

Non-GAAP Financial Measures

GitLab believes non-GAAP measures are useful in evaluating its operating performance. GitLab uses this supplemental information to evaluate its ongoing operations and for internal planning and forecasting purposes. GitLab believes that non-GAAP financial information, when taken collectively with its GAAP financial information, may be helpful to investors because it provides consistency and comparability with past financial performance. However, non-GAAP financial information is presented for supplemental informational purposes only, has limitations as an analytical tool, and should not be considered in isolation or as a substitute for financial information presented in accordance with GAAP. Reconciliations of non-GAAP financial measures to the most directly comparable financial results as determined in accordance with GAAP are included at the end of this press release following the accompanying financial data. We define non-GAAP financial measures as GAAP measures, excluding certain items such as stock-based compensation expense, amortization of acquired intangible assets, foreign exchange (gain) loss, equity method investment loss and impairment, acquisition related expenses, charitable donation of common stock, restructuring charges, a non-recurring income tax adjustment related to bilateral advance pricing agreement (“BAPA”) negotiations, non-recurring charges associated with the formation of our GitLab Information Technology (Hubei) Co., LTD Joint Venture in China (“JiHu”), and other expenses that the Company believes are not indicative of its ongoing operations. In addition to these exclusions, effective Q1 FY26 we utilize a fixed long-term projected tax rate in our computation of the non-GAAP income tax provision which reflects the new location of GitLab’s intellectual property in the U.S. following the conclusion of our bilateral advance pricing agreements. For FY26 and FY27, we have determined the projected non-GAAP tax rate to be 22%. Shares used for net income per share on a non-GAAP basis include incremental dilutive shares related to restricted stock units, options, and shares issuable under GitLab Inc.’s 2021 Employee Stock Purchase Plan that are anti-dilutive on a GAAP basis. A reconciliation of non-GAAP guidance measures to corresponding GAAP measures is not available on a forward-looking basis without unreasonable effort due to the uncertainty of expenses that may be incurred in the future. Investors are encouraged to review the related GAAP financial measures and the reconciliation of these non-GAAP financial measures to their most directly comparable GAAP financial measures and not rely on any single financial measure to evaluate our business.

Adjusted Free Cash Flow

Adjusted free cash flow is a non-GAAP financial measure that we calculate as net cash provided by operating activities less cash used for purchases of property and equipment, plus any non-recurring income tax payments related to the BAPA or minus any non-recurring income tax refunds related to the BAPA, plus any non-recurring payments related to the formation of JiHu. We believe that adjusted free cash flow is a useful indicator of liquidity that provides information to management and investors about the amount of cash generated from our operations that, after the investments in property and equipment, any non-recurring income tax payments or refunds related to the BAPA, and any non-recurring payments related to the formation of JiHu, can be used for strategic initiatives, including investing in our business, and strengthening our financial position. One limitation of adjusted free cash flow is that it does not reflect our future contractual commitments. Additionally, adjusted free cash flow does not represent the total increase or decrease in our cash balance for a given period.
