

Sonoco ThermoSafe Introduces the Orion r® High Performance Temperature Controlled Box Rental Service

October 9, 2019

ARLINGTON HEIGHTS, ILL., U.S. – Sonoco ThermoSafe, a unit of Sonoco (NYSE: SON), has announced the creation of the Orion r® high performance temperature controlled box rental service. This service will feature the new Orion r® line of temperature controlled packaging, featuring high performance vacuum panel insulation encased in a lightweight, rugged EPP shell for maximum durability and thermal duration. The Orion r® line will also offer optional on board telemetry, allowing biopharmaceutical clients access to cloud-based temperature and geolocation data for maximum shipment visibility and quality assurance.

Orion's innovative long-duration design, featuring rugged, lightweight Sonoco-molded automotive EPP, is substantially more reusable than existing rental parcels and enables the pharmaceutical supply chain to cost-effectively and sustainably ship small parcels globally.

"With the introduction of the Orion r® high performance temperature controlled parcel rental service, Sonoco ThermoSafe now offers the only one-stop rental service for every temperature controlled container mode and size," said Christopher Day, Director of Marketing & Innovation for Sonoco ThermoSafe. "We can customize our supply chain to rent high performance temperature controlled packaging as small as a five liter Orion r® passive unit, to the first passive pallet unit load device, the Pegasus ULD® – all in the same locations. Sonoco's rapid pre-conditioning deployment model and 300+ company-owned locations enable the ThermoSafe division to quickly and efficiently expand the depot network for leasing Orion r® units across the globe."

Additional announcements about the Sonoco ThermoSafe rental platform, the Orion r® and Pegasus ULD®, including updates to the global service network, will be forthcoming. Please contact your Sonoco ThermoSafe representative or visit www.thermosafe.com/contact for more information.

About Sonoco ThermoSafe

Sonoco ThermoSafe, a unit of Sonoco (NYSE:SON), is a leading global provider of temperature assurance packaging for the safe and efficient transport of pharmaceuticals, biologics, vaccines and other temperature-sensitive products. Sonoco ThermoSafe shipping solutions mitigate risk for customers and ensure product efficacy throughout the extremes of a supply chain. With operations in the Americas, Europe and Asia, Sonoco ThermoSafe has a vast product offering featuring industry-leading technology that encompasses refrigerated, frozen or controlled room temperature applications. In addition, Sonoco ThermoSafe's ISC Labs® deliver individualized design and testing services and innovative packaging solutions along with qualification and validation services to meet all regulatory requirements.
