### **Independent Auditor's Report**

Audit Committee of the Board of Directors Dogwood State Bank Raleigh, North Carolina

### **Report on the Financial Statements**

We have audited the financial statements of Dogwood State Bank (the Company), which comprise the balance sheets as of December 31, 2021 and 2020, the related statements of income, comprehensive income, changes in shareholders' equity, and cash flows for the years then ended, and the related notes to the financial statements (collectively, the financial statements).

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2021 and 2020, and the results of its operations and its cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

### **Basis for Opinion**

We conducted our audits in accordance with auditing standards generally accepted in the United States of America (GAAS). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are required to be independent of the Company and to meet our other ethical responsibilities, in accordance with the relevant ethical requirements relating to our audits. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

### **Responsibilities of Management for the Financial Statements**

Management is responsible for the preparation and fair presentation of the financial statements in accordance with accounting principles generally accepted in the United States of America, and for the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is required to evaluate whether there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern within one year after the date that the financial statements are issued (or within one year after the date that the financial statements are issued).

### Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance but is not absolute assurance and therefore is not a guarantee that an audit conducted in accordance with GAAS will always detect a material misstatement when it exists. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control. Misstatements are considered material if there is a substantial likelihood that, individually or in the aggregate, they would influence the judgment made by a reasonable user based on the financial statements.

In performing an audit in accordance with GAAS, we:

- Exercise professional judgment and maintain professional skepticism throughout the audit.
- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, and design and perform audit procedures responsive to those risks. Such procedures include examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, no such opinion is expressed.
- Evaluate the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluate the overall presentation of the financial statements.
- Conclude whether, in our judgment, there are conditions or events, considered in the aggregate, that raise substantial doubt about the Company's ability to continue as a going concern for a reasonable period of time.

We are required to communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit, significant audit findings, and certain internal control-related matters that we identified during the audit.

Elliott Davis, PLIC

### See Notes to Financial Statements

### Note 1. Nature of Operations and Basis of Presentation

### Nature of operations:

Dogwood State Bank (the "Company") is a state-chartered bank organized under the laws of North Carolina. The Company is headquartered in Raleigh, North Carolina, and provides a wide range of banking services and products through its six branch offices in Charlotte, Greenville, Morehead City, Raleigh, Sanford and Wilmington, North Carolina. The Company also supports various guaranteed government lending (GGL) programs of the Small Business Administration (SBA) through its small business lending division.

### Basis of presentation:

The accompanying financial statements include the accounts and transactions of the Company. The preparation of the Company's financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

### Note 2. Summary of Significant Accounting Policies

### Cash and cash equivalents:

Cash and cash equivalents include cash and due from banks, interest-earning deposits with banks, and federal funds sold. Cash and cash equivalents have original maturities of three months or less. The carrying amount of such instruments is considered a reasonable estimate of fair value.

### Investment securities:

The Company classifies investment securities as held to maturity, available for sale, or trading at the time of purchase. Premiums and discounts are recognized in interest income using the interest method over the period to maturity. Debt securities are classified as held to maturity where the Company has both the intent and ability to hold the securities to maturity. These securities are reported at amortized cost.

Investment securities available for sale are carried at fair value and consist of debt securities not classified as trading or held to maturity. Unrealized holding gains and losses on investment securities available for sale are reported in other comprehensive income, net of related tax effects. Gains and losses on the sale of investment securities available for sale are determined using the specific identification method recorded on a trade date basis.

### Investment securities, continued:

Each investment security held to maturity and available for sale in a loss position is evaluated for other-thantemporary impairment. The review includes an analysis of the facts and circumstances of each individual investment such as (1) the length of time and the extent to which the fair value has been below amortized cost, (2) changes in the earnings performance, credit rating, asset quality, or business prospects of the issuer, (3) the ability of the issuer to make principal and interest payments, (4) changes in the regulatory, economic, or technological environment of the issuer, and (5) changes in the general market condition of either the geographic area or industry in which the issuer operates.

Regardless of these factors, if the Company has developed a plan to sell the security or it is more likely than not that the Company will be forced to sell the security in the near future, then the impairment is considered other-than-temporary and the carrying value of the security is permanently written down to the current fair value with the difference between the new carrying value and the amortized cost charged to earnings. If the Company does not intend to sell the security and it is not more likely than not that it will be required to sell the security before recovery of its amortized cost basis less any current period credit loss, the other-than-temporary impairment is separated into the following: (1) the amount representing the credit loss and (2) the amount related to all other factors. The amount of the total other-than-temporary impairment related to the credit loss is recognized in other comprehensive income, net of applicable taxes.

### Marketable equity securities:

Investments in equity securities having readily determinable fair values are stated at fair value. Realized and unrealized gains and losses on these securities are determined by specific identification and are included in noninterest income.

### Loans held for sale:

Loans held for sale include the portion of loans originated through the small business lending division that are expected to be sold to the SBA. Loans held for sale are carried at fair value.

### Paycheck Protection Program (PPP) loans:

Loans originated by the Company under the PPP represent the outstanding balance of loans to assist small businesses and non-profit organizations affected by the COVID-19 pandemic. PPP loans are fully guaranteed by the SBA, and management believes substantially all of these loans will ultimately be forgiven under PPP rules. As of December 31, 2021 and 2020, PPP loans totaled \$61,327 and \$101,110, respectively. None of these loans are past due or otherwise impaired. As of December 31, 2021 and 2020, there was no allowance for PPP loans due to the SBA guarantee.

### Paycheck Protection Program (PPP) loans, continued:

During the first quarter of 2021, the Company participated in the second round of funding authorized by the Economic Aid to Hard-Hit Small Businesses, Nonprofits and Venues Act.

### Loans, excluding PPP loans:

Loans that the Company has the intent and ability to hold for the foreseeable future, or until maturity, are reported at their outstanding principal balance, adjusted for any charge-offs, deferred fees or costs on originated loans and unamortized premiums or discounts on acquired loans. Loan origination fees and certain direct origination costs are capitalized and recognized as an adjustment to the yield of the related loan. Interest on loans is recorded based on the principal amount outstanding.

The accrual of interest on impaired loans is discontinued when the future collectability of the recorded loan balance is in doubt. When the future collectability of the recorded impaired loan balance is not in doubt, interest income may be recognized on the cash basis. Generally, loans are placed on nonaccrual status when they are past due 90 days or more. When a loan is placed in nonaccrual status, all unpaid accrued interest is reversed and subsequent collections of interest and principal payments are generally applied as a reduction to the principal outstanding. Should the credit quality of a nonaccrual loan improve, the loan may be returned to an accrual status after demonstrating consistent payment history for at least six months.

A loan is classified as a troubled debt restructuring (TDR) when certain modifications are made to the loan terms and concessions are granted to the borrowers due to financial difficulty experienced by those borrowers. Prior to 2020, the Company has granted concessions by (1) reduction of the stated interest rate for the remaining original life of the debt or (2) extension of the maturity date at a stated interest rate lower than the current market rate for new debt with similar risk. The Company does not generally grant concessions through forgiveness of principal or accrued interest.

### Allowance for loan losses:

During 2020, pursuant to Section 4013 of the Coronavirus Aid, Relief, and Economic Security (CARES) Act, the Company deferred loan payments for various customers who were experiencing financial strain resulting from the COVID-19 Pandemic. Loans receiving these types of payment deferrals were not considered to be delinquent and were not classified as TDRs.

The Company's loan policies, guidelines, and procedures establish the basic guidelines governing its lending operations. They address the types of loans sought, target markets, underwriting, collateral requirements, term, interest rate, yield considerations and compliance with laws and regulations. The loan policies are reviewed and approved annually by the Board of Directors.

### Allowance for loan losses, continued:

The allowance for loan losses (ALLL) is a reserve established through a provision for loan losses charged to expense. Loan balances are charged off against the ALL when the collectability of principal is unlikely.

Subsequent recoveries, if any, are credited to the ALLL. The ALLL is maintained at a level based on management's best estimate of probable credit losses that are inherent in the loan portfolio. Management evaluates the adequacy of the ALLL on at least a quarterly basis.

The Company segments the loan portfolio into broad categories with similar risks for the purposes of computing the Allowance for loan losses. Certain of these broad groupings are further segmented based on additional risks used to calculate the ALLL. Management evaluates loans originated under government guaranteed lending (GGL) programs separately from loans originated from traditional sources due to risks specific to GGL lending, including risks related to customers being out of the Company's primary market areas.

The Company's loan segments and the specific risks of each segment are described below.

*Construction/development loans* – Risks common to construction/development loans are cost overruns, changes in market demand for property, inadequate long-term financing arrangements and declines in real estate values. Construction/development loans are further segmented into residential construction/development loans, GGL construction/development loans and other construction/development loans. Residential construction/ development loans are also susceptible to risks associated with residential mortgage loans. Changes in market demand for property could lead to longer marketing times resulting in higher carrying costs, declining values, and higher interest rates.

*Commercial real estate loans* – Loans in this category are susceptible to declines in occupancy rates, business failure and general economic conditions. Also, declines in real estate values and lack of suitable alternative use for the properties are risks for loans in this category. Commercial real estate loans are further segmented into loans secured by non-owner occupied commercial real estate, loans secured by owner-occupied real estate that are originated under GGL programs, and loans secured by all other owner-occupied commercial real estate.

1-4 family loans – Residential mortgage loans are susceptible to weakening general economic conditions and increases in unemployment rates and declining real estate values. This segment includes loans secured by both first lien and subordinate lien positions.

*Commercial and industrial loans* – Risks to this loan category include industry concentration and the inability to monitor the condition of the collateral which often consists of inventory, accounts receivable and other non-real estate assets. Equipment and inventory obsolescence can also pose a risk. Declines in general economic conditions and other events can cause cash flows to fall to levels insufficient to service debt. Commercial and industrial loans are further segmented into commercial and industrial loans estate that are originated under GGL programs, including solar, and all other commercial and industrial loans.

### Allowance for loan losses, continued:

*Home equity loans* – Risks common to home equity loans and lines of credit are general economic conditions, including an increase in unemployment rates, and declining real estate values which reduce or eliminate the borrower's home equity.

*Other consumer loans* – Risks common to these loans include regulatory risks, unemployment and changes in local economic conditions as well as the inability to monitor collateral consisting of personal property.

The evaluation of the adequacy of the ALLL includes both loans evaluated collectively for impairment and loans evaluated individually for impairment. For loans evaluated collectively for impairment, loans are grouped based on common risk characteristics. Historical loss rates are then combined with certain qualitative factors to determine the ALLL reserve rates for each loan grouping. Qualitative factors include consideration of certain internal and external factors, such as loan delinquency levels and trends, loan growth, loan portfolio composition and concentrations, local and national economic conditions, the loan review function, and other factors management deems relevant to the ALLL calculation.

A loan is considered individually impaired when, based on current information and events, it is probable that the Company will be unable to collect the scheduled payments of principal and interest when due according to the contractual terms of the loan agreement. Reserves, or charge-offs, on individually impaired loans that are collateral dependent are based on the fair value of the underlying collateral, less an estimate of selling costs, while reserves, or charge-offs, on loans that are not collateral dependent are based on either an observable market price, if available, or the present value of expected future cash flows discounted at the historical effective interest rate. The Company evaluates loans that are classified as doubtful, substandard or special mention to determine whether or not they are individually impaired. This evaluation includes several factors, including review of the loan payment status and the borrower's financial condition and operating results such as cash flows, operating income or loss, etc.

### Purchased credit-impaired loans:

The evaluation of the ALLL is inherently subjective, and management uses the best information available to establish this estimate. However, if factors such as economic conditions differ substantially from assumptions, or if amounts and timing of future cash flows expected to be received on impaired loans vary substantially from the estimates, future adjustments to the ALLL may be necessary.

Loans acquired in a transfer, including business combinations, where there is evidence of credit deterioration since origination and it is probable at the date of acquisition that we will not collect all contractually required principal and interest payments, are accounted for as purchased credit-impaired (PCI) loans. Where possible, PCI loans with common risk characteristics are grouped into pools at acquisition. For PCI loan pools, the excess of the cash flows initially expected to be collected over the fair value of the loans at the acquisition date (i.e., the accretable yield) is accreted into interest income over the estimated remaining life of the PCI loans using the effective yield method, provided that the timing and the amount of future cash flows is reasonably estimable.

### Purchased credit-impaired loans, continued:

Accordingly, such loans are not classified as nonaccrual and they are considered to be accruing because their interest income relates to the accretable yield recognized under accounting for PCI loans and not to contractual interest payments. The difference between the contractually required payments and the cash flows expected to be collected at acquisition, considering the impact of prepayments, is referred to as the nonaccretable difference.

Subsequent to acquisition, estimates of cash flows expected to be collected are updated based on current assumptions regarding default rates, loss severities, and other factors that are reflective of current market conditions. If the Company has probable decreases in pool-level cash flows expected to be collected, the provision for loan losses is charged, resulting in an increase to the ALLL. If the Company has probable and significant increases in pool-level cash flows expected to be collected, the proviously established ALLL and then increase interest income as a prospective yield adjustment over the remaining life of the loan pool. The impact of changes in variable interest rates is recognized prospectively as adjustments to interest income.

### Premises and equipment:

Land is carried at cost. Other components of premises and equipment are stated at cost less accumulated depreciation. Depreciation is calculated on the straight-line method over the estimated useful lives of assets, which range from 37 to 40 years for buildings and three to seven years for furniture and equipment. Leasehold improvements are amortized over the terms of the respective leases or the estimated useful lives of the improvements, whichever is shorter. Repairs and maintenance costs are charged to operations as incurred, and additions and improvements to premises and equipment are capitalized. Upon sale or retirement, the cost and related accumulated depreciation are removed from the accounts and any gains or losses are reflected in earnings.

Premises and equipment are reviewed for impairment whenever events or changes in circumstances indicate that the carrying value may not be recoverable. Assets to be disposed of are transferred to other real estate owned and are reported at the lower of the carrying amount or fair value less costs to sell.

### Bank-owned life insurance:

The Company has purchased life insurance policies on certain current and former employees and directors. These policies are recorded at their cash surrender value, or the amount that could be realized by surrendering the policies. Income from these policies and changes in the net cash surrender value are recorded in non-interest income.

### Income taxes:

Deferred tax assets and liabilities are included in other assets. Deferred tax assets and liabilities reflect the estimated future tax consequences attributable to differences between the tax basis of assets and liabilities and their carrying amounts for financial reporting purposes. Deferred tax assets are also recognized for operating loss carry-forwards. Deferred tax assets and liabilities are measured using enacted tax rates in effect for the year in which the temporary differences are expected to be recovered or settled. Deferred tax assets are reduced by a valuation allowance if it is more likely than not that the tax benefits will not be realized.

### Other real estate owned:

Other real estate owned is included in other assets and includes assets acquired through loan foreclosure. These properties are held for sale and are initially recorded at fair value less costs to sell upon foreclosure. After foreclosure, valuations are periodically performed, and the assets are carried at the lower of carrying amount or fair value less cost to sell. Revenue and expenses from operations and valuation adjustments are included in noninterest expense. There was no other real estate owned as of December 31, 2021 or 2020.

### Equity investments at cost:

As a requirement for membership, the Company has invested in common stock of the Federal Home Loan Bank of Atlanta. This investment, which is included in other assets, is carried at cost and is periodically evaluated for impairment.

### Stock-based compensation:

Compensation cost is recognized for restricted stock awards granted to employees. Compensation cost is based on the fair value of restricted stock awards based on the market price of the Company's common stock at the date of grant. Compensation cost is recognized over the required service period, generally defined as the vesting period for restricted stock awards.

### Fair value measurements:

Fair value is defined as the exchange price that would be received to sell an asset or paid to transfer a liability in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The Company follows the fair value hierarchy which gives the highest priority to quoted prices in active markets (observable inputs) and the lowest priority to management's assumptions (unobservable inputs). For assets and liabilities recorded at fair value, the Company's policy is to maximize the use of observable inputs and minimize the use of unobservable inputs when developing fair value measurements.

The Company utilizes fair value measurements to record fair value adjustments to certain assets and liabilities and to determine fair value disclosures. Investment securities available for sale are recorded at fair value on a recurring basis. Additionally, the Company may be required to record at fair value other assets on a nonrecurring basis, such as impaired loans and other real estate owned. These nonrecurring fair value adjustments typically involve application of lower of cost or market accounting or write-downs of individual assets.

Assets and liabilities measured at fair value are grouped in three levels, based on the markets in which the assets and liabilities are traded and the reliability of the assumptions used to determine fair value. An adjustment to the pricing method used within either Level 1 or Level 2 inputs could generate a fair value measurement that effectively falls to a lower level in the hierarchy. These levels are described as follows:

- Level 1: Valuations for assets and liabilities traded in active exchange markets.
- Level 2: Valuations for assets and liabilities that can be obtained from readily available pricing sources via independent providers for market transactions involving similar assets or liabilities. The Company's principal market for these securities is the secondary institutional markets, and valuations are based on observable market data in those markets.
- Level 3: Valuations for assets and liabilities that are derived from other valuation methodologies, including discounted cash flow models and similar techniques, and not based on market exchange, dealer, or broker traded transactions. Level 3 valuations incorporate certain assumptions and projections in determining the fair value assigned to such assets or liabilities.

The determination of where an asset or liability falls in the fair value hierarchy requires significant judgment. The Company evaluates its hierarchy disclosures at each reporting period and based on various factors, it is possible that an asset or liability may be classified differently. However, management expects that changes in classifications between levels will be rare.

### Accumulated other comprehensive income:

The Company's accumulated other comprehensive income is comprised of unrealized gains and losses, net of taxes, on investment securities available for sale.

### Segment reporting:

Operating segments are components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision maker in deciding how to allocate resources and in assessing performance. Management has determined that the Company has a single operating segment, which is providing general commercial banking and financial services to individuals and businesses located in North Carolina and to customers in various states through its GGL Small Business Administration (SBA) lending program. The Company's various products and services are those generally offered by community banks, and the allocation of resources is based on the overall performance of the Company versus individual regions, branches, products and services.

### Revenue from contracts with customers:

All of the Company's revenues that are within the scope of ASC 606 are recognized within noninterest income. The following table presents the Company's sources of noninterest income for the years ended December 31, 2021 and 2020. Items outside the scope of ASC 606 are noted as such.

Revenue from contracts with customers, continued:

	Year ended December 31,			
		2021		2020
Non-interest income				
Government-guaranteed lending <sup>1</sup>	\$	13,279	\$	3,073
Service charges and fees on deposit accounts		878		649
Bank-owned life insurance <sup>1</sup>		580		497
Gain on sales of investment securities available for sale, net <sup>1</sup>		4		721
Other <sup>2</sup>		265		99
Total non-interest income	<u>\$</u>	15,006	<u>\$</u>	5,039

<sup>1</sup>Not within the scope of ASC 606

<sup>2</sup>The other category includes \$265 and \$99 of income sources that are within the scope of ASC 606 but determined immaterial as of December 31, 2021 and 2020, respectively.

There were no impairment losses recognized on any receivables or contract assets arising from the Company's contracts with customers during the years ended December 31, 2021 and 2020. While the Company has noninterest income related to government-guaranteed lending, changes in cash surrender value of life insurance and sales of investment securities available for sale, these are not within the scope of ASC 606. Service charge revenue generated from contracts with customers is noninterest income and relates to fees charged on deposit accounts and certain loan and deposit fees.

Revenues generated from each of these contracts are recognized when a performance obligation is met, and each obligation is associated with a transaction tied to an account. Given each of these accounts are transactional and the related contracts are day-to-day contracts, the performance obligations on these accounts occur when the contract provision is triggered on the account, which results in the related service charge.

Based on the Company's analysis, there are no fees generated for opening an account or for a service on the account where the good or service has not been transferred or prior to the performance obligation being met.

As of December 31, 2021 and 2020, the Company did not have amounts of material receivables, contract assets or contract liabilities tied to these contracts with customers. The Company believes that while loan and deposit accounts generate service charge income, these contracts do not create receivables, assets or liabilities given the fees associated with these service charges are typically charged and collected once the performance obligation is triggered. In addition, during the years ended December 31, 2021 and 2020, the Company did not recognize revenue that was included in any contract liabilities, and no revenues were recognized related to performance obligations satisfied in prior reporting periods. The Company analyzes its payment streams associated with contracts with customers on a quarterly basis.

### Revenue from contracts with customers, continued:

As of December 31, 2021 and 2020, the nature of the performance obligations within the contracts generating these service charges on deposit and loan accounts have a duration of one year or less. Also, based on the Company's analysis and the nature of the contracts discussed within this note, management determined that there are no significant judgements associated with the recognition of revenue associated with these contracts. Based on the Company's analysis, each of the service charge revenues discussed above are associated with the transfer of services through administration of a customer's deposit account or through an agreed-upon, fixed amount that is disclosed in the customer's contract and are charged to the customer when the related service is performed on the customer's account. In addition, based on the Company's analysis, none of the contracts discussed above required a material cost to obtain or fulfill the contract, which resulted in no capitalized asset associated with these contracts as of December 31, 2021 and 2020.

### Recently issued accounting pronouncements:

# FASB ASU 2016-13, Financial Instruments-Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments (ASC 326)

In June 2016, the FASB issued ASC 326 to change the accounting for credit losses and modify the impairment model for certain debt securities. As discussed below, subsequent additional guidance related to ASC 326 has resulted in an anticipated adoption no later than periods beginning after December 15, 2022. ASC 326 introduces a new credit loss methodology which requires earlier recognition of credit losses, replacing multiple impairment methods currently allowed under accounting principles generally accepted in the United States of America.

The ASC 326 amendments require loss estimates be determined over the lifetime of the asset and broaden the information an entity must consider in developing its expected credit losses. ASC 326 does not specify a method for measuring expected credit losses and allows an entity to apply methods that reasonably reflect its expectations of the credit loss estimate based on the entity's size, complexity and risk profile. The standard will apply to the Company's loans, unfunded loan commitments and debt securities.

The Company will apply the amendments to ASC 326 through a cumulative-effect adjustment to retained earnings as of the beginning of the year of adoption. While early adoption was permitted beginning in first quarter 2019, the Company did not elect that option. The Company is evaluating the impact of ASC 326 on the financial statements. The Company expects ASC 326 will result in an increase in the recorded allowance for loan losses given the change to estimated losses over the contractual life of the loans adjusted for expected prepayments. In addition to the allowance for loan losses, the Company will also record an allowance for credit losses on held-to-maturity debt securities instead of applying the impairment model currently utilized. The amount of the adjustments will be impacted by each portfolio's composition and credit quality at the adoption date as well as economic conditions and forecasts at that time.

Other accounting standards that have been issued or proposed by the FASB or other standards-setting bodies are not expected to have a material impact on the Company's financial position, results of operations or cash flows.

### Note 3. Investment Securities

The following tables summarize the amortized cost, gross unrealized gains and losses, and fair value of investment securities available for sale and held to maturity by major classification:

				Decembe	r 31, 20	21

### Note 3. Investment Securities, Continued

The amortized cost and fair values of investment securities available for sale and held to maturity, by contractual maturity, are shown below. Expected maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

	December 31, 2021			
	Amortized			Fair
		Cost		Value
Investment securities available for sale with scheduled maturities: Within 1 year After 1 through 5 years	\$	37,242	\$	36,943
After 5 years through 10 years	\$	32,212 69,453	\$	31,878 68,821
Investment securities held to maturity with scheduled maturities: After 1 through 5 years After 5 years through 10 years After 10 years	\$	18,463 8,772 15,214	\$	18,133 8,709 15,221
Arter 10 years	\$	42,449	\$	42,063
		December	31, 20	20
		ortized		Fair
		Cost		Value
Investment securities available for sale with scheduled maturities: Within 1 year After 1 through 5 years After 5 years through 10 years After 10 years	\$ \$	1,107 30,371 10,982 14,269 56,729	\$	1,123 30,891 11,009 14,646 57,669
Investment securities held to maturity with scheduled maturities: After 5 years through 10 years	\$	1,732	\$	1,782

During 2021, the Company transferred investment securities available for sale to investment securities held to maturity. At the time of the transfer the securities had an amortized cost basis of \$37,970 and a fair value of \$37,750. The \$220 difference between the amortized cost basis and fair value at the date of transfer is amortized as a yield adjustment over the remaining life of the securities and the \$37,750 fair value, adjusted for subsequent amortization, became the securities new cost basis.

### Note 3. Investment Securities, Continued

As of December 31, 2021, four securities totaling \$4,687 in investment securities have been in an unrealized loss for more than twelve months. As of December 31, 2020, no investment securities were in an unrealized loss position for more than a twelve-month period. The securities in an unrealized loss position as of December 31, 2021 and 2020 continue to perform and are expected to perform through maturity, and the issuers have not experienced significant adverse events that would call into question their ability to repay these debt obligations according to contractual terms.

Further, because the Company does not intend to sell these investments and does not believe that it will be required to sell the investments before recovery of their amortized cost bases, which may be maturity, unrealized losses on such securities were not considered to represent other-than-temporary impairment as of December 31, 2021 and 2020.

As of December 31, 2021, the Company held no individual investment securities with an aggregate book value greater than 10 percent of total shareholders' equity.

The following table summarizes realized securities gains and losses for the periods presented:

	2	2021		
Realized gains	\$	224	\$	772
Realized losses		(220)		(51)
	\$	4	\$	721

During 2021, the Company purchased 36,000 shares of marketable equity securities with a cost basis of \$227. As of December 31, 2021, the fair value was \$243. There were no marketable equity securities as of December 31, 2020.

### Note 4. Loans and Allowance for Loan Losses

The following table summarizes the Company's loans by type:

	2021	2020
Construction/development - GGL	\$ 20,358	\$ 8,713
Construction/development - other	78,574	51,131
Commercial real estate - owner occupied - GGL	17,999	6,092
Commercial real estate - owner occupied - other	138,156	70,375
Commercial real estate - non-owner occupied - other	143,954	83,703
Commercial and industrial - GGL	52,961	41,962
Commercial and industrial - other	68,867	45,888
1-4 family	53,929	50,458
Home equity	13,378	12,410
Construction/development - residential	975	1,018
Other consumer	2,528	1,769
	\$ 591,679	\$ 373,519

The preceding table and all following disclosures exclude \$61,327 and \$101,110 of PPP loans originated during 2021 and 2020, respectively.

As of December 31, 2021 and 2020, loans with a recorded investment of \$246,726 and \$130,552, respectively, were pledged to secure borrowings or available lines of credit with correspondent banks.

As of December 31, 2021 and 2020, there were no loans to directors and executive officers outstanding.

### **PCI Loans**

Loans for which it is probable at acquisition that all contractually required payments will not be collected are considered PCI loans. The outstanding balance of PCI loans consists of the undiscounted sum of all amounts, including amounts deemed principal, interest, fees, penalties, and other under the loan, owed by the borrower at the reporting date, whether or not currently due and whether or not any such amounts have been written or charged off. The unpaid principal balance of PCI loans was \$1,501 and \$2,739 as of December 31, 2021 and 2020, respectively.

The following table summarizes changes in accretable yield, or income expected to be collected, related to the Company's PCI loans for the periods presented:

	20	)21	2	2020
Accretable yield at beginning of period	\$	440	\$	663
Accretion		(246)		(263)
Reclassification of nonaccretable differences		(33)		49
Other changes, net		105		(9)
Accretable yield at end of period	\$	266	\$	440

### Allowance for Loan Losses, Continued

The Company categorizes loans into risk categories based on relevant information about the ability of borrowers to service their debt including current financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors. The Company analyzes loans individually by classifying the loans according to credit risk. The Company uses the following general definitions for risk ratings:

*Pass* – These loans range from superior quality with minimal credit risk to loans requiring heightened management attention but that are still an acceptable risk and continue to perform as contracted.

*Special Mention* – Loans classified as special mention have a potential weakness that deserves management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan or of the institution's credit position at some future date.

*Substandard* – Loans classified as substandard are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

*Doubtful* – Loans classified as doubtful have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

### Allowance for Loan Losses, Continued

The following tables summarize the risk category of loans by class of loans:

		Decembe	er 31, 2021

The following table provides the average recorded investment in impaired loans by loan type:

	Y	ear ended De	ecember 3	1,
	2	021	20	020
Construction/development - other	\$	2	\$	2
Home equity		37		114
1-4 family		167		177
Commercial and industrial - other		1,496		-
Commercial and industrial - GGL		57		-
	\$	1,759	\$	293

There was \$83 in interest income earned on one impaired loan during the year ended December 31, 2021. There was no interest income earned on impaired loans during the years ended December 31, 2020.

### Allowance for Loan Losses, Continued

The Company may modify certain loans under terms that are below market in order to maximize the amount collected from a borrower that is experiencing financial difficulties. These modifications are considered to be TDRs. TDRs are evaluated individually for impairment based on the collateral value, if the loan is determined to be collateral dependent, or discounted expected cash flows, if the loan is not determined to be collateral dependent. The Company has no commitments to lend additional funds to any borrowers that have had a loan modified in a TDR.

During 2020, pursuant to Section 4013 of the CARES Act, the Company deferred scheduled payments for 78 loans with an outstanding balance of \$37,984 to provide temporary relief to customers under COVID-related financial stress. None of these loans were classified as TDRs as of December 31, 2021. As of December 31, 2021, there were no loans in deferred status.

The following table provides the number and recorded investment of TDRs outstanding at December 31, 2021 and 2020:

	December	<sup>.</sup> 31, 2021	December	<sup>.</sup> 31, 2020		
	 orded stment	Number		orded tment	Number	
1-4 family	\$ 264	7	\$	15	1	
Commercial real estate - owner occupied - other	3,034	2		66	2	
Home equity	-	1		151	1	
	\$ 3,298	10	\$	232	4	

As of December 31, 2021, there was one non-performing TDR with a recorded investment of \$8. As of December 31, 2021 there were no TDRs that were not performing in accordance with the modified loan terms.

The Company does not generally forgive principal or unpaid interest as part of when restructuring loans. Therefore, the recorded investments in TDRs during 2021 and 2020 did not change following the modifications. There was one new TDR in 2021 for \$3,033 and two new TDRs in 2020 for \$262. There have been no payment defaults on these TDRs within a year from modification.

### Note 5. Premises and Equipment

A summary of premises and equipment is presented in the table below:

		mber 31,	mber 31,
	2	2021	2020
Land	\$	1,564	\$ 1,820
Building and leasehold improvements		14,781	13,164
Furniture and equipment		2,329	1,769
Less accumulated depreciation		(2,314)	(1,880)
	\$	16,360	\$ 14,873

Depreciation on premises and equipment, which is recorded in occupancy and equipment expense, totaled \$1,262 and \$824 for the years ended December 31, 2021 and 2020, respectively.

As of December 31, 2021 and 2020, buildings and leasehold improvements included \$8,146 and \$6,194, respectively, related to the Company's right of use lease assets.

#### Note 6. Leases

The following table summarizes the Company's lease assets and liabilities as of December 31, 2021 and 2020:

	Balance Sheet				
Description	Classification	2021		2020	
Assets:					
Finance	Premises and equipment, net	\$	8,146	\$	6,194
Operating	Accrued interest receivable				
	and other assets		782		692
Total leased assets		\$	8,928	\$	6,886
Liabilities:					
Finance	Lease liability	\$	8,584	\$	6,448
Operating	Accrued interest payable				
	and other liabilities		792		719
Total lease liabilities		\$	9,376	\$	7,167

### Note 6. Leases, Continued

The following table provides information regarding the minimum lease payments in future periods that will reduce lease-related liabilities outstanding as of December 31, 2021:

	<b>Finance Leases</b>		<b>Operating Leases</b>		Total	
2022	\$	834	\$	344	\$	1,178
2023		886		275		1,161
2024		907		191		1,098
2025		929		30		959
2026		952		-		952
Thereafter		5,375		-		5,375
Total minimum lease payments		9,883		840		10,723
Discount		(1,299)		(48)		(1,347)
Lease liability	\$	8,584	\$	792	\$	9,376

The following table provides the weighted average remaining lease term (in years) and the weighted average discount rate of finance and operating leases as of December 31, 2021:

	Finance Leases	<b>Operating Leases</b>
Weighted average remaining lease term in years	10.7	1.7
Weighted average discount rate	2.41%	1.53%

### Note 7. Goodwill and other intangible assets

The table below summarizes the changes in carrying amounts of goodwill and other intangible assets (core deposit intangible) for the periods presented:

			Other i	intangible
	Go	Goodwill		ssets
Balance at December 31, 2019	\$	7,016	\$	1,095
Accumulated amortization		-	_	(429)
Balance at December 31, 2020		7,016		666
Accumulated amortization		-	_	(323)
Balance at December 31, 2021	\$	7,016	\$	343

Goodwill represents the excess of the purchase price over the fair value of acquired net assets under the acquisition method of accounting. The acquisition that generated the Company's goodwill was a nontaxable event and, as a result, there is no tax basis in the goodwill, and none of the goodwill is deductible for tax purposes.

### Note 7. Goodwill and other intangible assets, Continued

Goodwill is evaluated for impairment annually or more frequently if events occur or circumstances change that may indicate that impairment exists. The most recent goodwill impairment evaluation was performed as of December 31, 2021. No goodwill impairment was recorded during 2021 or 2020.

The value of other intangible assets was determined using the present value of the difference between a market participant's cost of obtaining alternative funds and the cost to maintain the acquired deposit base. The other intangible assets are amortized over a seven-year period using an accelerated method. Other intangible assets are evaluated for impairment if events and circumstances indicate impairment may exist.

The following table presents estimated future amortization expense for the Company's other intangible assets:

2022	\$ 217
2023	111
2024	15
2025	-
2026	-
Thereafter	 -
	\$ 343

No impairment charges were recorded for other intangible assets during 2021 or 2020.

SBA servicing assets, which are included in other assets, represent the present value of projected future servicing income when an SBA loan is sold servicing retained. The SBA servicing asset was \$2,390, net of \$177 valuation allowance, at December 31, 2021, and \$364 with no valuation allowance at December 31, 2020. The SBA servicing asset is amortized over the servicing life of the loan and is subject to impairment based on changes in servicing values.

### Note 8. Income Taxes

The significant components of the provision for income taxes for the years ended December 31, 2021 and 2020 are as follows:

	2	021	2020		
Current tax provision:					
Federal	\$	(23)	\$	(645)	
State		-		-	
Total current tax (benefit)		(23)		(645)	
Deferred tax provision:					
Federal		(616)		481	
State		(78)		(8)	
Total deferred tax provision (benefit)		(694)		473	
Total income tax benefit	\$	(717)	\$	(172)	

The difference between the provision for income taxes and the amounts computed by applying the statutory federal income tax rate of 21 percent for 2021 and 2020 to income before income taxes is summarized below:

	2021		2020
Income tax expense at federal statutory rate	\$	772	\$ 1
Increase (decrease) resulting from:			
State income taxes, net of federal benefit		(62)	(6)
Bank-owned life insurance		(122)	(104)
Stock-based compensation		(1,347)	-
Tax law change regarding NOL carrybacks		-	(246)
Nondeductible expenses		80	69
Other permanent difference, net		(38)	 114
Total income tax benefit	\$	(717)	\$ (172)

Deferred income taxes reflect the net tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes.

### Note 8. Income Taxes, Continued

Significant components of deferred taxes at December 31, 2021 and 2020 are as follows:

	2021		2020	
Deferred tax asset relating to:				
Allowance for loan losses	\$	1,522	\$	916
Deferred compensation		270		208
Net operating loss carryforwards		282		342
Stock-based compensation		254		-
Unrealized loss on investment securities available				
for sale		197		-
Amortization of intangible assets		139		153
Other		-		85
Total deferred tax assets		2,664		1,704
Deferred tax liabilities relating to:				
Premises and equipment		(934)		(978)
Unrealized gains on investment securities available				
for sale		-		(221)
Acquisition accounting		(30)		(86)
Other		(170)		-
Total deferred tax liabilities		(1,134)		(1,285)
Total deferred tax asset, net	\$	1,530	\$	419

As of December 31, 2021, the Company had \$1,560 of post-2017 net operating losses which can be carried forward indefinitely and applied against future taxable income. These net operating losses will not expire. On March 27, 2020, the Coronavirus Aid, Relief, and Economic Security Act (CARES Act) was enacted in response to the COVID-19 pandemic. The CARES Act, among other things, permits carryovers and carrybacks to offset 100 percent of taxable income for taxable years beginning before 2021. In addition, the CARES Act allows net operating losses incurred in 2020, 2019 and 2018 to be carried back to each of the five preceding taxable years to generate a refund of previously paid income taxes. The Company utilized this provision in the CARES Act by carrying back the 2019 net operating loss to tax years 2018, 2017 and 2016, generating a benefit through the ability to carry back to higher tax rate years.

The Company's net deferred tax asset was \$1,530 and \$419 at December 31, 2021 and 2020, respectively. In evaluating whether it will realize the full benefit of the net deferred tax asset, the Company evaluated both positive and negative evidence, including among other things recent earnings trends, projected earnings, and asset quality. As of December 31, 2021, management concluded that the Company's net deferred tax asset was fully realizable. The Company will continue to monitor deferred tax assets closely to evaluate whether it will be able to realize the full benefit of its net deferred tax asset or whether there is any need for a valuation allowance.

### Note 8. Income Taxes, Continued

Significant negative trends in credit quality, losses from operations or other factors could impact the realization of the deferred tax asset in the future.

The Company's policy is to report interest and penalties, if any, related to uncertain tax positions in income tax expense. As of December 31, 2021 and 2020, the Company had no uncertain tax positions.

With few exceptions, the Company is no longer subject to U.S. federal, state and local, or non-U.S. income tax examinations by tax authorities for years before 2018.

### Note 9. Deposits

The scheduled maturities of time deposits as of December 31, 2021 are presented below:

		Less		\$250	
	tha	than \$250		Greater	Total
2022	\$	72,541	\$	8,712	\$ 81,253
2023		10,844		1,098	11,942
2024		4,433		270	4,703
2025		262		-	262
2026		1,068		-	1,068
Total	\$	89,148	\$	10,080	\$ 99,228

Brokered deposits totaled \$36,019 and \$19,974 as of December 31, 2021 and 2020, respectively.

### Note 10. FHLB Advances

A summary of FHLB advances as of December 31, 2021 and 2020 is presented below:

Description	Interest Rate	Maturity Date	2	2021	:	2020
Fixed Rate Credit	0.21%	January 7, 2021	\$	-	\$	5,000
Fixed Rate Credit	0.23%	January 22, 2021		-		10,000
Fixed Rate Credit	0.51%	January 26, 2021		-		1,500
Fixed Rate Credit	0.23%	January 28, 2021		-		9,000
Fixed Rate Hybrid	0.53%	March 26, 2021		-		2,500
Fixed Rate Hybrid	0.93%	September 24, 2021		-		3,000
Fixed Rate Hybrid	1.65%	January 31, 2022		4,000		4,000
			\$	4,000	\$	35,000

### Note 10. FHLB Advances, Continued

As of December 31, 2021, the Company had access to an additional \$141,626 at the FHLB on a secured basis. As of December 31, 2021, the Company also had unused unsecured federal funds lines of credit with various counterparty banks totaling \$75,000.

### Note 11. PPPLF Borrowings

Beginning in 2020, the Company partially funded PPP loan originations through the Federal Reserve's facility established to facilitate PPP lending. As of December 31, 2021, the Company had no PPPLF borrowings outstanding. As of December 31, 2020, the Company had PPLF borrowings with an outstanding balance of \$66,711, all of which has a fixed interest rate of one percent. Advances are repaid as PPP loans are forgiven or earlier if the Company's elects to do so. PPP loans totaling \$66,711 were pledged to secure the PPPLF borrowings outstanding at December 31, 2020.

### Note 12. Commitments and Contingencies

The Company is a party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of its customers. Those instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the balance sheet. The contract or notional amounts of those instruments reflect the Company's maximum exposure. The Company uses the same credit policies in making commitments and conditional obligations as it does for on-balance sheet instruments.

Commitments to extend credit, which totaled \$147,381 and \$97,111 at December 31, 2021 and 2020, respectively, represent agreements to lend to a customer as long as there is no violation of conditions established in the contract. Commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. As of December 31, 2021 and 2020, the Company had a reserve for unfunded commitments of \$135 and \$93, respectively, included in accrued interest payable and other liabilities on the Balance Sheet.

Since some of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. The Company evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral obtained, if deemed necessary by the Company, upon extension of credit is based on a credit evaluation of the borrower. Collateral obtained varies but may include real estate, equipment, stocks, bonds, and certificates of deposit.

### Note 13. Stock-Based Compensation and Retirement Plans

### **Restricted Stock**

The Company's 2019 Omnibus Incentive Plan authorizes up to 1,205,346 shares of the Company's voting common stock to be awarded under various incentive programs. Pursuant to authority under the 2019 Omnibus Incentive Plan, the Company adopted a restricted stock program that allows shares of stock to be awarded to employees. All shares vest over a five year period.

### Note 13. Stock-Based Compensation and Retirement Plans

### Restricted Stock, Continued

In 2021, the Company accelerated the vesting of 801,490 shares of restricted stock previously granted to certain executive officers. The accelerated vesting of these shares resulted in a one-time, non-cash charge of \$5,242 to stock-based compensation expense in 2021.

The following table provides information on the number of shares of restricted stock awarded in each of the years ended December 31, 2021 and 2020, the aggregate number of shares awarded as of December 31, 2021 and 2020, the restricted stock expense recorded during the years ended December 31, 2020 and 2019, and the unrecognized compensation cost for non-vested restricted stock awards as of December 31, 2021 and 2020:

	2021		2020	
Shares of restricted stock awarded during current year		117,500		492,500
Shares of restricted stock awarded as of December 31		1,114,990		997,490
Restricted stock expense recognized in current year Unrecognized compensation cost related to non-vested	\$	7,274	\$	1,245
restricted stock awards as of December 31		2,088		5,951

### **Defined Contribution Plans**

The Company sponsors a 401(k) plan for substantially all employees. Participants may make voluntary contributions resulting in salary deferrals in accordance with Section 401(k) of the Internal Revenue Code. The plan provides for employer contributions of up to 4 percent of pre-tax salary contributed by each participant. Employer contributions to the 401(k) plans totaled \$385 for the year ended December 31, 2021, compared to \$261 for 2020.

### Supplemental Employment Retirement Plan

As of December 31, 2021 and 2020, the Company had a \$1,174 and \$907 accrued liability, respectively, included in accrued interest payable and other liabilities on the Balance Sheet. The Company has \$907 in accrued liability as of both December 31, 2021 and 2020 related to obligations to two former employees, representing the present value of the future payments expected to be made pursuant to the terms of a non-qualified plan.

Additionally, in 2021 the Company implemented a long-term retention agreement with three current executives and has accrued an additional \$267 in accrued liability related to the present value of the future payments expected to be made to these executives under the new agreement. The Long-term retention agreements provide for specified cash retention payment amounts for 10 years generally commencing on the date that the Executive attains age 62 provided that the Executive remains employed by the Company.

### Note 14. Shareholders' Equity

### Supplemental Employment Retirement Plan, Continued

On May 6, 2019, the Company completed a recapitalization as part of a plan to expand its operations and grow into a statewide, North Carolina community bank. The recapitalization involved a private placement of 4,599,636 shares of the Company's voting common stock and 5,444,920 shares of the Company's non-voting common stock to certain institutional and accredited individual investors. Certain shares of voting and non-voting common stock were sold by the Company's former parent company and sole shareholder, West Town Bancorp, Inc., directly to other investors in the recapitalization. The remaining shares of voting and non-voting common stock sold in the recapitalization were newly issued. Following the recapitalization, West Town Bancorp, Inc. remained a minority shareholder of the Company but is no longer the parent company.

Certain institutional investors in the recapitalization received warrants to purchase a total of 737,855 shares of non-voting common stock. The exercise price of these warrants is \$10.00 per share, and the warrants expire five years from the date of issuance. During the first quarter of 2021, the Company repurchased 75,000 common stock warrants at \$2.28 per share, resulting in \$171 decrease in capital surplus.

During the first quarter of 2021, the Company completed a secondary offering of its voting common stock in a private placement. The Company issued a total of 2,326,839 shares at an offering price of \$12 per share, resulting in an additional \$27,922 of new capital.

During the first quarter of 2022, the Company completed a secondary offering of its voting common stock in a private placement. The Company issued a total of 664,316 shares at an offering price of \$18 per share, resulting in an additional \$11,958 of new capital.

### Note 15. Fair Value

### Fair value of financial instruments:

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value is best determined based upon quoted market prices. However, in many instances, there are no quoted market prices for the Company's various financial instruments. In cases where quoted market prices are not available, fair values are based on estimates using present value or other valuation techniques. Those techniques are significantly affected by the assumptions used, including the discount rate and estimates of future cash flows. Fair value estimates may not be realized in an immediate settlement, and the aggregate fair value amounts presented may not necessarily represent the underlying fair value of the Company.

### Cash and cash equivalents:

The carrying amount reported in the balance sheets for cash and cash equivalents approximates fair value. The fair value of cash and cash equivalents is measured using level 1 inputs.

### Investment securities available for sale:

Fair values are determined in the manner described above. The fair value of investment securities available for sale is measured using level 2 inputs.

### Investment securities held to maturity:

Fair values are determined in the manner described above. The fair value of investment securities held to maturity is measured using level 2 inputs.

### Marketable equity securities:

Fair values are based upon quoted market prices. The fair value of investment securities available for sale is measured using level 1 inputs.

### Loans held for sale:

Fair values of SBA loans held for sale are based on estimated instrument-level gains or losses to be realized upon sale, which management consider to be level 2 inputs.

### <u>PPP loans:</u>

The carrying value of PPP loans approximates fair value. Management anticipates substantially all of these loans will be forgiven under PPP rules within a 12-month period following origination.

### Loans, excluding PPP loans, net:

The fair value of loans represents the amount at which the loans of the Company could be exchanged on the open market, based upon the current lending rate for similar types of lending arrangements discounted over the remaining life of the loans. For fixed rate loans and for variable rate loans with infrequent re-pricing or re-pricing limits, fair value is based on discounted cash flows using current market rates applied to the cash flow analysis. The fair value of non-impaired loans is measured using level 2 inputs. The fair value of impaired loans relies on level 3 inputs.

### Deposits:

The fair value of time deposits is based on discounted cash flows using current market rates applied to the cash flow analysis for each time deposit. Other non-maturity deposits are reported at their carrying values. The fair value of deposits is measured using level 2 inputs.

### Short-term borrowings:

Fair values of short-term borrowings are estimated using discounted cash flow analyses based on the Company's current incremental borrowing rates for similar types of borrowing arrangements. Estimated maturity dates are also included in the calculation of fair value for these borrowings. The fair value of short-term borrowings is measured using level 2 inputs.

### Off-balance sheet instruments:

Off-balance sheet instruments include commitments to extend credit, standby letters of credit, and financial guarantees. Because of the uncertainty involved in attempting to assess the likelihood and timing of commitments being drawn upon, coupled with the lack of an established market and the wide diversity of fee structures, the Company does not believe it is meaningful to provide an estimate of fair value for these instruments.

The carrying amounts and fair values of the Company's financial instruments at December 31, 2021 and 2020 were as follows:

			Fair Value				
	December 31, 2021						
	Carrying Value	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs	Total		
Total cash and cash equivalents	\$ 95,107	\$ 95,107	\$ -	\$-	\$ 95,107		
Investment securities available for sale	68,821	-	68,821	-	68,821		
Investment securities held to maturity	42,449	-	42,063	-	42,063		
Marketable equity securities	243	243	-	-	243		
Loans held for sale	9,330	-	9,330	-	9,330		
PPP loans	61,327	-	61,327	-	61,327		
Loans, excluding PPP loans, net	585,054	-	591,545	3,599	595,144		
Deposits	787,714	-	766,928	-	766,928		
FHLB advances	4,000	-	4,000	-	4,000		

	December 31, 2020								
	Carrying Value	Level 1 Inputs	Level 2 Inputs	Level 3 Inputs	Total				
Total cash and cash equivalents	\$ 26,440	\$ 26,440	\$ -	\$ -	\$ 26,440				
Investment securities available for sale	57,669	-	57,669	-	57,669				
Investment securities held to maturity	1,732	-	1,782	-	1,782				
Loans held for sale	9,996	-	9,996	-	9,996				
PPP loans	101,110	-	101,110	-	101,110				
Loans, excluding PPP loans, net	369,352	-	381,938	265	381,903				
Deposits	412,132	-	411,583	-	411,583				
FHLB advances	35,000	-	35,000	-	35,000				
PPPLF borrowings	66,711	-	66,766	-	66,766				

### Recurring – Investment Securities Available for Sale:

Investment securities available for sale are reported at fair value utilizing measurements from independent third party sources, which are level 2 inputs. The fair value measurements consider observable data that may include dealer quotes, market spreads, cash flows, the U.S. Treasury yield curve, live trading levels, trade execution data, market consensus prepayment speeds, credit information, and the bond's terms and conditions, among other inputs.

### <u>Recurring – loans held for sale:</u>

Loans held for sale are reported at fair value utilizing projected sale price guidance, which is a level 2 input. The fair value measurements consider observable data that may include dealer quotes, market spreads, live trading levels, trade execution data, among other inputs.

The following tables summarize the Company's financial instruments measured at fair value on a recurring basis as of December 31, 2021 and December 31, 2020, segregated by the level of the valuation inputs within the fair value hierarchy.

	December 31, 2021							
	Level 1	Level 2	Level 3	Total				
Agency mortgage-backed	\$ -	\$ 35,528	\$ -	\$ 35,528				
Agency CMO/REMIC	-	10,322	-	10,322				
Corporate bonds	-	11,036	-	11,036				
US Treasury securities	-	5,928	-	5,928				
Commercial mortgage-backed	-	4,023	-	4,023				
US Government Agency securities	-	1,984	-	1,984				
Marketable equity security	243	-	-	243				
Loans held for sale	-	9,330	-	9,330				

	December 31, 2020							
	Level 1	Level 2	Level 3	Total				
Agency mortgage-backed	\$ -	\$ 27,125	\$ -	\$ 27,125				
Agency CMO/REMIC	-	3,344	-	3,344				
Taxable municipals	-	16,184	-	16,184				
Corporate bonds	-	6,800	-	6,800				
Commercial mortgage-backed	-	4,216	-	4,216				
Loans held for sale	-	9,996	-	9,996				

### Non recurring – impaired loans:

The Company does not record loans at fair value on a recurring basis. However, from time to time, a loan is considered impaired when management concludes that payment of principal and interest will not be made in accordance with the contractual terms of the loan agreement. Once a loan is identified as individually impaired, management measures impairment using one of several methods, including appraised collateral value and /or tax assessed value, liquidation value and discounted expected cash flow. Those impaired loans not requiring an allowance represent loans for which the fair value of the expected repayments or collateral exceed the recorded investments in such loans. The Company frequently obtains appraisals prepared by external professional appraisers and applies of 10 percent depending on various factors including the type of property, condition and location. In certain instances, the Company prepares internally generated valuations from on-site inspections, third-party valuation models or other information. No impaired loans were recorded at fair value as of December 31, 2021 or 2020.

### Note 16. Regulatory Capital Requirements

The Company is required to maintain reserve and clearing balances with the Federal Reserve Bank in the form of vault cash or deposits.

Banking regulators have established various ratios to monitor capital adequacy. Failure to comply with these capital adequacy requirements may affect various bank activities including the ability to undertake new business initiatives such as acquisitions and branch expansion, access to funding and cost of new business initiatives, the ability to pay dividends, the ability to repurchase shares or other capital instruments, the cost of deposit insurance, and the level of regulatory oversight.

Based on current regulatory guidance, banks are required to maintain a common equity tier 1 ratio of 4.50 percent, a tier 1 leverage ratio of 4.00 percent, a tier 1 risk-based capital ratio of 6.00 percent and a total risk-based capital ratio of 8.00 percent. Current regulations also require creation and maintenance of a capital conservation buffer in addition to the regulatory minimum capital requirements. The capital conservation buffer was phased in over four years beginning January 1, 2016, at 0.625 percent of risk-weighted assets. After increasing each subsequent year by an additional 0.625 percent, at January 1, 2018, the capital conservation buffer was 1.875 percent, and, as fully phased in on January 1, 2019, the capital conservation buffer is 2.50 percent.

### Note 16. Regulatory Capital Requirements, Continued

As of December 31, 2021, and 2020, the Company exceeded all applicable capital adequacy requirements.

	2021							
	Actual		Minimum adequately ca		Minimum to be well capitalized			
	Amount	Ratio	Amount	Ratio	Amount	Ratio		
Common equity tier 1	\$ 110,347	16.68%	\$ 29,272	4.50%	\$ 43,003	6.50%		
Tier 1 leverage	110,347	12.39%	35,622	4.00%	44,527	5.00%		
Tier 1 risk-based capital	110,347	16.68%	39,696	6.00%	52,927	8.00%		
Total risk-based capital	117,107	17.70%	52,927	8.00%	66,159	10.00%		

		2020							
	Actual		Minimum to be adequately capitalized			Minimum to be well capitalized			
	Δ	mount	Ratio	Amount		Ratio	Amount		Ratio
Common equity tier 1	\$	78,898	18.96%	\$	18,722	4.50%	\$	27,043	6.50%
Tier 1 leverage		78,898	15.32%		20,600	4.00%		25,750	5.00%
Tier 1 risk-based capital		78,898	18.96%		24,963	6.00%		33,284	8.00%
Total risk-based capital		82,978	19.94%		33,284	8.00%		41,605	10.00%

### Note 17. Subsequent Events

The Company evaluated subsequent events through the date its financial statements were issued, and, except as noted in Note 14, no subsequent events were noted through March 31, 2022.
