### Flowserve Releases New Self-priming Diaphragm Pump for the Agricultural Market

06/16/15

*Industry-leading Flowserve Scienco CT6 Pump Designed for Higher Flow Rate, Use in Crop Protection*

DALLAS, June 16, 2015 - Flowserve Corporation (NYSE: FLS), a leading provider of flow control products and services for the global infrastructure markets, announced today the release of its new self-priming, diaphragm Flowserve Scienco CT6 pump.

Engineered for use with chemical mixing and dispensing from mini-bulk tanks, drums and intermediate bulk containers (IBCs), the pump's six-chamber diaphragm design provides users a higher flow rate than existing products in the market and features wetted parts compatible with a wide range of agricultural chemicals.

"Across all our served industries, customers expect a premier product from Flowserve. For the agricultural industry, the CT6 pump clearly meets this expectation," said Bob Hendricks, President, Industrial Pump Operations. "The design of the CT6 is simplistic and user-friendly. And, with its high level of performance and reliability, it is an ideal transfer pump for today's larger application equipment."

The CT6 can pump up to 68 liters per minute (18 gallons per minute) and is used primarily to dispense fluids from bulk or mini-bulk tanks, intermediate bulk containers, drums and other similar applications. It can be configured with a variety of flow meters, hoses, brackets, dip tubes, fittings and valves to provide a complete pumping system. Other features of the CT6 pump include:

- Standard duty, up to 49 lpm (13gpm) and High Flow option, up to 68 lpm (18gpm)
- Fully configurable with various mounting options to provide a pumping system solution to match the customer's application

- Patent-pending feature for recirculation agitates the tank contents to a homogeneous distribution allowing each batch to be dispensed with the same potency

For more information on the CT6 pump, visit [www.flowserve.com/ct6](http://www.flowserve.com/ct6).

**Safe Harbor Statement:** This news release includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934, which are made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995, as amended. Words or phrases such as, "may," "should," "expects," "could," "intends," "plans," "anticipates," "estimates," "believes," "forecasts," "predicts" or other similar expressions are intended to identify forward-looking statements, which include, without limitation, earnings forecasts, statements relating to our business strategy and statements of expectations, beliefs, future plans and strategies and anticipated developments concerning our industry, business, operations and financial performance and condition.

The forward-looking statements included in this news release are based on our current expectations, projections, estimates and assumptions. These statements are only predictions, not guarantees. Such forward-looking statements are subject to numerous risks and uncertainties that are difficult to predict. These risks and uncertainties may cause actual results to differ materially from what is forecast in such forward-looking statements, and include, without limitation, the following: a portion of our bookings may not lead to completed sales, and our ability to convert bookings into revenues at acceptable profit margins; changes in the global financial markets and the availability of capital and the potential for unexpected cancellations or delays of customer orders in our reported backlog; our dependence on our customers' ability to make required capital investment and maintenance expenditures; risks associated with cost overruns on fixed-fee projects and in taking customer orders for large complex custom engineered products; the substantial dependence of our sales on the success of the oil and gas, chemical, power generation

and water management industries; the adverse impact of volatile raw materials prices on our products and operating margins; economic, political and other risks associated with our international operations, including military actions or trade embargoes that could affect customer markets, particularly Middle Eastern markets and global oil and gas producers, and non-compliance with U.S. export/re-export control, foreign corrupt practice laws, economic sanctions and import laws and regulations; increased aging and slower collection of receivables, particularly in Latin America and other emerging markets; our exposure to fluctuations in foreign currency exchange rates, including in hyperinflationary countries such as Venezuela; our furnishing of products and services to nuclear power plant facilities and other critical processes; potential adverse consequences resulting from litigation to which we are a party, such as litigation involving asbestos-containing material claims; a foreign government investigation regarding our participation in the United Nations Oil-for-Food Program; expectations regarding acquisitions and the integration of acquired businesses; our relative geographical profitability and its impact on our utilization of deferred tax assets, including foreign tax credits; the potential adverse impact of an impairment in the carrying value of goodwill or other intangible assets; our dependence upon third-party suppliers whose failure to perform timely could adversely affect our business operations; the highly competitive nature of the markets in which we operate; environmental compliance costs and liabilities; potential work stoppages and other labor matters; our inability to protect our intellectual property in the U.S., as well as in foreign countries; obligations under our defined benefit pension plans; and other factors described from time to time in our filings with the Securities and Exchange Commission.

All forward-looking statements included in this news release are based on information available to us on the date hereof, and we assume no obligation to update any forward-looking statement.
