

Oil & Gas Engineering Names Stratus ztC[™] Edge Product of the Year 2020 Finalist

2020-08-04

Zero-touch Edge Computing platform recognized for IIoT & Process Control

MAYNARD, Mass. — August 4th, 2020 — **Stratus Technologies**, a global leader in simplified, protected, autonomous Edge Computing platforms, has been named an Oil & Gas Engineering 2020 IIoT & Process Control award finalist for the Stratus ztC[™] Edge computing platform. This annual award honors automation and information technology innovations for oil and gas processes and equipment, highlighting opportunities to advance companies' efforts to operate at peak performance.

The Stratus **ztC Edge** is a secure, rugged, highly automated **Edge Computing** platform that helps increase operational efficiency and eliminate **downtime** by simplifying and protecting business-critical applications. Enabling customers to reduce the cost of operations and maintenance, minimize the risk of data loss, and ensure continuous availability of their operations, ztC Edge is a proven computing platform for the oil and gas industry.

"The ztC Edge is the platform of choice for organizations who depend on productive and efficient business operations with minimal downtime," said Jason Andersen, Stratus VP of Strategy and Product Management. "Being recognized by Oil & Gas Engineering highlights our **momentum** in providing innovative edge technology that our partners and customers rely on."

Gold, silver, and bronze Product of the Year winners will be chosen by readers, who have until October 16, 2020 to vote online at <https://gspplatform.cfemedia.com/pe/award-programs>. Oil & Gas Engineering readers include engineering, operations, and management professionals responsible for optimizing processes and ensuring

reliability.

ABOUT STRATUS

For leaders digitally transforming their operations in order to drive predictable, peak performance with minimal risk, Stratus ensures the continuous availability of business-critical applications by delivering zero-touch Edge Computing platforms that are simple to deploy and maintain, protected from interruptions and threats, and autonomous. For 40 years, we have provided reliable and redundant zero-touch computing, enabling global Fortune 500 companies and small-to-medium sized businesses to securely and remotely turn data into actionable intelligence at the Edge, cloud and data center – driving uptime and efficiency.
