs	$100 million
Capitalized stripping (non-sustaining)	$60 million
Internal rate of return(ii)	17%
NPV(iii)	$130 million

Estimated Gilmore Capital Cost

	Estimate ($ millions)
Barnes Creek heap leach pad	51
Geotechnical study and dewatering	19
Mining fleet & capitalized maintenance	12
Infrastructure, owner's cost and other	5
Contingency	13
Initial capital	**$100**
Capitalized stripping	$60M
Total	**$160M**

Summary of Feasibility Study Results

Operating Estimates (current mine plan + Phase W)

Timeline	Operational Metric	Estimate
2018-2024 (Mining)	Strip ratio	2.9
	Average grade processed	0.7 grams per tonne
	Average annual production[(i)]	341,000 ounces
	Average mining cost	$2.00 per tonne
	Average processing cost	$4.60 per tonne
	Production cost of sales	$765 per Au eq. oz.
	All-in sustaining cost	$905 per Au eq. oz.
2025-2027 (Stockpile milling / residual leach)	Strip ratio	N/A
	Average grade processed	0.46 grams per tonne
	Average annual production	46,000 ounces
	Average re-handle cost	$1.80 per tonne
	Average processing cost	$14.70 per tonne
	Production cost of sales	$720 per Au eq. oz.
	All-in sustaining cost	$785 per Au eq. oz.
2018-2027 (Life of project)	Strip ratio	2.9
	Average grade processed	0.7 grams per tonne
	Average annual production	253,000 ounces
	Average mining cost	$2.00 per tonne
	Average processing cost	$4.80 per tonne
	Production cost of sales	$765 per Au eq. oz.
	All-in sustaining cost	$900 per Au eq. oz.

Standalone Phase W Estimates

	Estimate
Life of mine production	1.5 million ounces
Life of mine ore processed	77.6 million tonnes
Average grade processed	0.8 grams per tonne
Strip ratio	4.0
Initial capital costs	$230 million
Capitalized stripping (non-sustaining)	$215 million
Internal rate of return	13%
NPV	$135 million

Estimated Phase W Initial Capital Cost

	Estimate ($ millions)
Mining fleet	73
Infrastructure	65
Heap leach pad	21
Process facilities	17
Tailings	9
Indirect and owner's cost	18
Contingency	27
Total	**$230**

KINROSS

(i) Includes years with large variances from the forecast average of up to +/- 150,000 ounces.

Bald Mountain, USA (100%)

Forecasting strong near-term cash flow with significant upside potential

- Large estimated mineral resource base with multiple sources of potential mineral reserve additions
- In 2018, achieved record production; lowest cost of sales in Kinross' portfolio
- Estimated mine life: 2023

Operating Results[3]

	2017	2018
Production (Au. Eq. oz.)	282,715	284,646
Production cost of sales ($/oz.)	$642	$547

2018 Gold Reserve & Resource Estimates[4]

	Tonnes (thousands)	Grade (g/t)	Ounces (thousands)
2P Reserves	66,650	0.6	1,347
M&I Resources	176,898	0.6	3,294
Inferred Resources	62,982	0.4	845

Paracatu, Brazil (100%)

Large gold mine with a long mine life that extends to 2032

- Paracatu is among the world's largest gold operations with annual throughput of ~60Mt
- Cornerstone asset in Kinross' portfolio
- Estimated mine life: 2032

Operating Results(3)

	2017	2018
Production (Au. Eq. oz.)	359,959	521,575
Production cost of sales ($/oz.)	$871	$822

2018 Gold Reserve & Resource Estimates(4)

	Tonnes (thousands)	Grade (g/t)	Ounces (thousands)
2P Reserves	590,628	0.4	7,938
M&I Resources	267,840	0.3	3,013
Inferred Resources	48,107	0.2	350

La Coipa Restart Project PFS Results (2015)

Project expected to generate a 20% IRR at an assumed gold price of $1,200 per ounce

- The pre-feasibility study estimates a 5.5 year mine life, following receipt of permits and commencement of stripping
  - Processing expected to commence 1.5 years after pre-stripping has been initiated and continue for 4 years

	Life of Mine Estimates (100% basis)[(i)]
Life of Mine	5.5 years
Total ounces recovered	1.03 million Au eq. oz.
Average annual production	207,000 Au eq. oz.
Average cost of sales	$674 per Au eq. oz.
Average all-in sustaining cost[(ii)]	$767 per Au eq. oz.
Initial capital	$94 million
Pre-Stripping	$105 million
IRR (after-tax)	20%
NPV[(iii)]	$120 million

Gold Price Sensitivity

	$1,100	$1,200	$1,300
IRR	15%	20%	26%

Additional Operating Metrics

	Life of Mine Estimates
Mill throughput capacity	13,000 tonnes per day
Average mining rate	80,000 tonnes per day
Average gold grade	1.69 g/t
Average silver grade	61.5 g/t
Average gold recovery	76%
Average silver recovery	59%
Strip ratio (waste:ore)	5.0

Key Assumptions

	Assumptions
Gold price	$1,200 per oz.
Silver price	$17 per oz.
Oil price	$65 per barrel
Chilean Peso	600 to the US dollar
Discount rate	5%

(i) Summary results are on a 100% basis, however Kinross has a 65% interest in Puren.
(ii) All-in sustaining cost includes operating cost, sustaining capital and post start-up capitalized stripping and does not include estimated initial capital expenditures of $94 million and estimated pre-stripping of $105 million, and any exploration, income taxes and non-cash items related to reclamation or allocation of regional or corporate overhead costs. This differs from the World Gold Council definition of all-in sustaining cost.
(iii) After tax, 5% discount.

Kupol-Dvoinoye (100%)

Our Russian mines are a model for successfully operating in a remote location

- High-grade, low-cost underground mines supported by 1 mill
- Estimated mine life: 2023, following another 1-year extension in 2018

Operating Results[3]

	2017	2018
Production (Au. Eq. oz.)	580,451	489.947
Production cost of sales ($/oz.)	$521	$582

2018 Gold Reserve & Resource Estimates[4]

	Tonnes (thousands)	Grade (g/t)	Ounces (thousands)
2P Reserves	7,388	7.7	1,832
M&I Resources	1,439	7.8	362
Inferred Resources	1,915	8.4	519

Foreign Investment in Russia

The world's leading companies are invested in Russia

Foreign Investment Advisory Council

- Chaired by the Russian Prime Minister, includes CEOs from over 50 international companies

Tasiast, Mauritania (100%)

Operating mine with a large gold resource located in a prospective district

- Successfully completed the Phase One expansion in 2018
- Performance exceeding expectations; record quarterly production in Q4 2018

Operating Results[3]

	2017	2018
Production (Au. Eq. oz.)	243,240	250,965
Production cost of sales ($/oz.)	$754	$976

2018 Gold Reserve & Resource Estimates[4]

	Tonnes (thousands)	Grade (g/t)	Ounces (thousands)
2P Reserves	119,917	1.9	7,440
M&I Resources	74,685	1.2	2,921
Inferred Resources	5,984	2.2	420

Summary of Feasibility Study Results

Operating Estimates (Phase One & Two combined)

Timeline	Operational Metric	Estimate
2020-2024 (First 5 years of Phase Two operation)	Total tonnes mined	438 million
	Strip ratio	6.4
	Average CIL grade processed	2.5 grams per tonne
	Average annual production	812,000 ounces
	Average mining cost	$2.05 per tonne
	Average processing cost	$14.50 per tonne
	Production cost of sales	$440 per ounce
	All-in sustaining cost	$655 per ounce
2025-2029 (Remaining life of mine)	Total tonnes mined	141 million tonnes
	Strip ratio	4.8
	Average CIL grade processed	1.5 grams per tonne
	Average annual production	457,000 ounces
	Average mining and re-handle cost	$2.75 per tonne
	Average processing cost	$14.30 per tonne
	Production cost of sales	$680 per ounce
	All-in sustaining cost	$835 per ounce
2020-2029 (Life of project)	Total tonnes mined	579 million tonnes
	Strip ratio	5.9
	Average CIL grade processed	2.0 grams per tonne
	Average recovery	93%
	Average annual production	634,000 ounces
	Average mining cost	$2.25 per tonne
	Average processing cost	$14.40 per tonne
	Production cost of sales	$530 per ounce
	All-in sustaining cost	$720 per ounce

Standalone Phase Two Estimates

	Estimate
Initial capital	$590 million
Internal rate of return	24%

Estimated Initial Capital Cost

	Estimate ($ millions)
Processing plant	137
Power supply	76
Water supply	50
Mining fleet	49
EPCM	27
Indirect, owner's cost and taxes	120
Contingency	79
Miscellaneous	52
Total	**$590**

Mauritania Highlights

Kinross has successfully operated in Mauritania since 2010

- Democratic republic that gained independence in 1960
- Mining-friendly jurisdiction:
  - Well-developed, competitive mining law
  - Mining is a major export industry
  - Companies operating in Mauritania include: SNIM, First Quantum, Algold
- Major foreign companies include:
  - BP, Total, Kosmos Energy, Tullow Oil, Société Générale
  - Recent increase in oil and gas investment
- Multilateral agencies such as IMF and World Bank active in the country

Country Statistics *(2017 estimates unless otherwise indicated)*	
Population	**3.7M**
GDP	**$5.0B**
% of GDP from mining *(2016 est)*	**7%**
Trade deficit	**$1.5B**
Government revenues	**$1.25B**
Budget deficit	**$53M**

Mining Convention: Royalty & Income Tax	
Government royalty	**3%**
Income tax rate	**25%**

Chirano, Ghana (90%)

Cost reduction achieved at Chirano by transitioning to self-perform

- Chirano is an underground and open pit operation located in southwestern Ghana
- Estimated mine life: 2021

Operating Results[1,3]

	2017	2018
Production (Au. Eq. oz.)	221,424	204,029
Production cost of sales ($/oz.)	$797	$768

2018 Gold Reserve & Resource Estimates[4]

	Tonnes (thousands)	Grade (g/t)	Ounces (thousands)
2P Reserves	6,053	2.1	415
M&I Resources	10,498	2.3	765
Inferred Resources	3,690	2.7	325

Endnotes

1) Unless otherwise noted, gold equivalent production, gold equivalent ounces sold and production cost of sales figures in this presentation are based on Kinross' 90% share of Chirano production and sales. Also unless otherwise noted, dollar per ounce ($/oz.) figures in this presentation refer to gold equivalent ounces.

2) For more information regarding Kinross' production, cost, overhead expense and capital expenditures outlook for 2019, please refer to the news releases dated February 13, 2019, which is available on our website at www.kinross.com. Kinross' outlook for 2019 represents forward-looking information and users are cautioned that actual results may vary. Please refer to the Cautionary Statement on Forward-Looking Information on slide 2 of this presentation and in our news release dated February 13, 2019, available on our website at www.kinross.com.

3) Attributable production cost of sales per gold equivalent ounce sold and all-in sustaining cost per gold equivalent ounce sold are non-GAAP financial measures. For more information and reconciliations of these non-GAAP measures for the three months and twelve months ended December 31, 2018, please refer to the news release dated February 13, 2019, under the heading "Reconciliation of non-GAAP financial measures," available on our website at www.kinross.com.

4) Mineral reserves and mineral resources are estimates. For more information regarding Kinross' 2018 mineral reserve and mineral resource estimates, please refer to our Annual Mineral Reserve and Mineral Resource Statement as at December 31, 2018 contained in our news release dated February 13, 2019, which is available on our website at www.kinross.com.
