

## Stratus ztC<sup>™</sup> Edge Named Hydrocarbon Processing 2020 Awards Finalist

2020-07-23

Zero-touch Edge Computing platform recognized within the Best Process – Plant Optimization category

MAYNARD, Mass. — July 23rd, 2020 — **Stratus Technologies**, a global leader in simplified, protected, autonomous Edge Computing platforms, has been named a finalist of Hydrocarbon Processing's 2020 "Best Process – Plant Optimization" award for the Stratus ztC Edge computing platform. Hydrocarbon Processing (HP) has been a trusted source of information for process manufacturers for nearly a century. This honor emphasizes the ztC Edge's ability to provide advanced edge compute technology to increase efficiency and shorten the time to getting critical applications up and running.

The **ztC Edge** is a secure, rugged, highly automated **Edge Computing** platform that helps organizations achieve peak performance through increased operational efficiency and zero downtime at the edge. Its built-in virtualization, automated protection, and industrial interoperability ensure that customers can easily achieve high availability, simplified deployment and manageability, and reliable security and performance as more assets are connected to the enterprise or cloud and more applications are decentralized in the operation.

The HP Awards celebrate innovative technologies that have been instrumental in improving facility operations. The program honors leading innovations in Energy as well as outstanding personal contributions to the industry.

"Edge Computing is providing process manufacturers with an enormous opportunity to simplify and transform their technology infrastructure without impacting operational criticality or OT productivity," said Jason Andersen, Stratus VP of Strategy and Product Management. "The ztC Edge is purpose-built for OT leaders who require Edge

Computing platforms to deliver fast and efficient performance, security, and manageability for their critical business operations and applications.”

## ABOUT STRATUS

For leaders digitally transforming their operations in order to drive predictable, peak performance with minimal risk, Stratus ensures the continuous availability of business-critical applications by delivering zero-touch Edge Computing platforms that are simple to deploy and maintain, protected from interruptions and threats, and autonomous. For 40 years, we have provided reliable and redundant zero-touch computing, enabling global Fortune 500 companies and small-to-medium sized businesses to securely and remotely turn data into actionable intelligence at the Edge, cloud and data center – driving uptime and efficiency.
