September 2026

Cautionary Statement on Forward-Looking Information

All statements, other than statements of historical fact, contained in this presentation including, but not limited to, any information as to the future financial or operating performance of Kinross, constitute “forward-looking information” or “forward-looking statements” within the meaning of certain securities laws, including the provisions of the Securities Act (Ontario) and the provisions for “safe harbor” under the United States Private Securities Litigation Reform Act of 1995 and are based on expectations, estimates and projections as of the date of this presentation. Forward-looking statements contained in this presentation include, without limitation, statements with respect to: our guidance for production, cost guidance, including production costs of sales, all-in sustaining cost of sales, mill throughput and average grades, exploration spend, and capital expenditures; anticipated returns of capital to shareholders, including the declaration, payment, increase and sustainability of the Company’s dividends; the size, scope and execution of the proposed share buybacks and the anticipated timing thereof, including the Company’s statement targeting share buybacks and dividends for 2026 of 50% of free cash flow; statements with respect to our forecasts cash flow, free cash flow and estimated free cash flow yield; identification of additional resources and reserves or the conversion of resources to reserves; the forecast project schedules, production and economics of the Great Bear, Lobo-Marté, Phase X, Curlew and Redbird 2 projects, including but not limited to, total gold sales, margins, grade, strip ratio, taxes, average annual production, the net present value of the project, the internal rate of return on the project, project payback period, average yearly free cash flow, life of mine unit costs, projected mine life, the total initial capital expenditures; the project design; our forecast mining and processing statistics for the Lobo-Marté project; the development timelines of the projects to production including the Company’s work relating to permitting and development and construction of and production at the projects; the timing of and future prospects for exploration at our mines and projects, and any expansion of the projects, including upside associated with each project’s land package and via exploration; the potential for expanding the initial mineral resource of each project and the potential for identifying additional mineralization in areas of intercepts and conceptual areas for extension and expansion at our mines and projects; potential recovery rates or processing techniques; the Company’s plans to construct exploration declines at certain of its projects; budgets for and future plans for exploration, development and operation at the Company’s operations and projects; the Company’s grade enhancement strategy; anticipated milestones; planned timing for the submission of permits and impact statements; the Company’s sustainability goals and commitments including its greenhouse gas reduction initiatives and targets; potential mine life extensions at the Company’s operations; the Company’s balance sheet, debt levels and liquidity outlook, as well as references to other possible events including, the future price of gold and silver, costs of production, operating costs; price inflation; capital expenditures, costs and timing of the development of projects and new deposits, estimates and the realization of such estimates (such as mineral or gold reserves and resources or mine life), success of exploration, development and mining, currency fluctuations, capital requirements, project studies, government regulation, permit applications, environmental risks and proceedings, and resolution of pending litigation. The words “2026E”, “advance”, “anticipate”, “approach”, “beyond”, “commit”, “conceptual”, “continue”, “estimate”, “expect”, “focus”, “forecast”, “forward”, “future”, “growth”, “guidance”, “initial”, “milestone”, “on schedule”, “on track”, “opportunity”, “option”, “optionality”, “outlook”, “pending”, “plan”, “path”, “phase”, “plan”, “pipeline”, “potential”, “priority”, “proceed”, “progress”, “prospective”, “target” and “upside” or variations of or similar such words and phrases or statements that certain actions, events or results “may”, “could”, “will” or “would” occur, and similar expressions identify forward-looking statements. Forward-looking statements are necessarily based upon a number of estimates and assumptions that, while considered reasonable by Kinross as of the date of such statements, are inherently subject to significant business, economic and competitive uncertainties and contingencies. The estimates, models and assumptions of Kinross referenced, contained or incorporated by reference in this presentation, which may prove to be incorrect, include, but are not limited to, the various assumptions set forth herein and in our Annual Information Form dated March 26, 2026 and our full-year 2025 Management’s Discussion and Analysis as well as: (1) there being no significant disruptions affecting the activities of the Company whether due to extreme weather events and other or related natural disasters, labour disruptions, supply disruptions, power disruptions, damage to equipment or otherwise; (2) permitting and development of the projects being consistent with the Company’s expectations; (3) political and legal developments in the U.S., Canada and globally being consistent with its current expectations; (4) the accuracy of the current mineral resource and mineral reserve estimates of the Company (including but not limited to tonnage and grade estimates); (5) certain price assumptions for gold and silver and foreign exchange rates; and (6) inflation and prices for diesel, natural gas, fuel oil, electricity and other key supplies being approximately consistent with anticipated levels. Known and unknown factors could cause actual results to differ materially from those projected in the forward-looking statements. There can be no assurance that forward-looking statements will prove to be accurate, as actual results and future events could differ materially from those anticipated in such statements. Forward-looking statements are provided for the purpose of providing information about management’s expectations and plans relating to the future. All of the forward-looking statements made in this presentation are qualified by this cautionary statement and those made in our other filings with the securities regulators of Canada and the United States including, but not limited to, the cautionary statements made in the “Risk Analysis” section of our Management’s Discussion and Analysis for the year ended December 31, 2025, and the “Risk Factors” set forth in the Company’s Annual Information Form dated March 26, 2026, and the “Cautionary Statement on Forward-Looking Information” in our news releases dated July 29, 2026 and September 23, 2026, to which readers are referred and which are incorporated by reference in this presentation, all of which qualify any and all forward-looking statements made in this presentation. These factors are not intended to represent a complete list of the factors that could affect Kinross. Kinross disclaims any intention or obligation to update or revise any forward-looking statements or to explain any material difference between subsequent actual events and such forward-looking statements, except to the extent required by applicable law.

Certain forward-looking statements in this presentation may also constitute a “financial outlook” within the meaning of applicable securities laws. A financial outlook involves statements about the Company’s prospective financial performance, financial position or cash flows and is based on and subject to the assumptions about future economic conditions and courses of action and the risk factors described above in respect of forward-looking information generally, as well as any other specific assumptions and risk factors in relation to such financial outlook noted in this presentation. Such assumptions are based on management’s assessment of the relevant information currently available, and any financial outlook included in this presentation is provided for the purpose of helping viewers understand the Company’s current expectations and plans for the future. Viewers are cautioned that reliance on any financial outlook may not be appropriate for other purposes or in other circumstances and that the risk factors described above, or other factors may cause actual results to differ materially from any financial outlook. The actual results of the Company’s operations will likely vary from the amounts set forth in any financial outlook and such variances may be material.

Other information

Where we say “we”, “us”, “our”, the “Company”, or “Kinross” in this presentation, we mean Kinross Gold Corporation and/or one or more or all of its subsidiaries, as may be applicable.

The technical information about the Company’s mineral properties contained in presentation has been prepared under the supervision of Mr. Nicos Pfeiffer who is a “qualified person” within the meaning of National Instrument 43-101.

The studies and economic analyses referenced in this presentation are preliminary in nature and are based, in part, on inferred mineral resources. Inferred mineral resources are considered too geologically speculative to have the economic considerations applied to them that would enable them to be categorized as mineral reserves. There is no certainty that the economic forecasts on which the studies and economic analyses are based will be realized.

This presentation references attributable production cost of sales per equivalent ounce sold, attributable all-in sustaining cost per equivalent ounce sold, attributable adjusted operating cash flow, attributable free cash flow and attributable capital expenditures, which are non-GAAP financial measures and ratios, with no standardized meaning under IFRS and therefore, may not be comparable to similar measures presented by other issuers.

All dollar amounts are expressed in U.S. dollars, unless otherwise noted.

Table of Contents

Company Overview	4
Great Bear	20
Operations & Projects	29
Sustainability	57
Appendix	62

Kinross: A Top Performing Senior Gold Producer

OPERATIONAL EXCELLENCE

- **Strong execution** underpinned by operational and technical excellence
- **Forecast:**
 - **1.84 Moz¹ to 1.86 Moz¹** per year for 2026 and 2027
 - **\$1,850/oz to \$1,900/oz AISC²**
 - **6 mines** across attractive jurisdictions
- **Sizeable Gold Reserve³ & Resource³ base:**
 - **~21Moz** of Reserves,
 - **~27Moz** of M&I, and
 - **~17Moz** of Inferred
- **Pipeline** of projects including world class **Great Bear** and **Lobo-Marte**

FINANCIAL STRENGTH

- **Rigorous cost** and **capital discipline**
- **Strong margins** and **Free Cash Flow**
- **\$1.9B Net Cash⁴** – robust investment grade balance sheet
- **Significant return of capital** to shareholders (dividends & buybacks):
 - Targeting **50% of Free Cash Flow**
 - **~\$1.5 billion** returned since Jan 1, 2025
 - **~\$800 million** returned in 2026 YTD⁵
 - **+33% annual dividend⁶** since Q3/25
- **Growing per share metrics:** ~4% reduction in share count since Q1/25

COMPELLING VALUE

- **Significant leverage** to gold and shareholder returns
- **Compelling relative valuation** and **strong Free Cash Flow yield** of ~10%⁷
- **BUY recommendation** from majority of Research Analysts⁸
- **Highly liquid stock** ~US\$400M⁹ of daily volume across NYSE: KGC and TSX:K
- **2026 TSX Top 30** ranking for 3-year Total Shareholder Returns

LEADING SUSTAINABILITY PERFORMANCE

- **Consistent top performer** in Sustainability by key rating agencies
- On track for **30% reduction** in GHG intensity by 2030
- **99% of employees** hired within the host countries
- **\$58 billion** in Cumulative Benefit Footprint since 2010¹⁰
- Strong independent Board of Directors:
 - **7 new directors since 2019:** Proactive Board Refresh Program

1) Gold equivalent ounces (Au Eq. oz). Refer to endnote #1
 2) Refer to endnote #6
 3) Mineral Reserves & Resources as of December 31, 2025. See Appendix B.
 4) As of June 30, 2026. Net Cash / (Debt) is a non-GAAP financial measure with no standardized meaning under IFRS and therefore, may not be comparable to similar measures presented by other issuers. Refer to endnote #5.
 5) As of September 22nd, 2026
 6) Annual dividend of \$0.16 per share as announced on February 18th, 2026

7) FCF Yield Calculated as 2026E Free Cash Flow per Share estimate per consensus / Share Price. Source: S&P Capital IQ as of September 24th, 2026.
 8) As per Broker ratings available on Bloomberg as of September 24th, 2026. See Pg. 14
 9) Average daily dollar (USD) volume traded over last 30-days as of September 24th, 2026, across both TSX and NYSE
 10) Spending on procurement, payments to governments, wages and benefits and community investments Kinross-wide (see 2025 Sustainability Report on www.kinross.com)

High-Quality Portfolio of Assets

Backed by Top Tier¹ Mines and World Class Development Projects in Attractive Jurisdictions

KINROSS

1)

Top tier defined as assets with Life of Mine (LOM) into the next decade and annual production averaging greater than 500koz and cash costs in the lower half of the industry cost curve

2)

Forecast 2026-2028 production, costs and capital expenditures is attributable and includes Kinross' share of Manh Choh (70%). Refer to endnote #1. See Appendix A for 2025 actuals.

3)

Refer to endnote #3.

4)

Subject to ongoing inflationary impacts and project opportunities currently under study, which have the potential to contribute in the 2030s

5)

Refer to endnote #2.

6)

Per metrics outlined in PEA published on September 10th, 2024 with updated gold price which also impacts AISC through increased royalties

7)

Refer to endnote #6.

8)

Per metrics outlined in the Feasibility Study refresh published on July 29th, 2026, with Q2 2026 results

9)

Production cost of sales and all-in sustaining cost of sales ("AISC") figures are calculated with copper production applied as a by-product credit.

Refer to endnote #10

5

Strong Operating Track Record

Longstanding track record of meeting or exceeding annual guidance metrics

	2012	2013	2014	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024	2025	Kinross Avg.	Peer ¹ Avg.

Robust annual planning and guidance setting process

2026 Revised Guidance^{2,3}

Grade Enhancement Strategy

Long-term vision of portfolio optimization stretching into the 2030s

1) Open Pit (OP), Underground (UG)
 2) Refer to endnote #6.
 3) Refer to Endnote #8 on Project Economics. Updated for \$4,100/oz gold price compared to \$4,300/oz as part of the January 2026 US Projects Update.
 4) The PEA is preliminary in nature and is based, in part, on Inferred Mineral Resources. Inferred Mineral Resources are considered too geologically speculative to have the economic considerations applied to them that would enable them to be categorized as Mineral Reserves. There is no certainty that the economic forecasts on which the PEA is based will be realized. The economic update to the PEA only pertains to the change in the gold price from \$1,900/oz to \$4,100/oz which also impacts AISC through increased royalties.

5) Over the first 8 years
 6) Production cost of sales and all-in sustaining cost of sales ("AISC") figures are calculated with copper production applied as a by-product credit. Refer to endnote #10
 7) Refer to Endnote #9 on Project Economics. Figures are based on \$4,100/oz gold price.

Significant Resource Optionality

Significant resource base for potential extensions at existing operations

New growth projects that could potentially contribute to the production profile through the end of the decade and beyond

		\$2,000/oz Au		\$2,500/oz Au		Growth Opportunities	Potential 2027-30 Impact	Potential 2030+ Impact
		Reserves	Resources					
		2P	M&I	Inferred				
Extensions at Current Operations	Paracatu, Brazil	4.8	3.5	0.0	Resource extensions: NW layback and footwall extensions			✓
	Tasiast, Mauritania	4.4	2.4	2.4	Open pit optionality: West Branch 6, & Satellites; Underground optionality			✓
	Round Mt., U.S.A	1.9	1.4	2.0	Phase X underground plus extensions at depth; Other open pit optionality			✓
	Fort Knox ¹ , U.S.A	1.4	2.4	0.6	Open pit optionality: Phase 11 and Gil satellite deposit			✓
	Bald Mt., U.S.A	1.2	2.5	0.8	Open pit optionality: Redbird, Top pit, & other satellite pits			✓
	La Coipa, Chile	0.4	2.1	0.2	Oxide Open Pit Extensions			✓
Growth Project Optionality	Curlew, U.S.A.	-	0.4	0.8	Curlew project; Roadrunner, Stealth and other underground extensions			✓
	Great Bear, Canada	-	2.7	4.3	Expected to drive meaningful production and cash flow through the 2030s			✓
	Lobo-Marte, Chile	6.7	2.8	0.7	Open pit heap leach with strong grade (1.3 g/t), low strip ratio (2:1)			✓
	Maricunga, Chile	-	7.1	4.9	Open pit heap leach with significant scale & potential margin at current Au prices			✓
	Total Gold ^{2,3} (Moz)	20.9	27.5	16.6				
Δ vs 2024		-0.9	+1.6	+3.4	2P: substantially replaced depletion due to mine plan optimizations, near mine exploration and progression of project studies			
		M&I and Inferred: growth due to exploration success and leveraging higher gold prices for open pit growth						

US Project Highlights

Three US-based organic growth projects yielding significant incremental value

	Round Mt. Phase X <i>Nevada, USA</i>	Curlew <i>Washington, USA</i>	Bald Mt. Redbird 2 <i>Nevada, USA</i>	Highlights ¹
				
NPV 5% \$3,500² \$4,100²	\$1.3 B \$1.7 B	\$0.7 B \$1.1 B	\$0.6 B \$0.9 B	Cumulative addition of \$3.7B at \$4,100 Au

Attractive Project Pipeline

Potential 2029+ Production Impact

Great Bear *Ontario, Canada*

Lobo-Marte *Chile*

Tasiast UG & Satellites *Mauritania*

Maricunga *Chile*

Open Pit Laybacks

Project
Overview

Potential world-class development project, highly prospective PEA¹, >500 koz/yr² at \$856/oz AISC³

Potential world-class development project, long-life, strong heap leach grade (1.3 g/t), low-cost, low strip ratio (2:1)

Potential bulk-tonnage underground, and open pit satellite potential to extend Tasiast mine life

Potential open pit heap leach restart with significant resources (7.1 Moz M&I, 4.9 Moz Inf)

Potential open pit extension opportunities at Paracatu, Fort Knox, La Coipa & Bald Mountain

2026
Focus

- Advanced exploration decline development
- Main project detailed engineering and permitting
- Continue exploration from underground and on broader land package
- Main project construction

- Project study updated with Q2/26 results
- Baseline studies
- Progress permitting
- Progress technical and engineering work

- Exploration drilling of UG target extensions
- Exploration for additional OP satellite opportunities
- Progress technical studies for both UG and OP extensions

- Refresh mine plan and economics
- Progress technical studies
- Progress baseline and water studies

- Exploration drilling targeting optimization of next laybacks
- Progress technical studies
- Environmental baseline studies

1) The PEA is preliminary in nature and is based, in part, on Inferred Mineral Resources. Inferred Mineral Resources are considered too geologically speculative to have the economic considerations applied to them that would enable them to be categorized as Mineral Reserves. There is no certainty that the economic forecasts on which the PEA is based will be realized. The economic update to the PEA only pertains to the change in the gold price from \$1,900/oz to \$4,100/oz which also impacts AISC through increased royalties.
 2) Over the first 8 years
 3) Refer to endnote #6.

Cost Discipline Driving Strong Cash Flow

KINROSS

1) 2026 AISC guidance based on mid-point value of Company guidance ranges. Newmont AISC is on a co-product basis. Refer to endnote #3 and refer to Appendix A for Kinross' 2025 Actuals

2) Refer to endnote #7

3) FCF represents Attributable Free Cash Flow as reported. Financial figures are non-GAAP financial measures or ratios, as applicable, with no standardized meaning under IFRS and therefore, may not be comparable to similar measures presented by other issuers. Refer to endnote #3.

4) "Attributable" includes Kinross' 70% share of Manh Choh cash flow.

Per S&P Capital IQ calculations: Annualized NOPAT / Average Total Capital (i.e., Total Common Equity + Minority Interest + Long Term Debt + Long Term Leases)

Strengthening Financial Position

Financial Strength

- As of June 30, 2026:
 - \$2.7 billion** of cash and cash equivalents
 - Over \$900 million cash** added in H1/26
 - \$4.4 billion** of total liquidity¹
 - \$1.9 billion** of Net Cash²
- \$1.5 billion **revolving credit facility renewed** in 2025, restoring the 5-year term

Reduced Debt Profile

- No near-term debt maturities**
- In 2025:
 - \$700 million debt repaid**
 - \$200 million** – remaining term loan used to fund the Great Bear acquisition
 - \$500 million** – 4.50% Senior Notes due in 2027
 - Moody’s upgrade:** Baa3 to Baa2 credit rating
- In 2026, **S&P upgrade:** BBB- to BBB credit rating with a Stable outlook

Agency	Rating
Moody’s	Baa2 (Stable)
Fitch	BBB (Stable)
S&P	BBB (Stable)

Disciplined Capital Allocation Strategy

1	REINVESTING IN OUR BUSINESS	2025 ACTUAL	2026 TARGET	H1/26 ACTUAL

Study for UG mining opportunity

Ongoing Greenfield and Brownfield Exploration to Bring in New Projects and Mine Life Extensions

Investment Case: Why Kinross?

Delivering Shareholder Value

- Strong operating track record ✓
- Disciplined cost management driving strong margins ✓
- Generating significant free cash flow ✓
- Investment grade Balance Sheet ✓
- Attractive dividend & share buyback ✓
- Growing net asset value and per share metrics ✓
- Compelling valuation ✓
- Highly liquid stock ✓
- Significant resource inventory ✓
- Exciting pipeline of exploration & development opportunities ✓

Compelling Value

2026E Free Cash Flow Yield %¹

Share Price Outperformance

Great Bear

National Indigenous Peoples Day

Kinross' Great Bear team partnered with the First Nations to participate in a learning opportunity on land-based teachings and knowledge sharing.

Great Bear – Project Location

Premier mining jurisdiction with strong infrastructure

Highly Attractive Jurisdiction:

- Highly **attractive and stable** operating jurisdiction
- 24 km southeast of the Town of Red Lake, Ontario and 250 km east of Winnipeg, Manitoba

Established Existing Footprint:

- Host to **several existing mining operations**
- Close to strong skilled labour pool

Significant Regional Infrastructure:

- Site **accessible** via paved Highway 105
- **Power** – existing provincial transmission powerline, Bell fiber and Enbridge Natural gas line along the highway adjacent to the project
- **Fully functional airport with daily flights** from Winnipeg and Thunder Bay, Ontario

Strong Culture:

- **Continued engagement** with local stakeholders and Indigenous partners

Great Bear – Current Update

AEX and Main Project progressing well

On schedule for **first production in late 2029**, subject to permitting

MAIN PROJECT PERMITTING: Federal and Provincial permitting continues to advance

- **Federally:**

- **Impact Statement submitted**,
- Progressing through the **review phase**, and
- **Ongoing engagement** with the regulators and stakeholders

- **Provincially:**

- Permitting advancing under **One Project, One Process**,
- Project **definition completed**, and
- **Integrated Authorization and Permitting Plan** issued

PROJECT UPDATE:

- **Advanced Exploration:**

- Surface infrastructure is **93% complete**
- **First blast** of the exploration decline **recently completed**
- **Decline to provide access** for exploration and extension of the underground resource, as well as delineation drilling

- **Main Project:**

- Detailed engineering advancing well with **~50% complete**
- **Initial procurement is progressing** well with selection of open pit mining fleet nearing completion

Great Bear – PEA Highlights

Updated PEA⁴ Economic highlights both, strong economics and positive technical attributes

Positive Technical Attributes:

- ✓ Clean metallurgy – no deleterious elements
- ✓ High metallurgical recoveries of 95.7%
- ✓ Straightforward conventional mill circuit
- ✓ Right-sized 10ktpd mill reducing project risk
- ✓ Highly competent geotechnical conditions
- ✓ Strong underground widths for high-productivity long-hole mining
- ✓ Significant production flexibility from high-grade open pit combined with underground
- ✓ Robust tailings and water management strategy
- ✓ >500km of drilling to date including ~16km of geotechnical drilling and 35km of RC drilling increasing resource confidence

Manageable Capex
\$1.4B Initial Capital including
contingencies

Note: Metrics calculated after-tax at \$4,100/oz and are discounted at 5% where applicable; All dollar amounts are expressed in U.S. dollars;

1) Free cash flow (FCF) and All-in sustaining cost (AISC) are Non-GAAP measures. Refer to endnote #6.

2) Average FCF over the first 8 years of production excluding stump years.

3) Refer to endnote #2.

4) The PEA is preliminary in nature and is based, in part, on Inferred Mineral Resources. Inferred Mineral Resources are considered too geologically speculative to have the economic considerations applied to them that would enable them to be categorized as Mineral Reserves. There is no certainty that the economic forecasts on which the PEA is based will be realized.. The economic update to the PEA only pertains to the change in the gold price from \$1,900/oz to \$4,100/oz which also impacts AISC through increased royalties.

Great Bear – PEA Production Profile¹

Top Tier Production Profile of ~500koz per year production from the combined Open Pit and Underground operations >4 g/t Mill Grade

Great Bear – High Grade Intercepts at Depth

Drilling beyond the PEA inventory shows upside potential for resource additions

Recent deep drilling from surface shows continued high grade mineralization at depth, highlighting potential for resource additions

Great Bear – Exploration

- Positive results validating a view of potential for a multi-decade high grade operation
- Continuing to explore along the **18km LP Structural Corridor**
- New mineralization identified at the **Strider Zone**
- Drilling is active, on strike and down dip to define the extents of this new zone

Great Bear – AEX Decline

Enables efficient drilling of underground material

Conceptual Exploration Timeline

Great Bear – Targeted Path to Production

Conceptual Project Development Timeline

(1) Three phased submission of the Impact Statement completed on time. Phase 1, 2, and 3 submitted in September 2025, December 2025, and March 2026, respectively.

(2) Average timelines consider Impact Assessment Agency of Canada (“IAAC”) process. Permitting timelines are estimated and subject to Government process, consultation and engagement.

(3) Remaining construction and operating permits are to be obtained in the ordinary course during construction prior to First Production.

Operations & Projects

Mauritania

Mauritania

A world class mining jurisdiction

- **Politically stable democracy** which gained independence in 1960
- Safe, secure jurisdiction with positive regional relations and **strong US, French, and NATO presence**
- Actively **promotes foreign investment** with pro-mining policies and a competitive fiscal and regulatory framework
- Foreign investment is **robust and steadily increasing**, with investments from BP, Total and First Quantum among others
- **Mining is a major industry** and critical to the economy alongside fishing and oil & gas, with the mining sector contributing:
 - 19% to national GDP in 2024
 - 25% of government revenue in 2024
- **Tasiast is a major contributor to the national economy** through royalties and taxes, strengthening the economic benefits in country
- Kinross continues to maintain a **strong relationship with the Government of Mauritania and local communities** around the Tasiast mine

Tasiast

Low-cost mine backed by a substantial reserve and exploration potential

- Increased production over prior quarter due to higher throughput
- Cost of sales in-line with Q1 2026
- Lowest cost operation driving robust free cash flow
- On track to meet 2026 guidance
- Successfully finalized a 5-year CLA⁴ in Q4 2025
- Ongoing exploration highlighting the potential to extend mine life via satellite pits, open-pit extensions or underground

 4) Collective Labour Agreement ("CLA")

Tasiast

Production Profile – 2P Reserves Only

- Tasiast life-of-mine plan has been updated on the back of the 2024 reserve update
- Updated mine plan reflects continued success increasing 2025-2027 production profile via operational improvements, mine design, and satellite mining opportunities
 - **2026 & 2027:** Expected to be around 500koz/yr due to ongoing mine plan optimization
- Drilling at depth continues to show continuity of mineralization and potential for underground production in the longer term
- Production profile **excludes M&I resources of 2.4 Moz plus an additional 2.4 Moz** of Inferred resources

Tasiast West Branch Exploration

Tasiast West Branch – *Strong Underground Potential*

- 2025 deep drilling shows mineralization continues at least 1.8km along strike and down plunge
- Confirms strong continuity beyond current resource boundaries

Brazil

2026E Gold Equivalent Production¹

Asset	Highlights
Paracatu	• Top-tier² asset • Largest gold mine in Brazil, and one of the world’s largest gold mining operations • Attractive cost structure and stable long mine life extending into the next decade • Track record of strong operating performance with eight consecutive years >500koz of production • Two hydro-electric power plants supplying ~70% of site power

Paracatu

Top-tier gold mine with production extending into the next decade

- **Largest producer in Q2** driving substantial free cash flow
- Continued **strong recoveries** driven by continuous improvement
- **Higher throughput** over Q1 2026
- **8th consecutive year producing over 500koz in 2025**
- **On track to meet 2026 guidance**

[Link to Paracatu VRIFY Model on Kinross Website](#)

1) Represents 2026 Guidance and reflects a range of +/- 5%. Refer to endnote #1
2) Refer to endnote #2
3) See Appendix B

Paracatu

Production Profile – 2P Reserves Only

- Paracatu life-of-mine plan updated, extending mine life to 2034
- ~760koz added to the 2026-2034 window vs. the 2020 Technical Report
- Recoveries improved from ~75% in 2020 to ~80% in 2025
- Production profile **excludes Measured & Indicated resources of 3.5 Moz:**
 - Drilling and mine plan optimization continues to further extend the production profile

Chile

2026E Gold Equivalent Production¹

Asset	Highlights
La Coipa	La Coipa oxide extensions show promising opportunities to extend mine life
Lobo-Marte	World Class Development Project with excellent long-life production potential
Maricunga	Past producer with significant resource

1) Refer to endnote #1

La Coipa

Executing improvement initiatives while advancing resource optionality

- **Production forecast lowered for 2026 and 2027** due to unprecedented winter weather and higher than expected copper grades resulting in lower-than-expected recoveries
- **Initiatives in place** to improve throughput and recovery
- **Advancing exploration and studies** focused on copper sulphide optionality

Operating Results			
	2024A	2025A	H1/26A
Production (Au eq. oz.)	246,131	231,770	113,250
Production cost of sales (\$/oz.) ¹	\$959	\$1,208	\$1,460

2P Reserves	7,342	1.8	436	45.9	10,839
M&I Resources	46,001	1.4	2,128	35.3	52,143
Inferred Resources	4,799	1.2	188	41.2	6,358

Chile – Strong Production Outlook

Mined in succession, La Coipa & Lobo-Marte could enable production in Chile beyond 2040

- La Coipa and Lobo-Marte are located in Chile’s Atacama (Region III), approximately 650 km north of Santiago
- Both deposits are in the Maricunga Belt with access to infrastructure, and just 50km apart.
- Lobo-Marte has the potential to be a long-life asset with a sizeable production profile
- Opportunity to share infrastructure and equipment from Kinross’ projects in the region (e.g., water source, processing equipment and camp)

2025 Chile Gold Reserve & Resource Estimates¹

	2P Reserves	M&I Resources	Inferred Resources
La Coipa	0.4	2.1	0.2
Lobo-Marte	6.7	2.8	0.7
Maricunga	-	7.1	4.9
Total Chile (Moz)	7.1	12.0	5.8

[Link to Chile VRIFY Model on Kinross Website](#)

Lobo-Marte – Project Highlights

Long-life, low-cost heap leach with strong margins

Project Economics ¹			
		\$3,500/oz	\$4,100/oz
NPV _{5%}	(\$B)	\$3.2B	\$4.3B
IRR	(%)	22%	26%
Payback	(yrs)	2.7	2.3
Avg. Prod. Cost of Sales ^{2,3}	(\$/oz Au)	\$700	\$690
Avg. AISC ^{2,3}	(\$/oz Au)	\$1,010	\$1,000
Initial Capital	(\$B)	\$1.8B	\$1.8B
Avg. Annual Production ⁴	(koz Au)	350 koz	350 koz
LOM Au Oz Production	(Moz Au)	4.6 Moz	4.6 Moz
Initial Operating Life	(yrs)	15	15
Avg. Au Grade	(g/t)	1.3	1.3
Avg. Au Recovery	(%)	69%	69%
Peak Mining Rate ⁵	(Mtpa)	50	50

- Robust economics:** Strong margins, \$1,000/oz AISC^{2,3}, and excellent returns of \$4.3B NPV and 26% IRR at \$4,100/oz
- High-margin production:** Average of ~350 koz Au per year from low-cost, low-strip, high-grade heap leach operation
- Upside potential:** 2.8 Moz of Indicated Resources and 0.7 Moz of Inferred beyond the FS mine plan; open at depth in gold porphyry
- \$1.8B capital estimate based on high-level update of 2021 FS:** Accounts for inflation and advancement of the execution strategy

Lobo-Marte update contains forward-looking information about expected future events and financial and operating performance of the Project. Please refer to the Cautionary Statement on Forward-Looking Information on slide 2 of this presentation

1) Refer to endnote #9 on Project Economics
 2) Production cost of sales and all-in sustaining cost of sales ("AISC") figures are calculated with copper production applied as a by-product credit.

3) Refer to endnote #10
 4) During steady state operations
 5) Total tonnes mined – includes waste and ore tonnes

Lobo-Marte – Planned Mining and Processing Overview

Large scale, low-strip, high heap leach grade supports strong margins

MINING:

- **Two large scale open pits** mined sequentially in the current mine plan
- **Large-scale fleet** delivering 50 Mtpa peak mining rate and low mining cost of \$3.25 per tonne
- **Covered overland conveyors** from open pits to crushing facilities reduce dust and add cost efficiencies
- **Low estimated strip ratio of 2:1** drives low-costs and strong project economics

PROCESSING:

- **Conventional heap leach¹** with 35 ktpd three-stage crushing
- **15-year initial operating life producing 4.6 Moz Au**
- **Low estimated processing cost** of \$12.30 per tonne driven by amenability to heap leach
- **High anticipated heap leach grade of 1.3 g/t** drives strong margins and project economics
- **~69% strong forecasted heap leach recovery**

Mining Statistics	Units	Marte Pit	Lobo Pit	Total
Total Ore & Waste Mined	(Mt)	179	309	488
Strip Ratio	(Waste:Ore)	1.3	2.7	2.0

Total Au Production	(Moz Au)	4.6
Total Cu Production	(Mlbs Cu)	64
Avg. Annual Production ²	(koz/yr Au)	350
Avg. Unit Processing Cost	(\$/t processed)	\$12.30

Lobo-Marte update contains forward-looking information about expected future events and financial and operating performance of the Project. Please refer to the Cautionary Statement on Forward-Looking Information on slide 2 of this presentation

Lobo-Marte – Upside Potential

Gold porphyry system on Chile's prolific Maricunga belt provides significant upside potential

- **Current FS mine plan reserve inventory of 6.7 Moz** based on 2021 FS study at \$1,200 gold price
- **Significant potential for mine life extension** from ~2.8 Moz indicated and ~700 koz inferred resource
- **Porphyry mineralization extends beyond the resource**
- **Broader future potential upside:** Located on prolific Maricunga belt with potential satellite pit additions. Land package includes ~400 km² in exploitation-mining and exploration concession grants

2025 Gold Reserve & Resource Estimates¹

	Tonnes (kt)	Grade (g/t Au)	Ounces (koz Au)
2P Reserves	160,720	1.3	6,732
M&I Resources	120,762	0.71	2,752
Inferred Resources	32,911	0.63	670

Lobo-Marte update contains forward-looking information about expected future events and financial and operating performance of the Project. Please refer to the Cautionary Statement on Forward-Looking Information on slide 2 of this presentation

United States

Asset	Highlights
Fort Knox, Alaska	High-grade production contribution from Manh Choh
Round Mountain, Nevada	Established production plan to 2038 with the bulk tonnage Phase X UG operations
Bald Mountain, Nevada	Open-pit mining with a large mineral resource base
Curlew, Washington	High-grade, UG operations restart producing into late 2030s

United States Total	2024A	2025A	H1/26A
Attributable ² production (Au eq. oz.)	730,953	675,589	290,205
Production cost of sales (\$/oz.) ³	\$1,295	\$1,417	\$1,948
Attributable ² production cost of sales (\$/oz.) ⁴	\$1,313	\$1,426	\$1,926

1) Refer to endnote #1
2) "Attributable" includes Kinross' 70% share of Manh Choh production and costs, as applicable.
3) Refer to endnote #2.
4) Refer to endnote #3

Fort Knox

High grade production contribution from Manh Choh

- **Strong contribution** from both Fort Knox and Manh Choh, in-line over prior quarter
- **Cost of sales decreased** over prior quarter due to timing of ounces through the mill
- Current **production life** is expected to extend **to 2030**
- **Further optionality** at Phase 11 with **~2.0Moz** indicated resources
- Significant mill capacity **provides optionality** for **future production growth**

Operating Results

	2024A	2025A	H1/26A
Attributable ¹ production (Au eq. oz.)	334,519	353,018	189,479
Production cost of sales (\$/oz.) ²	\$1,205	\$1,339	\$1,729
Attributable ¹ production cost of sales (\$/oz.) ³	\$1,233	\$1,344	\$1,674

2025 Gold Reserve & Resource Estimates⁴

		Tonnes (kt)	Grade (g/t)	Ounces (koz)
Fort Knox	2P Reserves	82,940	0.4	976
	M&I Resources	233,082	0.3	2,400
	Inferred Resources	47,909	0.4	599
Manh Choh	2P Reserves	2,033	6.8	444
	M&I Resources	703	2.0	46
	Inferred Resources	0	3.2	0

1) "Attributable" includes Kinross' 70% share of Manh Choh production and costs, as applicable.
2) Refer to endnote #2
3) Refer to endnote #3
4) Refer to Appendix B

Round Mountain

Phase S Open Pit mined as a bridge to Phase X underground

- **Production forecast lowered for 2026 and 2027** due to lower mining rates, grades and recoveries; improvement initiatives underway
- **Continue to transition** towards higher-grade, higher-recovery Phase S
- **Primary focus on advancing Phase X** to extend operations to 2038:
 - **High margin, bulk tonnage** UG on track for first production in 2028
 - Construction, development, and infill drilling progressing well
 - **Received all** major operational **permits for Phase X**

Operating Results

	2024A	2025A	H1/26A
Production (Au eq. oz.)	215,387	143,402	45,989
Production cost of sales (\$/oz.) ¹	\$1,527	\$1,918	\$3,030

2025 Gold Reserve & Resource Estimates²

	Tonnes (kt)	Grade (g/t)	Ounces (koz)
2P Reserves	45,055	1.3	1,888
M&I Resources	81,275	0.6	1,446
Inferred Resources	61,269	1.0	1,960

Round Mt. Phase X – Production and Cost profile

Significant incremental production at an average AISC¹ of \$1,665/oz at \$4,100 Au

Round Mt. Phase X – Strong exploration potential

Further upside potential via proximal growth and down-dip extensions

Mine Plan Inventory:

- ~8,400 metres of development completed to date
- ~35,000 metres of infill drilling completed to date
- Driving strong initial reserve and resource

Further Extension Potential:

- Intersected strong grades and widths outside the mine plan inventory; 220m down-dip
- Highest potential for further resource and mine plan extensions along the Caldera margin

Bald Mountain

Extending Production

- **Production in-line** over prior quarter
- **Cost of sales** decreased due to ramp up of capital stripping at **Redbird** and higher ounces places on the heap leach pad
- **Redbird Phase 2 approved** and optimized via satellite pits; extends production to 2032
- **Substantial mineral resource base** offers optionality for mine life extension across multiple open pit pushbacks

Operating Results

	2024A	2025A	H1/26A
Production (Au eq. oz.)	181,047	179,169	54,737
Production cost of sales (\$/oz.) ¹	\$1,205	\$1,198	\$1,852

2025 Gold Reserve & Resource Estimates²

	Tonnes (kt)	Grade (g/t)	Ounces (koz)
2P Reserves	66,306	0.6	1,225
M&I Resources	144,944	0.5	2,548
Inferred Resources	78,862	0.3	790

Bald Mt. Redbird 2 – Pits Overview

Combines the Redbird 2 anchor pit with five satellite pits, leveraging infrastructure

Bald Mt. Redbird 2 – Production and Cost Profile

High-productivity, low-cost additions extend Bald Mountain production to 2032

Incremental Mine Plan Stats ¹		
	Units	Metric
Tonnes Mined	Mtonne	251
Strip Ratio	x	3.0x
Tonnes Processed	Mtonne	63
Grade Processed	g/t	0.5
Peak Mining Rate	ktpd	229
Unit Mining Cost	\$/t mined	2.36

Bald Mt. – Longer-term Optionality

Prolific Land Package with >40 historically mined pits with further potential extensions

>40 Pits mined since 1870

5km

- ★ Historic Anchor Pit
- ★ Current Anchor Pit (Redbird)
- Historic Mining Area
- Current Mining Areas

Next Focus on large Resource at Top Pit

Top Pit Resource

	Tonnes (000's)	Grade (g/t Au)	Contained Ounces (000's)
Indicated	68,445	0.5	1,109
Inferred	28,762	0.3	235

- Top is a **large indicated resource (>1Moz)** of leachable material, which could act as next “anchor pit” after Redbird
- Potential stripping in the 2030s could be complemented by further satellites and exploration targets in the area
- **Top Pit is already permitted**
- Top was initially mined in late 1800s by underground and again by open pit starting in 1985. Top was last mined in 2023.
- Studies are planned to **determine optimal approach / sequence to extract the large resource**

Curlew – District Overview

Leveraging existing infrastructure for a quick restart in Washington State

District Map
2.8Moz produced through the Kettle River Mill

Curlew Mine Restart

- Leverages historic K2 mine (mined 1996-2005) portal and underground infrastructure
- Adjacent to the historic K1 mine (mined 1990-93)

Kettle River Mill

- Significant historical production
- Put into active care & maintenance in 2017
- Conversion to filtered tailings underway

Curlew – Production and Cost Profile

Steady, long-life asset with further upside potential to enhance in mid-to-late 2030s

Curlew – Mill & Tailings Overview

Simple process flowsheet; leveraging existing infrastructure

Process plant summary

- **Transport:**
 - Material from the Curlew mine to be transported ~40km by road to the mill
 - Consistent with past operations
- **Mill:**
 - 1,800tpd mill capacity
 - Conventional crushing, grinding, and carbon-in-leach gold recovery circuit
- **Metallurgy:** Comparable to historical ore processed
- **Recovery:**
 - 80% average LOM recovery anticipated
- **Tailings:**
 - Upgrade to dry-stack tailings
 - Addition of a tailings dewatering plant
- **Processing Cost:** Estimated at \$47 per tonne

Curlew – Exploration Upside

Targeting high-grade resource extension along the productive paleosurface

- **Development to Priority Targets:**

- Focused on developing to Priority Targets at Roadrunner and Stealth zones

- **Drilling underway:**

- Drilling commenced at Stealth and Roadrunner in Q4

- **Stealth and Roadrunner:**

- High-grade targets at Stealth and Roadrunner could defer upper zone and enhance production profile in the mid-to-late 2030s

Sustainability

Top Performer in Sustainability⁽¹⁾

Environment

GHG INTENSITY

- **GHG intensity 707 kg CO₂e/Au eq.oz** in 2025; on track towards 2030 target
- Scope 3 emissions for 2025 were 1.29 Mt CO₂e; continued engagement program with suppliers on sustainability including emissions reduction.

NATURAL CAPITAL

- **94 ha of land reclaimed in 2025**

WATER MANAGEMENT

- **75% water recycled**, representing approximately 219 million m³ of water
- **Rolled out the Kinross Water Management Standard across sites**

COMPLIANCE

- **Strong record** with zero significant spills; strengthened governance with modernized environment management system

Social

Governance

BOARD SUCCESSION

- **Strong Board Succession** has brought in seven new directors since 2019⁽²⁾
- **New Independent Chair** effective May 2025

STRONG ESG SCORES

- External **Board governance** ratings (e.g., Globe & Mail) and **ESG assessments** (e.g., S&P CSA, MSCI, LSEG)

ALIGNED WITH RESPONSIBLE MINING

- UN Guiding Principles; UN Global Compact; Voluntary Principles on Security & Human Rights
- **Responsible Gold Mining Principles**; Conflict-free gold (World Gold Council)
- Cyanide Code, MAC tailings standard and GISTM
- Limited assurance for 64 ESG metrics

Our approach to Sustainability⁽¹⁾

“Sustainability and mining responsibly are at the core of our Kinross culture... you need an “on-the-ground,” people-focused approach, along with a clear strategy, strong governance and visible leadership at all levels of the company.”

J. Paul Rollinson, CEO.

Strong Foundations

- **Kinross DNA** - values, policies, systems; people
- **Sustainability is embedded in our business** – we consider impact, risk, and opportunity across:
 - **Governance**
 - **Environment**
 - **Social**
- **Two-way perspective to assess risk, impact and opportunity** - enterprise value and society / environment (“double materiality”)

Strategy

- **Trusted Partner with our stakeholders** – acceptance and support
- **Priority focus areas** – People (workforce & communities); Planet (nature & climate); Efficiency (Energy, Water & Land)
- **Strategic enablers and strong foundations**

Our responsibilities

- **Commitments** (e.g., Cyanide Code, etc.)
- **Membership obligations** (e.g., World Gold Council’s Responsible Gold Mining Principles)
- **Reporting** obligations to our stakeholders

Sustainability report

- Balanced and comprehensive reporting, adapting to evolving requirements
- Rigor – strong data controls independent assurance of ~ 64 key metrics

Consistently Earning Top-Quartile ESG Results

Our performance depends on our people, united by our four core values, and who are the heart of our success

- Environment** – Strong track record on environmental compliance: water management, tailings stewardship, closure and reclamation
- Social** – Putting people first for workplace safety and inclusive culture, human capital development, and local community development
- Governance** – Robust corporate programs to ensure supply chain integrity, anti-corruption, tax, Board accountability and transparency & disclosure

Kinross Performance on Key ESG Ratings

Year	S&P Global	Sustainalytics*	MSCI	LSEG	ISS ESG	CDP Climate	CDP Water
2020	65	29.1	A	79.4	C	C	C
2021	71	34.2	A	78.5	C	C	C
2022	74	24.9	A	80.9	C+	C	C
2023	70	26.3	A	83.6	C+	C	C
2024	67	25.9	A	81.0	C+	C	B-
2025	69	26.2	AA	80.0	C+	C	B-

* Low score represents positive assessment of ESG and risk management

Reducing our Carbon Footprint

We are making green investments and constantly seeking efficiencies to help reduce our emissions profile

 LOW CARBON FOOTPRINT	Committed to 30% GHG intensity reduction in Scope 1 and Scope 2 emissions by 2030⁽¹⁾	
67% renewable	Of energy in 2025 that is sourced from the grid and self-generation⁽²⁾	
~35,000 tCO ₂ e reduction in emissions in 2025	Implemented 38 energy efficiency projects across the Company in 2025, leading to 2.4% emissions reduction	
2 Hydro-electric power plants in Brazil	1 Solar Power Plant in Mauritania	Solar plant at Tasiast performing well, providing 22% of annual power needs at the site
100% renewable	Secured renewable power for La Coipa operations.	

- Our Scope 1 and Scope 2 emissions are derived from the mobile equipment we deploy in our operations and the power grids we rely on:
 - We are committed to our GHG reduction targets and will work with our host governments, equipment manufacturers, and power utilities to help achieve these goals
- Our estimated Scope 3 emissions are similar in scale to our combined Scope 1 and 2 emissions. We are engaging with suppliers to seek quantity-based emission factors and opportunities for greenhouse gas reduction.
- Completed asset-level infrastructure climate risk assessment with the support of Marsh. Key perils include extreme heat, flooding, wildfires and others.
- Our **La Coipa mine** earned ISO50001 certification for energy management and has the lowest GHG intensity per oz in the Kinross portfolio
- Continued focus on energy efficiency in design for **Great Bear**, including ventilation on demand system

KINROSS

1)

Kinross is using 2021 as the baseline year as part of its Climate Change Strategy objectives.

2)

Data are from the Kinross 2025 Sustainability report as published on www.kinross.com

Appendix

Fuel Sensitivities

2026 fuel sensitivities ¹	Impact on cost of sales per ounce per \$10/barrel change in oil price
Direct crude oil impact on refined fuel products (2026 Sensitivity)	\$3/oz
Refining, distribution, taxes impact on refined fuel products	\$7/oz
Total fuel cost sensitivity	\$10/oz
Potential additional secondary cost sensitivity (Impacts related to freight and other consumables)	+ ~\$4/oz

2026 Revised Cost Guidance⁴ is based on \$100 per barrel oil price, total impact to 2026 annual costs from oil prices to date and \$100/barrel for the remainder of the year is ~\$20/oz

Oil Hedges ⁵ as of June 30, 2026	2026 Maturities	2027 Maturities	2028 Maturities
WTI Oil Swap Contracts (bbls)	544,200	858,396	144,000
Average Price (\$/bbl)	\$61.51	\$63.43	\$69.25

KINROSS

1)

Taking into account existing oil hedges.

2)

"AISC" represents attributable all-in sustaining cost per equivalent ounce sold.

3)

Financial figures are non-GAAP financial measures or ratios, as applicable, with no standardized meaning under IFRS and therefore, may not be comparable to similar measures presented by other issuers. Refer to endnote #3. "Attributable" includes Kinross' 70% share of Manh Choh production, costs, cash flow, and capital expenditures, as applicable.

4)

Refer to Appendix A for 2026 Guidance.

5)

Refer to Section 6 Liquidity and Capital Resource of Kinross' Management's Discussion and Analysis for the three months ended June 30, 2026

Kinross Exploration Highlights

Kinross Exploration – Recent Spend History

Recent Exploration Successes is Driving Future Production Potential

- ✓ **Reserve additions** – recent high margin reserve additions at **Tasiast** and **Paracatu** through drilling
- ✓ **La Coipa Phase 7** – restart of operation on back of high grade exploration discovery
- ✓ **Round Mountain Phase X** – exploration efforts unlocked opportunity to transition to higher grade UG
- ✓ **Curlew** – significantly expanded resource in higher grade, wider areas of mineralization
- ✓ **Great Bear** – extensive directional drill program outlined robust 12 year high grade mine life (per '24 PEA)

2026 Exploration Priorities

Property / Jurisdiction		Exploration Thesis
Brownfields	Great Bear, Ontario, Canada	Exploring for new zones of mineralization on the extensive ~120 sq. km land package
	Curlew Basin, Washington, USA	Exploring potential extensions of wide, high-grade mineralization to augment mine life
	Round Mountain, Nevada, USA	Targeting proximal and down dip extensions of mineralization to potentially add mine life and production scale
	Alaska, USA	Exploring proximal to Fort Knox main pit and Gil satellite pit for potential to augment medium term mine plan and future laybacks
	Bald Mountain, Nevada, USA	Prolific land package with numerous historical open pits and significant resource base
	Tasiast, Mauritania	Determine extent of mineralization at depth for potential future underground scenario, and exploring satellite targets
	Chile	Oxide Extensions at existing La Coipa pits and testing new nearby targets
Greenfields	Paracatu, Brazil	Testing high priority targets on the extensive land package for similar style grade and mineralization
	Snow Lake, Manitoba, Canada	Actively exploring multiple properties with high-grade narrow-veining, similar to nearby past producer
	Nevada, USA	Targeting low sulphidation epithermal, Carlin, Skarn and Porphyry-style deposits
	Finland	High-grade orogenic gold targets on underexplored Central Lapland Greenstone Belt
Expanding greenfields exploration budget based on strong early results in Canada and Nevada

Senior Leadership Team Incentives⁽¹⁾

Total Direct Compensation

- Executive Compensation has four key objectives:
- **Align executive interests** with Kinross’ long-term strategy and those of shareholders
 - **Reinforce** Kinross’ operating performance and execution of strategic objectives
 - **Enable** Kinross to attract and retain high performing executives
 - **Align** pay and performance in a way that is transparent and understood by all stakeholders
 - Our **“Say on pay” results reached 93%** support in 2026, and an average of 90% over the last ten years

Short-Term Incentive Plan – One Year

Key Strategic Area	Metric	% Weight ²
Safety & Sustainability	Corporate Responsibility Performance	20%
	Sustainability Initiatives	5%
Operational & Financial Performance	Delivering against guidance	15%
	Total cost	10%
Balance Sheet	Attributable free cash flow per share	10%
Shareholder Returns	Relative total shareholder returns (TSR)	10%
Building for the Future	Deliver targeted strategic accomplishments	30%

At Risk Pay: ~80% ⁽¹⁾ of CEO and aggregate NEO Total Direct Compensation is “at risk” and tied to company performance

Long-Term Incentive Plan – Three Year

- **At least 50%** of Total Direct Compensation is Equity with:
 - **55%** RPSUs and **45%** RSUs
- Large equity component, heavy weighting on RPSUs, and inclusion of TSR in the vesting conditions aligns with the four key objectives to create long-term value for the shareholders

Key Strategic Area	Metric (3-year period)	% Weight ³
Shareholder Returns	Relative total shareholder returns	50%
Operational & Financial Performance	Production	25%
	All-in sustaining cost	25%

Minimum Share Ownership

CEO Equity Ownership is approximately **70x his salary**⁽⁴⁾

KINROSS

1) For in-depth details refer to the “Executive Compensation” section of the 2026 Management Information Circular as published on www.kinross.com

2) Each measure is evaluated between 0-200% to determine the final “Company Performance Multiplier” for the 75% weighting of the Senior Leadership Team’s Short-Term Incentive

3) Each measure is evaluated between 0-200% to determine the “RPSU vesting multiplier”, which determines the number of RPSU’s that will vest

4) The CEO’s ownership reflects the value on December 31, 2025

Endnotes

- 1) Kinross' outlook, which is reported on an attributable basis including Kinross' share of Manh Choh (70%), represents forward-looking information and users are cautioned that actual results may vary. Please refer to the Cautionary Statement on Forward-Looking Information on page 2.
- 2) Production cost of sales, cost of sales, or cash cost per equivalent ounce sold is calculated as production cost of sales, as reported on the Company's consolidated statements of operations for the periods ended June 30, 2026, December 31, 2025, and 2024 divided by total gold equivalent ounces sold, as applicable.
- 3) Attributable production cost of sales per equivalent ounce sold, attributable all-in sustaining cost per equivalent ounce sold, attributable adjusted operating cash flow, attributable free cash flow and attributable capital expenditures are non-GAAP financial measures and ratios, as applicable, with no standardized meaning under IFRS and therefore, may not be comparable to similar measures presented by other issuers. Attributable production cost of sales per equivalent ounce sold is calculated as attributable production cost of sales divided by attributable gold equivalent ounces sold. Attributable production cost of sales or attributable cost of sales is a non-GAAP financial measure and attributable gold equivalent ounces sold includes Kinross' share of Manh Choh (70%) sales. Attributable all-in sustaining cost per equivalent ounce sold is calculated as attributable all-in sustaining cost divided by attributable gold equivalent ounces sold. Attributable all-in sustaining cost is a non-GAAP financial measure. Attributable adjusted operating cash flow, attributable free cash flow and attributable capital expenditures include Kinross' share of Manh Choh (70%) adjusted operating cash flow, free cash flow and capital expenditures, respectively. For definitions, purpose and reconciliations of these non-GAAP financial measures and ratios, please refer to Section 11 - *Supplemental Information* of Kinross' MD&A for the periods ended June 30, 2026, March 31, 2026, December 31, 2025, September 30, 2025, and June 30, 2025, which sections are incorporated by reference herein and as filed on the Company's website at www.kinross.com, on SEDAR+ at www.sedarplus.ca and on EDGAR at www.sec.gov.
- 4) "Capital expenditures" for the twelve months ended December 31, 2025 is as reported on the Company's consolidated statements of cash flows for the twelve months ended December 31, 2025 as "Additions to property, plant and equipment".
- 5) "Net Cash/(Debt)", is a non-GAAP financial measures and ratio, as applicable, with no standardized meaning under IFRS and therefore, may not be comparable to similar measures presented by other issuers. "Net Cash/(Debt)" is calculated as cash and cash equivalents less long-term debt, as reported on the Company's consolidated balance sheet as at June 30, 2026, December 31, 2025, 2024, 2023, and 2022.
- 6) Free cash flow and all-in sustaining cost are non-GAAP financial measures and ratios that have the same definition and purpose as attributable free cash flow and attributable all-in sustaining cost, respectively, as Great Bear, Round Mountain, Bald Mountain, and Curlew are 100% owned by Kinross. Refer to endnote #3.
- 7) AISC margin, defined as attributable average realized gold price per ounce less attributable all-in sustaining cost per equivalent ounce sold, is a non-GAAP financial measure. Non-GAAP financial ratios and measures have no standardized meaning under IFRS and therefore, may not be comparable to similar ratios or measures presented by other issuers. For definitions, purpose and reconciliation of these ratios, please refer to the Company's MD&A for the periods ended June 30, 2026, March 31, 2026, December 31, 2025, September 30, 2025, and June 30, 2025.
- 8) US Project Economics:
 - 1) The internal studies and economic analyses for the projects in this deck are preliminary in nature and is based, in part, on Inferred Mineral Resources. Inferred Mineral Resources are considered too geologically speculative to have the economic considerations applied to them that would enable them to be categorized as Mineral Reserves. There is no certainty that the economic forecasts on which the internal studies economic analyses are based will be realized.
 - 2) Average production cost of sales and average AISC represent costs for projected production for the life of mine.
 - 3) The economic analysis of the projects were carried out using a discounted cash flow approach on a pre-tax and after-tax basis, based on a long-term gold prices \$4,100/oz and \$3,500/oz in USD.
 - 4) The IRR on total investment that is presented in the economic analysis was calculated assuming 100% equity financing
 - 5) The NPV was calculated from the after-tax cash flow generated by the project, based on a discount rate of 5% and a valuation date of January 1, 2026.
- 9) Lobo-Marte Project Economics:
 - 1) Average production cost of sales and average all-in sustaining cost per ounce sold on a by-product basis represent costs for projected production for the life of mine.
 - 2) The economic analysis of the projects were carried out using a discounted cash flow approach on a pre-tax and after-tax basis, based on a long-term gold prices \$4,100/oz and \$3,500/oz in USD, and long-term copper prices of \$6/lb and \$5/lb, respectively.
 - 3) The IRR on total investment that is presented in the economic analysis was calculated assuming 100% equity financing.
 - 4) The NPV was calculated from the after-tax cash flow generated by the project, based on a discount rate of 5% and a valuation date of January 1, 2028.
- 10) Production cost of sales per ounce sold on a by-product basis and all-in sustaining cost per ounce sold on a by-product basis are equivalent to attributable production cost of sales per ounce sold on a by-product basis and attributable all-in sustaining cost per ounce sold on a by-product basis, respectively. These ratios are non-GAAP financial ratios with no standardized meaning under IFRS and therefore, may not be comparable to similar ratios presented by other issuers. Production cost of sales per ounce sold on a by-product basis is calculated as production cost of sales less non-gold production as a credit against production costs divided by gold ounces sold. All-in sustaining cost per ounce sold on a by-product basis is calculated as all-in sustaining costs less non-gold production as a credit against production costs divided by gold ounces sold. For definitions, purpose and reconciliations of these non-GAAP financial ratios, please refer to Section 11 - *Supplemental Information* of Kinross' MD&A for the three and six months ended June 30, 2026, which section is incorporated by reference herein and as filed on the Company's website at www.kinross.com, on SEDAR+ at www.sedarplus.ca and on EDGAR at www.sec.gov.

2026 Revised Guidance Summary⁽¹⁾ – Appendix A

Attributable⁽²⁾ Production Guidance

Annual attributable ⁽²⁾ gold equivalent production guidance	
2026	1.84 Moz to 1.86 Moz
2027	1.84 Moz to 1.86 Moz
2028	2.0 Moz (+/- 5%)

Attributable⁽²⁾ Production and Cost Guidance

Gold equivalent basis	2026 Guidance ⁽¹⁾	2025 Actual
Production (Au eq. oz.)	1.84 Moz to 1.86 Moz	2.01 million
Production cost of sales per Au eq. oz. sold ⁽⁴⁾	-	\$1,140
Attributable production cost of sales per Au eq. oz. sold ⁽³⁾	\$1,420/oz to \$1,460/oz	\$1,135
Attributable all-in sustaining cost per Au eq. oz. sold ⁽³⁾	\$1,850/oz to \$1,900/oz	\$1,571

2026 Guidance Summary⁽¹⁾ – Appendix A

Attributable Capital Expenditures⁽²⁾ Guidance Breakdown

Country	Forecast 2026 Sustaining Capital ⁽¹⁾⁽²⁾ (+/-5%) (attributable (million))	Forecast 2026 Non- Sustaining Capital ⁽¹⁾⁽²⁾ (+/-5%) (attributable million)	Total 2026 Forecast Capital ⁽¹⁾ (+/-5%) (attributable million)	2025 Sustaining Capital ⁽²⁾ (million)	2025 Non-Sustaining Capital ⁽²⁾ (million)	2025 Total Capital ⁽²⁾ (consolidated million)	2025 Total Capital ⁽²⁾ (attributable million)
Mauritania	\$80	\$195	\$275	\$113	\$239	\$352	\$352
Brazil	\$190	\$45	\$235	\$189	\$-	\$189	\$189
Chile	\$40	\$50	\$90	\$91	\$19	\$110	\$110
United States	\$140	\$500	\$640	\$214	\$224	\$438	\$419
Canada & Other	\$-	\$260	\$260	\$-	\$105	\$105	\$105
TOTAL	\$450	\$1,050	\$1,500	\$607	\$587	\$1,194	\$1,175

2026 sustaining capital⁽²⁾ includes the following forecast spending estimates

Mine development:	\$15 million (United States), \$15 million (Chile), \$20 million (Mauritania)
Mobile equipment:	\$55 million (United States), \$95 million (Brazil), \$30 million (Mauritania)
Mill facilities:	\$10 million (United States), \$25 million (Brazil), \$10 million (Chile), \$10 million (Mauritania)
Leach facilities:	\$15 million (United States)
Tailings facilities:	\$55 million (Brazil), \$10 million (Chile), \$10 million (Mauritania)

2026 non-sustaining capital⁽²⁾ includes the following forecast spending estimates

Great Bear AEX construction, detailed engineering and other	\$260 million
Round Mountain Phase X	\$100 million
Curlew	\$180 million
Bald Mountain Redbird 2	\$150 million
Tasiast West Branch Stripping	\$180 million

1) Refer to endnote #1

2) Forecast 2026 sustaining, non-sustaining and total capital expenditures are on an attributable basis and include Kinross' share of Manh Choh (70%) capital expenditures. Actual results as reported for the year ended December 31, 2025, for sustaining, non-sustaining and total capital expenditures (which are reported as "Additions to property, plant and equipment" on the consolidated statements of cash flows) are on a total basis and include 100% of Manh Choh capital expenditures. Sustaining, non-sustaining and attributable capital expenditures are non-GAAP financial measures. Refer to endnote #3

2026 Revised Guidance Summary⁽¹⁾ – Appendix A

Material assumptions used to forecast 2026 revised guidance for the remainder of the year, most notably relating to production cost of sales, are as follows:

- a gold price of \$4,350 per ounce for the remainder of the year;
- a silver price of \$65 per ounce;
- an oil price of \$100 per barrel for the remainder of the year;
- foreign exchange rates of:
 - 5.10 Brazilian reais to the U.S. dollar for the remainder of the year;
 - 920 Chilean pesos to the U.S. dollar for the remainder of the year;
 - 40 Mauritanian ouguiyas to the U.S. dollar; and
 - 1.38 Canadian dollars to the U.S. dollar;

Taking into account existing currency and oil hedges:

- a 10% change in foreign currency exchange rates would be expected to result in an approximate \$30 impact on attributable production cost of sales per equivalent ounce sold⁽²⁾⁽³⁾;
- specific to the Brazilian real, a 10% change in this exchange rate would be expected to result in an approximate \$50 impact on Brazilian attributable production cost of sales per equivalent ounce sold⁽³⁾;
- specific to the Chilean peso, a 10% change in this exchange rate would be expected to result in an approximate \$60 impact on Chilean attributable production cost of sales per equivalent ounce sold⁽³⁾;
- a \$10 per barrel change in the price of oil would be expected to result in an approximate \$10 impact on fuel consumption costs on attributable production cost of sales per equivalent ounce sold⁽³⁾; and
- a \$100 change in the price of gold would be expected to result in an approximate \$5 impact on attributable production cost of sales per equivalent ounce sold⁽³⁾ as a result of a change in royalties.

1) Refer to endnote #1
2) Refers to all of the currencies in the countries where the Company has mining operations, fluctuating simultaneously by 10% in the same direction, either appreciating or depreciating, taking into consideration the impact of hedging and the weighting of each currency within our consolidated cost structure.
3) Refer to endnote #3

Reserve & Resource Statement Notes – Appendix B

- 1) Unless otherwise noted, the Company's mineral reserves are estimated using appropriate cut-off grades based on an assumed gold price of \$2,000 per ounce and a silver price of \$23.53 per ounce. Mineral reserves are estimated using appropriate process recoveries, operating costs and mine plans that are unique to each property and include estimated allowances for dilution and mining recovery. Mineral reserve estimates are reported in contained units based on Kinross' interest and are estimated based on the following foreign exchange rates:
 - Canadian Dollar to \$US 1.38
 - Chilean Peso to \$US 940.00
 - Brazilian Real to \$US 5.25
 - Mauritanian Ouguiya to \$US 40.00
- 2) The Company's mineral reserve and mineral resource estimates as at December 31, 2025 are classified in accordance with the Canadian Institute of Mining, Metallurgy and Petroleum ("CIM") "CIM Definition Standards For Mineral Resources and Mineral Reserves" adopted by the CIM Council (as amended, the "CIM Definition Standards") in accordance with the requirements of National Instrument 43-101 "Standards of Disclosure for Mineral Projects" ("NI 43-101"). Mineral reserve and mineral resource estimates reflect the Company's reasonable expectation that all necessary permits and approvals will be obtained and maintained.
- 3) Cautionary note to U.S. investors concerning estimates of mineral reserves and mineral resources. These estimates have been prepared in accordance with the requirements of Canadian securities laws, which differ from the requirements of United States' securities laws. Unless otherwise indicated, mining terms used herein and in any document incorporated by reference but not otherwise defined have the meanings set forth in NI 43-101. The terms "mineral reserve", "proven mineral reserve", "probable mineral reserve", "mineral resource", "measured mineral resource", "indicated mineral resource" and "inferred mineral resource" are Canadian mining terms as defined in accordance with NI 43-101 and the CIM Definition Standards. These definitions differ from the definitions in subpart 1300 of Regulation S-K ("Subpart 1300"). While the definitions in Subpart 1300 are similar to the definitions in NI 43-101 and the CIM Definitions Standard, the definitions in Subpart 1300 differ from the requirements of, and the definitions in, NI 43-101 and the CIM Definition Standards. U.S. investors are cautioned that while the above terms are "substantially similar" to CIM Definitions, there are differences in the definitions in Subpart 1300 and the CIM Definition Standards. Accordingly, there is no assurance any mineral reserves or mineral resources that the Company may report as "proven mineral reserves", "probable mineral reserves", "measured mineral resources", "indicated mineral resources" and "inferred mineral resources" under NI 43-101 would be the same had the Company prepared the mineral reserve or mineral resource estimates under the standards set forth in Subpart 1300. U.S. investors are also cautioned that while the United States Securities and Exchange Commission ("SEC") recognizes "measured mineral resources", "indicated mineral resources" and "inferred mineral resources" under Subpart 1300, investors should not assume that any part or all of the mineralization in these categories will ever be converted into a higher category of mineral resources or into mineral reserves. Mineralization described using these terms has a greater amount of uncertainty as to its existence and feasibility than mineralization that has been characterized as reserves. Accordingly, investors are cautioned not to assume that any measured mineral resources, indicated mineral resources, or inferred mineral resources that the Company reports are or will be economically or legally mineable. Further, "inferred mineral resources" have a greater amount of uncertainty as to their existence and as to whether they can be mined legally or economically. Therefore, U.S. investors are also cautioned not to assume that all or any part of the "inferred mineral resources" exist. Under Canadian securities laws, estimates of "inferred mineral resources" may not form the basis of feasibility or pre-feasibility studies, except in rare cases. As a foreign private issuer that files its annual report on Form 40-F with the SEC pursuant to the multi-jurisdictional disclosure system, the Company is not required to provide disclosure on its mineral properties under the Subpart 1300 provisions and will continue to provide disclosure under NI 43-101 and the CIM Definition Standards. If the Company ceases to be a foreign private issuer or loses its eligibility to file its annual report on Form 40-F pursuant to the multi-jurisdictional disclosure system, then the Company will be subject to reporting pursuant to the Subpart 1300 provisions, which differ from the requirements of NI 43-101 and the CIM Definition Standards.
 - For the above reasons, the mineral reserve and mineral resource estimates and related information herein may not be comparable to similar information made public by U.S. companies subject to the reporting and disclosure requirements under the United States federal securities laws and the rules and regulations thereunder.
- 4) The Company's mineral resource and mineral reserve estimates were prepared under the supervision of and verified by Mr. Nicos Pfeiffer, who is a qualified person as defined by NI 43 101.
- 5) The Company's normal data verification procedures have been used in collecting, compiling, interpreting and processing the data used to estimate mineral reserves and mineral resource.
- 6) Rounding of values to the 000s may result in apparent discrepancies.
- 7) Round Mountain refers to the Round Mountain project, which includes the Round Mountain deposit and the Gold Hill deposit. The Round Mountain deposit does not contain silver and all silver resources at Round Mountain are contained exclusively within the Gold Hill deposit. Disclosure of gold mineral reserves and mineral resources reflect both the Round Mountain deposit and the Gold Hill deposit. Disclosure of silver mineral reserves and mineral resources reflect only the Gold Hill deposit.
- 8) Includes mineral resources and mineral reserves from the Puren deposit in which the Company holds a 65% interest; as well as mineral resources from the Catalina deposit, in which the Company holds a 50% interest.
- 9) Mineral resources are exclusive of mineral reserves.
- 10) Unless otherwise noted, the Company's mineral resources are estimated using appropriate cut-off grades based on a gold price of \$2,500 per ounce and a silver price of \$29.41 per ounce. Mineral resource estimates are reported in contained units based on Kinross' interest. Foreign exchange rates for estimating mineral resources were the same as for mineral reserves.
- 11) Mineral resources that are not mineral reserves do not have to demonstrate economic viability. Mineral resources are subject to infill drilling, permitting, mine planning, mining dilution and recovery losses, among other things, to be converted into mineral reserves. Due to the uncertainty associated with inferred mineral resources, it cannot be assumed that all or any part of an inferred mineral resource will ever be upgraded to indicated or measured mineral resources, including as a result of continued exploration.
- 12) The mineral resource estimates for Curlew assume a \$2,000 per ounce gold price.
